CREDIT CARDS – AUSTRALIA & NEW ZEALAND

FOUR PRIORITIES ESTABLISHED IN 2016

1. Creating a simpler, better balanced bank

2. Focusing on areas where we can win

3. Building a superior everyday experience to compete in the digital age

4. Driving a purpose and values led transformation

KEY MESSAGES

- Emerge with stronger relationships
- Continue to reshape the portfolio
- Continue to make the bank simpler
- Deliver new capabilities
- Ready to take advantage of opportunities

DRIVERS OF FRANCHISE TRADING REVENUE GROWTH

- **1. Customer-led** revenue growth resulting from supporting customer hedging activity, while the market was trading at wider bid-offer spreads
- **2. Revenue uplift was not reliant on increased risk.** VaR increase driven by COVID volatility rolling into VaR windows and higher liquid asset holdings.
- 3. Supported customers by remaining 'open for business' amidst market volatility, providing two-way pricing for customers
- **4. Operational capability** to attract and clear additional volume, that was at times 20%+ above average (achieved while operating hubs were operating under Business Continuity Plan arrangements)

2020 FULL YEAR RESULTS

INVESTOR DISCUSSION PACK TREASURY

REGULATORY CAPITAL

CAPITAL UPDATE

- Level 2 CET1 ratio of 11.3% (~11.4% pro-forma) and 16.7% on an Internationally Comparable basis¹), which is well in excess of 'Unquestionably Strong' benchmark²
 - Credit impacts of -29bps for the half;
 - Comprises \$669m CP, \$395m IP and \$3.9b of CRWA migration (mainly Institutional)
 - The above were partially offset by a reduction in underlying CRWA of \$13.9b (~+36bps) predominantly in the International business
 - Underlying non-CRWA increased \$7.4b (-19bps), including Interest Rate Risk in the Banking Book (IRRBB) from higher volatility and increased liquid assets.
 - Completion of announced asset sale of UDC added 10bps to the Level 2 CET1 ratio
- CET1 ratio is broadly restored to Sep-19 levels (pre COVID-19) despite absorbing 76bps of credit impacts (\$2.7b of CIC and \$6.5b of CRWA Migration)
- APRA Level 1 CET1 ratio of 11.2%. Level 1 primarily comprises ANZ BGL (the Parent including offshore branches) but excludes offshore banking subsidiaries³
- Leverage ratio of 5.4% (or 6.0% on an Internationally Comparable basis)

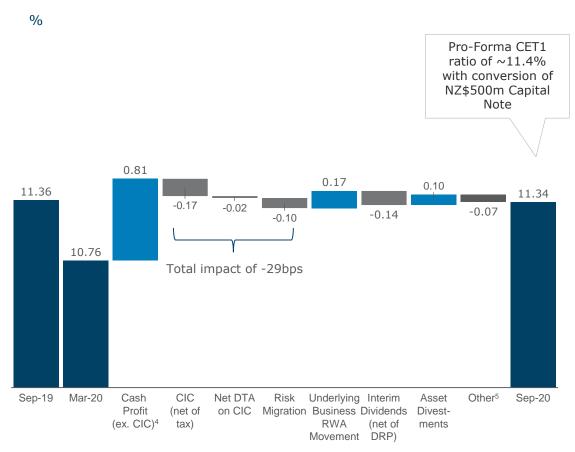

Dividend

- Interim Dividend of 25 cps paid in September (~10.6% DRP/BOP participation)
- Final Dividend of 35 cps fully franked representing 49% DPOR on 2H20 statutory earnings. On a Cash ex LNI basis, the Final 20 Dividend represents ~35% DPOR

Regulatory Update

- APRA has extended the exemption to treat loans granted repayment deferrals as part of COVID-19 support package as restructured for capital treatment purposes until 31 March 2021 at the latest
- APRA will commence consultation on capital reforms incorporating APRA's unquestionably strong framework, Basel III and measures to improve transparency, comparability and flexibility

APRA LEVEL 2 COMMON EQUITY TIER 1 RATIO (CET1)

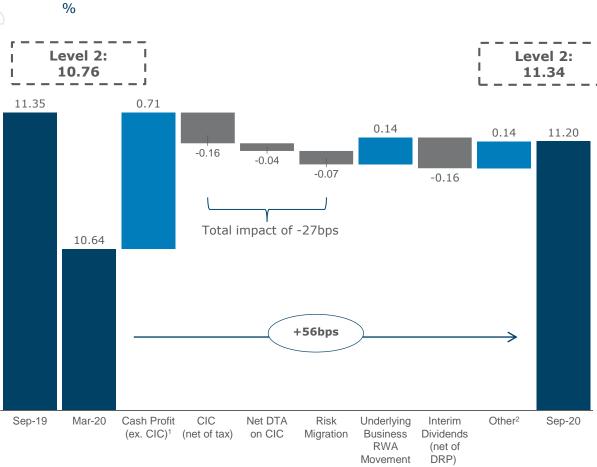

1. Internationally Comparable methodology aligns with APRA's information paper entitled International Capital Comparison Study (13 July 2015). Basel III Internationally Comparable ratios do not include an estimate of the Basel I capital floor 2. Based on APRA information paper "Strengthening banking system resilience – establishing unquestionably strong capital ratios" released in July 2017. 3. Refer to ANZ Basel III APS330 Pillar 3 disclosures 4. Excludes large / notable items & one-off items 5. Other impacts include capital deductions (which mainly comprises the movement in retained earnings in deconsolidated entities and capitalised software), net imposts, movements in non-cash earnings, net foreign currency translation and impacts from large/notable adjustments (non-capital deduction related)

