## RESULTS FOR ANNOUNCEMENT TO THE MARKET

---

The reporting period is the half-year ended 31 December 2020 with the previous corresponding period being the half-year ended 31 December 2019. The results have been reviewed by the Company's auditors.

### Results for announcement to the market

- Profit for the half-year was \$3.4 million. This is 22.8% down on the previous corresponding period. Dividends and distributions received decreased by 29.0%.
- Revenue from operating activities was \$3.3 million, 31.0% down on the previous corresponding period. This excludes capital gains on investments.
- The interim dividend of 3.5 cents per share fully franked (at 30%), the same as last year's interim dividend, will be paid on 16 February 2021 to ordinary shareholders on the register on 25 January 2021. There is no conduit foreign income component of the dividend.
- All of the interim dividend is sourced from capital gains, on which the Company has paid or will pay tax. The amount of the pre-tax attributable gain, known as an "LIC capital gain", attached to this dividend is 5 cents (3.5 cents grossed up for tax). This enables some shareholders to claim a tax deduction in their tax return. Further details will be on the dividend statements.
- A Dividend Reinvestment Plan (DRP) and Dividend Substitution Share Plan (DSSP) are available, the price for which will be set at a **2.5% discount** to the Volume Weighted Average Price of the Company's shares traded on the ASX and Chi-X automated trading systems over the five trading days from when the shares trade ex-dividend. The last date for the receipt of an election notice for participation in the DRP & DSSP is 5.00 pm (Melbourne time) on 27 January 2021.
- A final dividend for the 2020 financial year of 6.5 cents per share, fully franked, was paid to shareholders on 17 August 2020.
- Net asset backing per share as at 31 December 2020 was \$3.11 before deferred tax on the unrealised gains on the long-term investment portfolio, up from \$2.54 at the end of the previous corresponding period.
- The Company also announces a Share Purchase Plan to raise up to \$40 million, with a closing date for participation of 15<sup>th</sup> February 2021. Details will be sent to all shareholders.

## Mirrabooka delivers strong portfolio performance

### Half Year Report to 31 December 2020

- For the 6 month period, Mirrabooka's portfolio return, including the benefit of franking, was 33.0%. This is ahead of the combined Small and Mid Cap 50 sector benchmark, including franking, which was up 21.9% over the same period.
- The 12 month portfolio return, including franking, was 29.2%; the combined Small and Mid Cap 50 benchmark return over the corresponding period, including franking, was 13.8%.
- Volatile market conditions continued through the period due the impact of the COVID-19 pandemic and subsequent government and central bank policy responses. This volatility was even more present in the small and mid-cap sectors of the market in which Mirrabooka invests. The long-term adjustments made to the portfolio, including a narrowing of the focus into preferred holdings with quality franchises, has been particularly beneficial through this volatility.
- Half Year Profit was \$3.4 million down from \$4.4 million in the corresponding period last year. The fall in profit was due primarily to a reduced contribution from investment income as many companies lowered or suspended dividend payments. Adjustments made to the portfolio though the period produced after tax realised gains of \$15.3 million. In the corresponding period, last year, after tax realised gains were \$11.6 million.
- The interim dividend has been maintained at 3.5 cents per share fully franked.
- Despite the overall strength in the market, we have found opportunities to add new companies to the portfolio. NIB, Superloop and Nanosonics were purchased through temporary price weakness and Nuix was added through an initial public offering. The most material selling in the 6-month period has come from trimming some of the strongest portfolio performers, Objective Corporation and HUB24, and exiting our positions in Premier Investments and OptiComm, which was taken over. Selling activity has otherwise been relatively subdued as we remain confident in the stocks that we own.
- Mirrabooka remains focussed on long term opportunities in high quality companies and we are confident that with patience future market volatility will provide additional opportunities to invest. At the end of December 2020, Mirrabooka was close to fully invested and has therefore announced a Share Purchase Plan with this result to provide additional funds for the portfolio.

#### Portfolio return (including the full benefit of franking) – to 31 December 2020

Per annum returns other than for 6 months. Performance figures are after costs.

