

Quarterly Report

Period Ending September 30th 2020

Highlights

Costa Fuego Becomes a Leading Global Copper Development

- Hot Chili's combined Costa Fuego project now ranks as one of the world's largest low-altitude, clean concentrate (no arsenic), copper-gold Mineral Resources not controlled by a major mining company
- The Cortadera maiden Mineral Resource takes the total Mineral Resource estimate for Costa Fuego** to 724Mt at 0.48% copper equivalent (CuEq*) for 2.9Mt copper, 2.7Moz gold, 9.9Moz Silver and 64kt molybdenum

Maiden Cortadera Mineral Resource – Globally Significant & Growing

- The Cortadera maiden Mineral Resource is one of just two major global copper discoveries recorded in the world since 2016 (S&P Global) and comprises (+0.25% CuEq*) 451Mt at 0.46% CuEq*, including a higher grade component (+0.6% CuEq*) of 104Mt at 0.74% CuEq*

Forward Work Streams– Growth Drilling, Resource Additions & First Revenue

- Two drill rigs in operation at Cortadera testing large growth targets, updates expected shortly
- Excellent initial copper recoveries and compatible metallurgy from recent sulphide testwork confirm all three of Costa Fuego's deposits (Cortadera, Productora and San Antonio) can be incorporated into one combined development
- Maiden resource estimate for the San Antonio high grade satellite copper deposit being compiled and scoping study for combined Costa Fuego development advancing well
- Ramp-up of lease mining and processing at Productora progressing well, first commercial cash flow expected to commence in late November owing to delays related to local COVID restrictions

* Copper Equivalent (CuEq) reported for the resource were calculated using the following formula: $CuEq\% = ((Cu\% \times Cu \text{ price } 1\% \text{ per tonne} \times Cu_recovery) + (Mo \text{ ppm} \times Mo \text{ price per g/t} \times Mo_recovery) + (Au \text{ ppm} \times Au \text{ price per g/t} \times Au_recovery) + (Ag \text{ ppm} \times Ag \text{ price per g/t} \times Ag_recovery)) / (Cu \text{ price } 1\% \text{ per tonne})$. The Metal Prices applied in the calculation were: Cu=3.00 USD/lb, Au=1,550 USD/oz, Mo=12 USD/lb, and Ag=18 USD/oz. For Cortadera (Inferred + Indicated), the average Metallurgical Recoveries were: Cu=83%, Au=56%, Mo=82%, and Ag=37%. For Productora (Inferred + Indicated), the average Metallurgical Recoveries were: Cu=83%, Au=43% and Mo=42%. For Costa Fuego (Inferred + Indicated), the average Metallurgical Recoveries were: Cu=83%, Au=51%, Mo=67% and Ag=23%.

** Reported on a 100% Basis - combining Cortadera and Productora Mineral Resources using a +0.25% CuEq reporting cut-off grade

SUMMARY OF ACTIVITIES

Costa Fuego Becomes a Leading Global Copper Project

In early October, Hot Chili announced a significant milestone– a maiden resource for its world-class Cortadera copper-gold discovery in Chile.

This very substantial Cortadera maiden mineral resource estimate, compares favourably with the only other significant new copper discovery announced globally since 2016 (source S&P Global Market Intelligence, Wood August 2020) – Rio Tinto’s Winu discovery in Western Australia (503Mt grading 0.45%CuEq, 100% Inferred and reported above 0.20% CuEq cut-off grade, announced to ASX 28th July 2020).

