WAM Active Limited (WAA) ACN 126 420 719

Dear Shareholder,

The WAM Active Limited Board of Directors is pleased to present a one-for-one Bonus Issue of Options to all Shareholders of the Company, at no additional cost.

Each WAM Active Option provides holders with the right, but not the requirement, to purchase one additional WAM Active Share for \$1.10 per Option, without paying brokerage fees. The options can be exercised anytime, up until 31 October 2022. Shares issued on options exercised on or before 13 May 2021 and held at the dividend record date will receive the fully franked interim dividend of 3.0 cents per Share, which represents an annualised fully franked dividend yield of 5.5% and a grossed-up dividend yield of 7.8%, on the exercise price of \$1.10 per Option.

WAM Active's investment approach provides Shareholders with exposure to an active trading style and has led to strong investment portfolio performance throughout the Company's history. Since inception in 2008, the WAM Active investment portfolio has increased 12.0%* per annum. I am excited by the opportunity to significantly grow the Company's assets to the benefit of all Shareholders.

The investment portfolio currently holds 6.8%, as at 23 February 2021, in cash and the investment team sees significant opportunities that fit the WAM Active investment process. Lead Portfolio Manager Oscar Oberg and the team discussed their positive outlook and a selection of market mispricing opportunities during the [Interim Results Webinar](#) on 2 February 2021.

Advantages of increasing the Company's capital base

The Board believes that the Issue is an equitable and effective way to grow the Company's assets. As the Company's size increases, on-market liquidity for the Shares is also expected to increase, making it easier for Shareholders to buy and sell the Company's Shares. By increasing the size of the Company, this will increase the Company's relevance in the market, improve the prospect of broker and research coverage, increase interest from financial planners and gain additional access to market opportunities. Finally, the increased size is also expected to reduce the fixed expense ratio of the Company to the benefit of all Shareholders.

Advantages of the Issue for Shareholders

- The Options will trade on the ASX and may trade above or below their intrinsic value;
- Shareholders can sell their Options on-market or buy additional Options; and
- By exercising Options, Shareholders can increase their holding in the Company without incurring any brokerage fees, and at a fixed price that is below the current market price.

Dividends

On 2 February 2021, the Board announced a fully franked interim dividend of 3.0 cents per Share. The interim dividend represents an annualised fully franked dividend yield of 5.5% and a grossed-up dividend yield of 7.8%, based on the exercise price of \$1.10 per Option. Shares issued on options exercised on or before 13 May 2021 will receive the fully franked interim dividend of 3.0 cents per Share. The fully franked interim dividend will be paid on 28 May 2021 and the Shares will trade ex dividend on 18 May 2021.

The Company's profits reserve is currently 12.0 cents per Share, representing 2 years dividend coverage, and forms part of the net tangible assets (NTA) of the Company. Since inception, WAM Active has paid 74.7 cents per Share in fully franked dividends to Shareholders. The Company aims to pay dividends on a six-monthly basis, provided the Company has sufficient profits reserves and franking credits, and it is within prudent business practices. This is an investment objective of the Company rather than a forecast. The Company may not be successful in meeting this objective.

Use of the additional capital

No capital will be raised from the issue of the Options. If 72,549,447 Options are issued and those Options are fully exercised, the Company will raise approximately \$79.8 million.

The proceeds of the additional capital raised from the exercise of Options will be invested in accordance with the Company's proven and disciplined investment process. WAM Active's investment objectives are to deliver investors a regular income stream via fully franked dividends, provide a positive return with low volatility, after fees, over most periods of time and to preserve capital.

If the Investment Manager does not identify an opportunity using its investment approach, it will revert to cash. The average cash holding since inception is 38.1%.

