OzAurum Resources Limited (ASX: OZM)

OzAurum exploring two highly strategic gold projects in the Eastern Goldfields, Western Australia

Disclaimers

- This presentation has been prepared by OzAurum Resources Limited (ACN: 643 244 544) and its subsidiary ("**Company**") and is for information purposes only. No representation or warranty, express or implied, is made as to the fairness, accuracy, relevance completeness or correctness of the information, opinions and conclusions contained in this presentation and nothing contained in the Presentation is, or may be relied upon as a promise, representation or warranty, whether as to the past or the future. This presentation has been prepared without taking into account the investment objectives, financial situation or particular needs of any participant. Past performance is no guarantee of future performance. The Company hereby excludes all warranties that can be excluded by law.
- This presentation contains prospective financial material which is predictive in nature and may be affected by inaccurate assumptions or by known or unknown risks and uncertainties and may differ materially from results ultimately achieved. This presentation contains general background limited information about the Company and its activities current as at the date of this presentation. The information in this presentation is in summary form only and does not contain all the information necessary to fully evaluate any transaction or investment.

This is not an offer

- This presentation is for information purposes only. Neither this presentation nor the information in it constitutes an offer, invitation, solicitation or recommendation to subscribe for or purchase any security and does not form the basis of any contract or commitment. This presentation does not constitute investment advice and has been prepared without taking into account the recipient's investment objectives, financial circumstances or particular needs and the opinions and recommendations in this presentation are not intended to represent recommendations of particular persons. All recipients should consider seeking appropriate professional advice in reviewing this presentation and the Company.

Forward looking statements

- This presentation contains forward-looking statements. All statements other than those of historical facts included in this presentation are forward-looking statements. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, forward-looking statements are subject to risks, uncertainties and other important factors, which could cause actual results performance or achievements or industry results to differ materially from any future results performance or achievements expressed, projected or implied by such forward-looking statements. Such risks include, but are not limited to, gold and other metals price volatility, currency fluctuations, as well as political and operational risks and governmental regulation and judicial outcomes. The Company does not undertake any obligation to release publicly any revisions to any information or any forward-looking statement in this presentation of any changes in events, conditions or circumstances on which any such forward-looking statement is based. Undue reliance should not be placed on any forward looking statements.

Reliance on third party information

- The views expressed in this presentation contain information that has been derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. This presentation should not be relied upon as a recommendation or forecast by the Company.

Confidentiality

- The contents of this presentation are highly confidential. The presentation and its contents must not be reproduced or distributed by the recipient to any third party, including the press. Each person who has received a copy of this presentation (whether or not such person subscribes for shares in the Company) is deemed to have agreed: (i) not to reproduce or distribute this presentation, in whole or in part, without the prior written consent of the Company, other than to the recipient's legal, tax, financial and other advisors on a need to know basis, (ii) without the prior written consent of the Company, not to disclose any information contained in this presentation except to the extent that such information was (a) previously known by such person through a source (other than the Company) not bound by any obligation to keep such information confidential, (b) in the public domain through no fault of such person, or (c) lawfully obtained at a later date by such person from sources (other than the Company) not bound by any obligation to keep such information confidential, and (iii) to be fully responsible for, and indemnify the Company against, any disclosure of this presentation, or the information contained herein, by such person or any of its employees, agents or representatives in contravention of these terms of confidentiality.

Competent Persons Statement

- The information in this report that relates to exploration results is based on information compiled by Andrew Pumphrey who is a Member of the Australian Institute of Geoscientists and is a Member of the Australasian Institute of Mining and Metallurgy. Andrew Pumphrey is a full-time employee of OzAurum Resources Ltd and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Pumphrey has given his consent to the inclusion in this report of the matters based on the information in the form and context in which it appears. All results in this presentation have been previously disclosed in the Company's Prospectus dated 10 December 2020.

Investment Summary

- OzAurum Resources has two gold projects located in the Norseman-Wiluna Greenstone Belt of the Eastern Goldfields Province of the Yilgarn Craton: the Mulgabbie and Patricia Projects.
- The Managing Director and CEO, Andrew Pumphrey, began securing tenements at Mulgabbie from as early as 1990. The Mulgabbie Projects represent a strategic landholding in a proven gold belt near existing mine operations.
- Dual RC and Aircore drill rigs commenced 50,000m drilling program – extensive news flow and assays throughout the next period
- The Mulgabbie Projects represent a strategic landholding in a proven gold belt near existing mine operations. These areas are an important targets for future deep RC and diamond drilling.
- The Patricia Project encompasses the historic Patricia Gold Mine, which was operational until 1937 when production ceased.
- OzAurum Resources has assembled a skilled Board, comprising Directors who have a wide range of experience, with a proven track record of successful mineral exploration, discovery and development.
- OzAurum Resources has raised \$12 million via IPO to enable it to:
 - systematically undertake exploration and evaluation of OzAurum Resources' projects, aimed at a discovery of a mineral resource within those projects;

Directors & Management – Strong executive Leadership

Jeffrey Williams
Non-executive Chairman

Mr Williams has over 40 years' experience in the mining industry, with 16 years' experience as a professional mining engineer in Australia and seven years in the stockbroking industry. Mr Williams is a Fellow of the Australasian Institute of Mining and Metallurgy. His mining experience ranges from mine planning, underground management and feasibility studies through to mine development. Mr Williams was the Managing Director of Mineral Deposits Ltd for 15 years and departed in late 2011. He secured the Sabodala gold and Grande Cote zircon projects in Senegal in West Africa, and commenced gold production in March 2009. The market capitalisation of Mineral Deposits Ltd increased from A\$6m in 2003 to over A\$1b in 2011.

Andrew Pumphrey
Founder, Managing Director and CEO
*B.Sc. (Geology & Mineral Exploration),
Associate Diploma – Mine Surveying (WASM)
MAusIMM, MAIG*

Mr Pumphrey is a geologist and mine surveyor with over 30 years' experience in the mineral exploration industry. He has extensive field experience in exploring for gold, nickel, silver and zinc throughout Western Australia and has been involved with several underground and open pit gold operations. Based in Kalgoorlie since 1989, Mr Pumphrey has operated a successful exploration contracting business and has an extensive knowledge of the geology of the Eastern Goldfields. For the last five years, Mr Pumphrey has been working as the Operations Manager and General Manager for MacPhersons Resources Ltd and Horizon Minerals (ASX:HRZ). He previously worked as the Exploration Manager for MacPhersons Resources Ltd for four years.

