

ASX ANNOUNCEMENT

29 October 2020

QUARTERLY ACTIVITIES REPORT SEPTEMBER 2020

HIGHLIGHTS:

- **Drilling commenced at the Blackdome-Elizabeth Gold Project in British Columbia, Canada**
- **26 holes for 5,087 m of drilling completed at Blackdome**
- **Successful capital raising of \$2.5 million completed**
- **Continued progress on TSX Venture Exchange listing including board and management appointments**

TEMPUS RESOURCES LTD. (“Tempus” or the “Company”) (ASX: TMR) reports on its activities for the Quarter ended 30 September 2020 (the “Quarter”), largely focused on advancing the Blackdome-Elizabeth Gold Project in British Columbia, Canada, and gold-copper focused Zamora Projects in Ecuador.

BLACKDOME-ELIZABETH GOLD PROJECT (BRITISH COLUMBIA, CANADA – 100%)

During the Quarter, drilling commenced at Blackdome, being the first new drilling that has been undertaken on the high grade, past producing Blackdome-Elizabeth Gold Project since 2011.

Drilling at the Blackdome sector of the Project has now been completed, with a total of 26 holes (5,087 metres) completed at the Giant, Redbird, No.17, No.19, New and the No.3 veins (Figure 1/Table 1). The No.3 Vein, formerly referred to as part of the No.1/No.2 Vein, is a key part of the historical Mineral Resource at Blackdome.

In addition to samples from the new Tempus drilling being submitted to the laboratory, 43 samples from available historical drilling have been submitted to the laboratory. These samples are from both previously sampled zones, and previously unsampled zones considered prospective for gold mineralisation based on geological observations. Historically, duplicate analysis on samples from Blackdome have shown very high variability, so Tempus considers it prudent to conduct duplicate analysis on both the historical and new samples before releasing the full set of results. Final batches of samples were dispatched subsequent to the end of the Quarter, with all results expected to be reported in mid-November, 2020.

Subsequent to Quarter-end, the drill rig moved to the Elizabeth sector of the Project, where it will be joined by a second rig, to expedite the planned 6,000 metre program there, and allow completion before the end of 2020. The program at Elizabeth has a dual focus, with the initial focus being on verifying and expanding upon the high grade Southwest Vein, which hosts the majority of the Elizabeth historical Mineral Resource (328,280 tonnes at 13.63 g/t gold, for 143,900 ounces – refer to ASX announcement dated 19 August 2019), and extensions to the Main and West Vein mineralisation (Figure 2).

For personal use only

A second rig is planned to initially focus on several exciting new exploration targets, including a compelling gold in soil anomaly located approximately 2.5 km to the east of Elizabeth, where a coherent anomaly up to 0.66 g/t gold was identified by Tempus in late 2019.

Site preparations for the drilling at Elizabeth have been completed, with the camp, facilities and equipment set up to handle the imminent cooler autumn and winter weather conditions. Drilling operations at Elizabeth will commence as soon as final program of work approval is received, expected imminently.

Results from the initial 5 drillholes at the Giant Vein target at Blackdome were reported during the Quarter, with significant intersections including:

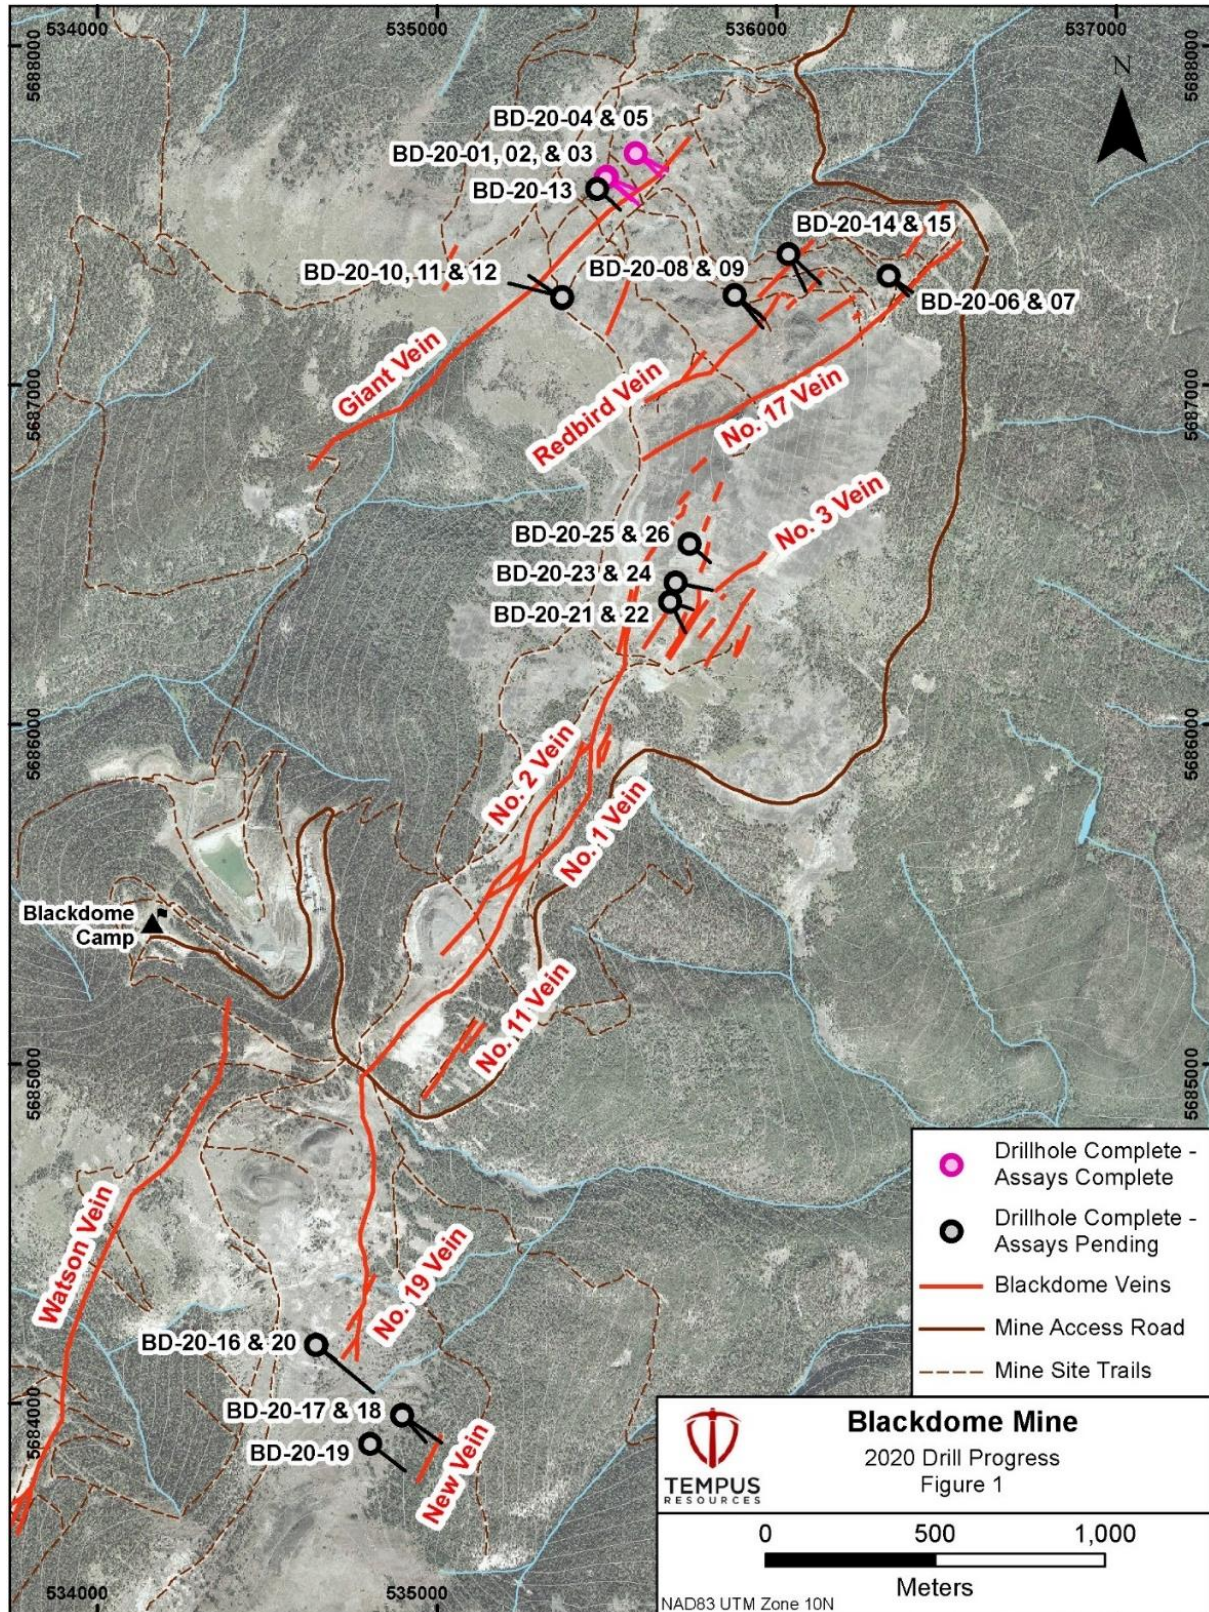

- **18 m @ 1.23 g/t gold and 3.09 g/t silver**, from 121 m, including
 - 8 m @ 1.99 g/t gold and 4.21 g/t silver** from 131 m, including
 - 1 m @ 5.20 g/t gold and 11 g/t silver**, from 137 m (BD-20-04)
- **2 m @ 2.56 g/t gold and 4.73 g/t silver**, from 143 m (BD-20-05)
- **3 m @ 1.89 g/t gold and 1.82 g/t silver**, from 139 m, including
 - 1 m @ 3.09 g/t gold and 2.37 g/t silver**, from 139 m (BD-20-02)
- **2 m @ 1.93 g/t gold and 3.95 g/t silver**, from 49 m (BD-20-02)
- **1 m @ 1.45 g/t gold and 4.07 g/t silver**, from 134 m (BD-20-02)
- **1 m @ 1.88 g/t gold and 4.73 g/t silver**, from 143 m (BD-20-05)

The results were in line with expectations for that target and indicate continuity of mineralisation along strike as well as a wider zone of mineralisation on both the hanging wall and footwall of the Giant Vein. The results are similar to historical drilling on the Giant Vein and adds to the extensive body of data available for the Giant Vein, one of the key unmined areas at Blackdome, where mineralisation extends to surface

The Company executed an Exploration Agreement with the Bridge River Indian Band (Xwisten) with respect to the Elizabeth portion of the Project during the Quarter. The agreement pertains to Tempus's exploration activities which may include, without limitation, the following activities within the Project: claim staking, bedrock sampling, ground surveys within control grids (cut lines) including geological mapping and geophysical/geochemical surveys, airborne geophysical surveys, limited overburden stripping and trenching, bulk sampling and drilling related exploration activities, until a positive Bankable Feasibility stage is reached.