Z 51

REGULATORY CAPITAL

| APRA LEVEL 2 VS LEVEL 1 CET1 RATIOS | Bps |
|-------------------------------------|-----|
| Level 2 HoH mvmt | 58 |
| Level 1 HoH mvmt | 56 |
| Level 2 vs Level 1 Mvmt | 2 |
| Explained by | |
| Cash Profit ¹ | 10 |
| Asset Divestment | 10 |
| Other | -18 |

 Level 2 includes Cash earnings and RWA movement from ANZ subsidiaries (e.g. ANZ Bank New Zealand) that are outside of Level 1.

- Level 2 CET1 ratio HoH increase is +2bps higher than Level 1:
 - +20bps due to retention of earnings and benefits from UDC asset sale in ANZ NZ and not remitted as dividends into the Level 1 entity;
 - Largely offset by 18bps of L1 benefit (not in L2) from decline in IG RWA and net FX impacts.

1. Excludes large/notable items & one-off items 2. Other impacts include capital deductions (which mainly comprises the movement in retained earnings in deconsolidated entities and capitalised software), net imposts, movements in non-cash earnings, net foreign currency translation and impacts from large/notable adjustments (non-capital deduction related)

INTERNATIONALLY COMPARABLE¹ REGULATORY CAPITAL POSITION

| APRA Level 2 CE | T1 Ratio- 30 September 2020 | 11.3% |
|--|--|-------|
| Corporate undrawn EAD and unsecured LGD adjustments | Australian ADI unsecured corporate lending LGDs and undrawn CCFs exceed those applied in many jurisdictions | 1.7% |
| Equity Investments & DTA | APRA requires 100% deduction from CET1 vs. Basel framework which allows concessional threshold prior to deduction | 0.9% |
| Mortgages | APRA requires use of 20% mortgage LGD floor vs. 10% under Basel framework. Additionally, APRA also requires a higher correlation factor vs 15% under Basel framework | 1.3% |
| Specialised Lending | APRA requires supervisory slotting approach which results in more conservative risk weights than under Basel framework | 0.8% |
| IRRBB RWA | APRA includes in Pillar 1 RWA. This is not required under the Basel framework | 0.4% |
| Other | Includes impact of deductions from CET1 for capitalised expenses and deferred fee income required by APRA, currency conversion threshold and other retail standardised exposures | 0.3% |
| Basel III Intern | ationally Comparable CET1 Ratio | 16.7% |
| Basel III Intern | ationally Comparable Tier 1 Ratio | 19.1% |
| Basel III Intern | ationally Comparable Total Capital Ratio | 23.3% |

1. Internationally Comparable methodology aligns with APRA's information paper entitled International Capital Comparison Study (13 July 2015). Basel III Internationally Comparable ratios do not include an estimate of the Basel I capital floor

CET1 AND LEVERAGE IN A GLOBAL CONTEXT

CET1 RATIOS^{1,2} LEVERAGE RATIOS^{1,2,3} 0% 10% 15% 20% 25% 5% 0% 1% 2% 3% 4% 5% 6% 7% 8% SEB OCBC Svenska Handelsbanken UOB Swedbank Intesa Sanpaolo ABN Amro CET1 DBS Danske Bank Regulators globally have ANZ Erste Bank Rabobank provided specific COVID-19 Raiffeisen Bank International (RBI) Natwest related transitional BBVA Nordea arrangements, ANZ has utilised ANZ Morgan Stanley public CET1 levels and adjusted Credit Agricole Group Rabobank for Capital treatment of ECL ING Group UBS provisioning where available Groupe BPCE Credit Suisse No adjustments have been HSBC HSBC Intesa Sanpaolo made for RWA concessions UniCredit Standard Chartered related to COVID-19 (i.e. OCBC Credit Agricole Group mortgage deferrals) Erste Bank Natwest UOB Standard Chartered UniCredit Nordea UBS ABN Amro DBS Raiffeisen Bank International (RBI) Groupe BPCE Barclays Swedbank Commerzbank SEB Deutsche Bank Commerzbank JP Morgan State Street Santander Credit Suisse ING Group **BNP** Paribas Danske Bank Societe Generale Barclavs TD Svenska Handelsbanken RBC Societe Generale Goldman Sachs Santander Deutsche Bank BMO Scotia BBVA BMO Citibank **BNP** Paribas Bank of America RBC Scotia Wells Fargo TD