Martin C Holland
Non-executive Director

Mr Holland is the co-founder, Chairman and Managing Director of Cobre Ltd (CBE:ASX). He is a known mining executive with over 12 years' experience in M&A and corporate finance. Mr Holland was the founder and CEO of Lithium Power International (LPI:ASX) from 2015 to 2018. During this period, Mr Holland raised in excess of A\$70m of new equity to progress LPI's projects from acquisition and further exploration to a definitive feasibility study. Mr Holland is the Chairman of Sydney based investment company, Holland International Pty Ltd, which has strong working relationships with leading institutions and banks across the globe.

Andy Tudor
Non-executive Director
BAppSc(Geol), MAusIMM, MAIG

Mr Tudor's experience has been gained over 34 years as a geologist in the mining industry. He has encompassed roles ranging from Managing Director/CEO of ASX listed companies to General Manager, Country Manager and Exploration Manager roles, as well as exploration and mine geology functions. Mr Tudor has also held the position of General Manager and Principal Consultant of a global mineral consulting firm where his role concentrated on project assessment, due diligence and evaluation studies, in conjunction with geological and resource assessments. Mr Tudor's career commenced exploring and mining gold in Western Australia and progressed to the varying gold and base metal environments of the Australasian/Pacific region.

Stephen Hewitt-Dutton
Company Secretary

Mr Hewitt-Dutton has over 20 years of experience in corporate finance, accounting and company secretarial matters. He is an Associate Director of Trident Capital Pty Ltd and holds a Bachelor of Business from Curtin University. Before joining Trident Capital Pty Ltd, Mr Hewitt-Dutton worked in a big 4 accounting firm and corporate accounting roles, and most recently was an Associate Director of Carmichael Corporate Pty Ltd, where he assisted clients by providing equity market, IPO and M&A advice and assistance. He has also held Financial Controller and Company Secretary positions for both public and private companies in excess of 15 years.

Capital structure

Capital Structure

1. The Company has issued 8 million options to existing shareholders exercisable at a 50% premium to the issue price of the IPO offer with a 5-year expiry. The Lead Manager will also receive broker options equating to up to 5% of the share capital of the Company (on a fully diluted basis) exercisable at a 50% premium to the issue price of the IPO offer with a 3-year expiry.

The Founder and Managing Director has compiled this portfolio of tenements over a 30 year period and 2021 is the year to advance extensive exploration

Andrew Pumphrey, a Kalgoorlie-Boulder geoscientist says increased interest from mining companies in a remote exploration district he has traversed for 30 years points to growing potential for it to hold new gold discoveries.

Sitting in the shadow of Saracen's Carosue Dam gold mine, the region, more than 100 km north-east of Kalgoorlie, has also become a hub for greenfields exploration.

Andrew Pumphrey and his associates have held leases around the historic Mulgabbie mining centre near Carosue Dam for three decades, a place that has been worked since 1903 and known as one of the few locations outside the Golden Mile that contain gold in tellurides.

He said increased activity from Saracen and promising drilling from St Barbara had given him more confidence in the prospectivity of the district.

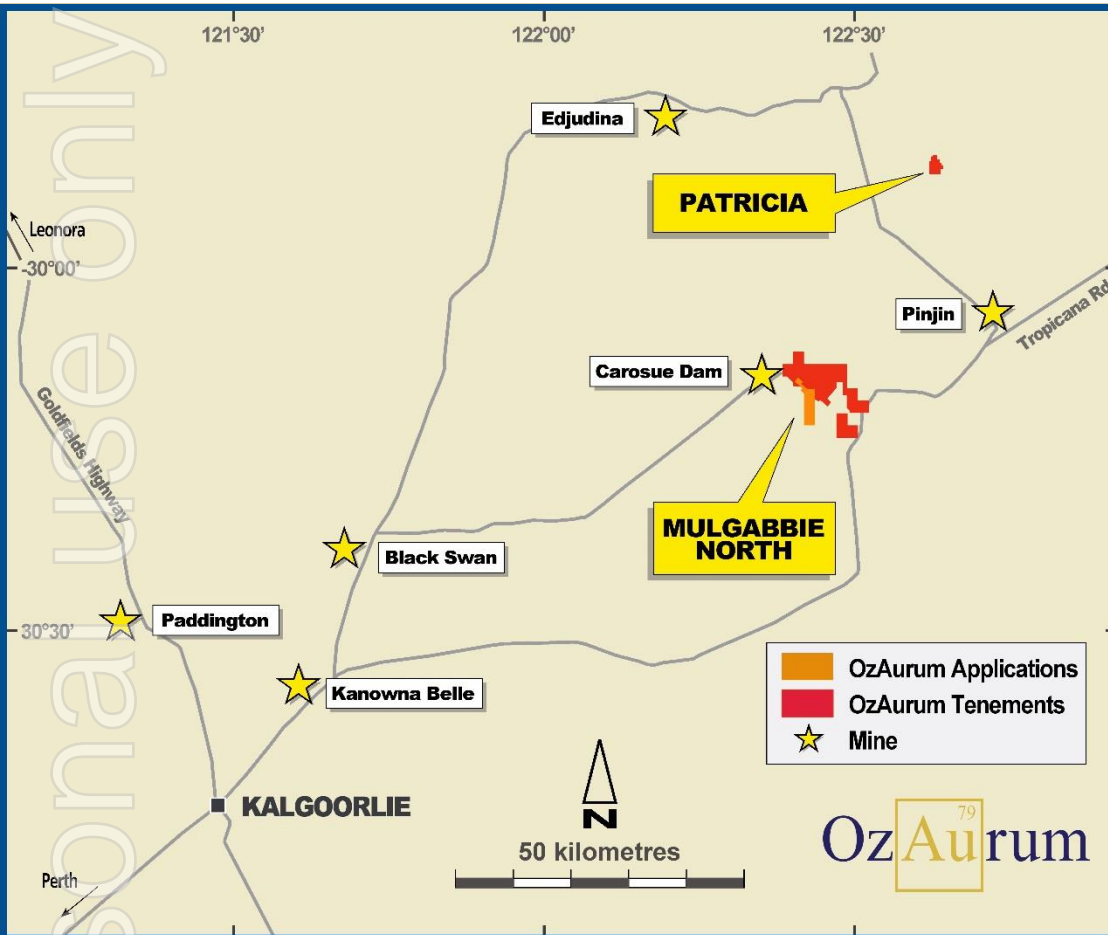

"There's been a considerable amount of alluvial gold that's come out of that area since I've been involved in it, probably well over 1000 ounces," he said.

