Management outlined the following at our Full Year Presentation, on 19 August 2020:

See DPE FY20 Market Presentation, “Living With COVID-19” slide 40

Management is prepared for a medium-term future living with COVID-19; Domino's will rise to the challenge

Likelihood of a mix of above-trend sales, temporary closures and short-term investments are not possible to quantify

DPE is however well placed to respond: our strategy, store footprint, and franchisees are right for this time.

What delivered us to now, allows us to build a confident future

Domino's outlook for new store openings and Same Store Sales growth remains unchanged

In all regions we intend to put people first, and grow market share:

- To prioritise the safety of our customers and team members ✓
- To invest in 'distressed' media ✓
- To seek out growth opportunities ✓
- To be agile ✓
- To strengthen our franchisee base ✓
- To refine operations, to grow carry-out and delivery ✓
- To prepare for more value-focused customers ✓

Multi-year program to strengthen the franchisee base continues to improve performance during rapidly changing times

- Improved DPE margins through refranchising corporate stores, leverage, and reduced COVID-19 specific support to stores
- Domino's is not accepting government support in FY21: and \$792,000 JobKeeper assistance received in FY20 in Australia has been returned to the ATO

- The Australian Government has issued a response to the Parliamentary Joint Committee on Corporations and Financial Services inquiry into the operation and effectiveness of the Franchising Code of Conduct: the Fairness in Franchising report
- In response the Australian Government will implement a range of measures to reform how franchising is regulated, to restore confidence in the industry
- Domino's supported the recommendations and had already taken proactive steps to be best practice in franchising
 - Mandating legal and financial advice for sub-franchisees prior to joining the Domino's system
 - Moving from annual to quarterly AdFund statements
 - Substantially increasing the required training for prospective franchisees
 - As has always been the case, franchisees have the right to purchase like products from any supplier – DPE aims to be the lowest cost provider
- The majority of organic new stores and refranchising of corporate stores is to internal candidates (existing Domino's franchisees or experienced store managers).
- Franchising is a key component of Domino's success and management is committed to continued improvement.

OUR PURPOSE & VALUES WILL CONTINUE TO SHAPE OUR SUCCESS

Domino's is prepared for ongoing uncertainty into calendar year 2022

- Societal restrictions will continue to affect all markets differently
- Digital delivery growth is strong – COVID-19 has brought forward the 'Age of Delivery'
- Carry-out orders remain challenging in most regions – and present an opportunity post COVID-19
- All regions seek growth opportunities, including distressed marketing and real estate
- Management has not observed an anticipated shift to austerity

“Aligning our business with a single purpose and being relentlessly focused on this purpose, will give the best opportunity of delivering.” – AGM, 2019

THE KEY TO WINNING AND RETAINING CUSTOMERS

- New products and occasions – including our chicken ‘box and a bucket’ – are winning and retaining new customers

EUROPE – LOOKING FORWARD

Domino's expects to open a record number of new stores in Europe in FY21

- Franchisees have risen to the challenge: **engagement and profitability is very strong, lead by Germany**
- All markets maximising the opportunity to grow delivery; **aiming to rebuild carry-out orders when restrictions ease**
- Continuing high levels of COVID-19 in European markets, coupled with social restrictions, will affect short-term carry-out

Germany

- Strong sales, profitability and store roll-out give management and franchisees heightened optimism over medium-term
- Germany has been trading extremely well; margin partially offset by DPI royalty step-up in H2

France

- Positive franchisee alignment will lift new store openings in H221 – Network Sales growth will reflect market closure in pcp

Benelux

- Franchisees have traded well despite difficult conditions and will target carry-out opportunity as restrictions allow

Denmark

- Short-term losses continue, as anticipated, as we repair the brand and invest in new stores to build-out the market
- Customers are embracing the 'real' Domino's brand and continued reputational improvement is ongoing, as expected

ANZ – LOOKING FORWARD

Management is confident in franchisees' capability to navigate the ongoing effects of COVID-19

- All stores are well-placed for delivery growth and rebuilding carry-out (which remains challenged, including in NZ)
- ANZ short-term soft commodity headwinds anticipated in H221, which are expected to moderate in H122
- Digital delivery has been strong – Domino's will retain new customers with additional menu options and Project 3TEN
- Technology development, focused on lifting already high levels of delivery performance (including *Call on Arrival*)

