Quarterly Activities Report – 30 September 2020

Further to the Appendix 4C Quarterly Cashflow lodged on 30 October 2020, the Directors of Site Group International Limited ("Site", ASX:SIT) provide a summary of the activity undertaken in the quarter.

COVID-19 continues to significantly impact economies around the world. Site continues to provide services in most jurisdictions albeit in a reduced or intermittent delivery in some places such as Philippines, Myanmar, PNG and KSA. The decline in international revenues experienced towards the end of FY20 has continued into the first quarter of FY21, however recent renewals on the contracts in Kingdom of Saudi Arabia for 2 years at the existing NCTC facility and the likely renewal the Engineering Work Experience Program (EWEP) in Myanmar are encouraging signs of future growth in these regions. Additional expectations of further significant training contracts in KSA and Bahrain are likely indicators that the Middle East and North Africa region will drive significant growth for the International business.

In Australia, the essential nature of industry programs is seeing a return towards previous levels of skills and licence training. Subject to industry continuing to show improvement in QLD, NT and WA and through the relationships with State Government funding initiatives, the improvement trend is expected to continue.

Expenditure on these activities predominantly comprise the wages and salaries paid to employees, amounts paid to contractors and the direct training costs such as equipment hire and classroom supplies.

Clark Property

Site continues to pursue the potential development of its 30 hectare Clark Leasehold property as part of the strategy to maximise international asset values. While the progress has been interrupted by COVID-19 and the short term closure of offices in the region, the commercial discussions around the property are continuing with several parties renewing discussions around partnering and investing in the project.

Expenditure on these activities consists of employee costs and consultant and advisor fees to legal and property specialists.

Regulatory Actions

Process with the litigations with the regulatory bodies resulted in hearing with the ACCC in the Federal Court in June and ASQA in the Administrative Appeals Tribunal in July. Decisions are expected possibly this calendar year.

Expenditure on these activities comprised professional fees for legal costs as well as salaries and wages to employees.

Authorised for release by the Board.