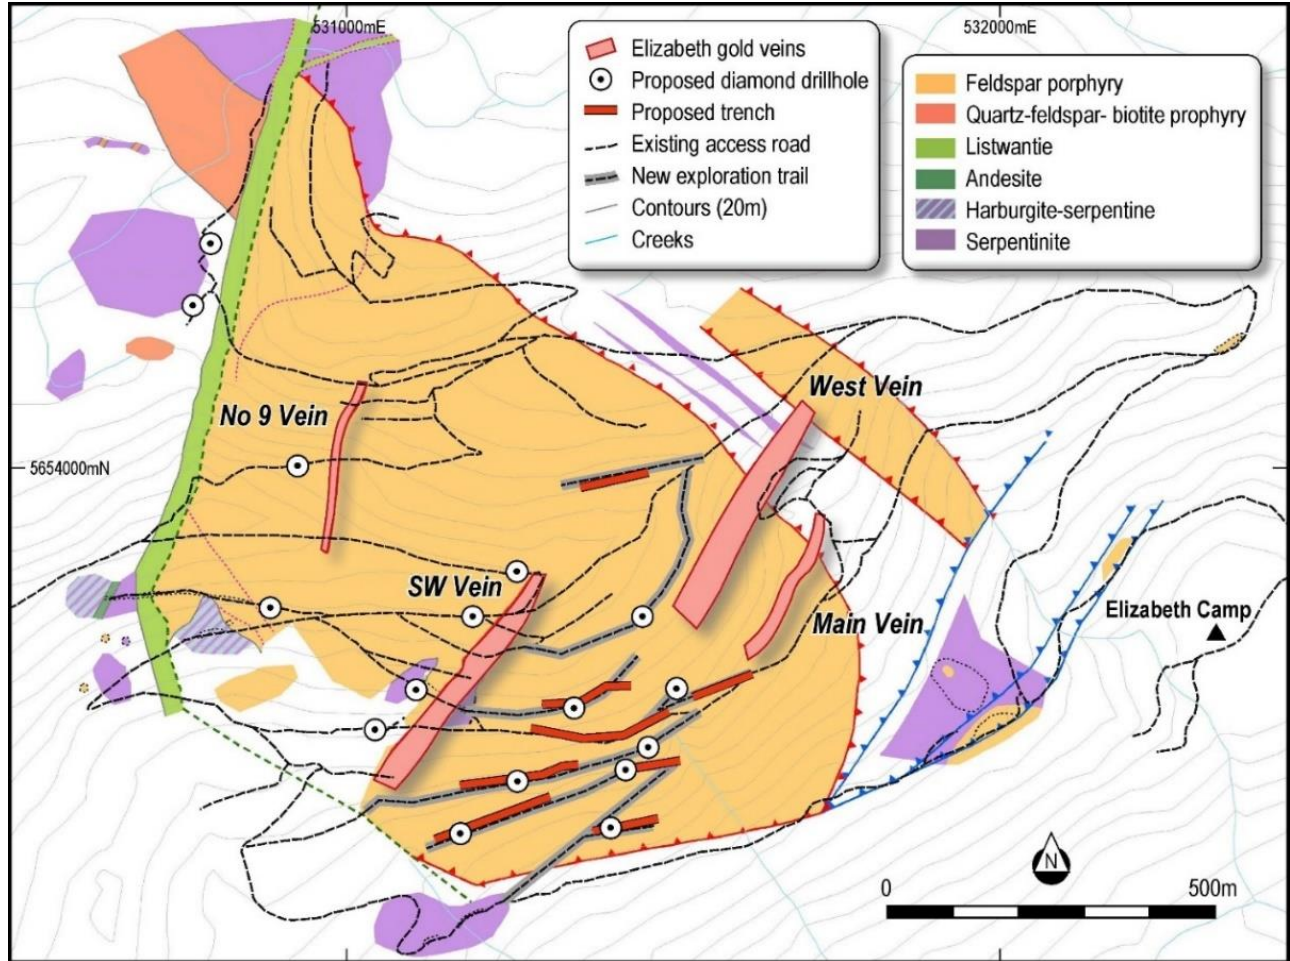

The Company expects a steady stream of results from the Blackdome-Elizabeth Project to be reported from mid-November (higher grade zones at Blackdome) and during December and January (Elizabeth), culminating in updated JORC and NI43-101 compliant Mineral Resources for the Project. The updated Mineral Resource estimates will form the basis of further evaluation and feasibility studies to be commenced in early 2021, with the ultimate aim of recommencing production at Blackdome in 2022.

MINERAL CREEK GOLD PROJECT (BRITISH COLUMBIA, CANADA – 100%)

The Company's primary focus in British Columbia, Canada, is on the Blackdome-Elizabeth Gold Project. However, given the outcomes of the review of Mineral Creek conducted earlier this year, and the presence of significant high grade gold intercepts (Figure 3), the Company is currently actively investigating opportunities to advance the Project