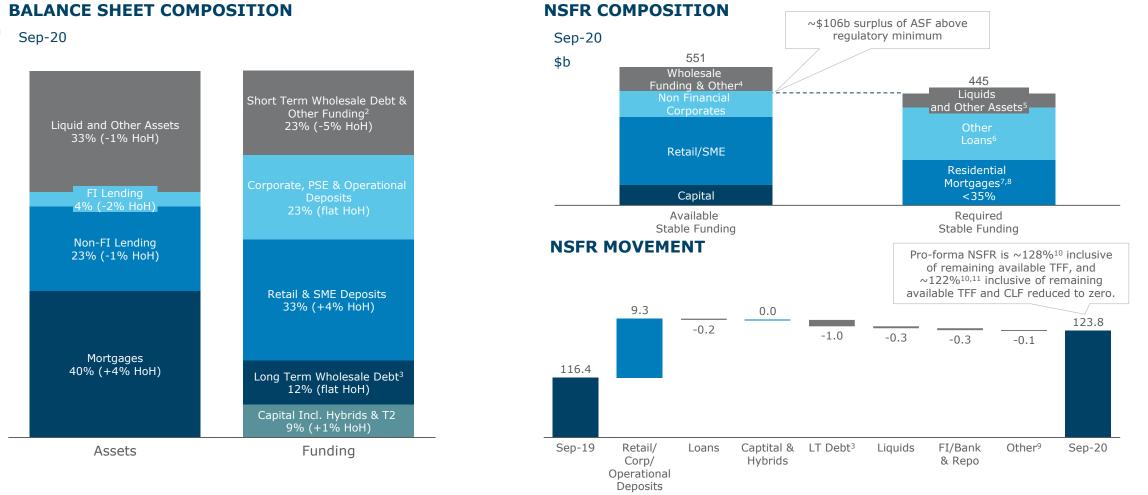

1. CET1 and leverage ratios are based on ANZ estimated adjustment for accrued expected future dividends, COVID-19 transitional arrangements for expected credit loss and leverage exposure concessional adjustments where details have been externally disclosed. ANZ ratios are on an Internationally Comparable basis. All data sourced from company reports and ANZ estimates based on last reported half/full year results assuming Basel III capital reforms fully implemented 2. Based on Group 1 banks as identified by the BIS (internationally active banks with Tier 1 capital of more than €3 billion) 3. Includes adjustments for transitional AT1 where applicable. Exclude US banks as leverage ratio exposures are based on US GAAP accounting and therefore incomparable with other jurisdictions which are based on IFRS

Leverage

ANZ compares equally well on leverage, however international comparisons are more difficult to make given the favourable treatment of derivatives under US GAAP

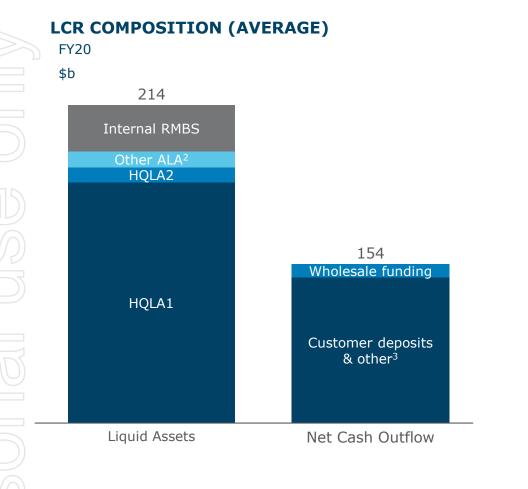

BALANCE SHEET STRUCTURE¹

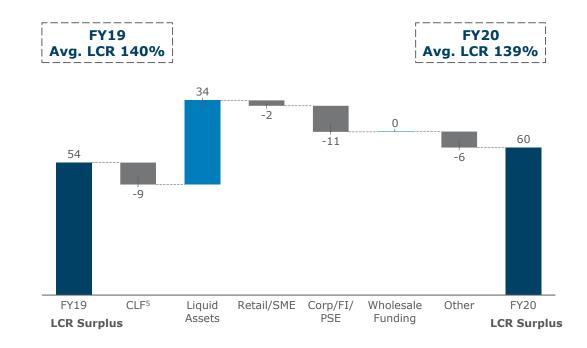

1. NSFR Required Stable Funding (RSF) and Available Stable Funding (ASF) categories and all figures shown are on a Level 2 basis per APRA prudential standard APS210 2. Includes FI/Bank deposits, Repo funding and other short dated liabilities 3. Includes drawn TFF of \$12b 4. Wholesale Funding includes \$12b drawn TFF, 'Other' includes Sovereign, and non-operational FI Deposits 5. 'Other Assets' include Off Balance Sheet, Derivatives, Fixed Assets and Other Assets 6. All lending >35% Risk weight 7. Includes NSFR impact of self-securitised assets backing the Committed Liquidity Facility (CLF) 8. <35% Risk weighting as per APRA Prudential Standard 112 Capital Adequacy: Standardised Approach to Credit Risk 9. Net of other ASF and other RSF 10. Remaining TFF includes ~\$8n of Supplementary TFF and ~\$4.4b of Additional TFF as at 1 October 2020 11. CLF is ~36b as at 30 September 2020

ANZ 55

LIQUIDITY COVERAGE RATIO (LCR) SUMMARY¹

MOVEMENT IN AVERAGE LCR SURPLUS⁴ (\$b)