"What's really interesting about it is you've got Breaker down that southern end with their new discovery (Bombora).

"You've got Apollo to the east at Lake Rebecca and then Carosue Dam."

Near Kalgoorlie Goldfield in Western Australia

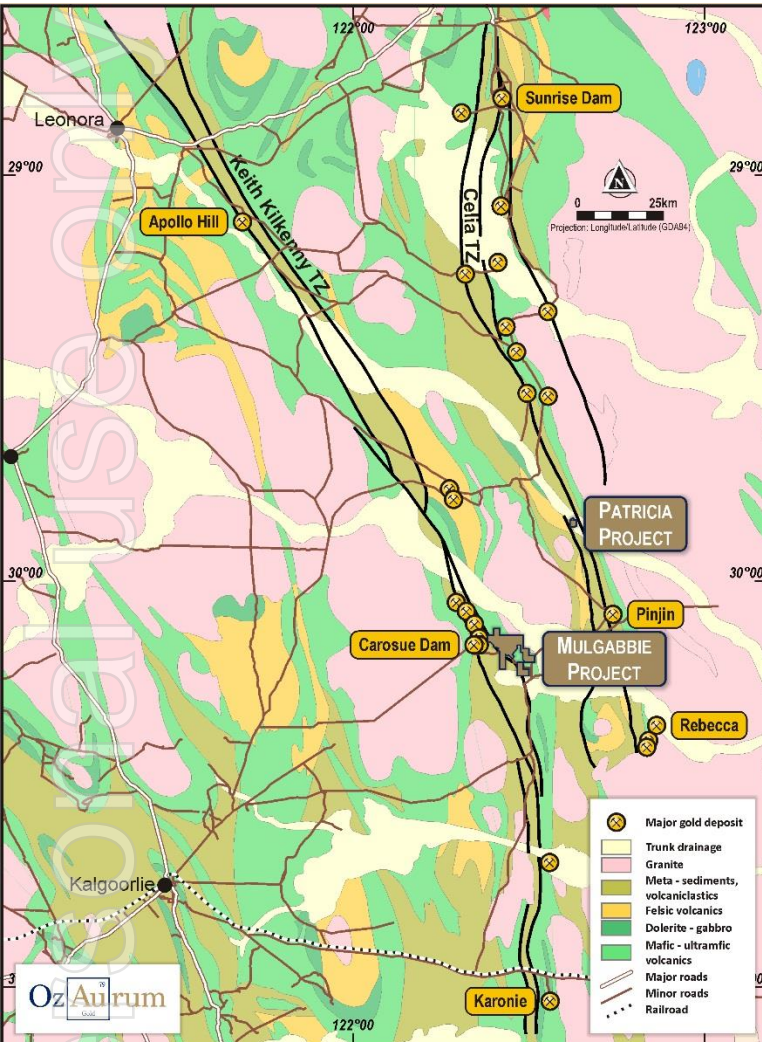

Strategic landholding secured in highly mineralised eastern Norseman-Wiluna Greenstone belt.

- 100% Ownership.
- Prospective and strategic exploration landholding via granted Mining Leases, Prospecting Licences, Exploration Licences and Miscellaneous Licences.
- A number of open pit and high grade underground gold mines in the region.
- Numerous drill-ready exploration targets - drill hole locations planned with contractors locked in.
- Access via the well maintained Kalgoorlie – Tropicana access road.

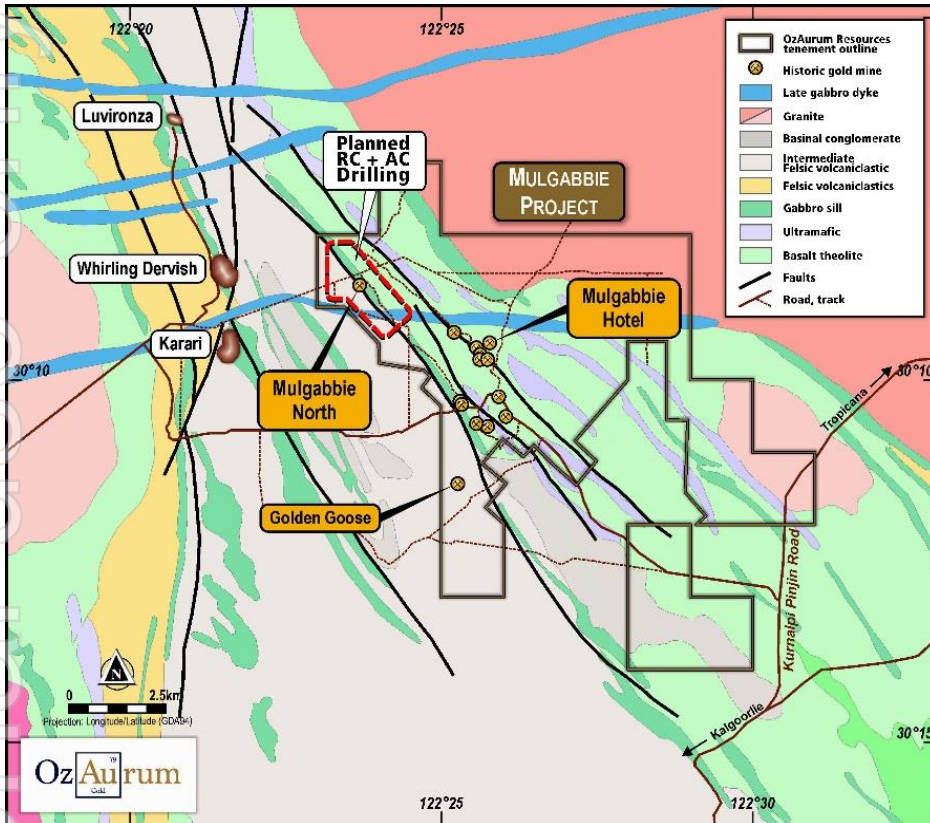

Plus Thirty Million Ounce Gold Province

- Mulgabbie North lies on the Relief Shear at the contact between the mafic and felsic sequences. This is a geological feature that has emerged as a locator of a significant gold mineralising system.
- Patricia is a high-grade gold project open at depth.
- This coveted gold producing region has hosted a number of plus-million ounce endowments.
- The Mulgabbie Perseverance and surrounding historical gold mines have historically produced some high grade gold Mineralisation, which is found on the contact between basalt and dolerite. These areas are an important target for future deep RC and diamond drilling.