Figure 3 – Significant Intercepts – Linda, Ember and 1050 Zones

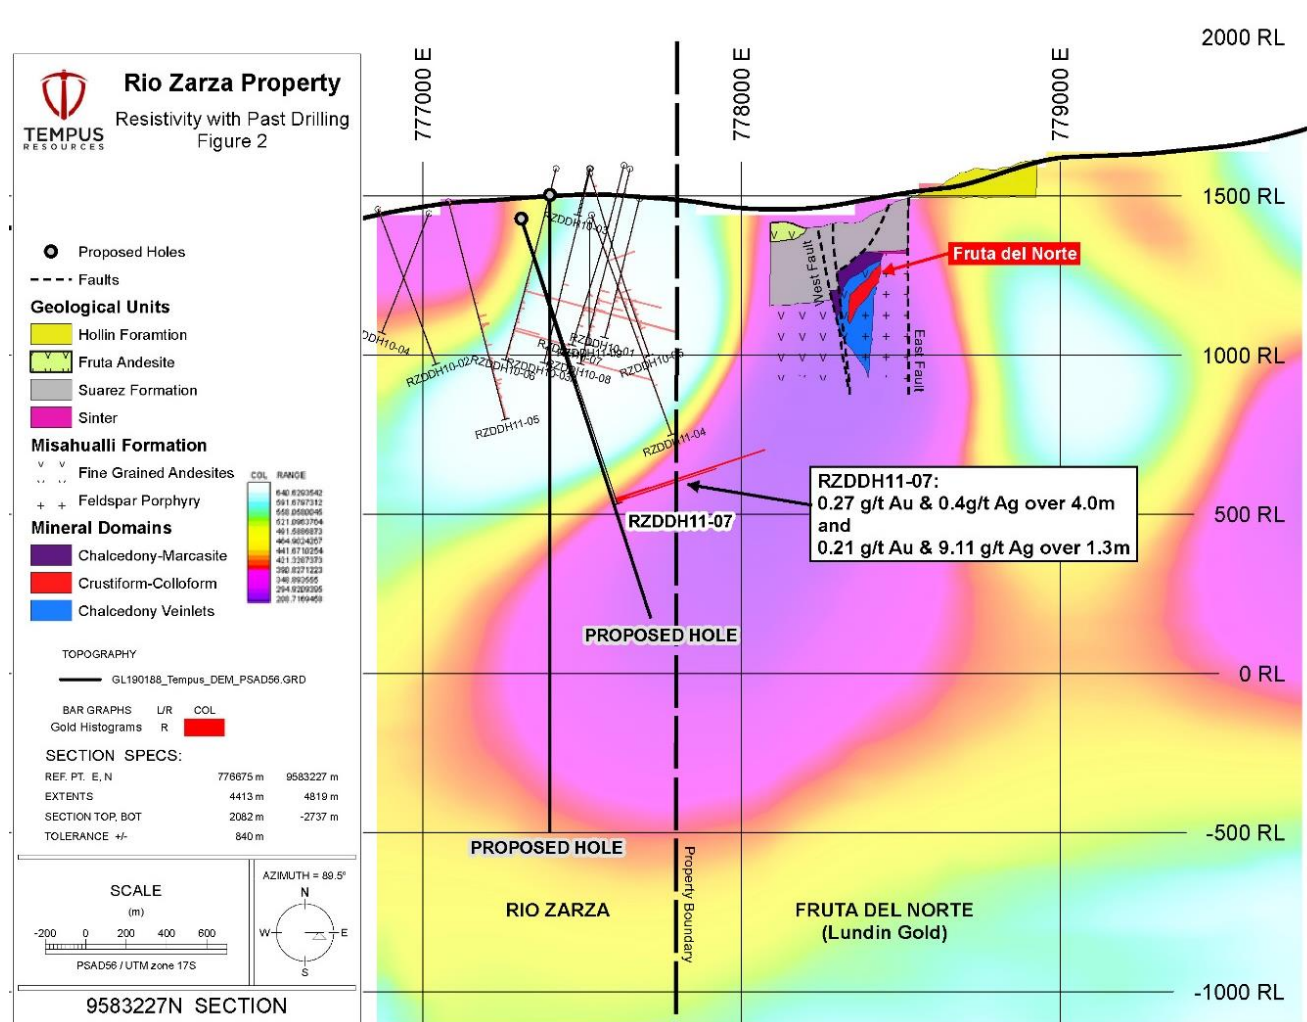

ZAMORA PROJECTS (ECUADOR – 100%)

As previously announced the Company is planning to drill its advanced Rio Zarza property in Q1, 2021.

Recent work by Tempus has advanced the geological, geophysical and geochemical understanding of the Project and has generated compelling targets for drilling. A significant resistivity anomaly, in which the Fruta del Norte deposit is hosted, extends to the west and below the current extent of drilling at Rio Zarza (Figure 4). The geophysical anomaly is supported by anomalous gold and silver at the base of the deepest historical hole, near the top of the geophysical anomaly (Figure 9).

