WhiteHawk Cyber Risk Scorecard Product Line Now 100% Automated Platform Services & Scorecard Now Include New Cyber Security Model

Highlights

- **WhiteHawk incorporates and automates the new U.S. Department of Defense Cybersecurity Maturity Model Certification (CMMC) mapping into their online client services and Cyber Risk Scorecard**
- **WhiteHawk development team automates Cyber Risk Scorecard production 100% as a foundational element of all WhiteHawk Product Lines & Client deliverables**
- **Product Line advancements enable increased scaling and speed to delivery of all current and future clients**
- **WhiteHawk is one of the first Cyber Risk platforms to automate the Path to CMMC by providing a documented baseline, online maturity model and virtual consult across the Defense Industrial Base (DIB)**
- **Current DIB client, is leveraging this approach in support of an initial 700+ DIB Suppliers and Vendors**

Perth, WA and Alexandria, VA - WhiteHawk Limited (ASX:WHK) ("WhiteHawk" or "the Company"), the first global online cyber security exchange enabling small-to-medium businesses to take smart action against cybercrime, fraud and disruption is pleased to announce the automation and scaling of two key product lines the Cyber Risk Scorecard and CMMC added to the online maturity model, enabling scalability across thousands of companies.

The U.S. Office of the Secretary of Defence (OSD) established the Cybersecurity Maturity Model Certification (CMMC) starting in January 2020, as the cyber resilience benchmark for all Defense Industrial Base ("DIB") contractors and suppliers to meet going forward. In support of WhiteHawk's current and all future DIB clients, WhiteHawk built upon the Cyber Risk Maturity Model already in place, mapping current cyber controls to the CMMC framework and into all Cyber Risk Scorecards. This allows WhiteHawk to provide an automated path to all DIB companies to determine their respective CMMC baselines, identify gaps to meet their required CMMC Level (1-5) and start to address those gaps immediately via the WhiteHawk Online Cybersecurity Exchange. WhiteHawk current Top 12 DIB client, has kicked off this Path to CMMC program across over 700 of its current suppliers – a competitive differentiator to all.

In addition, WhiteHawk development team has taken the automation of their Cyber Risk Scorecards (which are foundational to all WhiteHawk enterprise and SME product lines, platforms, SaaS subscriptions) to the next level by both incorporating CMMC mapping and making them 100% automated. Now WhiteHawk can deliver literally hundreds to thousands of Cyber Risk Scorecards within 1-10 days (1 day for current clients and no more than 7-10 days for new clients), with increased profit margins.

Terry Roberts, Executive Chair of WhiteHawk, commented, "CMMC is a game changer for the U.S. Department of Defense today, the entire U.S. Federal Sector tomorrow and potentially State, Local and Commercial in the future. The achievable elegance of a maturity model approach, like CMMC, is that a majority of companies need to reach Levels 1-3, which is very achievable, affordable and impactful to everyone's cyber resilience. Our pragmatic approach allows any company (no matter their cyber sophistication) to know how to get started smartly today! And now that our Cyber Risk Scorecards both include CMMC mapping and are automated, no one has to wait nor spend thousands to develop their CMMC initial plan of action. WhiteHawk is now "The Place" for all companies to get started."