Highlights include:

- Cortadera’s maiden Mineral Resource positions Hot Chili with the largest copper Mineral Resources and one of the largest gold Mineral Resources for an ASX-listed emerging company
- The Cortadera maiden Mineral Resource (+0.25% CuEq*) of 451Mt at 0.46% copper equivalent (CuEq*) takes the total Mineral Resource estimate for Costa Fuego** to 724Mt at 0.48% CuEq1 for 2.9Mt copper, 2.7Moz gold, 9.9Moz Silver and 64kt molybdenum
- The Cortadera maiden Mineral Resource includes a higher grade component (+0.6% CuEq*) of 104Mt at 0.74% CuEq* that is growing rapidly
- The independently estimated Mineral Resource (categorised as, 41% Indicated and 59% Inferred), extends from surface and remains open in several key directions

Tables 1 and 2 outline the maiden Cortadera Mineral Resource estimate, the re-stated Productora Mineral Resource estimate and the Global Mineral Resource for the combined Costa Fuego project, respectively.

For further details please refer to ASX announcement “Costa Fuego Becomes a Leading Global Copper Project” (12th October 2020) for JORC Table 1 information related to the Cortadera JORC compliant Mineral Resource estimate by Wood and the Productora re-stated JORC compliant Mineral Resource estimate by AMC Consultants.

Table 1 Independent JORC Code Cortadera Mineral Resource

Cortadera Resource		Grade					Contained Metal				
Classification (+0.25% CuEq*)	Tonnage (Mt)	CuEq (%)	Cu (%)	Au (g/t)	Ag (g/t)	Mo (ppm)	Copper Eq (tonnes)	Copper (tonnes)	Gold (ounces)	Silver (ounces)	Molybdenum (tonnes)
Indicated	183	0.49	0.40	0.15	0.7	43	905,000	728,000	889,000	4,227,000	7,900
Inferred	267	0.44	0.35	0.12	0.7	73	1,181,000	935,000	1,022,000	5,633,000	19,400
Total	451	0.46	0.37	0.13	0.7	61	2,086,000	1,663,000	1,911,000	9,860,000	27,300

Reported at or above 0.25% CuEq*. Figures in the above table are rounded, reported to appropriate significant figures, and reported in accordance with the JORC Code - Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Metal rounded to nearest thousand, or if less, to the nearest hundred. * *Copper Equivalent (CuEq) reported for the resource were calculated using the following formula:* $CuEq = ((Cu\% \times Cu \text{ price } 1\% \text{ per tonne} \times Cu_recovery) + (Mo \text{ ppm} \times Mo \text{ price per g/t} \times Mo_recovery) + (Au \text{ ppm} \times Au \text{ price per g/t} \times Au_recovery) + (Ag \text{ ppm} \times Ag \text{ price per g/t} \times Ag_recovery)) / (Cu \text{ price } 1\% \text{ per tonne})$. The Metal Prices applied in the calculation were: Cu=3.00 USD/lb, Au=1,550 USD/oz, Mo=12 USD/lb, and Ag=18 USD/oz. For Cortadera (Inferred + Indicated), the average Metallurgical Recoveries were: Cu=83%, Au=56%, Mo=82%, and Ag=37%.

Reported at or above 0.25% CuEq*. Figures in the above table are rounded, reported to appropriate significant figures, and reported in accordance with the JORC Code - Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Metal rounded to nearest thousand, or if less, to the nearest hundred. * * *Copper Equivalent (CuEq) reported for the resource were calculated using the following formula:* $CuEq\% = ((Cu\% \times Cu\ price\ 1\% \text{ per tonne} \times Cu_recovery) + (Mo\ ppm \times Mo\ price\ per\ g/t \times Mo_recovery) + (Au\ ppm \times Au\ price\ per\ g/t \times Au_recovery) + (Ag\ ppm \times Ag\ price\ per\ g/t \times Ag_recovery)) / (Cu\ price\ 1\% \text{ per tonne})$. The Metal Prices applied in the calculation were: Cu=3.00 USD/lb, Au=1,550 USD/oz, Mo=12 USD/lb, and Ag=18 USD/oz. For Cortadera (Inferred + Indicated), the average Metallurgical Recoveries were: Cu=83%, Au=56%, Mo=82%, and Ag=37%. For Productora (Inferred + Indicated), the average Metallurgical Recoveries were: Cu=83%, Au=43% and Mo=42%. For Costa Fuego (Inferred + Indicated), the average Metallurgical Recoveries were: Cu=83%, Au=51%, Mo=67% and Ag=23%.