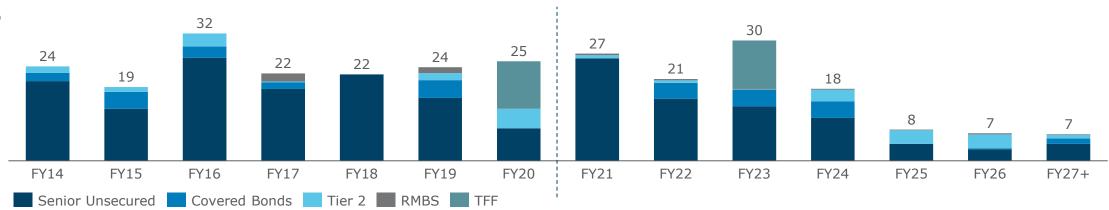

1. All figures shown on a Level 2 basis as per APRA Prudential Standard APS210 2. Comprised of assets qualifying as collateral for the Committed Liquidity Facility (CLF), excluding internal RMBS, up to approved facility limit; and any assets contained in the RBNZ's liquidity Policy – Annex: Liquidity Assets – Prudential Supervision Department Document BS13A 3. 'Other' includes off-balance sheet and cash inflows 4. LCR surplus excludes surplus liquids considered non-transferrable across the Group. At 30 Sep 20, this included \$16b of surplus liquids held in NZ, up from \$8b at 30 Sep 2019 5. RBA CLF decreased by \$12.3b from 1 January 2020 to \$35.7b (2019: \$48.0b)

ANZ

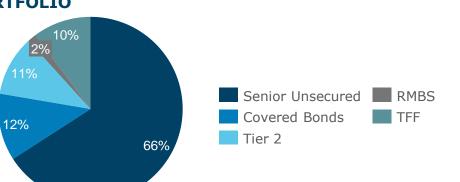

56

TERM WHOLESALE FUNDING PORTFOLIO¹

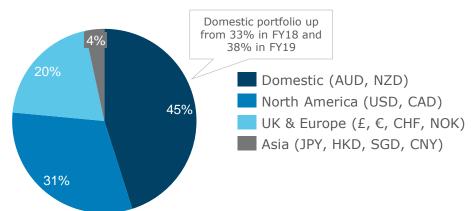

- ANZ's term funding requirements depend on market conditions, balance sheet needs and exchange rates, amongst other factors
- RBA Term Funding Facility (TFF) Initial Allocation of \$12b fully drawn in 2H20. Remaining TFF comprises Supplementary and Additional Allocations, ~\$12b² undrawn
- ANZ estimates minimal senior debt term funding requirements for FY2021

PORTFOLIO

PORTFOLIO BY CURRENCY

1. All figures based on historical FX and exclude AT1. Includes transactions with an original call or maturity date greater than 12 months as at the respective reporting date. Tier 2 maturity profile is based on the next callable date 2. As at 1 October 2020

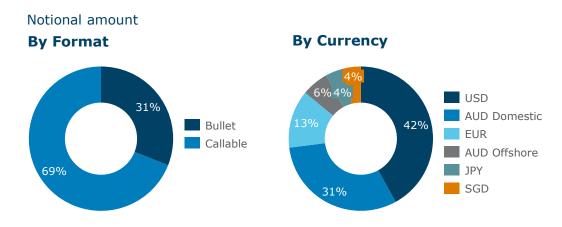

MATURITIES

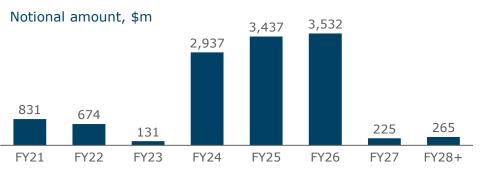

ANZ'S TIER 2 CAPITAL PROFILE¹

ANZ'S TIER 2 CAPITAL REQUIREMENT TO PROGRESSIVELY INCREASE TO MEET TLAC REQUIREMENT

- Issued AUD \$7.0b since July 2019 across AUD, EUR, and USD
- FY21 T2 issuance expected to be ~\$4-5b
- Required portfolio increase from \$12.1b to ~\$22b by January 2024 (based on 5% of current RWAs²)
- · Planned issuance in multiple currencies in both callable and bullet format
- Increased T2 issuance expected to be offset by reduction in other senior unsecured funding
- · Well managed amortisation profile provides flexibility regarding issuance tenor

TIER 2 CAPITAL

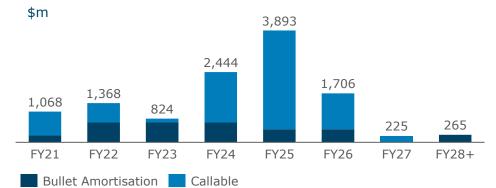

FUNDING PROFILE

Scheduled Bullet and Call Date Profile

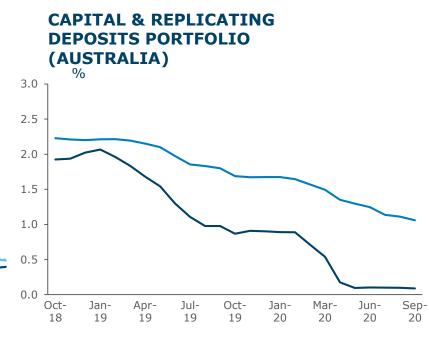

- 1. Profile is AUD equivalent based on historical FX, excluding Perpetual Floating rate notes issued 30 October 1986 (which loses Basel III transitional relief in 2021). Comprises Tier 2 capital in the form of Capital Securities only (i.e. does not include other Tier 2 capital such as eligible General reserve for impairment of financial assets)
- 2. Current RWAs \$429b as at 30 September 2020
- 3. Amortisation profile is modelled based on scheduled first call date for callable structures and in line with APRA's amortisation requirements for bullet structures

