EXPLORATION AND DEVELOPMENT ACTIVITIES

Wolfsberg Lithium Project

COVID-19

Q3/2020 continued to present a number of challenges for commodity markets due to the impact of the coronavirus pandemic. The situation is still highly uncertain with governments, companies and individuals required to follow recommendations to help in controlling the rate of infection at a global scale. Although circumstances have changed during the quarter with some easing of restrictions, travel restrictions are impacting the Company directly. The easing of some restrictions by the relevant government bodies has allowed the Company to recommence operational activities at its Wolfsberg Lithium project in Q3/2020.

Drilling

In Q3/2020, the Company was issued the decree to drill the deep holes with more than 300m of depth covering phase 2 of the drilling program in Zone 1. The Company has commenced the tender process for the drilling contractor and is in the process of engaging relevant consultants to supervise the progress of these exploration activities. As some of these contractors are not based in Austria, the Company anticipates some delays may occur due to differing regulations and restrictions during the COVID-19 pandemic period.

Definitive Feasibility Study (DFS)

With the receipt of the decree in Q3/2020 for the deep hole drilling program in Zone 1, the Company is in a position to recommence the Phase 2 resource drilling program in Zone 1 as an essential part of the DFS.

The Company reported in Q4/2019 and Q1/2020 that Dorfner/Anzaplan completed the metallurgical test work to assess and optimize process lines, flowsheets and layouts. The results and scope of work have been reviewed and the remaining lock cycle tests were pending during Q2/2020 to assess sufficiently the process to produce reliable results for the Lithium Hydroxide product. As advised in the Company's Q2/2020 report, Dorfner/Anzaplan were advised to recommence the lock cycle tests in Q3/2020. The Company has been advised by Dorfner/Anzaplan that the final results for these tests can be expected in Q1/2021. This metallurgic test work will also take place at the pilot plant for the Wolfsberg Lithium Project at Dorfner/Anzaplan's testing facility in Hirschau, Germany. At the completion and review of this work the detailed technical report will be published.

In Q3/2020, DRA Global were directed to recommence activities that includes supply of the independent assessment of the metallurgical work at the Dorfner/Anzaplan testing facility.

Hydrogeology

The Company continues with its hydrogeology monitoring program.

All hydrogeological data continues to be stored and secured into the Company's database.

The preparation work by SRK, and the geological consultant, GEO Unterweissacher, continues to ensure in-hole hydrogeological test work has been completed appropriately and can continue in the future.

Data from the above activities is fed into a water measuring database from which an annual report is produced.

Environmental

No environmental work has been carried out in Q3/2020.

Monitoring of water flows and quality from the mine is continuous.

Product Marketing

The strategy for the Company remains unchanged and focuses on the supply of lithium hydroxide to the nascent lithium battery plants of Europe. The Company is in discussion with a number of industry players regarding future off-take contracts and good progress has already been made in the advanced discussions with potential off-take partners.

Horizon 2020

In Q2/2020, the Company's 100% owned subsidiary ECM Lithium AT GmbH (ECM) commenced participation in the European Union funded Horizon 2020 - GREENPEG programme.

It is expected that a fully European Union funded geophysical survey program to support the database for the DFS will commence in Q4/2020 as part of the GREENPEG programme.

The Company continued to work proactively in the already approved and funded Horizon 2020 LithRef programme.

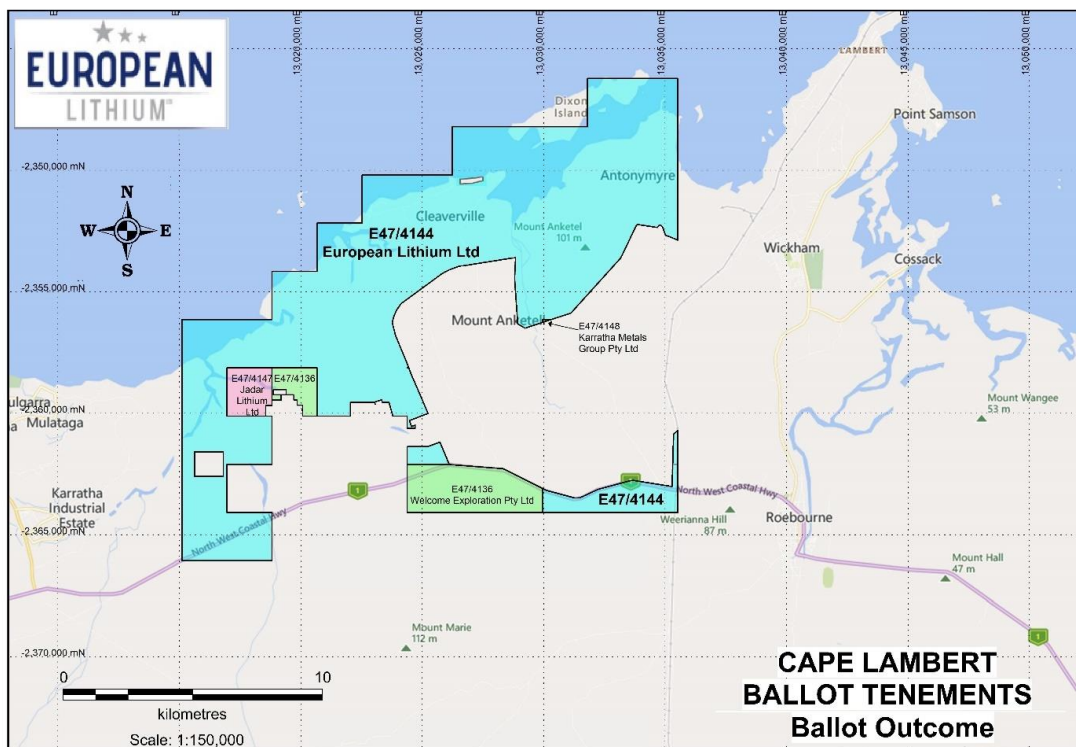

Continued participation shows the Company's abilities and eligibility to contribute with EU-level support to the sustainable supply of battery grade lithium, sourced and produced in Europe.
