Direct Sourcing client & revenue growth in line with expectations:

- ✓ Moved from 3 (Q121) to 11 partners, exceeding our goal of 8 partners:
 - CEO led partnerships with focus now on partner enablement (typically 3-6mth process)
 - Expected to provide opportunities to market LiveHire's platform to a material proportion of the Fortune 1000 enterprises
- ✓ 3 additional clients activated during the quarter, taking total to 8 as at Q221:
 - AUD\$80b market cap energy generation & distribution provider in North America
 - Mid-tier staffing firm focused on technology talent for Fortune 1000
 - Alberta Health second provincial government health agency to adopt direct sourcing
- ✓ Quarterly revenue of \$242k for Q221 up 235% up from \$72k in Q121 on plan

SaaS business progressing to plan:

- ✓ Net gain for the quarter of 6 taking total to 120 clients
- ✓ Closing ARR for the Q2 \$3,916,592 up 6% on Q1 21, and 28% up YOY
- ✓ NRR rate % (rolling 12mths) has moved from 80% to 82%
- ✓ Sales productivity / FTE continues to grow up 18% YOY

Cash tracks to plan and TCC's grows strongly:

- ✓ Cash receipts were a record \$1.498m for the quarter, with 12mth rolling at \$4.427m
- ✓ Lower cost base tracking according to plan
- ✓ Cashburn of (\$1.7m) which is 52% lower YOY
- ✓ Strong TCC's for the quarter up 25% to 3.2m:
 - ANZ up 13% to 2.3m and
 - North America up 74% to 0.9m

Direct Sourcing Opportunity

(Addressable US market of \$US800m¹+ in technology spend)

Old way (decades old process)

Example Company with avg. \$100m in contractor annual salary spend, paying ~20%+ supplier markup

Outsourced Provider who manages all staffing suppliers

20+ Staffing suppliers who mark up contractor salaries by ~20%+

New way (Managed Direct Sourcing)

Company with avg. \$100m in contractor salary spend, paying ~10% total markup.

Company branded LiveHire Talent Community, managed by 1 staffing supplier. Filling 40%+ of contractor roles directly.

Fewer staffing suppliers, providing niche contractor roles.

LiveHire revenue of 1-2% of contractor salaries

LiveHire's Performance & Financial Metrics – Glossary

Below we explain a handful of the headline performance and financial metrics, and inputs into key metrics, that we use every day to manage and drive LiveHire's performance.

Monthly Recurring Revenue

Monthly recurring revenue is a point in time monthly view of LiveHire's recurring revenue components. This is a combination of fixed monthly recurring revenue streams, variable monthly recurring revenue streams, and monthly recognised recurring revenue streams for upfront paying clients.

Annualised Recurring Revenue (ARR)

ARR represents Monthly Recurring Revenue at any point in time, multiplied by 12. It provides a 12 month forward view of recurring revenue at a point in time.

Opening ARR

Opening ARR represents the ARR at the beginning of the period.

New Business ARR

New Business ARR represents the ARR derived from new clients secured in that period.

ARR Churn

ARR Churn represents the value of ARR which was not renewed by clients in that period.

Closing ARR

Closing ARR represents the ARR at the end of the period and is calculated as:
 $\text{Opening ARR} + \text{New Business ARR} + \text{Net Upsell ARR} - \text{Churn ARR}$.

ARR Churn %

ARR Churn as a percentage of Opening ARR.

Annualised Recurring Revenue Per Client (ARRPC)

ARRPC is calculated as: $\text{Closing ARR} / \text{number of clients}$

ARRPC is a key metric and can be grown by securing higher value clients, and by adding new products and functionality to provide more value to clients.

Client

A client is defined as being an entity from which ARR is generated at a point in time.

Client Churn

Client Churn as a percentage of opening clients

Client Lifetime (Years)

$1 / \text{client churn rate}$

Gross Margin %

Gross Margin equals Revenue less Cost of Goods Sold. Revenue divided by Gross Margin gives Gross Margin %.

Cost of Goods Sold for a SaaS business represent direct costs to deliver ongoing service. They should not be confused with costs to acquire a customer, and could be thought of in simple terms as costs that scale with the number of customers you have. They include hosting fees, other third party software to deliver the service, and the costs of client implementations, client and platform support, and client success

LiveHire's Performance & Financial Metrics – Glossary

Below we explain a handful of the headline performance and financial metrics, and inputs into key metrics, that we use every day to manage and drive LiveHire's performance.

Lifetime Value

Lifetime Value (LTV) is calculated as New Business ARR x Gross Margin % x Client Lifetime (years)

Client Acquisition Cost (CAC)

Client Acquisition Cost is the cost per new client won of LiveHire's sales & marketing expenditure directly related to the winning of new clients. The current assumption is that 100% of total sales and marketing cost and 90% of solutions cost, relate to Client Acquisition.

CAC Ratio %

Client Acquisition Cost Ratio represents the ratio of incremental ARR generated by LiveHire's sales & marketing teams in a period, compared to the direct costs of obtaining that incremental ARR. Based on a 2017 survey of SaaS businesses¹ with ARR >US\$5 million, companies spent a median of \$1.15 to acquire each dollar of new ARR (i.e. a CAC Ratio of 87%). Gross margin can be applied to the CAC Ratio and then inverted to give the CAC Payback period (e.g. in the previous scenario, if a business gross margin was 75%, it's CAC Payback period would be $1 / (87\% \times 75\%) = 1.53$, or ~18 months. 18 months was the median CAC Payback period from the aforementioned survey, which implies a median Gross Margin of 75%

Net Revenue Retention (NRR) rate %

Calculated as $(\text{Opening ARR} + \text{upsell ARR} - \text{downsell ARR} - \text{churn} / \text{lost ARR}) / \text{Opening ARR}$. NRR is an indicator that measures how well a business can not only renew but generate additional revenue from its clients post initial sale.

livehire

Estimated Annualised Contract Value

Estimated Annualised Contract Value is an estimation of the annual revenue achievable from a client once it is at full ramp

Direct Sourcing Revenue

Direct Sourcing Revenue is the revenue earned from a direct sourcing client in the current financial year

Recurring Revenue

Recurring revenue is the component of statutory reported operating revenue that relates to recurring revenue streams earned during the period being reported on. Recurring revenue streams include hosting fees, user licence fees and ongoing support and maintenance fees.

Non-Recurring Revenue

Non-recurring revenue is the component of statutory reported operating revenue that relates to one-off revenue streams earned during the period being reported on. This predominantly consists of upfront implementation and integrations fees as well as people service/consulting fees.

EBITDA (excl SBP & TTC)

EBITDA excluding Share Based Payments and R&D rebate income, and prior to the transfer of certain costs to the software development asset. It provides a normalised view that excludes significant non-cash expenses, income not considered part of core operations, and includes all salary costs (including those able to be capitalised under the applicable accounting standards).