The Investment Manager's principal activity is to make investments in Australian listed equities. The Company aims to maximise Shareholder returns by taking advantage of relative short term arbitrage opportunities and mispricing in the Australian equities market, in order to deliver a combination of growth and income. The Investment Manager scours the market for opportunities to undertake investments on a portfolio basis. To implement the strategy, the Investment Manager will employ Wilson Asset Management's proven investment process of market-driven investing, which is focused on delivering absolute returns in all market cycles. The investment portfolio is actively traded and during the 2020 financial year, the equity component of the portfolio turned over 3.9 times. See Section 7.1 to 7.2 for further details.

Prospectus and the Issue

The Board recommends you read this Prospectus carefully and in its entirety before making a decision to deal in Shares and Options. If you have any questions about the Prospectus, please contact your professional adviser. This Prospectus provides details of the Issue and an overview of the business and activities of the Company. Each Option entitles Shareholders the opportunity, but not the obligation, to subscribe for one additional WAM Active Share at the exercise price of \$1.10 per Option at any time on or before 5:00pm (Sydney time) on 31 October 2022.

The Board is focused on growing the Company and creating Shareholder value and believes the Bonus Option Issue will promote growth of the Company's assets by providing further opportunity for the investment team to identify and invest in companies that fit the investment process and increase its relevance in the market. A Bonus Option Issue delivers further benefit to Shareholders as the owners of the Company by increasing their claim to any future income and capital growth without incurring any brokerage fees.

On behalf of the Board of Directors, I thank you for your continued support.

Yours sincerely

Geoff Wilson AO
Chairman
WAM Active Limited

¹Investment portfolio performance and Index returns are before expenses, fees and taxes.

²Grossed-up dividend yield includes the benefits of franking credits and is based on a tax rate of 30.0%.

3. Risk factors

3.1 Risk factors

Intending investors should be aware that dealing in and exercising Options involves various risks. There are general risks associated with owning Securities in publicly listed companies. The price of Securities can go down as well as up due to factors outside the control of the Company. Some of these factors include global economic and political stability, natural disasters, performance of the domestic and global share markets, interest rates, foreign exchange, taxation and labour relations environments.

The operating results and profitability of the Company are sensitive to a number of factors. The following matters, as well as others described elsewhere in this Prospectus, should be carefully considered in evaluating the Company and its prospects:

- (a) The success and profitability of the Company in part depends upon the ability of the Investment Manager to identify market mispricing and trading opportunities and to invest in well-managed companies which have the ability to increase in value over time. Even if the Company does not perform well, it may be difficult to remove the Investment Manager;
- (b) The future earnings of the Company and the value of the investments of the Company may be affected by the general economic climate, commodity prices, currency movements, changing government policy and other factors beyond the control of the Company. As a result, no guarantee can be given in respect of the future earnings of the Company or the earnings and capital appreciation of the Company's investments;
- (c) Variations in legislation and government policies could materially affect operating results;
- (d) All investments carry the risk that their value may be affected by changes in laws and regulations, especially taxation laws. Regulatory risk includes risk associated with variations in the taxation laws of Australia or other jurisdictions in which the Company holds investments. Any variation in the taxation laws of Australia could materially affect the operating results;
- (e) Any variation in foreign exchange rates could materially affect the operating results;
- (f) Any variation in short and long term interest rates could materially affect the operating results through their effect on the price of a security and the cost of borrowing;
- (g) Any variation in commodity prices could materially affect the operating results;
- (h) There is a risk that Shares will fall in value over short or extended periods of time. Historically, shares have outperformed other traditional asset classes over the long term. Share markets tend to move in cycles, and individual share prices may fluctuate and underperform other asset classes over extended periods of times. Shareholders in the Company are exposed to this risk both through their holding in Shares and Options in the Company as well as through the Company's Portfolio;
- (i) The past performance of the Company and other entities managed by the Investment Manager, and persons associated with the Investment Manager, are not necessarily a guide to future performance of the Company. The success and profitability of the Company will largely depend on the Investment Manager's continued ability to manage the Portfolio in a manner that complies with the Company's objectives, strategies, policies, guidelines and permitted investments. A failure to do so may negatively impact the Company and its Securities. In addition, there are risks inherent in the investment strategy that the Investment Manager will employ for the Company;
- (j) Short selling securities involves borrowing stock and selling these borrowed securities. Short selling is subject to the theoretically unlimited risk of loss because there is no limit on how much the price of a security may appreciate. Additionally, there is a risk that the Securities lender may request return of the Securities. These risks may give rise to the possibility that positions may have to be liquidated at a loss and not at a time of the Investment Manager's choosing;
- (k) The selling or purchasing of an unhedged option or warrant runs the risk of losing the entire investment or of causing significant losses to the Company in a relatively short period of time;
- (l) The Investment Manager may receive compensation based on the Company's performance. This performance fee may create an incentive for the Investment Manager to make investments that are riskier or more speculative than would otherwise be the case;
- (m) The Company's Portfolio may be less diversified than other listed investment companies;