- 2. 7 year transition period from 1 July 2021 (subject to change)
- 3. Only in relation to the 3% of RWA increase in Total Capital requirements announced in July 2019

LIQUIDITY AND FUNDING ENVIRONMENT

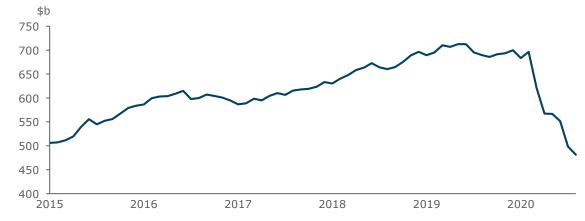

CURRENT EXCESS LIQUIDITY IS LIKELY TO PERSIST

Large increase in deposits in 2H20 led to a significant Funding Gap¹ reduction (10x higher than a full year during the GFC) across the Australian system

In addition to the quantum of deposits increasing, the quality of deposits is simultaneously improving (higher household and operational deposits) with very high household savings rates and conservative corporate settings

- Term Funding Facility (TFF) has contributed further funding to the banking system
- Implications of the narrowing of the Funding Gap include;
- Negates near term senior term debt requirements (although T2 requirements unchanged)
- Elevated Exchange Settlement Account balances
- The medium term influences on the system Funding Gap include
 - Demand for credit
 - Tax cuts and future fiscal measures, including state government
 - Outright QE
 - Offshore wholesale funding requirement to significantly decrease as a proportion of total funding

Similar operating environment in New Zealand

DECLINING FUNDING GAP¹ ACROSS AUSTRALIAN SYSTEM

DEFERRAL ROLL-OFF SUMMARY

~55k loans have completed / exited the 6 month deferral period or advised intended action as at 15 October 2020

AUSTRALIA – HOME LOAN DEFERRAL METRICS¹

Of the current ~40k active 6 month loan deferrals:

- ~ 25% have made at least one payment while on deferral
- ~ 50% have at least a 3 month payment or greater savings 'buffer'²
- ~ 20% have Lenders Mortgage Insurance

Of those with ANZ associated transaction account data:

- ~ 80% have stable or improved income³
- ~ 10% in JobKeeper/JobSeeker payment scheme⁴

Of the ~11K loan deferrals that have requested and received an approval for a 4 month extension:

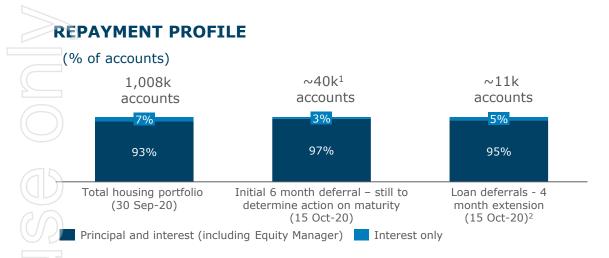

- ~ 50% are from Victoria (impacted by the extended lockdown period)
- ~ 85% have DLVR <90%⁵

ANZ 83

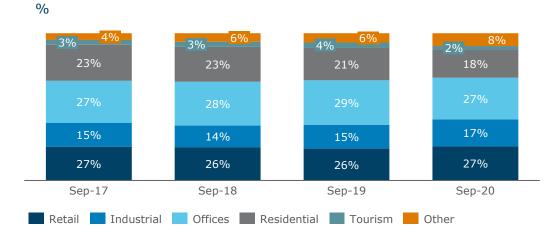

SEGMENTS OF INTEREST

• Growth in the portfolio over the last 5 years has been focused in Australia. At the same time commercial property lending in New Zealand has only increased marginally and APEA has declined significantly.

• FY20 growth of ~AUD4b was predominantly driven by higher lending to strongly rated REITs requesting liquidity support at the onset of COVID-19 in March 20 quarter. Growth has moderated since March with credit quality portfolio remaining stable.

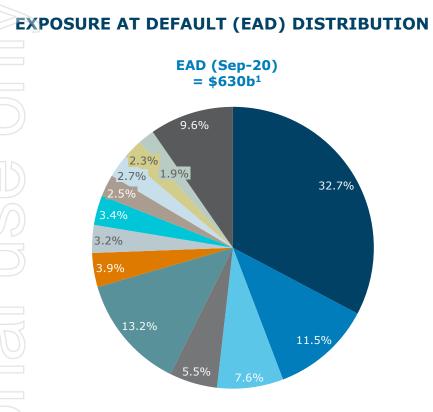

• Decline in residential development lending is due to lower market activity. Growth in retail has been very selective to non-discretionary and large diversified counterparties. Majority of lending to office sector is to A-Grade properties least likely to be affected by current COVID-19 constraints.

