- **Small and mid caps:**
 - Outperformed in 68% of years
 - have significantly greater variance of returns (tendency for higher highs and lower lows) –timing entry is very important
- **ECPAM objective** - *to identify well managed, high growth, small cap companies that will become mid and large caps over time*

Successful active management requires liquidity but an information advantage is a necessity

- The information advantage obtained by conducting forensic research of high quality growth businesses can produce superior investment performance over the long-term.
- Great investment opportunities occur when excellent companies are surrounded by unusual circumstances which reduces the entropy (lack of order or predictability) of the system and causes the equity to be mispriced.

Fundamental Research

There's no substitute for due diligence.

Through in-depth, detailed analysis, we come to a conclusion as to whether a business is a quality franchise, has a sustainable competitive advantage, is operating in a favourable industry and has the appropriate management in place to execute on an appropriate strategy.

THE SIX PILLARS OF A QUALITY FRANCHISE ARE INTERDEPENDENT & INTERRELATED

Our Investment Philosophy

The economics of a business drives long-term investment returns.

Investing in **high quality, growth businesses**, that have the ability to generate predictable, above average economic returns will produce superior investment performance over the long-term.

- 1 Valuing potential, not just performance
- 2 Choosing high quality growing businesses
- 3 Ignoring temporary market turbulence

Market Inefficiencies We Exploit

Growth Anomaly

On average the market **undervalues** extremely high-quality, capital efficient, organic growth businesses.

QUALITY
GROWTH

SUSTAINABLE
OPPORTUNITY

LONG
TERM

Time Arbitrage

The market tends to **overemphasize** temporary themes and short-term factors.

How are we handling Covid-19?

We have continued to apply our investment process diligently. Key points to note:

- 1) We did not decide to reposition the portfolio to Covid unaffected companies. Our investment process was naturally overweight companies that were better able to handle this 'demand' shock.
- 2) Coming into the year we had higher cash weights due to lower forecast IRR. As the IRR has climbed, our cash weights have reduced. We will deploy capital sensibly.
- 3) Covid-19 has flowed through to changes in our terminal PE's and our forecast earnings.

The portfolio has performed well considering the large drawdown.

- 1) Strong Alpha Generation through this period.
- 2) Exhibited a degree of capital protection from a growth manager.
- 3) Portfolio companies are arguably in better competitive positions now than they have ever been.

Portfolio Performance

Historical Performance to 31 May 2020

Product	3 Month	6 Month	1 Years	3 Years	5 Years	^ Inception
FSI	0.22	-3.66	8.21	14.96	11.44	12.32
All Ords Accumulation Index	-9.04	-14.12	-6.21	4.72	4.56	7.85
Alpha	9.26	10.46	14.42	10.24	6.88	4.47
ECP	10.63	5.63	22.34	21.23	15.72	15.31
Small Ords Accumulation Index	-1.91	-7.66	-2.91	7.51	6.59	6.05
Alpha	12.54	13.29	25.25	13.72	9.13	9.26

Past Performance is not a reliable indicator of future performance. The total return figures quoted are historical, calculated using end-of-month prices and do not allow the effects of tax or inflation. Total returns for the benchmark do not incur costs. Returns assume the reinvestment of all dividends. ^Inception of the FSI portfolio is 1 May 1998., ^Inception for ECP portfolio is 21 August 2014.

Name Changes to Portfolio (YTD)

FSI (Allcap)	ECP (Ex50)
Sold	
Fisher & Paykel (FPH)	Fisher & Paykel (FPH)
Pushpay (PPH)	
Additions	
IDP Education (IEL)	IDP Education (IEL)
	Lifestyle Communities (LIC)
	Audinate Group (AD8)

Portfolio Decision **Sell - IRR below threshold**

FPH AU

Thesis - FPH will maintain and grow market share in their core products (ventilators and masks) and will increase penetration in hospitals for their Optiflow products.

- R&D investment into new designs and products
- Education of the market into better treatments
- Continued market share dominance

The SCA for FPH is driven by the following factors:

- Technological advancement
- Product innovation
- Brand awareness

Research

- [Research Report](#)
- [Company Notes](#)

COVID

How has COVID impacted the investment thesis?

- COVID has had a positive impact given the increased demand for ventilators and other breathing apparatuses. FPH is a leading manufacturer of these products and demand has been very strong and lead to 100% utilisation of their manufacturing facilities
- The Company has upgraded twice since the start outbreak of the virus in January 2020

What changes have we made to our forecasts or positioning?

- Our forecasts are above the market and reflect our positive view on the outlook. However, FPH has performed very well and this has meant the IRR has fallen below threshold for the Portfolio (~-10% irr).
- Accordingly, the stock has been sold down to 0% weight in the portfolio and will re-include it when the IRR is big enough to warrant re-inclusion.

Portfolio Decision Sell - Thesis Break

RWC AU

Thesis - Market leading position in 'Behind the Wall' plumbing supplies, particularly their SharkBite products in the Push to Connect (PTC) segment.

- Increasing penetration of Sharkbite and PTC fittings;
- Continued geographical expansion of product range (US);
- Expansion into new geographies.

SCA - What is the SCA basis?

- Organisational Resource
 - IP & Production processes, customer relationships and distribution.
- Reputational Resource
 - Brand of Quality and Reliability

Research

- [Research Report](#)
- [Company Notes](#)
- [Sell Motivation](#)

What changed about our thesis?

- Acquisition of John Guest Holdings
- Takeover was greater than 25% EV - material acquisition resulting in substantial changes in resource-base, strategy, management, and overall organisational complexity.
- Thesis is now about cross selling as opposed to market share gains within core Sharebite products.

End Result

- Sold RWC post the merger announcement at an average price of \$5.42
- Slowing growth in ANZ and weakness in Europe.
- US weather events did not materialise, impacting expectations for products (downside).
 - Lower sales volumes given growth not related to increasing penetration.
- Chairman (Founder) sold entire stake in RWC.

HYPOTHESIS

IDP is building a global student placement platform that is the largest and best place for students to find a place to study internationally, benefiting from the rising wealth in Asia. IDP has significant runway to reach 15% market share in its most mature markets. IDP's IELTS business is a necessity for students and contributes to IDP being the most trusted brand name in education

REVIEW TRIGGER

- 1) Market share loss in any destination market
- 2) LT damage to Source countries demand to study OS
- 3) ARPU declines in SP or IELTS

RECENT SUCCESS

- Taking significant market share. Into UK (China was +13% IDP +23%, India was +42% IDP +169%) into Australia India market was negative, IDP +15%

MAJOR CONCERN

- LT ability for Universities globally to adapt to continue accepting Students Post COVID
- Short term Australian Uni de-prioritising Int'l Student.
- PTE ability to scale up IELTS competition

FSI and ECP Metrics (31 May 2020)