50,000m Stage 1 Dual-Rig Exploration Program Commenced

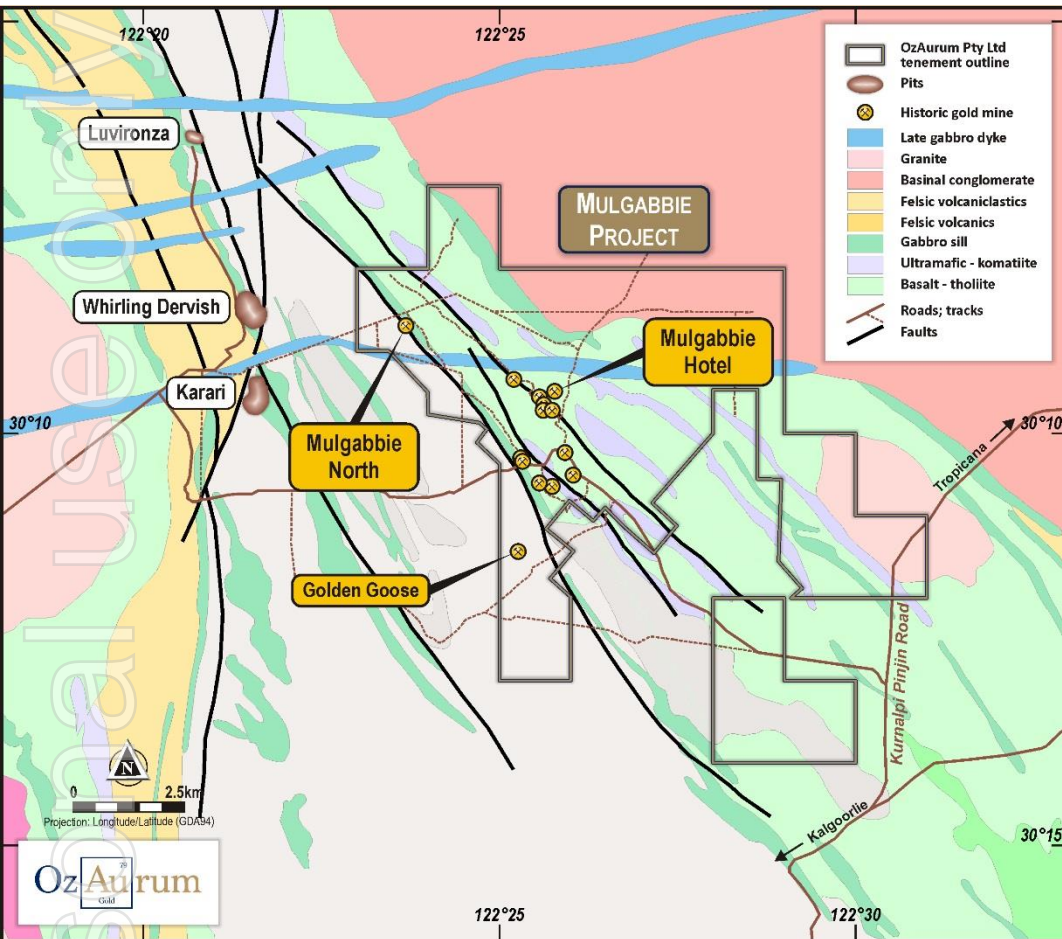

Stage 1 drilling campaign 20,000m RC + 30,000m Aircore

- Initial drilling focussed at Mulgabbie North - similar stratigraphy to the Carosue Dam sequence
- High priority RC targets James and Ben prospects along Relief Shear open at depth and along strike
- Mulgabbie North AC drilling testing gold geochemistry targets parallel to Relief Shear + 2km strike of the Relief Shear
- Multi Element BOH geochemistry on all AC holes aimed at increasing our understanding of the stratigraphy, alteration and vectors to high grade gold mineralisation
- Mulgabbie Camp + Offices and Infrastructure established ahead of drilling