ANZLMI LOSS RATIOS REMAINED COMPARABLE TO PEERS¹

LMI & REINSURANCE STRUCTURE

Australian Home Loan portfolio LMI and Reinsurance Structure at 30 Sep 20 (% New Business FUM Oct-19 to Sep-20)

ANZLMI uses a **diversified panel of reinsurers** (10+) comprising a mix of APRA authorised reinsurers and reinsurers with highly rated security.

Reinsurance is comprised of a **Quota Share arrangement**³ with reinsurers for mortgages 90% LVR and above and in addition an **Aggregate Stop Loss arrangement**² for policies over 80% LVR.

1. Negative Loss ratios are the result of reductions in outstanding claims provisions. Source: APRA general insurance statistics (loss ratio net of reinsurance) 2. Aggregate Stop Loss arrangement –reinsurer indemnifies ANZLMI for an aggregate (or cumulative) amount of losses in excess of a specified aggregate amount. When the sum of the losses exceeds the pre-agreed amount, the reinsurer will be liable to pay the excess up to a pre-agreed upper limit 3. Quota Share arrangement – reinsurer assumes an agreed reinsured % whereby reinsurer shares all premiums and losses accordingly with ANZLMI

STRESS TESTING TAIL RISK IN THE AUSTRALIAN MORTGAGE PORTFOLIO

- ANZ conducts regular stress tests of its loan portfolios to meet risk management objectives and satisfy regulatory requirements.
 - Stress tests are highly assumption-driven; results will depend on economic assumptions, on modelling assumptions, and on assumptions about actions taken in response to the economic scenario.
 - Under this illustrative scenario, the COVID-19 environment deteriorates substantially, causing prolonged reductions in consumer spending and business investment. This results in a significant and sharp increase in unemployment and material nationwide falls in property prices.
- This stress testing scenario is independent of ANZ's ECL scenarios.
- Estimated portfolio actual losses (Individual Provision Charge) under these significantly stressed conditions are manageable, with cumulative total losses at A\$3.2b¹ over three years (net of LMI recoveries²).

| Assumptions | Year 1 | Year 2 | Year 3 |
|--|--------|--------|--------|
| Unemployment rate | 9% | 12% | 13.2% |
| Real GDP year ended growth | -9.2% | 1.6% | 2.3% |
| Cumulative reduction in house prices | -30% | -38% | -35% |

Note: This information has not been independently assured. KPMG will provide assurance over ANZ's full year performance against targets in its annual ESG reporting to be released 9 November 2020. Results as at 30 September 2020. 1. Australian Retail and Commercial customers; 2. RepTrak® community sentiment indicator ranking based on the four major Australian banks; 3. Performance includes initiatives that help improve environmental sustainability, increase access to affordable housing and promote financial wellbeing. This target is new in 2020 and replaces the \$15bn sustainable solutions target that we exceeded one year ahead of schedule in 2019 (\$19.1bn); 4. Reducing the direct impacts of our business activities on the environment; 5. Through our initiatives to support financial wellbeing including financial inclusion, employment and community programs, and targeted banking products and services for small businesses and retained inclusion.

EXTERNAL REPORTING

RECOGNITION

Sustainability Award Silver Class 2020

In 2020 received SAM Silver Class distinction with a score of 82 (out of 100) in the 2019 Dow Jones Sustainability Indices Corporate Sustainability Assessment.

We achieved a CDP climate disclosure score of A- in 2019

Member of the FTSE4Good Index

Ranked amongst the top 100 companies for gender equality globally by Equileap in 2019

Ranked amongst the Top 10 Best Workplaces to Give Back in Australia by GoodCompany in 2020

FRAMEWORKS

Our ESG reporting is prepared in accordance with the Global Reporting Initiative Standards (Comprehensive level)

We report in line with using the recommendations of the Financial Stability Board's (FSB) Task Force on Climate-Related Disclosures (TCFD)

As an Equator Principles Financial Institution signatory we report on our implementation of the Principles in our ESG Supplement

In 2019 we became a founding signatory to the UN Principles for Responsible Banking.

We measure the value of our community investment in accordance with the London Benchmarking Group (LBG) methodology

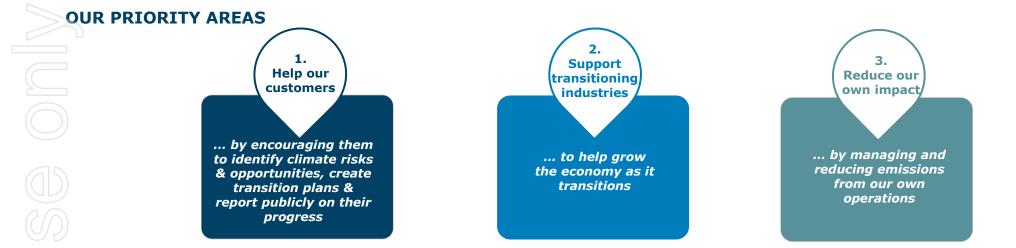

2020 FULL YEAR RESULTS

INVESTOR DISCUSSION PACK CARBON POLICY

OUR APPROACH TO CLIMATE CHANGE

We understand the impact – positive and negative – our financing has on climate change. Through our lending decisions, we support companies and projects that contribute to reducing emissions and are resilient to a changing climate.

