### Key commentary

- Basket size grew strongly for the year, partially offset by lower transaction growth
- Online sales grew by 18.1% for the year following the temporary suspension of services during March and April
- Inflation ex tobacco and fresh of 1.5% driven by cost inflation, lower product availability and mix impacts
- Gross margin increased by 30bps driven by favourable mix, strategic sourcing benefits and a more efficient supply chain
- CODB increased by 16bps driven by higher store expenses partially offset by Smarter Selling initiatives
- EBIT also includes a \$16 million charge as a result of the Award covered salaried team member review
- Coles expects to incur incremental operating expenditure in FY22 and FY23 for the Witron and Ocado projects. This operating expenditure relates to project implementation costs, and in FY23, includes double-running costs. In FY22, Coles expects these costs to be up to \$75 million

<sup>1</sup> Fuel sales have been excluded as Express no longer records fuel sales as sales revenue under the New Alliance Agreement with Viva Energy.

<sup>1</sup> FY19 sales exclude fuel sales and has been restated for flybuys. However, the change in gross margin and EBIT margin may not be meaningful ('N/M') as the fuel margin model has changed under the New Alliance Agreement during FY19.

## Key commentary

- Comparable c-store sales growth of 4.6% driven by COVID-19 related pantry stocking and strong basket size growth in the latter part of the year
- Invested in the customer offer, commencing network wide roll out of new self-service coffee machines in Q4
- Average weekly fuel volumes of 59.5mL were recorded in the year, prior to COVID-19 fuel volumes were trending positively
- CODB decreased by 153bps as a result of cost control and efficiency measures
- Express recorded an EBIT loss for the full year of \$16m as a result of a material decline in fuel volumes and in part c-store margin deterioration as customers shifted towards top-up and non-food categories

Outlook

# Outlook for FY21

---

- In the first 6 weeks of 1QFY21, Supermarkets comparable sales remain broadly in-line with the levels achieved in the second half. In Online, following the significant increase of capacity in the second half, sales are up approximately 60% in the first 6 weeks of FY21, driven by Victoria
- Coles has continued to incur significant incremental COVID-19 costs in the early part of FY21. Given these incremental costs, Supermarkets is achieving an EBIT margin consistent with the FY20 full year. The extent and duration of these incremental costs will depend upon a number of factors as we continue to proactively manage the unfolding COVID-19 situation
- In Liquor, sales have remained elevated with any moderation of sales growth dependent on social distancing restrictions for hotels, pubs, clubs and licensed venue operators. Aside from incremental COVID-19 costs, Liquor also expects to step-up its investment in customer service in the coming 12 months as it implements its new strategy
- In Express, average weekly fuel volumes in the early part of the first quarter are broadly in-line with the June exit rate, with significant variation between states
- In Other, FY21 corporate costs are also expected to be slightly above FY20 recurring corporate costs driven by a market-wide increase in insurance costs, while net earnings from property operations are expected to be more modest than FY20 and weighted toward the first half due to lower anticipated disposal activity. Coles' 50% share of flybuys' net result is also expected to be broadly in-line with FY20
- Coles retains its \$1 billion cost-out target to be achieved between FY20 and FY23. In FY21, Coles will continue to focus on realising cost-out opportunities however, the timing will be dictated, in part, by COVID-19
- Coles' optimised store network and formats is already transforming the make-up and performance of our extensive store network with plans to renew approximately 65 stores and to open in the range of 15 to 20 new stores in FY21, including five stores that were delayed in FY20 due to COVID-19
- Gross operating capital expenditure is expected to be approximately \$1 billion and includes increased investment on the Witron ambient automated distribution centres as the project enters its third year. In addition, Coles also expects net property capex to be approximately +/- \$100 million in FY21

The Hemphill family dairy farm in Kyabram, Victoria supplies milk to Coles under our direct milk sourcing model. Coles is building long-term relationships with dairy farmers by extending the model to SA and WA following the successful roll out in VIC, Southern and Central NSW.