** Note: Silver (Ag) is only present within the Cortadera Mineral Resource estimate

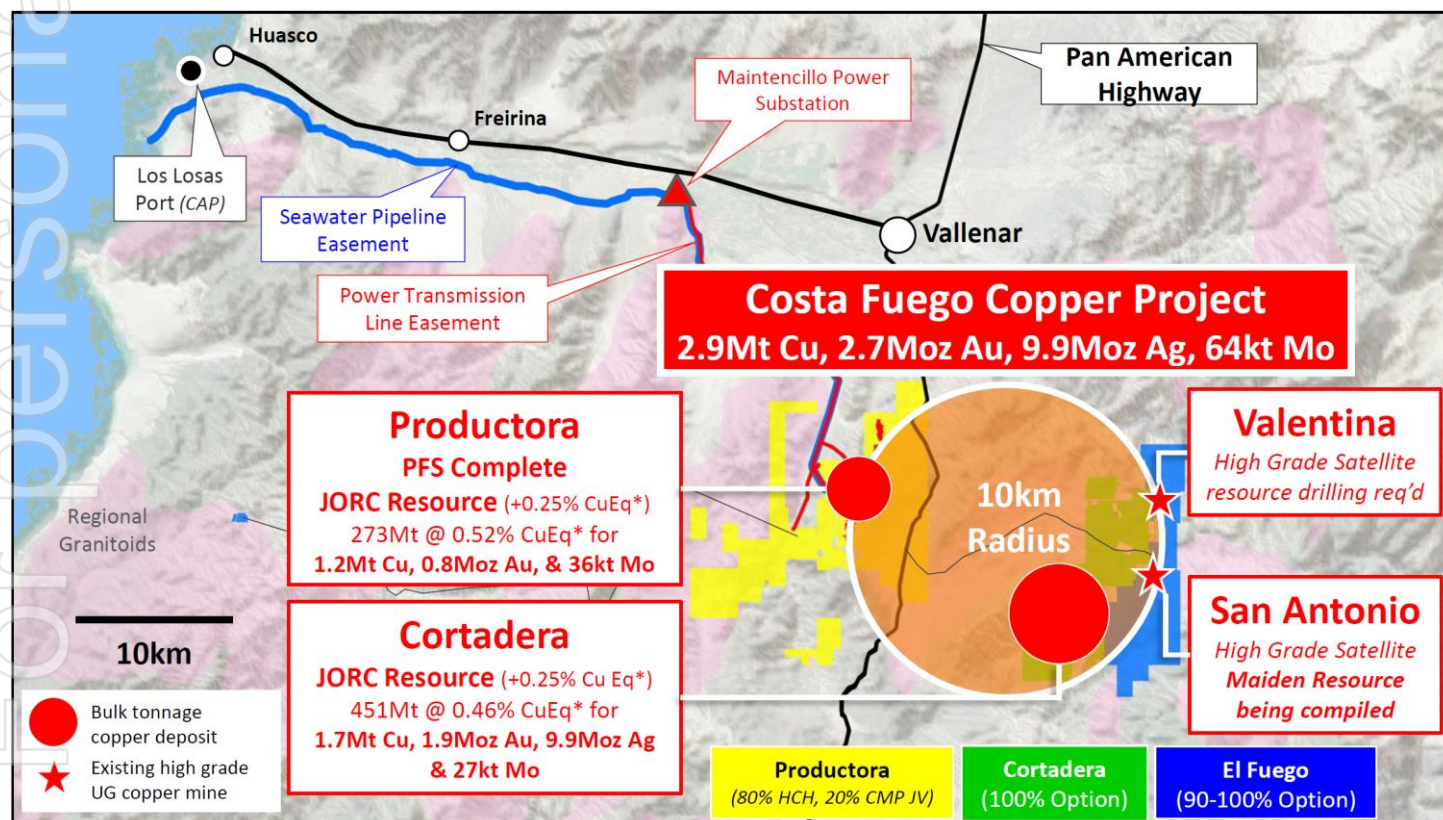

Figure 1 Location and infrastructure of the Costa Fuego copper project, located along the Chilean coastal range 600km north of Santiago.

