 - Oil sales for the quarter of ~146,000 barrels (gross) from liftings in July and September;
 - Buru advancing preparations for extensive 2021 exploration program; and
 - Farmout process continuing for the Company's exploration areas.
- **COVID-19 Impacts**

The Company's risk profile remain substantially unchanged from the previous quarter. Notwithstanding a recovery and stability in global oil prices, there remains for potential for significant impact to the Company's royalty receipts as a result of the oil price changes, due to:

 - any interruption to or suspension of production by Buru or on the Weeks Royalty; and
 - An expected decline in royalty receipts depending on the share of sales that are hedged or contracted. A decline in the A\$ exchange rate would partially offset any decline which, at this stage, cannot be forecast or quantified.
