Announcement to ASX

30 OCTOBER 2020

SEPTEMBER QUARTERLY ACTIVITY REPORT

HIGHLIGHTS

- Drilling of Borba 1-7 well expected to commence in 2020
- Construction of all-weather drilling location and future production base commencing this week.
- 3 km access roadwork was completed for the Borba 1-7 Natural Gas well earlier in 2020
- High capacity rig selected and available at short notice to mobilise
- Significant interest from potential partners to participate and fund Borba drilling
- Continuing to review new opportunities and prospects to add resilience and sustainability to the strong Sacramento Basin portfolio of projects.

Sacramento Basin-focused natural gas developer Sacgasco Limited (ASX: SGC) (“Sacgasco” or “the Company”) is pleased to provide the Quarterly Activities Report for the calendar quarter ending 30 September 2020.

EXPLORATION, APPRAISAL AND NEW VENTURES

ONSHORE CALIFORNIA

Borba Natural Gas Prospect Drilling (Sacgasco 76% Working Interest (“WI”))

Construction of the all-weather drilling-pad and future production-base for the Borba 1-7 conventional natural gas well commenced in the last week of October 2020.

Highly experienced local contractor, NOR CAL Construction will build the pad which is expected to take around 10 days.

Sacramento Basin

The Company continued to maintain leases in the Sacramento Basin during the quarter. Sacgasco has a working interest (WI) of between 10% and 100% in oil and gas leases which cover natural gas prospects ranging in size from 5-20 Bcf to Tcf recoverable prospective resources of Natural Gas. Strategic analysis of well histories and seismic to uncover opportunities for growth are ongoing.

GAS FLOW UPDATE

| Gas Flows | September 2020 Quarter | June 2020 Quarter |
|------------------------------------|------------------------|-------------------|
| Gross mcf * (100%) | 38,062 | 44,618 |
| Net SGC mcf (after Royalty) | 21,008 | 25,000 |
| *mcf – Thousand Cubic feet gas | | |

Overall gas flows were reduced in the quarter by operational interruptions.

California has an unsatiated average 7 Bcf per day gas market. California imports over 90% of this natural gas from other US States and Canada.

The relevant Natural Gas prices in California for the last quarter have been up to 270% of USA benchmark Henry Hub natural gas prices. They are currently some 133% of the USA benchmark Henry Hub natural gas prices.

Hub
US\$3.08

CURRENT QUARTER OBJECTIVES

Drilling the Borba 1-7 well is a primary forward focus of the company.

The well will be drilled with a small directional component to optimise the intersection of more than 10 separate seismic anomalies on 3D seismic. The well is expected to take some 25 to 35 days to drill and operations are expected to commence this calendar year.

Sacgasco is planning to commence drilling the Borba 1-7 well as soon as final preparation for drilling are completed and additional leasing is documented. The well is already fully permitted with the State and local authorities.

At the shallow Kione Formation the Borba well will test a strong seismic anomaly separated from the sandstones that were productive at this level in the nearby West Ord Bend Gas Field. Production has also been encountered in the Borba vicinity from other shallower sand reservoirs.

At around 5,600 feet (1,700 metres) the well is projected to be in a mapped structural closure 140 feet (43 metres) up-dip from a 1998 well which encountered multiple zones over a 570 feet (175 metres) interval of high gas shows and porosity. These shows were not flow tested at the time, but these sand intervals have been productive in the local area.

Deeper seismic anomalies are interpreted to indicate sand reservoir development and natural gas shows are expected. Saggasco has also previously found the basement to be fractured and gas productive.

The well will be drilled with the largest capacity rig in the area and will require a 10,000 psi rated control stack on the 9 5/8" casing below 6,000 feet. The well will have 3 strings of protective pipe.

Farmout and funding discussions to reduce Saggasco's Working Interest exposure are advanced to enable Saggasco to implement its plans to drill the well this year.

A Resource Report by an independent party is being finalised and will be released once final working interests are settled

A comparison of key characteristics of the Perth Basin and the Sacramento Basin shows the many advantages of the Sacramento Basin as an investment location.