Cortadera's maiden Mineral Resource estimate extends from surface and is considered amenable to large-scale open pit mining.

Cortadera's high grade core has already delivered six world-class drilling intersections since it was discovered by Hot Chili in August last year. The high grade core has the potential to grow significantly with further drilling and represents a potential large underground development opportunity.

The addition of the maiden Cortadera mineral resource estimate positions Costa Fuego favourably amongst the largest undeveloped copper Mineral Resources in the world not controlled by a major mining company, as outlined in Table 3 and Figure 2.

Table 3 Largest Copper Resources in the World Not Controlled by a Major Mining Company (except Winu)

Rank	Project	Company	Country	Stock Exchange	Contained CuEq Metal (Mt)	Average CuEq Grade (%)	Average Cu Grade (%)	Cut-off Grade (%)	Cut-off Grade Basis	Surface Elevation (m.a.s.l.)

All projects selected only include those not controlled by a major mining company (except Winu) who have stated a publicly announced (ASX, TSX or other) Mineral Resource estimate classified as either Measured, Indicated or Inferred where copper is the primary commodity and average metallurgical recoveries have been declared. Project details assembled from public information by Wood (on behalf of Hot Chili) in July 2020 (used without the consent of the source) and normalised using the following price deck: Copper 3.00 USD/lb, Gold 1,550 USD/oz, Molybdenum 12 USD/lb, Silver 18 USD/oz, Platinum 1,050 USD/oz, Palladium 1,400 USD/oz, Cobalt 14 USD/lb, Nickel 7 USD/lb. Copper Equivalent grade and tonnes have been normalised using these prices in addition to recoveries declared in each project's public company announcements. Several significant copper projects were excluded from the comparative analysis owing to insufficient reported information to calculate Copper Equivalence. These projects were Tampakan, Santo Tomas, Santa Cruz, Escalones, Beschoku and Beutong. Further details regarding the Mineral Resources for each project used in the comparative analysis is set out in Appendix 1.

Figure 3 outlines the extent, morphology and areas of open extensional potential across the Cortadera Mineral Resource estimate.

Largest Undeveloped Copper Mineral Resources in the World Not Controlled by a Major Mining Company

All projects selected only include those not controlled by a major mining company (other than Winu) who have stated a publicly announced (ASX, TSX or other) Mineral Resource estimate classified as either Measured, Indicated or Inferred where copper is the primary commodity and average metallurgical recoveries have been declared. Project details assembled from public information by Wood (on behalf of Hot Chili) in July 2020 (used without the consent of the source) and normalised using the following price deck: Copper 3.00 USD/lb, Gold 1,550 USD/oz, Molybdenum 12 USD/lb, Silver 18 USD/oz, Platinum 1,050 USD/oz, Palladium 1,400 USD/oz, Cobalt 14 USD/lb, Nickel 7 USD/lb. Copper Equivalent grade and tonnes have been normalised using these prices in addition to recoveries declared in each project's public company announcements. Several significant copper projects were excluded from the comparative analysis owing to insufficient reported information to calculate Copper Equivalence. These projects were Tampakan, Santo Tomas, Santa Cruz, Escalones, Beschoku and Beutong. Further details regarding the Mineral Resources for each project used in the comparative analysis is set out in Appendix 1.

Figure 2 Costa Fuego ranks as one of the largest copper Mineral Resources in the world not controlled by a major mining company. Costa Fuego is also one of the few undeveloped large copper resources that is both low-altitude (less than 1,000m elevation) with no arsenic impurity.

Figure 3 Oblique Long Section (looking NNE) displaying the Maiden Cortadera Mineral Resource extents in relation to drilling. Note that the average low grade halo of the block model is exposed on the outer façade of the above image.

