AUSTRALIAN SECURITIES EXCHANGE ANNOUNCEMENT

7 April 2020

EDENCRETE® - SIGNIFICANT REPEAT ORDER IN USA FOR LARGE INDUSTRIAL STORAGE AREA – Additional Information

Eden Innovations Ltd (Eden) (ASX: EDE) refers to its earlier announcement on this topic released to the ASX on 2 April 2020 (the Announcement).

The ASX has today informed Eden that it considers that if a transaction is sufficiently material to warrant disclosure under Listing Rule 3.1, the identity of the other party will generally itself be material information that must also be disclosed under that rule. Accordingly, as required by the ASX in this case, Eden announces that:

- the contractor referred to in the Announcement is Two State Construction, a contractor that has used EdenCrete® products in a number of projects in the USA over the past four years.

BACKGROUND

EdenCrete® is Eden's 100% owned, proprietary carbon-strengthened concrete additive that enhances a wide range of performance characteristics of the concrete including compressive strength, flexural strength, tensile strength, abrasion resistance, reduced permeability, increased modulus of elasticity, and reduced shrinkage, delivering stronger, tougher, more durable and longer lasting concrete.

One of the primary target markets for EdenCrete® is improving the performance of concrete used in the construction and maintenance of concrete roads, bridges and other infrastructure, particularly where it is subject to heavy wear, freeze/thaw weather conditions and/or high levels of added salt. Additionally, it has potential for use in most other concrete applications including high-rise building construction, marine and coastal applications, water storage and pipelines, hardstand areas, warehouses, shotcrete applications and pre-stressed and pre-cast concrete structures and products.

Gregory H. Solomon
Executive Chairman