Borba 1-7 Well Pad Site

Ongoing review of potential conventional oil and gas projects that have a strategic fit with Saggasco's current assets and strategy.

Project Portfolio

SGC's current focus is unlocking the underlying value from its natural gas prospects in the under-explored parts of the Sacramento Basin and elsewhere as opportunities arise.

Sacgasco is the Operator of all but one of its WI wells and related tenements.

| PROJECT NAMES <i>All located in the Sacramento Basin</i> <i>Onshore northern California</i> | LEASES; RELATED GAS FIELD (HBP LEASES); OR KEY WELL | PROJECT TYPE | TOTAL GAS WELLS | WORKING INTEREST (WI)* |
|----------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|---------------------------------|------------------------|-------------------------------|
| <i>Dempsey Area Project</i> | Rancho Capay, Rice Creek, East Gas Fields - HBP Leases Oil and Gas Mineral Leases | Exploration, Appraisal & Rework | 10 | 40-60% |
| <i>Alvares Project</i> | Oil and Gas Mineral Leases Alvares 1 well (P&A Re-entry) | Exploration & Appraisal | 1 | 50% |
| <i>Borba Project</i> | Oil and Gas Mineral Leases | Exploration | - | 50% |
| <i>Los Medanos Project</i> | Los Medanos Gas Field HBP Leases | Appraisal & Rework | 2 | 90% |
| <i>Malton Project</i> | Malton Gas Field HBP Leases and Oil and Gas Mineral Leases | Exploration, Appraisal & Rework | 8 | 45-70% |
| <i>Dutch Slough Gas Project</i> | Dutch Slough Gas Field HBP Leases | Exploration, Appraisal & Rework | 4 | 70% |
| <i>Denverton Creek Gas Project</i> | Denverton Creek Gas Field HBP Leases | Gas flow & Rework | 1 | 70% |
| <i>Rio Vista Gas Project</i> | Rio Vista Field Wells HBP Leases | Gas flow, development & Rework | 3 | 100% |

Perth Basin Comparison – SGC, XST and Strike / Warrego

| Comparison Criteria | SACRAMENTO BASIN | Perth Basin |
|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Production to Date | Over 13 Tcf | Around 0.6 Tcf |
| Gas Market | 7 Bcf per day; Undersupplied- 90% gas imported from interstate | Less than 1 Bcf per day; Over supplied, limited market subject to WA DOMGAS Policy |
| Gas Price | ~A\$6 per mcf – 120% to 160% of Henry Hub US benchmark natural gas price | Less than A\$4 per mcf; No export outlet (WA Govt Policy Aug 2020) |
| Well Depths | Less than 3,000 Metres | Around 5,000 metres |
| Market Caps and Leverage | SGC - \$ 11 million (270 Million Shares) XST - \$ 4 million (1,400 Million Shares) | STX - \$ 422 million (1,700 Million Shares) WGO - \$ 190 million (900 Million Shares) |
| Reservoirs and Opportunity | Tens of Bcf to Tcf potential; Highly pressured; Identified in Outcrop; Identified Sweet Spots in Subsurface from 3D Seismic; Extensive vertical column of gas saturated rocks in Saccgasco's Dempsey control well | Tens of Bcf to Tcf potential; Highly Pressured; Identified from limited well intersection and high flow rates; reliant on seismic amplitudes for Resource Estimation |
| Land Access | Landowner Incentives in form of 20% Royalty from Production | "Lock the Gate" adversarial activity; little landowner incentive; |
| Equipment and Industry Support | Existing owned plant; Extensive local suppliers and competition mean lower costs -> \$ | New plant needed; Limited suppliers and equipment and labour drive costs up -> \$\$\$ |
| Government Regulation | Existing Gas Field Administrative Areas facilitate activity; California is desperate for gas "to keep the lights on" | Sovereign Risk from WA Govt Domgas Policy of restricted gas export |

Sacramento Basin compared to Perth Basin Investments

Corporate

The company held its Annual General Meeting of shareholders in July 2020. All resolutions were passed.

