QUARTERLY ACTIVITIES REPORT FOR THE PERIOD ENDING 30 SEPTEMBER 2020

HIGHLIGHTS

- In July, PRM successfully raised \$150,000 before costs via a placement.
- In September the Company raised \$1.18 million via an oversubscribed rights issue
- Farm-out discussions regarding the drilling of Bowsprit-1 are ongoing
- The Company is reviewing potential new assets

Bowsprit Oil Project ("Bowsprit") (Lease No. 21754 & 21787) - PRM 100% working interest¹.

The Bowsprit leases are located approximately 70km southeast of New Orleans in approximately 3m of water. Bowsprit is assessed to contain an undeveloped conventional Miocene aged oil sand at a depth of approximately 7,400ft (2,255m) that is located above a deeper, 9,500ft gas field that was developed in 1960s by Shell. Consequently, the Bowsprit field contains 14 vertical well penetrations and has demonstrated producible oil from an upper Miocene sand. The 30ft thick oil sand was flowed successfully in 1960s from four wells and produced approximately 75,000 bbls of oil, but full field development was not practical with the vertical well technology of the time (~100bopd declining to 40 bopd / well).

PRM plans to drill a vertical pilot hole to evaluate the prospective reservoirs and then pull back and deviate the well to place a horizontal well between former production wells in the proven (flowed) Upper Miocene Sand. The field will be rapidly placed on production either by low cost tie-back to a near-by facility for early cashflow and/or, if the Lower Miocene reservoir (prospective resources) are present and the accumulation is sizable, via a dedicated new unmanned production facility with additional development drilling.

Farm-Out Progress

Subject to completion of the Pinnacle buyout, PRM now has a 100% working interest and is Operator of the Leases. PRM is seeking a new partner(s) to join the project. The Company and its agents are now re-engaging with interested parties (activity was curtailed due to COVID 19) and pending the US election result.

Land Status (net acres of mineral leases)

Below is a table showing PRM's net acres of oil and gas mineral leases in the project area.

Oil Project Area	PRM's Working Interest (%WI)	PRM's Net Revenue Interest (%NRI)	Project area Gross Acres (1ha = 2.471ac)	PRM's Net Acres (1ha = 2.471ac)
Bowsprit SL21754	50%	39.5%	1,000	500
Bowsprit SL21787	50%	39.5%	154	77
TOTAL	-	-	1,154	577

(Total acres as at 30 June 2020)

On 29 July 2019 – PRM announced a buyout of the co-lessee to move to 100% Working interest and 74% net revenue interest in both leases and thus increase the Company's net interest to 1154 net acres. This deal is not yet completed. The deadline for completion has been extended with Pinnacle to 31 December 2020 with an option to extend to March 2021.