Multiple Forward Work Streams Underway

Expansion Drilling to Facilitate Rapid Resource Growth at Cortadera

Drilling activities continued during the quarter, albeit at a slower rate of advance owing to COVID restrictions applied to the Vallenar region of Chile.

The Company is operating one diamond drill rig and one Reverse Circulation (RC) drill rig at the Cortadera copper project (both on day shift) and has completed multiple pre-collar's to facilitate expansion drilling across the Cortadera Mineral Resource.

An update on initial expansion diamond holes at Cuerpo 3 and Cuerpo 2 is expected to be released shortly.

Sixteen diamond holes are planned to be drilled across the Cortadera discovery zone over the coming year in advance of a Mineral Resource upgrade for Cortadera in 2021.

Drilling has also commenced at the large "look-alike" Cortadera North target, located 2km north of the Cortadera discovery zone as displayed in figure 4. The Company is planning to complete ten deep RC drill holes across the 2km long target in order to provide an initial first-pass assessment in advance of planned diamond drill testing. The Company is currently completing its second deep RC hole at Cortadera North.

Results returned for the first two drill holes of the Company's third-phase drilling programme have provided strong encouragement for continued growth of the Cortadera discovery with new results confirming from CRP0016D confirm the high grade core discovered within the largest porphyry at Cortadera (Cuerpo 3) is continuing to expand.

CRP0016D recorded 190m grading 0.6% copper and 0.2g/t in a predicted extension to the currently defined high grade core which remains open for growth in several key areas.

This result was included in the recently announced maiden Mineral Resource estimate for Cortadera and details of CRP0016D and CRP0042D results are contained in Hot Chili's ASX announcement "Drill Results Expand High Grade Copper-Gold Core at Cortadera", dated 11th August 2020.

Resource Development and Scoping Study Activities

An internal scoping study is underway to assess a combined development for Costa Fuego involving both open pit and underground operations which will leverage central processing and existing infrastructure access already secured by Hot Chili (power and sea water pipeline easements, surface rights).

The Company is likely to pursue a similar development approach to the Nueva Union (Teck 50%, Newmont Goldcorp 50%) copper project in Chile, where the Relincho and El Morro copper-gold deposits are being combined into one development via haulage using a 40km conveyor belt.

Nuevo Union is located between 2,000m and 4,000m elevation, approximately 100km east-northeast of Costa Fuego, with similar average copper grades and co-credit metals. By comparison, Costa Fuego's Cortadera and Productora copper-gold deposits are located 14km apart, at low attitude (800-1,000m elevation), along the Pan American Highway and within 50km of port facilities.

Further resource additions are planned to be added to Costa Fuego as the Company focusses towards establishing a Tier-1 copper resource base (+5Mt contained copper). The Company is currently compiling a maiden resource for the San Antonio high grade satellite deposit, located 4km from Cortadera. San

Antonio is the first of several high grade resources the Company intends to add into the combined Costa Fuego copper development.

During the quarter, the Company also released highly encouraging initial metallurgical testwork results for Cortadera and San Antonio.

Highlights include:

- **Consistent and Compatible Ore Metallurgy:** Sulphide test work results confirm that all three of Hot Chili's neighbouring projects (Cortadera, Productora and San Antonio) are compatible and can be incorporated into one combined development, now named "Costa Fuego"
- **Excellent Initial Copper Recoveries:** Rougher flotation test work from Cortadera and San Antonio indicates excellent copper recoveries of 89% to +95%
- **Strong Co-Product Recoveries** - Gold, silver and molybdenum rougher flotation recoveries consistent with other leading global copper developments (Rio Tinto's Winu or SolGold's Cascabel project)
- **Clean-Concentrate Confirmed:** No deleterious elements present in rougher concentrate, confirming Costa Fuego as a clean-concentrate combined copper development
- **Low Capital Intensity Maintained:** All three deposits indicate high recoveries of payable metals using salt water processing, no desalination plant required

These first results provide a solid foundation from which to carry out further optimisation of the metallurgical flowsheet for life-of-mine ore source supply for the Costa Fuego copper development.

