MINING & PRODUCTION

Why real-time rock knowledge is important

**MANY \$1BN MINING
INVESTMENT DECISIONS ARE
MADE HAVING SAMPLED ONLY
1% OF 1% OF THE ORE BODY.**

Rock knowledge is an understanding of location, texture, grade and mineralogy.

It answers the question where to drill next and how processing can be optimised.

We enable the timely delivering of quality data, giving clarity on the nature of the rock to allow real-time decisions to be made, rather than having to wait weeks or months.
