# REPORT

## 1. CORPORATE

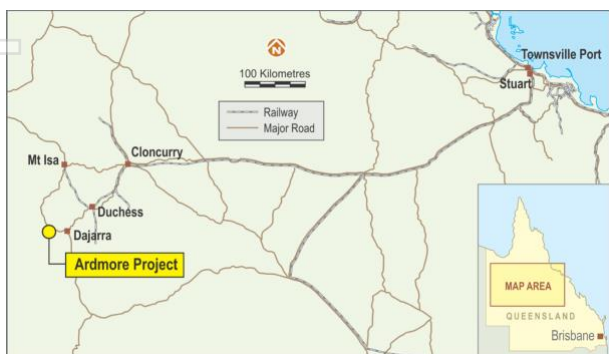

The Company maintained a cash balance of A\$1.864 million as at 30 September 2020, a reduction of \$0.273 Million from the prior quarter reflecting ongoing administration and general project costs.

Following the end of the quarter the Company announced a non-renounceable 2 for 5 rights issue to raise up to \$2.866 million, with 1 free accompanying unlisted option to each new share applied for. The free accompanying options have an exercise price of 5 cents and will expire on 31 December 2023.

The purpose of the issue is to raise funds for the further development of the Company's Ardmore Project and for exploration on the Oxley and Goulburn Projects, as well as for general working capital. Upon closing of the rights issue the Company will have additional funds of up to \$2.866 million to progress its planned programs, particularly at Ardmore in Queensland.

## 2. ARDMORE PHOSPHATE ROCK PROJECT, QLD

Work continues on the Company's high-grade low impurity Ardmore Phosphate Project, with board approval given (subject to successful capital raisings) for mining commencement in the first half of 2021. The initial phase proposes mining 25,000 tonnes of phosphate rock.

Ardmore location map

Centrex continues to revise the DFS on the Ardmore Phosphate Project to update financial parameters to reflect the effects from the Covid 19 pandemic, which

continues to generate uncertainty regarding future phosphate prices, exchange rates and state and country lock-downs and project construction timelines, therefore making forecasting outcomes difficult.

The latest forecast for phosphate rock pricing indicated a CFR India price for 71-75% BPL trending broadly firmer towards the projected Ardmore full production start date of later in 2022.

## 3. OXLEY POTASSIUM NITRATE FERTILIZER PROJECT, WA

External consultants are reviewing processing and product alternatives, with the aim of refinement of current processes for the Oxley Project.

During the quarter, further rationalization of the Oxley tenements was effected with Board approval to proceed with the full surrender of E70/3777.

## 4. GOULBURN GOLD-BASE METAL PROJECT, NSW

Centrex's two exploration licences EL 7388 Goulburn and EL 7503 Archer located in the east Lachlan Fold Belt are of significant interest for gold and base metals. Previous exploration within these tenements has mainly focussed on base metal mineralisation, but exploration programs are under consideration for the two priority gold targets which have been identified.

The first gold target is located approximately 10 kilometres to the south of the Cullarin Gold Project, identified as proximate to the interpreted Cullarin Fault Zone, a major regional structural corridor that strikes in an approximate NS orientation down the

western side of EL 7388. This structure and the nearby Mountain Ash Gold Mine (mined in 1908), also located within the western portion of EL 7388, makes it a potentially favourable gold exploration target.

The second gold target is along strike of the Collector North copper and gold prospect discovered by Centrex in 2015. This structurally complex area trends NNE of Collector North and contains both Silurian- aged volcanics and Ordovician-aged sediments thought to be prospective for both epithermal and orogenic styles of gold mineralisation.

### About Centrex Metals

Centrex Metals is looking to help secure Australasia's sustainable agriculture future through the exploration and development of its wholly-owned Ardmore Phosphate Project and Oxley Potash Project. The products from both of these projects are necessary ingredients for global food production and human nutrition.

The Centrex Metals fertilizer projects are located near to established energy and transport infrastructure that are necessary for access to established agricultural markets. The Company is also continuing its copper-gold-base metal exploration projects near Goulburn in the Lachlan Fold Belt in New South Wales.

### **Forward Looking Statements**

This announcement may contain forward looking statements. Forward looking statements inherently involve subjective judgement and analysis and are subject to significant uncertainties, risks and contingencies, many of which are outside of the control of, and may be unknown to Centrex Metals Limited ('Centrex' or the 'Company').

Actual results and developments may vary materially from those expressed in these materials. The types of uncertainties which are relevant to the Company may include, but are not limited to, commodity prices, political uncertainty, changes to the regulatory framework which applies to the business of the Company and general economic conditions. Given these uncertainties, readers are cautioned not to place undue reliance on such forward looking statements.

Forward looking statements in these materials speak only at the date of issue. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, the Company may not update or revise any of the forward looking statements resulting from any change in events, conditions or circumstances on which any such statement is based.

Forward looking statements include, but are not limited to, statements concerning Centrex's planned exploration program, targeted resources, commencement of product export and other statements that are not historical facts. When used in this document, the words such as "could", "target", "plan", "estimate", "intend", "may", "aim", "potential", "should", and similar expressions reflected in these forward-looking statements are reasonable, such as statements involving risks and uncertainties and no assurance can be given that actual results be consistent with these forward-looking statements.