Further details related to this metallurgical testwork is outlined in Hot Chili's ASX announcement "Positive Results from Initial Metallurgical Test Work", dated 31st July 2020.

CORPORATE

Additional ASX Disclosure Information

ASX Listing Rule 5.3.2: There was no substantive mining production and development activities during the quarter. All material removed from Productora during the quarter comprised existing stockpiles and remnant ore positions not included in the Company's existing Productora Mineral Resource statement.

ASX Listing Rule 5.3.3: Schedule of Mineral Tenements as at 30 September 2020

The schedule of Mineral Tenements and changes in interests is contained in Table 6 at the end of this activities report.

ASX Listing Rule 5.3.4: Reporting under a use of funds statement in a Prospectus does not apply to the Company currently.

ASX Listing Rule 5.3.5: Payments to related parties of the Company and their associates during the quarter per Section 6.1 of the Appendix 5B totaled \$1,825,000. This is comprised of Directors' salaries and fees (excl. GST) and salaries of \$123,000 and payments to Blue Spec Sondajes, a company controlled by Mr Murray Black, for rents of \$3,000 and drilling services of \$1,699,000.

Health, Safety, Environment and Quality

Hot Chili's sustainability framework ensures an emphasis on business processes that target long-term economic, environmental and social value. The Company is dedicated to continual monitoring and improvement of health, safety and the environmental systems.

Importantly, the Company has implemented COVID safety measures and procedures to ensure the safety of its staff, consultants and contractors during these challenging times. This was of paramount importance for allowing a re-commencement and continuation of drilling activities during the quarter.

While the Company sees these measures as temporarily impacting productivity at its operations, there is no greater importance than ensuring the safety of our people and their families.

The company is pleased to report that there were no incidents recorded for the quarter. Field operations during the period including geological reconnaissance activities, RC and diamond drilling, field mapping and sampling exercises at the Cortadera project.

The Company's HSEQ quarterly performance is summarised below:

Table 5 HSEQ Quarter 3 2020 Performance and Statistics

Item	PRODUCTORA		CORTADERA	
	April-June 2020	Last 24 months	April-June 2020	12 Months
LTI events	0	0	0	0
NLTI events	0	0	0	0
Days lost	0	0	0	0
LTIFR index	0	0	0	0
ISR index	0	0	0	0
Thousands of mh (1)	720	3,960	2,688	48,202
Environmental incidents	0	0	0	0
Headcount (2)	4	0.5	5.3	19

Notes: HSEQ is the acronym for Health, Safety, Environment and Quality. LTIFR per million man hours. Safety performance is reported on a monthly basis to the National Mine Safety Authority on a standard E-100 form; (1) man-hours; (2) Average monthly headcount

Tenement Changes During the Quarter

There were no changes to the Company's tenement holdings during the quarter.

Qualifying Statements

Competent Person's Statement- Exploration Results

Exploration information in this Announcement is based upon work compiled by Mr Christian Easterday, the Managing Director and a full-time employee of Hot Chili Limited whom is a Member of the Australasian Institute of Geoscientists (AIG). Mr Easterday has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a 'Competent Person' as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' (JORC Code). Mr Easterday consents to the inclusion in the report of the matters based on their information in the form and context in which it appears.

Competent Person's Statement- Productora Mineral Resources

The information in this Announcement that relates to the Productora Project Mineral Resources, is based on information compiled by Mr N Ingvar Kirchner. Mr Kirchner is employed by AMC Consultants (AMC). AMC has been engaged on a fee for service basis to provide independent technical advice and final audit for the Productora Project Mineral Resource estimates. Mr Kirchner is a Fellow of the Australasian Institute of Mining and Metallurgy (AusIMM) and is a Member of the Australian Institute of Geoscientists (AIG). Mr Kirchner has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' (the JORC Code 2012). Mr Kirchner consents to the inclusion in this report of the matters based on the source information in the form and context in which it appears.

