

ASX Release | ClearVue Technologies Limited (ASX: CPV)**Executive Team Changes**

18 January 2021: Smart building materials company ClearVue Technologies Limited (ASX:CPV) (**ClearVue** or the **Company**) advises the following key changes and proposed changes to its executive leadership team.

Mr Kenan (Ken) Jagger interim CEO has advised the Company that he is resigning to pursue other interests. Mr Jagger intends to serve out his notice period and to assist the Company with handover to existing and incoming new management.

The Board would like to thank Mr Jagger for his contributions over the last approximately two years in various capacities including as Chief Commercial Officer, and more recently as interim Chief Executive Officer where his focus has been on sales, marketing and investor relations activity for the Company. The Company wishes to thank Mr Jagger for his service and wishes him the very best for his future endeavours.

As previously announced ClearVue is continuing work on the development of its global roll out strategy including the development of its global leadership team in its Tier 1 territories of Northern Europe and the United States.

To this end, the Company is continuing to pursue the appointment of a European CEO with knowledge, experience and networks from the building integrated photovoltaics (BIPV) industry to add to the current management team.

The Company is also in discussions with sales and marketing specialists in the US and the Board is interviewing and searching for a global CEO with the requisite background and experience suitable for global scaling of the ClearVue business.

The Board looks forward to updating the market in coming weeks on the appointment of a European CEO and other key appointments.

Authorised by the Board of ClearVue.

About ClearVue Technologies Limited

ClearVue Technologies Limited (ASX: CPV) is an Australian technology company that operates in the Building Integrated Photovoltaic (BPIV) sector which involves the integration of solar technology into building surfaces, specifically glass and building façades, to provide renewable energy. ClearVue has developed advanced glass technology that aims to preserve glass transparency to maintain building aesthetics whilst generating electricity.

ClearVue's electricity generating glazing technology is strategically positioned to compliment and make more compelling, the increased use of energy-efficient windows now being regulated in response to global climate change and energy efficiency goals.

Solar PV cells are incorporated around the edges of an Insulated Glass Unit (IGU) used in windows and the lamination interlayer between the glass in the IGU incorporates ClearVue's patented proprietary nano and micro particles, as well as its spectrally selective coating on the rear external surface of the IGU.

ClearVue's window technology has application for use in the building and construction and agricultural industries (amongst others).

ClearVue has worked closely with leading experts from the Electron Science Research Institute, Edith Cowan University (ECU) in Perth, Western Australia to develop the technology.