Figure 4 – Resistivity with past drilling and relationship to Fruta del Norte

Community engagement in the *Valle del Tigre II* concession area continued during the Quarter, with active engagement with community groups progressing. Field exploration is expected to commence during the current Quarter, consisting of a detailed geochemical sampling program, the results of which will be integrated with the recently completed airborne geophysical survey, to generate drill targets.

CORPORATE

The Company held approximately **\$3.8 million** in cash reserves at the end of the Quarter. During the Quarter, the Company completed a \$2.5 million capital raising at \$0.31 per share, that was managed by Petra Capital Pty Ltd. The Placement was strongly supported by new and existing institutional and sophisticated investors.

Given the Company's focus on projects in Canada and Ecuador, the planned listing on the TSX Venture Exchange (TSX-V) in Canada is being rapidly progressed. A full listing application and an NI43-101 Technical Report have been submitted, and Tempus is targeting listing in the current Quarter. Concurrently, the Company is expecting to list on the OTC in the USA.

As part of the planned North American listings, the Company has moved to bolster its Board and Management, providing an increased Canadian presence, and to provide the necessary independent Non-Executive directors required for compliance with TSX-V requirements.

During the Quarter, the Company appointed Mr. Jason Bahnsen as President.

Mr. Bahnsen is a Canadian / Australian mining engineer with over 30 years of experience in natural resources finance and operations.

Jason's career has spanned a broad range of roles in the resources industry. He began his career in mine development, working for underground mine contracting companies in Canada, Indonesia and Australia. He has held production roles at several gold mine operations in capacities as mine planning engineer, project engineer and shift boss. Following several years working with Rio Tinto in Australia where Jason was involved in mine feasibility study work and business development roles, he moved into investment banking. Jason spent approximately 10 years working as a resource banker working with firms including Deutsche Bank, Macquarie Bank, and Fox Davies Capital on major international resource acquisition and equity market transactions. Following a successful career in banking, Jason became involved in resource company development and has held CEO roles for several private and listed resource exploration and development companies.

Subsequent to the end of the Quarter, and effective from November 1, 2020, the Company appointed Mr. Tom Peregoodoff and Mr. Anthony Cina as Non-Executive Directors.

Mr. Peregoodoff has over 30 years of mineral industry exploration, evaluation and development experience. As President and CEO of Peregrine Diamonds Ltd he led the development of the Chidliak diamond project until the eventual sale of Peregrine to Debeers in 2018. Prior to joining Peregrine he spent 18 years with BHP, with his last role as Vice President of Early Stage Exploration he had global responsibility for early stage exploration activities. Mr. Peregoodoff has extensive global operations and business development experience. He is a past director of Island Pacific School, and is a current director of Toronto Stock Exchange listed Mountain Province Diamonds Inc. (TSX: MPVD). Mr. Peregoodoff holds a BSc. in Geophysics from the University of Calgary and resides in Vancouver.

Mr. Cina has over 30 years of experience in accounting, finance and tax-related matters and has extensive experience in the mining industry. Mr. Cina is a corporate director and board advisor and has served for various mining and technology-related public and private companies, including currently serving as

Chairman of TSX Venture Exchange listed Itafos, a US and Brazilian focused vertically integrated phosphate miner and fertilizer producer. Prior to these roles, Mr. Cina served in several senior executive roles with mining companies, most recently as Senior Vice President, Business Administration at Yamana Gold Inc. (“Yamana”). Prior to joining Yamana, he was Chief Financial Officer of Itafos. Mr. Cina is a Chartered Accountant and Chartered Professional Accountant and has received the ICD.D designation from the Institute of Corporate Directors. Mr. Cina holds a Bachelor of Commerce degree from the University of Toronto.

During the quarter, approximately \$1,887,000 was spent on exploration expenditure and \$176,000 on corporate and administration costs. As outlined in the Appendix 5B (section 6) approximately \$118,000 were made to related parties and their associates, this being for director fees, and costs associated with the provision of company secretarial and accounting services.

Competent Persons Statement

Information in this report relating to Exploration Results is based on information reviewed by Mr. Kevin Piepgrass, who is a Member of the Association of Professional Engineers and Geoscientists of the province of BC (APEGBC), which is a recognised Professional Organisation (RPO), and an employee of Tempus Resources. Mr. Piepgrass has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined by the 2012 Edition of the Australasian Code for reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr. Piepgrass consents to the inclusion of the data in the form and context in which it appears.
