Market Commentary on Impact of Global Pandemic - Digital and Mobility

According to International Data Corporation (IDC) Worldwide Digital Transformation Spending Guide*, spending on the digital transformation of business practices, products, and organizations is predicted to continue at a solid pace, despite challenges presented by the COVID-19 pandemic. This focus on digitization and Bigtincan’s unique strength in mobility, provides the Company with opportunities for tailwinds going into FY21. Bigtincan’s ability to address counter-cyclical market sectors (life sciences, technology, telecommunications), was demonstrated over the past quarters, with new customers and expansions in Technology, Financial Services and Life Sciences.

During the Quarter, the Company saw no impact on payment terms from enterprise customers, or had extended potential bad debt exposure.

Summer Product Release

During the Quarter Bigtincan conducted a Summer 2020 product release, with this release adding new functionality to the Bigtincan suite of products including;

- Custom automation hook within the Draft and Publish pipeline for Bigtincan Automation, providing customers with a greater level of extensibility, to add custom functionality to drafting and publishing automation, often required in more complex business scenarios.

Cash Position and Commentary

Customer cash receipts for the Quarter were \$4.5m. This September quarter is typically lower due to seasonality (slower US Summer quarter) and cash receipts are in line with the Company's forecasts. During the Reporting Period, the Company also received \$0.5m in Government grants.

Bigtincan continued its program to fund longer-term development projects, with \$1.1m of costs allocated to capitalised software development. These projects are important to the future of the business and are long term strategic programs providing ongoing investments in data science and AI technologies.

The software will be used by Red Bull employees and distributors globally to help empower these users for remote onboarding and training, and to help promote and sell Red Bull products in customer facing scenarios on iOS devices and phones/tablets.
