**MARKET UPDATE
QUARTER ENDED 30 SEPTEMBER 2020**

ANNOUNCEMENT

30 OCTOBER 2020

The Company is pleased to present its report for the quarter ended 30 September 2020 and advises:

- Post harvest orchard operations have continued as planned and growing conditions have been good with no major frosts or rain events. The orchard is in good health with a good coverage of flower buds. The flowers are expected to open over the first two weeks of November and we will be able to report on flowering and fruit set in the next quarterly report.
- The continued rain has significantly impacted the water markets since their opening this season in July. The three principal dams that supply the Victorian irrigation districts, that is the Hume, Dartmouth and Eildon dams, currently have around 50% more water in them now than they did at this time last season. Importantly, they continue to record strong net inflows from the ongoing rains. It is orchard managements expectation that there will be a 100% water allocation in our irrigation district this season. We are pleased to see current spot water prices in the Goulburn district in the region of \$110 to \$120 per ML compared with \$550 to \$600 per ML at the same time last year.
- The newly planted portions of the orchard continue to be a focus of the orchard team and we are pleased with the establishment of the first and second tranches. The picture below is of some trees planted as part of the first tranche in March 2018 which we expect will produce a commercial harvest this season (ie at three years old). Managements review of these two plantings has confirmed the benefit of planting larger nursery stock as the trees initial growth is greater and the loss rate is lower. Further, it is our experience the larger seedlings result in significant cost savings over the first two years as the trees are trained to the trellis. With this in mind, the decision regarding the timing of the planting of the third and final tranche of the replanting programme will be deferred until after another inspection of the nursery stock in November 2020 at which time we will also have a better understanding of the likely 2021 harvest.

- We confirm all oil produced last year has been accepted by Boundary Bend Olives and has been collected.
- We remain conscious of the impact of the COVID-19 virus and continue to enforce preventative practices at the orchard. We are pleased to report that the virus has had little impact on operations to date.

Quarterly cash flow

The cash receipts for the September quarter amounted to \$423,000 which compares with \$1,007,000 for the same period last year and the operating surplus was \$22,000 compared with \$362,000 for the same period last year. These lesser amounts are a result of the 2020 harvest being lower than the previous year.

The Company forecasts that operating cash will run at a small deficit through to the March 2021 quarter followed by a larger deficit in the June quarter which includes the annual harvest costs. This pattern is not unexpected given the reduced cash receipts this season and management will continue to monitor cash balances. The business cashflow is expected to return to normal levels post the 2021 harvest with the anticipated improved harvest and the significant reduction of water prices to levels close to long term averages. The \$1.5m rights issue capital raising completed successfully in the June 2020 quarter placed the Company in a sound funding position to deal with the cyclical nature of the business.

The Company has commenced the process of reviewing its financing strategies with a view to developing options to restructure the current debt arrangements of the Company.

The payments to related parties of the Company set out in section 6 of the attached Appendix 4C refers to salary and superannuation entitlements paid to the Managing Director during the quarter.
