2. REVIEW AND RESULTS OF OPERATIONS

Results of the Company's operations during the period ended 31 December 2020 are as follows:

- A net profit after tax of \$32,038,801 was recorded for the period. This included gains and losses on investments, interest income, dividend income and changes in the fair value of financial assets designated at fair value through profit and loss held as at 31 December 2020. The primary reason for the significant increase in profitability is due to the movement in market prices for listed investments held in the investment portfolio for the period 30 June 2020 to 31 December 2020;
- An interim dividend of \$4,011,129 (3.0 cents per share) has been provided for at 31 December 2020; and
- Net assets per share was 128.0 cents per share at 31 December 2020. This figure is calculated by dividing the net assets as set out in the Statement of Financial Position by the number of ordinary shares on issue as at the reporting date and is after allowance for dividends and all costs.

After considering the above results following the completion of the half-year to 31 December 2020, the Directors remain confident that the Company's objectives will be met over its investment horizon.

**WESTOZ INVESTMENT COMPANY LIMITED
FOR THE HALF-YEAR ENDED 31 DECEMBER 2020**

NOTES TO THE FINANCIAL STATEMENTS

4. Changes in fair value of investments at fair value through profit or loss

	31/12/2020 \$	31/12/2019 \$
Net realised gain in the current period on disposal of investments		
- listed equities	5,205,379	6,216,531
Net unrealised gain on investments		
- listed equities	46,494,599	14,688,169
	<u>51,699,978</u>	<u>20,904,700</u>

The primary reason for the change in fair values was movement in market prices for listed investments held in the investment portfolio. The fair values of the Company's financial assets have been affected by changes in the broad economic and fiscal environment as well as specific matters that impact the value of individual investments. Specific factors that have impacted the portfolio are changes in outlook for interest rates, commodity prices and economic growth. Individual stock positions have been impacted by changes in earnings expectations, balance sheet structures and ability to generate cash flow. Managing the investment portfolio in the face of these and other changes is inherent in the Company's activities and they are managed in accordance with the financial risk management objectives and policies as disclosed in the most recent annual financial report of the Company.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The following table shows financial instruments recorded at fair value, analysed between those whose fair value is based on quoted market prices, those involving valuation techniques where model inputs are observable in the market and those where the valuation technique involves the use of non-market observable inputs. The fair value of all other financial instruments approximates their carrying value.

	31 December 2020			Total
	Valued at Quoted market price (Level 1)	Valuation Technique market observable inputs (Level 2)	Valuation Technique non – market observable inputs (Level 3)	
Financial assets and liabilities at fair value through profit or loss

	185,605,597	-	-	185,605,597

**WESTOZ INVESTMENT COMPANY LIMITED
FOR THE HALF-YEAR ENDED 31 DECEMBER 2020**

NOTES TO THE FINANCIAL STATEMENTS

4. Changes in fair value of investments at fair value through profit or loss (cont'd)

	30 June 2020			Total
	Valued at Quoted market price (Level 1)	Valuation Technique market observable inputs (Level 2)	Valuation Technique non – market observable inputs (Level 3)	
Financial assets and liabilities at fair value through profit or loss				
<i>Listed equities - long</i>	127,660,234	-	-	127,660,234
	127,660,234	-	-	127,660,234

The level in which instruments are classified in the hierarchy is based on the lowest level input that is significant to the fair value measurement in its entirety. Assessment of the significance of an input requires judgement after considering factors specific to the instrument.

The fair value of listed equity is based on quoted market prices at the reporting date (bid price for long positions), without any deduction for transaction costs.

For instruments for which there is currently no active market the Company uses valuation methods generally accepted in the industry. Some of the inputs to those methods may not be market observable and are therefore estimated based on assumptions. In the case of unlisted equities, recent transactional evidence has been obtained that supported the current valuation. If, in the future, similar transactions occur at significantly different values, the fair value of unlisted equities will be revised appropriately.

5. Management Fee

Deferred tax assets in the prior year relate to unrealised losses on investments in financial assets and recognised tax losses. The recognition of these assets was based on an assessment that it is probable that future taxable profits would be generated against which these assets can be utilised.

The company believed that such future taxable profits would be generated based on the following:

- The manager has in the past demonstrated an ability to generate taxable profits requiring cash tax payments to be made;
- The manager has a medium to long term investment strategy so future profitability should be judged over an extended period; and
- Return expectations for the market and the portfolio remain consistent with historical results over a reasonable time horizon.

Auditor's responsibility

Our responsibility is to express a conclusion on the half-year financial report based on our review. We conducted our review in accordance with Auditing Standard on Review Engagements ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*, in order to state whether, on the basis of the procedures described, anything has come to our attention that causes us to believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including: giving a true and fair view of the Company's financial position as at 31 December 2020 and its financial performance for the half-year ended on that date; and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*. **Building a better
working world**

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Independence

In conducting our review, we have complied with the independence requirements of the *Corporations Act 2001*.