## Market and Portfolio Returns

In the disruption caused by the COVID-19 pandemic during the year, investors factored in significant downside risk at the height of the crisis, with smaller companies unsurprisingly facing an even more uncertain outlook.

With various government and central bank measures beginning to take effect in the second quarter of the 2020 calendar year, the supportive demand backdrop that this provided saw small and mid-cap companies rally more sharply than larger ASX listed companies. As confidence grew around various vaccine developments, and the expected continuance of very low interest rates the market recovery continued further over the 6 months to 31 December 2020. This was particularly evident as many shorter term focussed investors rotated from companies whose revenues increased through the COVID-19 environment (i.e. online retailing), to companies that had been most negatively impacted by pandemic (i.e. travel).

Reflective of the quality of the portfolio, Mirrabooka delivered a return for the 6 months to 31 December 2020, including the benefit of franking, of 33.0%. This was ahead of the Combined Small Ordinaries and Mid Cap 50 benchmark which was up 21.9%, including franking, over the same period. Over the 6-month period, the portfolio has benefitted from strong share price performance in some of our larger holdings such as Mainfreight, ARB Corporation, Objective Corporation, Reece, Net Wealth, HUB24 and Xero. For the 12 months to 31 December 2020, the relative returns were 29.2% for Mirrabooka and 13.8% for the benchmark, with both figures including the benefit of franking.

## Portfolio Changes

Despite the overall strength in the market, we have found opportunities to invest in some new companies for the portfolio. In NIB (health insurance) and Nanosonics (infection control and decontamination products), we have followed progress in these companies that meet our quality thresholds for many years. These were added to the portfolio during meaningful price dips that have since recovered. We have also followed progress at Superloop (fibre telecommunications provider) and saw an opportunity to invest with the arrival of a well credentialed management team which has a focus on extracting greater returns from a valuable asset base. Corporate Travel, which was previously owned, has inevitably been caught up in impacts of the pandemic. However, we decided to re-enter the stock as it very effectively navigated the impacts of the crisis and made a well-timed acquisition in the US.

Capital markets and IPO activity has been particularly buoyant since September. We continue to maintain an approach of meeting as many aspiring IPO candidates as possible as we look to own the highest quality opportunities that arise from these. While we did see some interesting companies to follow into the future, material participation was limited to the data processing business Nuix.

The most material selling in the 6-month period has come from trimming some of the strongest portfolio performers because of valuation risk, Objective Corporation and HUB24, and exiting our positions in Premier Investments and OptiComm, which was taken over. Selling activity has otherwise been relatively subdued as we remain confident in the stocks that we currently own.

## Share Purchase Plan

Mirrabooka is currently close to fully invested. As a result of continuing to find opportunities to further invest, and with fewer concerns that have required us to exit holdings, a Share Purchase Plan has been announced with this result.

**\*Incorporates the benefit of franking credits for those who can fully utilise them.**

Note: Rebalancing of the portfolio to manage risk is an important part of Mirrabooka's investment approach. The tax paid on realised gains can impact relative performance figures against the Index which does not have such imposts. The inclusion of the benefit of franking credits from the tax paid and distributed to shareholders in the dividend is one way of overcoming this distortion.

Past performance is not indicative of future performance.

## 1. Basis of preparation of half-year financial report

This general purpose half-year financial report has been prepared in accordance with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Act 2001*.

This interim financial report does not include all the notes of the type normally included in an annual financial report. This report should be read in conjunction with the 2020 Annual Report and public announcements made by the Company during the half-year, in accordance with the continuous disclosure requirements of the *Corporations Act 2001*.

The accounting policies adopted are consistent with those of the previous financial year and corresponding interim reporting period.

In the interests of transparency in its reporting, the Company uses the phrase “market value” in place of the AASB terminology “fair value for actively traded securities.”

## 2. Financial reporting by segments

The Company operates as a Listed Investment Company in Australia. It has no reportable business or geographic segments.

### (a) Segment information provided to the Board

The internal reporting provided to the Board for the Company’s assets, liabilities and performance is prepared on a consistent basis with the measurement and recognition principles of Australian Accounting Standards, except that net assets are reviewed both before and after the effects of unrealised capital gains tax on investments (as reported in the Company’s Net Tangible Asset announcements to the ASX).
