KINGMAN GOLD PROJECT, ARIZONA USA

During the Quarter, the Company undertook a review of the high-grade Kingman Gold Project located in Arizona, USA.

The Kingman Project is held by Flagstaff Minerals Limited and located in the mining state of Arizona. The project area is approximately 145 kilometres from Las Vegas and is within 5km of US Highway 93. This area saw extensive mining activity in the early 1900's when numerous gold, silver and base metals mines were in operation. The project area comprises 195 highly prospective unpatented contiguous lode claims.

Riedel Chairman Grant Mooney stated: “we are looking forward to completion of the deal process as we pursue our goal of being on the ground and drilling early in the new year. Flagstaff’s experienced US-based technical team are well prepared to commence work on the ground in the new year and we look forward to reporting results”.

Key points to note in relation to the project are:

- Diamond Drilling in late-2019 included the following shallow high-grade results:
 - 1.5m @ 21.6 g/t gold, 89 g/t silver & 1.8% lead from 47.2m;
 - 0.15m @ 26.9 g/t gold, 449 g/t silver, 17% lead & 2.7% copper from 39.6m;
 - 0.46m @ 15.2 g/t gold, 153 g/t silver & 2.3% zinc from 58.2m;
 - 0.3m @ 2.1 g/t gold & 2,340 g/t silver from 55.8m; and
 - 1.5m @ 3.4 g/t gold & 56 g/t silver from 78.3m

(Refer ASX announcement dated 23 October 2020)

- Multiple outcropping targets and veins open along strike and at depth
- Previously mined up to 1942 and almost no modern exploration work carried out with numerous historic mining areas never drill tested
- Extensive nearby infrastructure with year-round project access located approximately 5km from major highway