Competent Person's Statement- Cortadera Mineral Resources

The information in this report that relates to Mineral Resources for the Cortadera Project is based on information compiled by Elizabeth Haren, a Competent Person who is a Member and Chartered Professional of the Australasian Institute of Mining and Metallurgy and a Member of the Australian Institute of Geoscientists. Elizabeth Haren is employed as an associate Principal Geologist of Wood, who was engaged by Hot Chili Limited. Elizabeth Haren has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Elizabeth Haren consents to the inclusion in the report of the matters based on her information in the form and context in which it appears.

Reporting of Copper Equivalent

Copper Equivalent (CuEq) reported for the resource were calculated using the following formula: $CuEq\% = ((Cu\% \times Cu \text{ price } 1\% \text{ per tonne} \times Cu_recovery) + (Mo \text{ ppm} \times Mo \text{ price per g/t} \times Mo_recovery) + (Au \text{ ppm} \times Au \text{ price per g/t} \times Au_recovery) + (Ag \text{ ppm} \times Ag \text{ price per g/t} \times Ag_recovery)) / (Cu \text{ price } 1\% \text{ per tonne})$. The Metal Prices applied in the calculation were: Cu=3.00 USD/lb, Au=1,550 USD/oz, Mo=12 USD/lb, and Ag=18 USD/oz. For Cortadera (Inferred + Indicated), the average Metallurgical Recoveries were: Cu=83%, Au=56%, Mo=82%, and Ag=37%. For Productora (Inferred + Indicated), the average Metallurgical Recoveries were: Cu=83%, Au=43% and Mo=42%. For Costa Fuego (Inferred + Indicated), the average Metallurgical Recoveries were: Cu=83%, Au=51%, Mo=67% and Ag=23%.

Forward Looking Statements

This Announcement is provided on the basis that neither the Company nor its representatives make any warranty (express or implied) as to the accuracy, reliability, relevance or completeness of the material contained in the Announcement and nothing contained in the Announcement is, or may be relied upon as a promise, representation or warranty, whether as to the past or the future. The Company hereby excludes all warranties that can be excluded by law. The Announcement contains material which is predictive in nature and may be affected by inaccurate assumptions or by known and unknown risks and uncertainties and may differ materially from results ultimately achieved.

The Announcement contains "forward-looking statements". All statements other than those of historical facts included in the Announcement are forward-looking statements including estimates of Mineral Resources. However, forward-looking statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by such forward-looking statements. Such risks include, but are not limited to, copper, gold and other metals price volatility, currency fluctuations, increased production costs and variances in ore grade recovery rates from those assumed in mining plans, as well as political and operational risks and governmental regulation and judicial outcomes. The Company does not undertake any obligation to release publicly any revisions to any "forward-looking statement" to reflect events or circumstances after the date of the Announcement, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws. All persons should consider seeking appropriate professional advice in reviewing the Announcement and all other information with respect to the Company and evaluating the business, financial performance and operations of the Company. Neither the provision of the Announcement nor any information contained in the Announcement or subsequently communicated to any person in connection with the Announcement is, or should be taken as, constituting the giving of investment advice to any person

Appendix 5B

Mining exploration entity or oil and gas exploration entity
quarterly cash flow report

Name of entity

Hot Chili Limited

ABN

91 130 955 725

Quarter ended ("current quarter")

30 September 2020

Consolidated statement of cash flows	Current quarter \$A'000	Year to date (..3....months) \$A'000
1. Cash flows from operating activities		
1.1 Receipts from customers	-	-
1.2 Payments for		
(a) exploration & evaluation	(2,439)	(2,439)
(b) development	-	-
(c) production	-	-
(d) staff costs	(234)	(234)
(e) administration and corporate costs	(390)	(390)
1.3 Dividends received (see note 3)	-	-
1.4 Interest received	-	-
1.5 Interest and other costs of finance paid	-	-
1.6 Income taxes paid	-	-
1.7 Government grants and tax incentives	25	25
1.8 Other (provide details if material)	-	-
1.9 Net cash from / (used in) operating activities	(3,037)	(3,037)