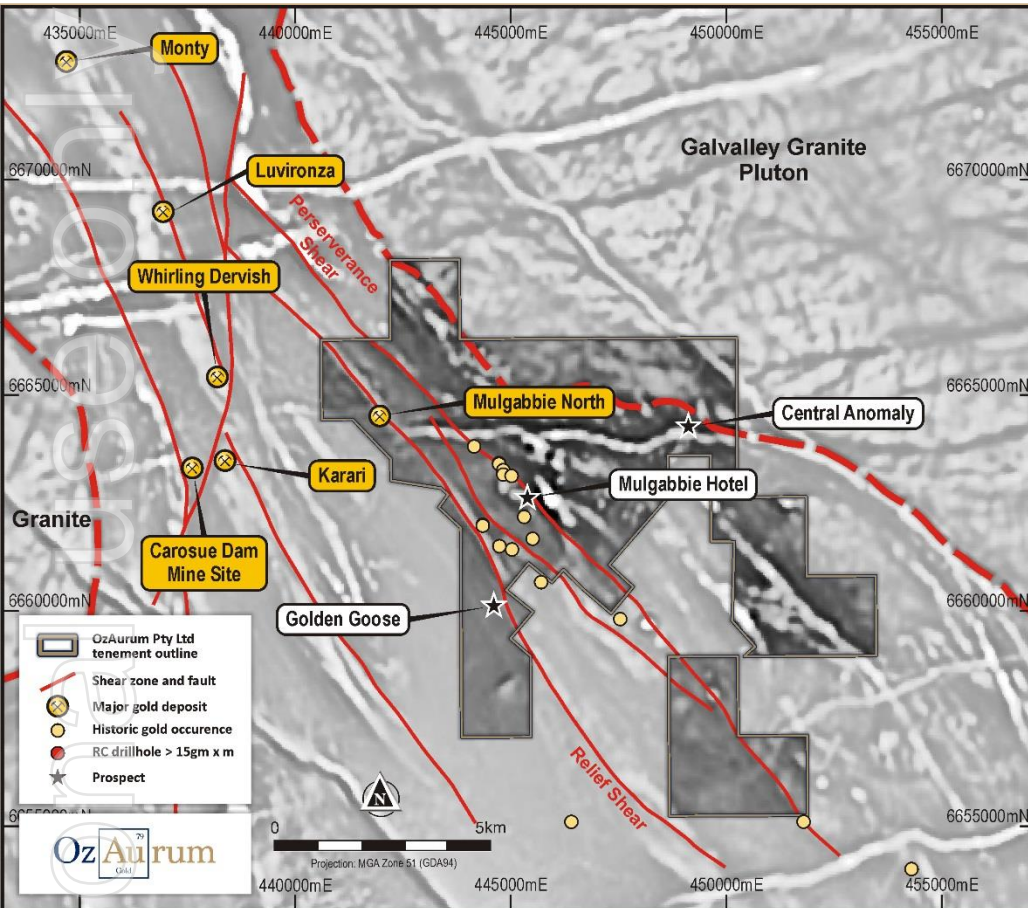

Mulgabbie Gold Projects – Overview

- Mulgabbie North is underexplored with limited drilling despite gold endowment in the belts.
- Extend and upgrade resource to JORC 2012 compliance.
- Gold mineralisation open at depth and along strike.
- OzAurum drilling has already commenced and assays received from Mulgabbie drilling.
- Drilling planned to establish JORC compliant resources and reserves in short to medium term.
20,000 metres Aircore Drilling; and
40,000 metres RC drilling

Opportunity for Multiple Deposits in defined gold corridor adjacent to Carosue Dam

Magnetic image of the Carosue Dam district showing local gold deposits within the main structures.

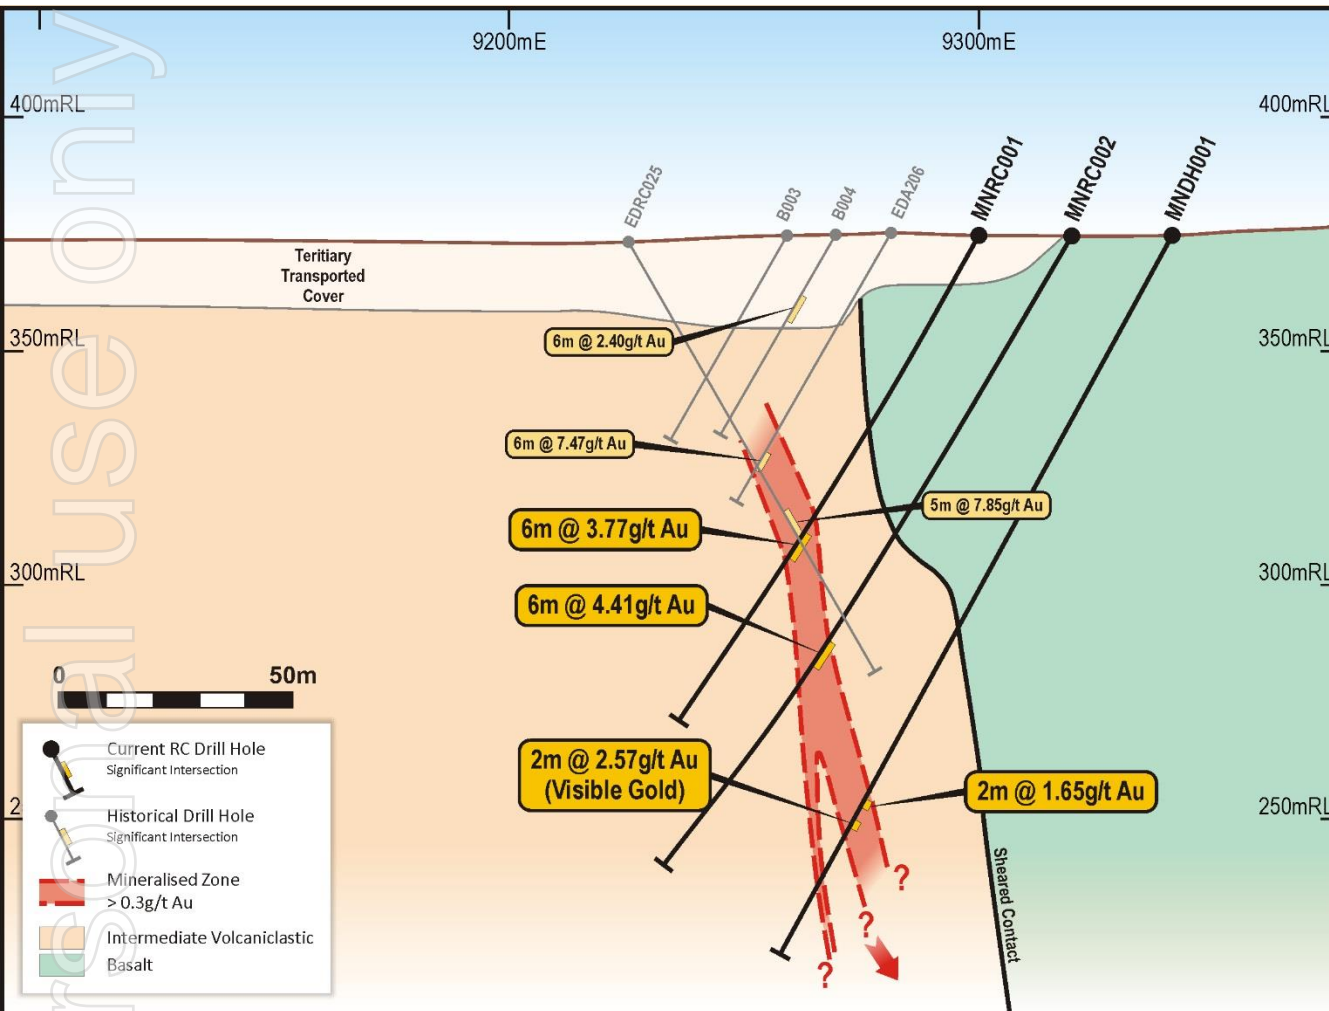

Exciting Potential

Mulgabbie Area contains highly encouraging exploration vectors:

- Major Trans Lithospheric Structure (Keith-Kilkenny Fault) – important structural locator of gold mineralisation in the Mulgabbie area.
- Greenschist facies metamorphism and sericite + carbonate alteration with pyrite and arsenopyrite which is a characteristic of large mesothermal lode Au deposits.
- Location of gold mineralisation occurring where flexures of 10–15° occur in strike of rock units.

