**Investment Strategy and Review<sup>1</sup>**

The Company's portfolio of investments delivered a return of 31.25% for the 12 months ended 30 June 2020.

Total shareholder return, as measured by share price movement and dividends paid over the course of the year, was 38.61%.

This year, the Company paid a fully franked dividend yield of 5.80% (up from 5.14% in FY2019), equivalent to a grossed-up yield of 8.29% (up from 7.35% in FY2019).

AEG remains a unique offering on the ASX and is not comparable with often highly directional strategies employed by some listed investment companies. Our Portfolio is market neutral and domestic in nature and offers an attractive diversification opportunity for investors.

The Investment Strategy seeks to limit market risk by constructing a long/short market neutral portfolio via a series of matching pairs of predominantly S&P/ASX100 companies. Company selection is based on fundamental analysis. The Portfolio is diversified and typically comprises 30 to 35 pairs of stocks. Company pairs are generally in similar industries or sectors, thus limiting the Portfolio's exposure to general market direction. The Investment Strategy produces returns that are uncorrelated with equities and has been able to profit in rising and falling markets.

The proposal is designed to eliminate the share price discount due to the difference between the Company's net tangible asset position and its current share price, and improving liquidity. The Company is currently considering the advantages and disadvantages of the proposal and Shareholders will be notified in due course.

This Appendix 4E is based on the 2020 Annual Report which is in the process of being audited. All the documents comprise the information required by Listing Rule 4.3A.

**(c) Share Buy-Back**

On 17 June 2019, the Company announced it intended to undertake an on-market share buy-back of up to 10% of the Company's issued share capital or approximately 10.2 million ordinary shares within the next 12 months. The share buy-back commenced on 1 July 2019 and during the year ended 30 June 2020, 9,476,116 shares have been bought-back. The shares bought-back were subsequently cancelled.

**(d) Dividend Reinvestment Plan**

Under the terms of the DRP, 244,568 and 120,232 ordinary shares were acquired on-market for DRP participants at \$1.189 and \$1.007 per share respectively. These shares were applied to the holdings of the DRP participants as at the dividend payment date of 19 October 2018 and 23 April 2019.

The DRP has been structured to take account of the relationship between the market price of the Company's shares and the Company's NTA per Share at the relevant time when dividends are being invested.

If the prevailing share price is greater than or equal to NTA per share, DRP participants will be issued new shares. If the prevailing share price is less than the NTA per share, the Company may buy the securities on-market and if additional securities are required to satisfy DRP Participants, issue new shares.

**(d) Capital Risk Management**

The Company's policy is to maintain a strong capital base so as to maintain Shareholder and market confidence. The overall strategy remains unchanged.

To achieve this, the Directors monitor the weekly NTA estimates, monthly NTA results, investment performance, the Company's Indirect Cost Ratio and share price movements. The Board is focused on maximising returns to Shareholders with active capital management a key objective of the Company.

The Company is not subject to any externally imposed capital requirements.