SNAPSHOT OF PROGRESS TO DATE

| ACTIVITY | AIM | OUTCOME |
|---|--|---|
| Engage with 100 of our largest emitting customers, focusing on energy, transport, buildings, and food, beverage and agriculture | Encourage and support our customers to establish or strengthen low carbon transition plans | As at end FY20 we have engaged with 83 customers and will apply the lessons to our broader customer base |
| Fund and facilitate up to \$50b of investment in sustainable solutions | Help our customers lower carbon emissions through increased energy efficiency, low emissions transport, green buildings, reforestation, renewable energy & battery storage, emerging technologies, disaster resilience and climate change adaptation measures | We have made good progress to date with \$9.08b funded and facilitated in sustainable solutions |
| Increase our lending support to renewables and lower-carbon gas | Help support the shift to net zero emissions and support industries that create new job opportunities | Since 2015, our direct lending to renewables projects has grown by 63% to \$1.5b. Over 90% of this portfolio is now comprised of gas and renewables |

OUR 2020 CLIMATE CHANGE STATEMENT

energy efficiency, water usage, waste management and indoor environment quality

We support the Paris Agreement's goal of transitioning to net zero emissions by 2050.

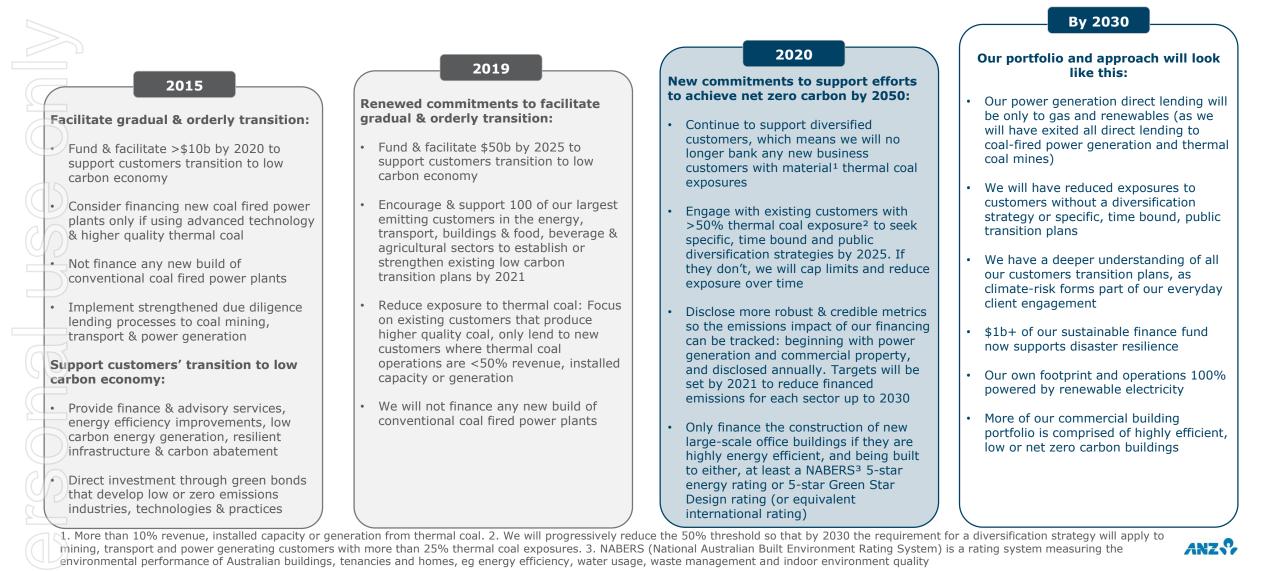

Our 2020 Climate Change Statement outlines our approach and strengthened commitments that seek to support a global transition to net zero emissions.

| PRIORITY AREAS | HOW ARE WE MAKING CHANGE? |
|--|---|
| Help our customers by encouraging them to identify climate risks & opportunities, create transition plans & report publicly on their progress | We will do this by Broadening engagement with our existing largest emitting customers to also include major oil & gas companies within the energy sector, to support them to establish and strengthen their transition plans by 2021 Disclosing more robust and credible metrics so the emissions impact of our financing can be tracked annually, starting with commercial property and power generation. From 2021 will set targets to reduce the financed emissions of each sector between now and 2030 Ensuring discussion of climate risk becomes part of our everyday client engagement to have a deeper understanding of all our customers' transition plans. Over time, we will move away from working with customers that do not have clear and public transition plans Funding and facilitating at least \$50 billion by 2025 towards sustainable finance to help our customer's lower carbon emissions. We will allocate \$1 billion of this towards supporting customers' and communities' disaster recovery and resilience |
| Support transitioning industries to help grow the economy as it transitions | We will do this by Further reducing the carbon intensity of our electricity generation lending portfolio by only directly financing low carbon gas & renewable projects be 2030 Continuing to support diversified customers, which means no longer banking any new business customers with material¹ thermal coal exposures Engaging with existing customers who have more than 50% thermal coal exposure² to support existing diversification plans. Where these are not already in place, we will expect specific, time bound and public diversification strategies by 2025. We will cap limits to customers which do not meet this expectation and reduce our exposure over time³ Not directly financing any new coal-fired power plants or thermal coal mines⁴, including expansions. Existing direct lending will run off by 2030. Only financing the construction of new large-scale office buildings if they are highly energy efficient, and being built to either, at least a NABERS⁵ 5-star energy rating or 5-star Green Star Design rating (or equivalent international rating) |
| Reduce our own impact | We will do this by Accelerating our own emission reductions by sourcing 100% of the electricity needed for our business operations from renewables by 2025 Further updates on our progress to minimise our own carbon footprint can be found in ANZ's ESG Supplement <u>https://www.anz.com.au/about-us/sustainability/</u> |