Mulgabbie North Project – Significant Gold Discovery

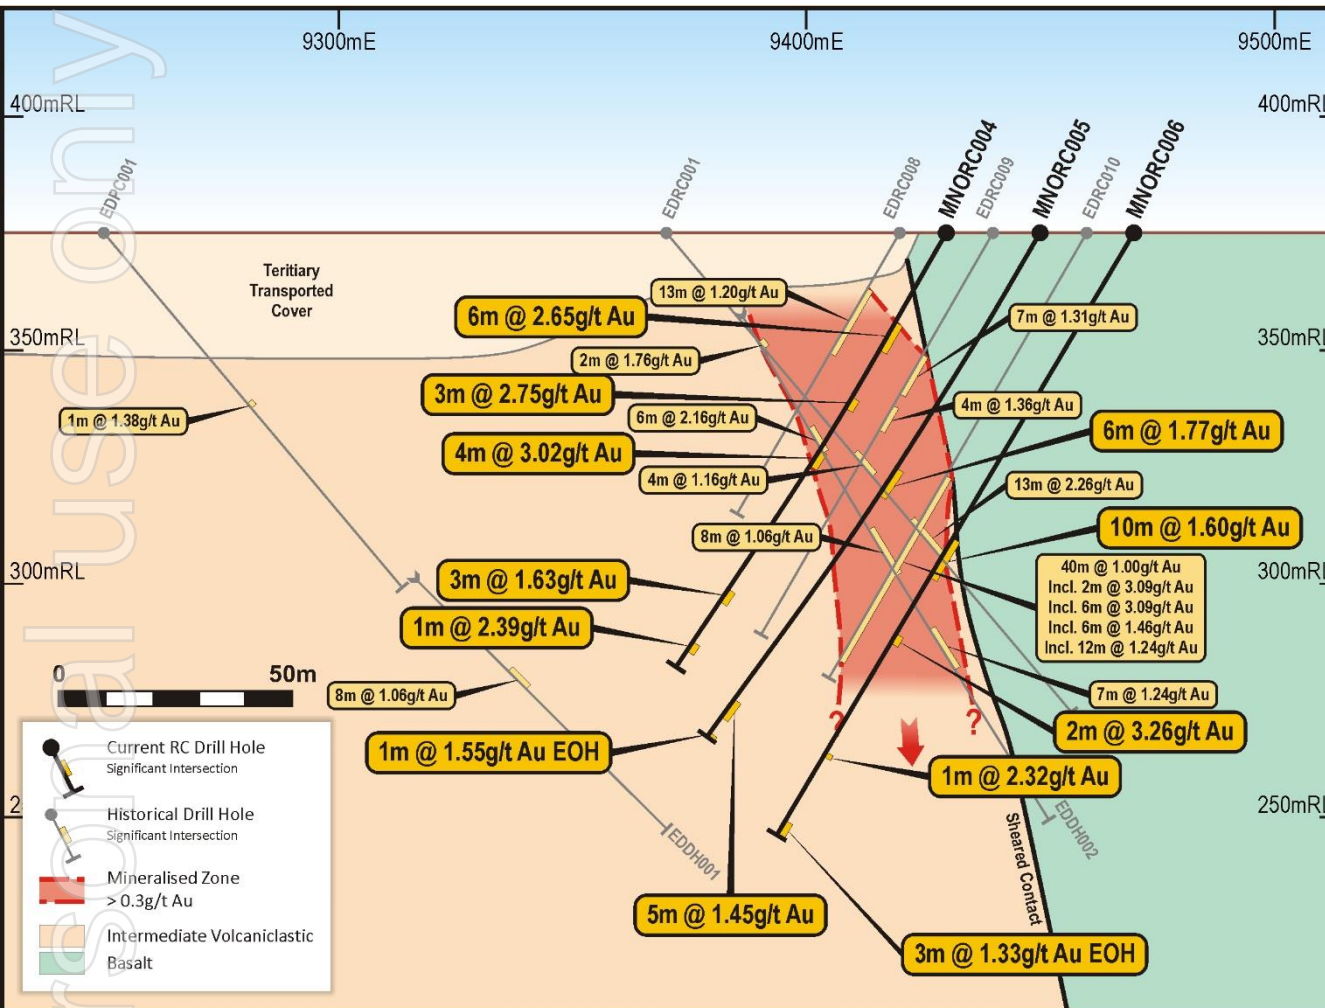

Mulgabbie North 8900N High Grade Gold Zone

EDRC 025	5m @ 7.85 g/t Au
inc	1m @ 23.0 g/t Au
MNRC 001	6m @ 3.77 g/t Au
inc	1m @ 9.06 g/t Au
MNRC 002	6m @ 4.41 g/t Au
inc	1m @ 9.57 g/t Au

- Extensive alteration and mineralisation footprint over 2km typical of a large gold system.
- Plans to extend and upgrade resource to JORC 2012 compliance beneath existing mineralisation.

