FREELANCER LIMITED

How big is the market?

“160 million jobs, or about 11% of the projected 1.46 billion services jobs worldwide, could in theory be carried out remotely, barring any constraints in supply”*

* McKinsey Global Institute, The Emerging Global Labor Market, Part I: The Demand for Offshore Talent in Services.

Estimated demand for Web Design services (mid-high OECD)

Freelancer's global web design revenue opportunity estimated as \$2.7 billion per annum (\$10.5b GPV)

- Freelancer's estimated global web design revenue opportunity at c.\$2.7 billion (\$10.5b GPV).
- This is as a replacement of existing business only- there is also potential upside from opening up of new demand from lower cost labour services
 - e.g. for the first time, a café can get a website for c.\$100
- Indicative calculation:
 - web design in the US alone is US\$20 billion + industry¹
 - wages constitute US\$12 billion of this
 - more than 50% of software engineering jobs can be outsourced at 30% of US wages²
 - US\$1.74 billion in wages outsourced @ 27.8% monetisation rate = c.A\$678 million revenue opportunity for Freelancer in the US (Total Available Market)⁴
 - there are 28 million small businesses in the US, but at least 96 million more in other mid-high income OECD countries³
 - from this we estimate the global opportunity is $(96+28)/28 = \text{c.}4.4\text{x}$ larger than the US market

Comparison of hourly labour cost, index (US = 100)²

1. IBISWorld, "Web Design Services in the US" (August, 2013).

2. McKinsey Global Institute, "The Emerging Global Labor Market: Part III: How Supply and Demand for Offshore Talent Meet" (June, 2005).

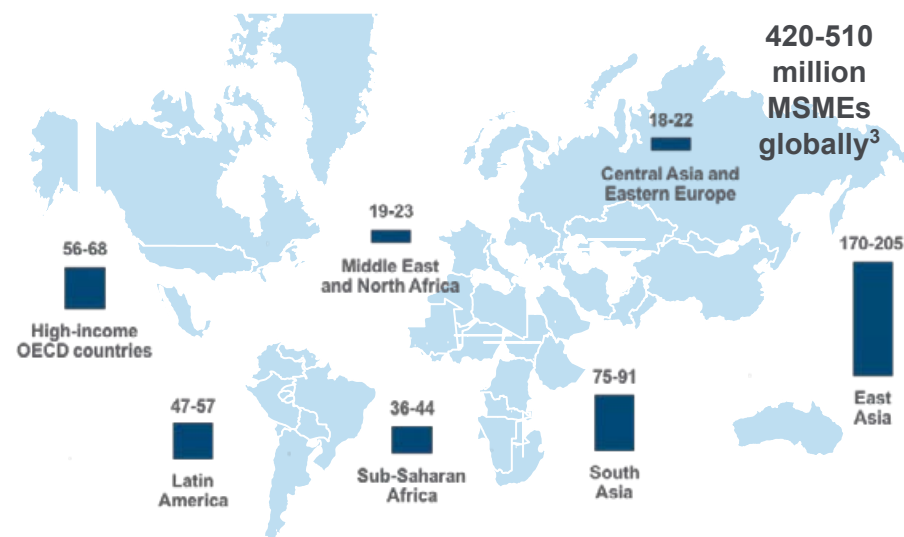

3. Based on 28m SMEs in the US, 96m MSMEs outside the US in mid-high income OECD countries.

4. Based on AUD/USD exchange rate of 0.7132.

Estimated demand from mid-high income OECD SMEs

Global small business revenue opportunity estimated as \$48 billion per annum (620 million projects, \$181 billion GPV)