Greg Channon resigned as Non-Executive Director during the quarter and Mr David McArthur joined the Board as a Non-Executive Director. The Board would like to thank Mr Channon for his assistance during his time with Saccgasco.

Appendix 5B Quarterly Cash Flow report includes \$25,000 at Line 6.1 under "Payments to related parties of the entity and their associates". This includes the payment of loan interest (\$10,400), office lease (\$10,400), and company secretarial and accounting management fees (\$3,800).

SACGASCO CAPITAL STRUCTURE

About Sacgasco Limited (ASX. SGC)

Sacgasco Limited (ASX: SGC) is an Australian-based energy company appraising, developing and flowing clean conventional natural gas in the Sacramento Basin, onshore California.

SGC has an extensive portfolio of conventional-reservoir, natural gas flowing wells; and prospects at both exploration and appraisal stages, including Tcf natural gas opportunities.

The Company is targeting gas supply to the premium local Californian gas market and burgeoning LNG market in North America.

Sacgasco is of the view that the size of prospects in California have been the potential to supply both domestic California natural gas and export LNG markets including those to Asia.

Sacgasco's strategy is to find and develop under-valued and under-explored opportunities connected to under-supplied oil and gas markets with attractive product prices.

Twitter: @SacGasCo

Leases:

US exploration is conducted on leases grant by Mineral Right owners, in SGC's case primarily private individuals or groups. Leases can vary in size from very small parcels (part of an acre) to large landholdings (covering a few square miles). Leases generally are for 5 years and rentals are paid annually. There are no firm work commitments associated with the leases. Some leases are 'Held By Production' (HBP) and royalties are paid to mineral right owners in lieu of rentals. SGC has not listed all it leases as it is impractical and not meaningful for potential project value assessment in a conventional natural gas play. A detailed listing of leases may also lead to a loss of competitive advantage and consequent reduced value to SGC shareholders.

Competent Persons

This document contains forward looking statements that are subject to risk factors associated with the oil and gas industry. It is believed that the expectations reflected in these statements are reasonable, but they may be affected by many variables which could cause actual results or trends to differ materially. The technical information provided has been reviewed by Mr Gary Jeffery, Managing Director of Sacgasco Limited. He is a qualified geophysicist with over 47 years technical, commercial and management experience in exploration for, appraisal and development, and transportation of oil and gas. He is a member of The American Association of Petroleum Geologists. Mr Jeffery consents to the inclusion of the information in the form and context in which it appears.

The timing of future events is subject to the normal industry vagrancies of operational matters and equipment availability which are outside the control of Sacgasco and its suppliers. Facilities depicted in images on the Sacgasco website are not necessarily assets of Sacgasco. Some of the images used represent aspects of the oil and gas industry in which Sacgasco is involved or images of equipment owned by companies providing services to Sacgasco.

Before investing it is recommended that investors conduct their own due diligence and consult financial and technical advisors and form their own opinions on future events and implications.

For personal use only

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8 If Item 8.7 is less than 2 quarters, please provide answers to the following questions:

8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

No. The Group expects negative cash flows (Item 8.3) to decrease in the next two quarters when compared with Q3/2020. Higher gas prices are expected to reduce negative cash flows. The main factor for higher than normal cash outflows in the September 2020 quarter were due to the settlement of a lease for Borba exploration well.

These measures collectively are expected to result in having sufficient funding available for operations for the coming 2 quarters.

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Yes. During the quarter, Gary Jeffery loaned the Company \$100,000 which will be used to fund its exploration program.

As noted above in note 7.6, Gary Jeffery loaned the Company \$100,000 on 22 October 2020 to further fund its exploration program.

The Directors are confident they can raise further capital and /or farmout some obligations to sustain future operations.

If necessary, the Group will delay discretionary expenditure that is not contractually committed.

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Yes. The entity believes operations will continue through the methods identified in sections 8.8.1 and 8.8.2 through the deferral of discretionary expenses. Additionally, 50% of the Managing Director and Chairman Director fees are extinguished through the issue of shares, with the remaining 50% payable when the Company is in a financial position to do so.

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.
