Update for the Quarter Ending 30 September 2020

MEC Resources Ltd (ASX: MMR, ACN 113 900 020) ("**MEC**" or "the **Company**") is pleased to provide its Appendix 4C (Quarterly Cashflow Report) for the quarter ended 30 September 2020.

Operational Update

MEC has a non-controlling interest in the unlisted energy explorer Advent Energy Ltd ("**Advent**") of 49.3%.

Advent holds a range of hydrocarbon permits which contain near term production opportunities with pre-existing infrastructure and exploration upside.

Advent's assets include RL1 (100%) in the onshore Bonaparte Basin in the Northern Territory and PEP11 (85%) in the offshore Sydney Basin.

MEC continues to monitor its investment in Advent noting that up until 22 October 2020 the Company had no representation on the board of Advent at which point Mr Anthony Huston and Mr David Breeze, who are directors of Advent were confirmed as MEC board members.

The Board is discussing a proposed partial in-specie distribution framework of shares it holds in Advent which will be subject to shareholder approval at a general meeting of shareholders. The Company is in consultation with the ASX as it works on preparation of a submission to the ASX which will be followed by a Notice of Meeting. The Company is consulting further with Advent about the in-specie distribution framework to enable it to complete its due diligence and issue a Prospectus.

On 2 October 2020 MEC advised that it has entered into a standstill agreement with both Advent (**Advent**) and Asset Energy Pty Ltd (**Asset**) in relation to writs and demands issued by both Advent and Asset the effect of which is to allow the parties time to negotiate a resolution of the pending claims. MEC is currently in discussion with Advent and expects to be in a position to provide additional information in the near future.

The Company has not considered new investments.

Advent Energy has provided the following information to MEC

Advent Energy

Investee Advent Energy Ltd has submitted to the National Offshore Petroleum Titles Administrator (NOPTA) an application to enable the drilling of the Baleen drill target in the PEP11 permit offshore NSW. The PEP11 Joint Venture has reviewed the work program and now proposes to proceed with the drilling of a well at Baleen subject to approvals from NOPTA and other regulatory authorities and financing and has now made application to NOPTA to change the current Permit conditions. The current permit expiry date is in March 2021. The application to NOPTA includes the extension of the permit title for up to two years to enable the drilling and includes an application for the removal of the requirement for a 500 sq. km 3D seismic program. NOPTA has confirmed that this application is now in the final decision phase.

Advent also announced it is proposing with its Joint Venture partner Bounty, to use the drilling program at Baleen to investigate the potential for CCS - Carbon Capture and Storage (geo-sequestration of CO₂ emissions) in PEP11. CCS can capture CO₂ fossil fuel emissions. Both the International Energy agency and the Intergovernmental Panel on Climate change believe that CCS can play an important role in helping to meet global emission reduction targets. CCS is part of a suit of solutions with the potential to mitigate greenhouse gas emissions and help address climate change. The Sydney Basin is a major contributor to Australia's greenhouse gas emissions and contributes up to 34% of the total national emissions. Independent Government published research has indicated at least 2 TCF (Trillion Cubic Ft) of CO₂ storage may be feasible in the offshore Sydney Basin.

Advent subsidiary Onshore Energy ("**Onshore**") made an application for suspension and extension of the permit conditions in EP386 which was not accepted by the Department (DMIRS). Onshore sought a review of the decision by the WA Minister of Resources who responded setting out a course of action in relation to that decision which Onshore is following. Onshore Energy Pty Ltd has lodged an appeal against this decision with the State Administrative Tribunal (SAT).

- Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer:

No. The Company is currently working on a partial in specie to MEC shareholders of its investment in investee company Advent following discussions with the Advent Board and ASX . During this time costs have been minimised and directors have agreed to take their directors fees as to 25% in cash and the remaining 75% as shares subject to shareholder approval.

- Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer:

The Company anticipates that the work outlined above will take about 4 to 6 weeks subject to various approvals by the ASX to complete. Concurrent with making a market announcement in relation to this restructure the Company anticipates it will also work on a capital raising in the form of a rights issue.

- Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer:

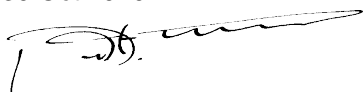

Yes. The Company continues to focus on its short-term business objectives which is its investment in investee company Advent. As noted, this requires an approval from the shareholders of the Company and in this regard a Notice of General Meeting will be arranged in the near future subject to approval of such notice by the ASX.

The Company also continues to assess its funding opportunities in the form of a rights issue. However, no decisions have been made about further capital raising pending finalisation of the restructure process other than to raise sufficient working capital as required to relist on ASX .