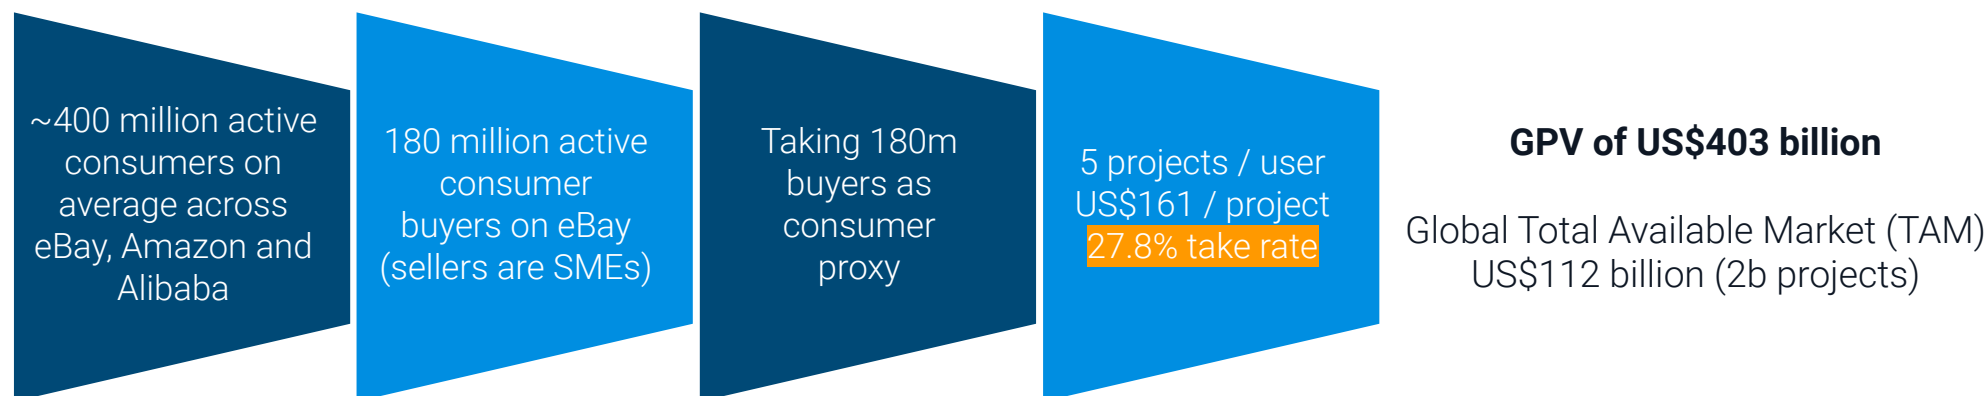

- There are about 28 million small businesses in the US
 - 22 million of these are informal non-employers (yet generate >\$1 trillion per annum in revenue)¹
- US job posters who posted more than one project posted on average 4.97 projects in 2016²
- Average project size in FY19 was US\$216, generating revenue of \$60 to Freelancer (27.8% monetisation rate)²
 - Implies A\$11.7 billion TAM (A\$42 billion GPV, 140 million projects) from US SMEs
- But there are 420 – 510 million micro, small and medium enterprises (MSMEs) globally³
- 96 million are formal employer MSMEs outside the US in mid-high income nations⁴
 - Additional A\$40 billion TAM (A\$144 billion GPV, 480 million projects)
- Estimated global TAM from MSME market of c.\$52 billion (A\$186 billion GPV, 620 million projects)
- This excludes another 100m+ informal (unregistered) MSMEs in high income nations globally including non-employer firms, sole proprietors and partnerships which could add materially to Freelancer's revenue opportunities

1. US Government, Small Business Administration Office of Advocacy.
2. Based on Freelancer internal statistics. Average paid value of completed project was US\$216 in FY19. Monetisation rate = \$50.4m / 181.41m = 27.8%
3. McKinsey Global Institute, "Two trillion and counting: Assessing the credit gap for micro, small, and medium-size enterprises in the developing world" (October, 2010).
4. World Bank Statistics, International Finance Corporation. Excludes informal MSMEs including non-employer firms, sole proprietors and unincorporated partnerships.

Estimated demand from consumers

Product marketplaces as proxy of consumer demand indicates TAM of US\$108 billion (2b projects, US\$410b GPV)

				
2019/TTM Revenue	US\$10.9 billion	US\$281 billion	US\$64 billion	A\$58 million
2018 GMV/GPV	US\$94.6 billion	US\$258 billion ²	US\$547 billion ⁴	A\$181 million

- 2030 projected global labour force: 3.5 billion¹
- Of the 4.8 billion working age in the developing world:
 - 46% have a secondary education²
 - 10% have a tertiary education
- In the Philippines, tertiary education rose from 9% to 22% (13m) 1980-2010
 - Brazil, China, India @ 7 to 9%, yet produce c.5m STEM grads per annum³

- There are 220 million people with a tertiary degree between India, China, Brazil, Philippines, Malaysia, Indonesia, Egypt, Sri Lanka and Nigeria
- c.5 billion people to join the Internet over next decade that earn <\$10/day
- They have very little assets however are educated and can sell their services

 - McKinsey Global Institute has estimated that “160 million jobs, or about 11% of the projected 1.46 billion services jobs worldwide, could in theory be carried out remotely, barring any constraints in supply”
- In the US alone, the temporary labour market is estimated to be in the order of \$100 billion¹