SUMMARY OF OUR CLIMATE-RELATED FINANCIAL DISCLOSURES (TCFD)

Through our TCFD reporting, we seek to provide information on our approach to climate change and ability to manage the associated risks and opportunities. Below is a summary of future focus areas and actions.

| TCFD Theme | Focus Areas 2021/22 | Beyond 2020 Vision |
|-------------------|--|---|
| Governance | Align with regulatory guidance on climate-related risk governance, including stress testing of selected portfolios | An enhanced risk management framework that anticipates potential climate-related impacts, and associated regulatory requirements |
| Strategy | Extend analysis of flood-related risks to incorporate bushfire, flood and other risks relating to retail customers Possible extension of emerging environmental and climate-related risks to other segments of the home loan portfolio Include climate risk reference in Agriculture related lending guidance documents used by our front line bankers | Business strategy more closely aligned to a resilient and sustainable economy that supports the Paris Agreement and Sustainable Development Goals |
| Risk Management | Encourage 100 of our largest emitting customers to develop transition plans in key sectors such as energy, transport, buildings & food, beverage & agriculture Customer engagement to identify customer or sector-specific transition or physical risks Develop an enhanced climate risk management framework that strengthens our governance and is responsive to climate change | Further integrate assessment of climate-related risks into our Group risk management framework Standard discussions with business customers include climate-related risks and opportunities Assessment of customer transition plans part of standard lending decisions and portfolio analysis |
| Metrics & Targets | Complete transition plan engagement with top emitting customers and consider how to integrate into customer assessments Target to fund and facilitate \$50b by 2025 in sustainable solutions New metrics for our financing of power generation and commercial buildings to demonstrate how we are taking steps towards the goal of net zero emissions by 2050 Target to procure 100% renewable electricity for ANZ's operations by 2025 | Continue to evolve our reporting with leading practices to measure the alignment of our lending with the Paris Agreement goals Reduce ANZ's operational emissions in line with the decarbonisation trajectory of the Paris Agreement goals |

IMPLEMENTATION OF CUSTOMER TRANSITION PLAN TARGET

Background

• We are committed to encourage and support 100 of our largest emitting customers in the energy, transport, buildings and food, beverage and agricultural sectors to establish or strengthen their low carbon transition plans, by 2021.

How will success be measured with this target?

- Customers reporting on their transition plans by 2021, providing stakeholders with public, specific and time bound information.
- To date, we have engaged with 83 of our largest emitting customers to support them to establish, or strengthen, low carbon transition plans.
- We have now established a 'baseline' for how these customers are responding to climate-risk, which will inform our ongoing engagement with them in 2021 and beyond.

Which customers are in scope?

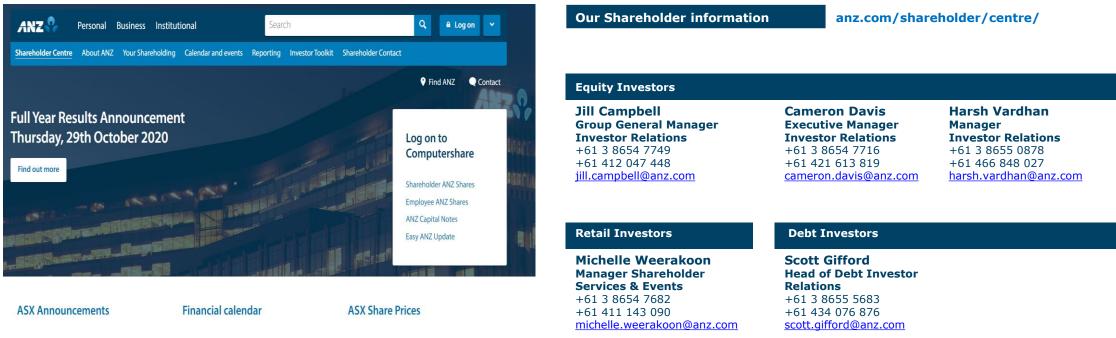

- The customer selection process is informed by criteria including:
 - Direct emissions, i.e. emissions from company owned or operated assets
 - Indirect emissions from their 'value chains', i.e. both upstream and downstream from their operational footprint
 - The depth of our relationships is also considered to maximise prospects for engagement

Next steps

We are disclosing progress against the target in our full year reporting. We also provide six-monthly updates to our Ethics and Responsible Business Committee and to the Board Ethics, Environment, Social and Governance Committee.

FURTHER INFORMATION

DISCLAIMER & IMPORTANT NOTICE: The material in this presentation is general background information about the Bank's activities current at the date of the presentation.
