Phosphate and mineral exploration and development company Celamin Holdings Limited (ASX: CNL) ("Celamin" or the "Company") is pleased to present details of its activities for the Quarter ending 30 June 2020.

Celamin remains focused on regaining control of the Chaketma Phosphate Project in Tunisia ("Chaketma") following the illegal transfer of its interest by Tunisian Mining Services ("TMS"). Chaketma is a potential largescale, world class phosphate development asset, which comprises six prospects over a total area of 65km<sup>2</sup>. It hosts a total JORC compliant Inferred Resource of 130Mt @ 20.5%  $P_2O_5^{-1}$ , confirmed from drilling at only two of the project's six prospects with access by road, and proximal to rail and gas pipelines (see Figure 1).

#### **Chaketma Update**

The Company provided various updates on Chaketma during the quarter and most recently announced on 23 July 2020 that the final decision on the urgent application to restore its 50.99% stake in the Chaketma Phosphate Project is now likely to occur in August 2020. As noted in the announcement on 23 June 2020, the impact of Coronavirus

<sup>&</sup>lt;sup>1</sup> ASX announcements dated 9 November 2012 and 18 June 2013

Celamin Holdings Limited

has resulted in a delay to all legal matters, including Celamin's urgent application to restore its interest in Chaketma Phosphates SA (**CPSA**).

Despite these delays, Celamin has made advancements on various actions to uncover the measures taken by TMS, and others, to avoid an adverse outcome since the commencement of the dispute in 2015.

Celamin also remains entitled to payment of approxiamately US\$4.7m by TMS in damages and costs. This amount accrues interest daily until paid in full by TMS. Celamin is continuing various actions to seize and sell assets belonging to TMS to offset the amount owed to Celamin.

Noting recent progress to recover its interest in Chaketma, Celamin is pleased to report the modest improvement in the rock phosphate concentrate price which has increased circa 6% from cyclical lows over the last two months<sup>2</sup>. This is in part believed to be due to the impact of the Coronavirus in China and, specifically the region of Hubei, restricting logistics and supply of rock phosphate concentrate. China is also introducing tougher environmental regulations that may affect the export market for rock phosphate concentrate. Further, it is anticipated that an additional 31Mt of rock phosphate concentrate will be required to meet expected phosphate acid production during the next decade.<sup>3</sup>

#### Accrued damages update

The damages owed by TMS continue to accrue with the amount now owing to Celamin amounting to approximately A\$6.5M. This amount increases every day that TMS fails to honour the arbitration orders from November 2017.

#### Zeflana and Djebba update

During the March 2020 quarter, the Company announced that it was granted two exploration permits contiguous with the existing Zeflana exploration permit. The total area around Zeflana now held by Celamin amounts to 88km<sup>2</sup>.

The areas around Djebba and Zeflana are known to host historical zinc-lead mines and have not had the benefit of modern exploration technologies (see Figure 2).

Subject to current quarantine and confinement measures in place in Tunisia due to the Coronavirus being lifted, Celamin plans to complete initial broad scale mapping, soil sampling and geophysical surveys ahead of identifying and prioritising drill targets.

#### **Exercise of Listed Options**

During the quarter, a total of A\$1,466,732 was raised due to the exercise of listed CNLO options.

Proceeds from the exercise of these options will contribute to the continued recovery of Chaketma, securing payment of damages and costs owing, initial due diligence activities anticipated upon the recovery of Celamin's interest in Chaketma and general working capital.

Celamin held cash and cash equivalents of approximately A\$1,562,000 at the end of the June 2020 quarter.