Mulgabbie North Project – Significant Gold Discovery

OzAurum October 2020 RC + DD drilling - 9600 N zone selected results including:

MNORC 001	5m @ 2.21 g/t Au
MNORC 002	4m @ 1.68 g/t Au
MNORC 004	6m @ 2.65 g/t Au
MNORC 005	6m @ 1.77 g/t Au
MNORC 006	10m @ 1.60 g/t Au
MNORC 007	1m @ 4.38 g/t Au EOH
MNODH 001	5m @ 1.86 g/t Au
	5m @ 1.82 g/t Au
	5m @ 1.35 g/t Au

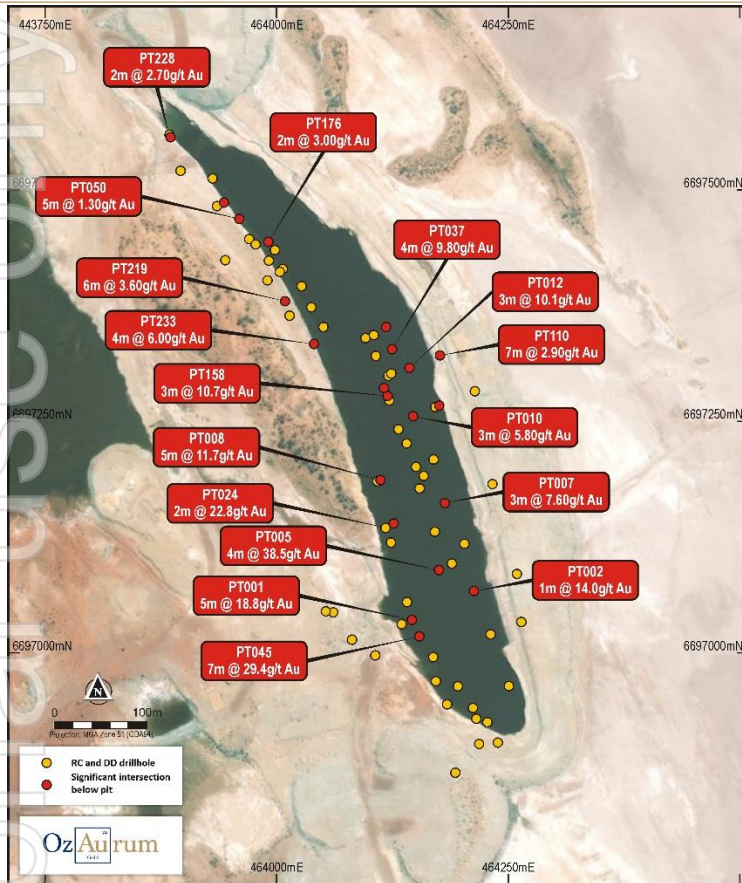

In conjunction with solid drill results including:

• Section 9600N

EDRC 001	30m @ 1.20 g/t Au
inc	13m @ 2.26 g/t Au
EDDH 002	6m @ 2.15 g/t Au
EDRC 010	40m @ 1.00 g/t Au
EDR 276	12m @ 2.72 g/t Au

Patricia Project –High Grade Gold Project

High grade historic gold production

Historical records show 4,115 tonne of ore was treated for 5,384 oz of gold

Only shallow RC + Diamond drilling undertaken

Diamond Drilling returned high grade intercepts beneath pit including:

PT 001	5m	@ 18.8 g/t Au	incl 1m @ 80 g/t Au
PT 005	4m	@ 38.4 g/t Au	incl 1m @ 147.5 g/t Au
PT 024	2m	@ 22.8 g/t Au	incl 1m @ 44.50 g/t Au

And below the historical pit on section 10450N:

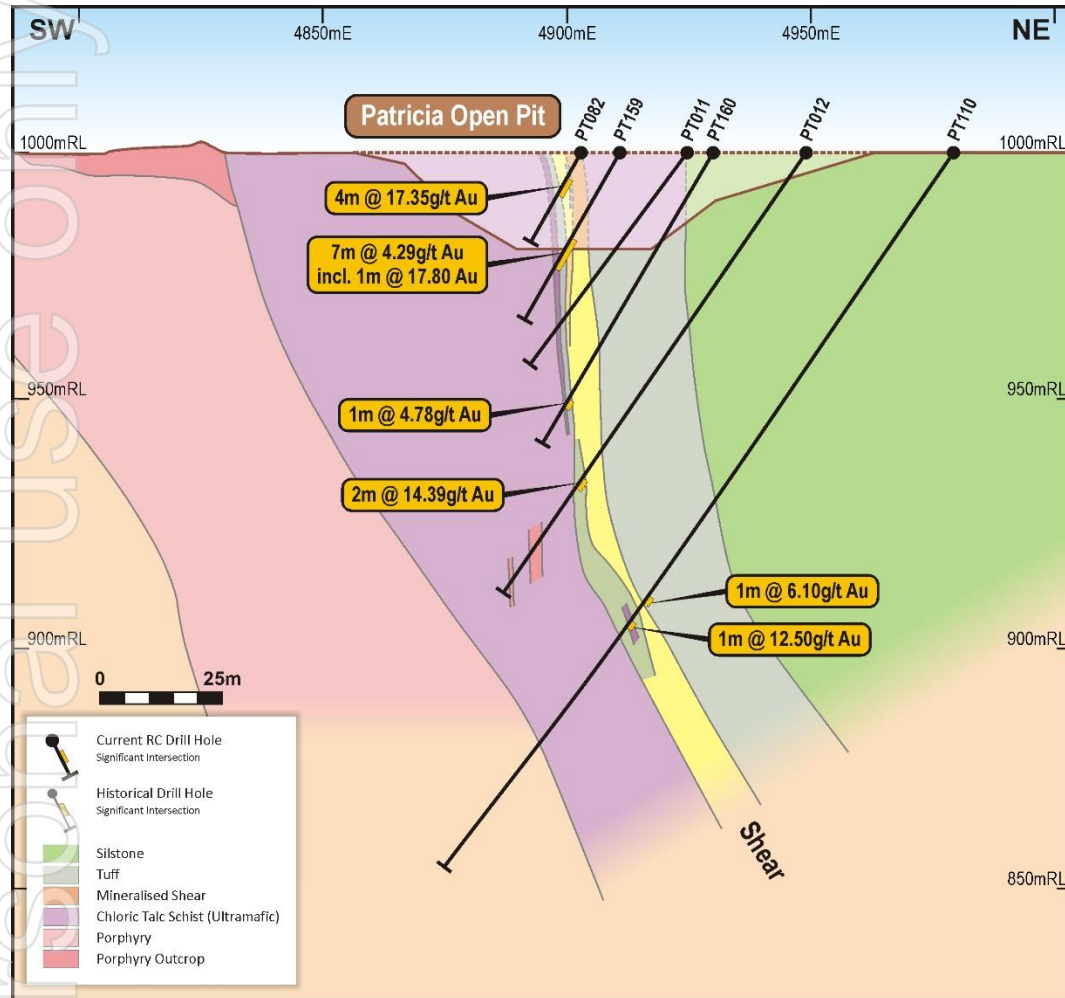

PT 012	2m	@ 14.39 g/t Au
PT 110	1m	@ 12.50 g/t Au
PT 159	1m	@ 17.8 g/t Au

Mineralisation is open at depth.