Operations 360 continues to lift franchisee performance and is an ongoing feature of ANZ operations

- Improved insights have delivered new fortressing opportunities and positive performance in newly opened stores
- Continued improvement in franchisee capability and store performance will deliver network expansion:

Organic new store openings will accelerate in H221 and refranchising of corporate stores will continue

JAPAN – LOOKING FORWARD

Franchising expected to reach 50% milestone in 2021: ahead of plan

- National changes to store ingredient distribution, including dough making in stores, are opening up new regions
 - New, white space areas are now proving successful targets for expansion
 - **Four franchised stores have recently opened in Hokkaido (pop. 5.2m people)** – and trading at extraordinary levels
 - New stores will continue to open in new prefectures (incl. Hokkaido)
- **Management is very confident of ongoing expansion in the Japan market**
- As a result of rolling over extraordinary SSS figures in H220, H221 SSS forecasts are difficult to predict

The proven ability for Domino's Japan to execute during rapid growth has set a new benchmark for the future

1) H121 vs. H120 growth, excluding AASB16 and significant Charges

CLASS ACTION

- The Company rejects the allegations and has been defending the action vigorously. A defence denying the allegations has been filed and an application to have the statement of claim (or parts thereof) struck out was heard on 9 June 2020
- A decision on the strike out application is yet to be handed down
- The statement of claim does not quantify any loss by the lead applicant or the alleged group and, to date, the applicant's solicitors have not indicated how many members form part of the alleged group
- Accordingly, the Company remains unable to determine any potential obligation or financial impact arising from the alleged damages claimed in the proceeding

SPEED RABBIT PIZZA

- Domino's Pizza France is involved in eight separate proceedings. One has been resolved finally in favour of DPF. One has not yet been heard at first instance. In the other six proceedings, the Court has ruled in favour of DPF at first instance but those decisions are in various stages of appeal. DPE denies all claims made and is vigorously defending the proceedings brought against it. DPE is confident of its legal position

PIZZA SPRINT

- Multiple separate proceedings have been brought in relation to matters which occurred before the Company's ownership of the France market. In one proceeding, the Court's decision did not result in any fine or financial charges but is being appealed by the plaintiffs. In other proceedings, DPF was ordered to pay a total of €3 million. DPF is appealing these decisions

APPENDIX 8 – NETWORK & SAME STORE SALES CALCULATION

55

- **Same Store Sales are calculated weekly, measured in local currency**

- Same Store Sales is the process of comparing year-on-year growth of existing mature stores
- Stores are included after two years of trading (either two years of DPE, or one year pre-acquisition plus one year of DPE)
- Where a delivery territory is fortressised with the opening of a new store, both the existing and new store(s) are excluded until two years of like-for-like trading data is collected
- During COVID-19 – stores that were closed for greater than a week are not included in Same Store Sales calculations for the period of their closure
- The above provides a normalised estimate of performance from a like-for-like group of stores that continued to trade at a point in time

- **Network Sales are calculated in both local currency and AUD**

- Network Sales growth includes sales for all stores
- Stores are included from the first day of trading
- Where a delivery territory is fortressised, the Network Sales from both stores are included at all times
- During COVID-19 – closed stores have zero Network Sales

DPE HAS TAKEN A CONSISTENT APPROACH TO MEASURING SSS AND NETWORK SALES GROWTH SINCE LISTING

- A number of figures in the tables and charts in this presentation pack have been rounded to one decimal place. Percentages (%) and variances have been calculated on actual figures

Statutory Profit and Underlying Profit:

- Statutory profit is prepared in accordance with the Corporations Act 2001 and Australian Accounting Standards (AASB), which comply with International Financial Reporting Standards (IFRS)
- Underlying profit is the Statutory profit contained in Appendix 4D of the Domino's Financial Report, adjusted for significant items specific to the period. Comparisons to prior periods in financial statements are generally made on an underlying basis, rather than statutory. Where highlighted in this document, Statutory results have been adjusted for significant items (as shown in previous Market Presentations)
- Underlying Profit after tax is reported to give information to shareholders that provides a greater understanding of the performance of the Company's operations. DPE believes Underlying Profit after tax is useful as it removes significant items thereby facilitating a more representative comparison of financial performance between financial periods. Underlying Profit is a non-IFRS measure which is not subject to audit or review
