

FOR IMMEDIATE RELEASE

13 October 2020

## **WhiteHawk Cyber Risk Radar Expands Across Four Sectors Five New Proof of Value Engagements and Contracts**

### **Highlights**

- **WhiteHawk has kicked-off 5 new Proof of Value (POV) Cyber Risk Radar engagements**
- **POV's are across 3 key Sectors: the U.S. Government Sector (a U.S. Agency & a Department), the Manufacturing Sector, and two with the Defence Industrial Base**
- **The previous U.S. Government Cyber Risk Radar POV resulted in a 5 year Contract**

**Perth, WA and Alexandria, VA** - WhiteHawk Limited (ASX:WHK) ("WhiteHawk" or "the Company"), the first global online cyber security exchange enabling small-to-medium businesses to take smart action against cybercrime, fraud and disruption is pleased to announce the kick off of five new proof of value engagements and contracts. These proofs of value are across three key Sectors, the U.S. Public Sector, the Manufacturing Sector, and two with the Defence Industrial Base, for up to a total of 100 vendors.

For the POV, WhiteHawk provides continuous cyber risk monitoring and prioritization for the rest of 2020, plus two Cyber Risk Scorecards (one immediately and one at the end of the POV) for each vendor/supplier. The WhiteHawk automated Cyber Risk Scorecards now include mapping to the new Cybersecurity Maturity Model Certification (CMMC), kicked off this year by the U.S. Office of the Secretary of Defence and being phased into all Department of Defence contracts over the next few years. This enables the prime company to baseline and monitor the key cyber risks of their most critical suppliers and kick-off their third party CMMC management program.

WhiteHawk has now dramatically expanded its ability to establish, automate, and disrupt how companies are managing their third party risk. Through these POV's, WhiteHawk continues to demonstrate and validate the power, impact, scalability, and effectiveness of the Cyber Risk Radar annual SaaS subscription, across supply chains of any size.

Terry Roberts, Executive Chair of WhiteHawk, commented, "Because we continuously vet innovative Cyber Risk companies and solutions, we know our Cyber Risk Radar is both comprehensive and cutting edge. Often the only way to effectively demonstrate this to a new client is through a low cost initial Proof of Value. Our experience has been, once a client experiences the full capability, they decide to implement it across a majority of their suppliers, vendors, team mates. The intent is that these POVs will lead to ongoing work with each of these organisations."