The project has had very limited exploration over the last 30 years (no drilling has been undertaken).

Patricia Project – High Grade Gold Project

- Open at Depth.
- Targeting high grade gold extensions.
- 12,000m of RC + diamond drilling planned.
- The main imperative is to establish a well controlled 3D geological model by extension drilling at depth and along strike, leading to a JORC 2012 resource.

Patricia pit looking south

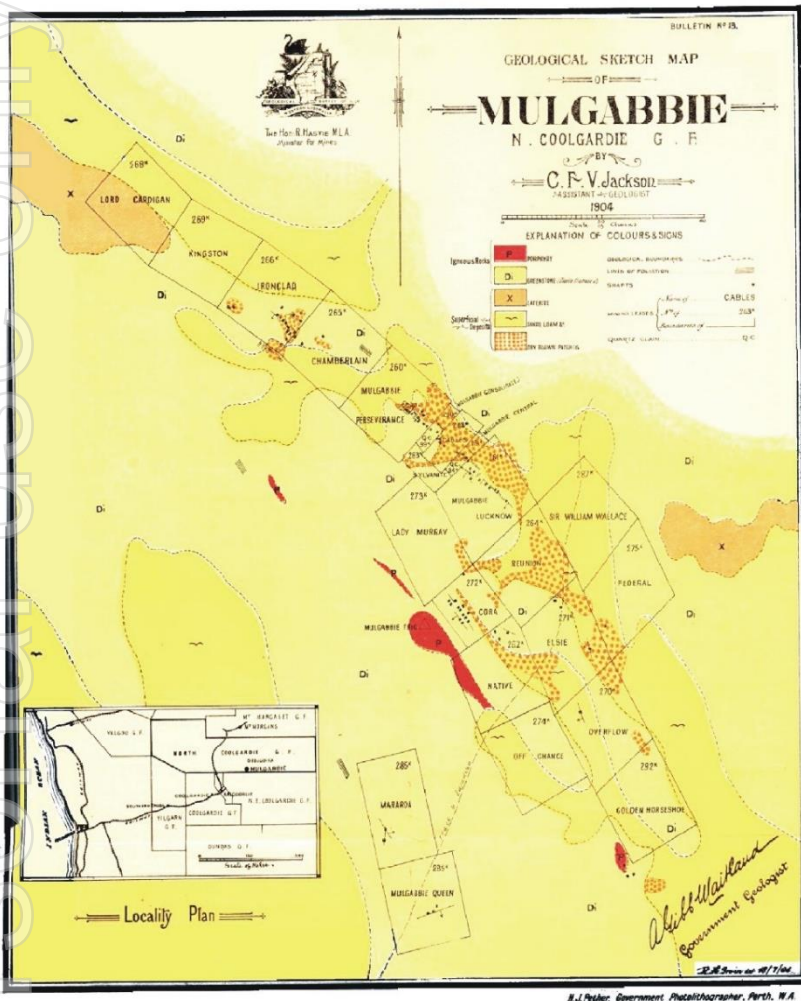

Mulgabbie Hotel Project – Historic Bonanza Gold Grades

- Historical gold production 1898 – 1940 7,706 oz produced at 34 oz/t or 1057 g/t.
- Vendor 1990 Underground tribute mining produced 20 tonnes at grade 64.8 g/t.
- 1,000 oz recent alluvial tribute gold production M28/364 Hotel.
- Dolerite hosted mineralisation and telluride mineralisation.
- Significant Intersections include:

RCMC 7	22m @ 2.22 g/t Au from 4m
RCMC 3	10m @ 2.64 g/t Au from 26m
RCMC 6	12m @ 2.29g/t Au from 46m

Photograph: Mulgabbie high grade underground gold ore M28/364 -1990 underground mining operation

A. H. Wallman, Government Geologist, Perth, W.A.

Scheduled Work Plan

- OzAurum plans to focus on the exploration of the Mulgabbie Project and Patricia Project, with the objective of discovering significant economic gold deposits capable of being developed.

Mulgabbie Gold Project	Q1 2021	Q2 2021
Aircore drilling - Mulgabbie North	•	•
Reverse Circulation drilling - Mulgabbie North	•	•
Drone Magnetometer Survey Mulgabbie	•	

Patricia Gold Project	Q1 2021	Q2 2021
Reverse Circulation drilling		•
Open Pit Dewatering permitting	•	•
Drone Magnetometer Survey	•	
Heritage Survey	•	

Why OzAurum?

- Focused gold exploration on projects in strategic locations.
- Strong Board with required technical skills.
- Projects located in the heart of WA Goldfields - excellent infrastructure and multiple milling opportunities.
- The projects closely neighbour a number of existing mining operations and gold processing plants.
- The Mulgabbie Perseverance and surrounding historical gold mines have historically produced high grade gold.
- Granted Mining Leases and Miscellaneous Licenses in place – potential accelerated path to production.
- Long-standing relationships with existing stakeholders built up from working in the area for 30 years.

Alluvial Gold found on OzAurum tenements

1. OzAurum Mines Pty Ltd (**OzAurum Mines**) has acquired a 100% interest in all of the Tenements and Tenement Applications pursuant to the completion of the Option Agreements. Transfer of the Tenements from the Registered Holders to OzAurum Mines cannot be lodged for registration with the DMIRS until the Duty is assessed and paid, and the stamped documents are received. Accordingly, the Registered Holders listed above remain as the registered holders of the Tenements until such time as they can be transferred to OzAurum Mines. The Tenement Applications are currently held on trust for OzAurum Mines by the Registered Holders pursuant to the Option Agreements. If the Tenement Applications are granted, OzAurum Mines will apply to become the registered holder of those tenements.