2. Cash flows from investing activities		
2.1 Payments to acquire or for:		
(a) entities	-	-
(b) tenements	(389)	(389)
(c) property, plant and equipment	-	-
(d) exploration & evaluation	-	-
(e) investments	-	-
(f) other non-current assets	-	-

Consolidated statement of cash flows		Current quarter \$A'000	Year to date (..3....months) \$A'000
2.2	Proceeds from the disposal of:		
	(a) entities	-	-
	(b) tenements	-	-
	(c) property, plant and equipment	-	-
	(d) investments	-	-
	(e) other non-current assets	-	-
2.3	Cash flows from loans to other entities	-	-
2.4	Dividends received (see note 3)	-	-

4.	Net increase / (decrease) in cash and cash equivalents for the period		
4.1	Cash and cash equivalents at beginning of period	6,308	6,308
4.2	Net cash from / (used in) operating activities (item 1.9 above)	(3,307)	(3,307)
4.3	Net cash from / (used in) investing activities (item 2.6 above)	(389)	(389)
4.4	Net cash from / (used in) financing activities (item 3.10 above)	1,161	1,161

Consolidated statement of cash flows		Current quarter \$A'000	Year to date (..3....months) \$A'000
4.5	Effect of movement in exchange rates on cash held	(102)	(102)
4.6	Cash and cash equivalents at end of period	3,941	3,941

5. Reconciliation of cash and cash equivalents at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts	Current quarter \$A'000	Previous quarter \$A'000
5.1 Bank balances	3,852	6,219
5.2 Call deposits	89	89
5.3 Bank overdrafts		
5.4 Other (provide details)		
5.5 Cash and cash equivalents at end of quarter (should equal item 4.6 above)	3,941	6,308

6. Payments to related parties of the entity and their associates	Current quarter \$A'000
6.1 Aggregate amount of payments to related parties and their associates included in item 1	1,825
6.2 Aggregate amount of payments to related parties and their associates included in item 2	-

Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.

7. Financing facilities <i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
7.1 Loan facilities	-	-
7.2 Credit standby arrangements	-	-
7.3 Other (please specify)	-	-
7.4 Total financing facilities	-	-
7.5 Unused financing facilities available at quarter end	<input type="text"/>	
7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.	<input type="text"/>	

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (item 1.9)	(3,037)
8.2 (Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(389)
8.3 Total relevant outgoings (item 8.1 + item 8.2)	(3,426)
8.4 Cash and cash equivalents at quarter end (item 4.6)	3,941
8.5 Unused finance facilities available at quarter end (item 7.5)	-
8.6 Total available funding (item 8.4 + item 8.5)	3,941
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	1.15
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: Yes	

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: :Subsequent to announcing the initial mineral resource estimate for Cortadera, renewed interest in the Company's Cortadera transaction has been noted. The company believes the strategic funding process will ultimately be successful. Mining operations by Chilean government agency ENAMI have been hampered by events beyond the Company's control (COVID quarantine declared in the Vallenar region of Chile) but assurances have been given that commercial cashflow from lease mining and processing commence in late November and will be a source of working capital going forward. Unquoted options on issue continue to be exercised and have provided further in-flows of cash into the company.

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: Any drilling will be targeted and cost effective and funded by working capital sourced from mining operations or the exercise of options immediately. Drilling can be postponed at any time to ensure commitments in the next two quarters can be met and the Company expects to cease operations over the Christmas period for approximately three weeks.

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date:30 October 2020.....

Authorised by:By the Board.....
(Name of body or officer authorising release – see note 4)

This announcement is authorised by the Board of Directors for release to ASX.

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