- (n) Shareholders are reminded that any investment in the Company should be regarded as a long term proposition and to be aware that, as with any equity investment, substantial fluctuations in the value of their investment may occur; and
- (o) The ability of the Investment Manager to continue to manage the Company's Portfolio in accordance with this Prospectus and the Corporations Act is dependent on the maintenance of the Investment Manager's AFSL and its continued solvency. Maintenance of the AFSL depends, among other things, on the Investment Manager continuing to comply with the ASIC imposed licence conditions and the Corporations Act.

4. Terms of the Issue

4.1 The Issue

The Issue is a one-for-one bonus issue of Options, each Option being exercisable into one Share at an exercise price of \$1.10 per Option.

No funds will be raised by the grant of the Options. If the maximum number of Options are issued under this Prospectus and are subsequently exercised, the Options issued would raise approximately \$79,804,392.

The Issue is made to all Shareholders registered at 7:00pm (Sydney time) on the Record Date being, 25 March 2021.

The maximum number of Options which may be issued is approximately 72,549,447. This maximum number assumes that

- the Company has issued the maximum number of Shares possible under the SPP and Placement, which close on 17 March 2021; and
- 100% of the Company's issued Share capital on the Record Date is held by Eligible Shareholders.

The number of Options which you have been issued is shown on the Option Exercise Form. You do not need to take any action to receive the Options.

If you would like to exercise your Options you can do so by returning a completed Option Exercise Form to the share registrar or the Company and paying \$1.10 per Option to the Company by BPAY® or cheque.

4.2 Rights attaching to Options

On exercise, the Options will be converted to fully paid ordinary Shares in the Company. Detailed provisions relating to the rights attaching to Options and Shares are set out in the Company's Constitution and the Corporations Act. A copy of the Constitution can be inspected during office hours at the registered office of the Company.

See Section 9.3 for a summary of the rights attaching to the Options and Section 9.4 for the rights attaching to the Shares.

4.3 ASX quotation of the Options

Within 7 days after the date of this Prospectus, application will be made to the ASX for the Options to be quoted on the ASX.

If the ASX does not give permission for quotation of the Options within 3 months after the date of this Prospectus (or a later date permitted by ASIC), none of the Options will be issued and if any have been issued, the issue will be void, unless ASIC grants an exemption permitting the Issue.

It is expected that quotation of the Options will initially be on a deferred settlement basis.

4.4 Issue and allotment of Options

No Options or other securities will be issued on the basis of this Prospectus later than the expiry date of this Prospectus being the date 13 months after the date of this Prospectus.

It is expected Options will be issued on 26 March 2021. It is anticipated that Option Exercise Forms in relation to the Options will be despatched on 29 March 2021.

It is the responsibility of Shareholders to determine their allocation prior to trading in Options. Shareholders who sell any Options before they receive their Option Exercise Form will do so at their own risk.

4.5 Overseas Shareholders

The Options are not offered in any jurisdiction in which, or to any person to whom, it would be unlawful to make such an offer.

The Company may form the view that it is unreasonable to make the Issue to overseas Shareholders in jurisdictions (Excluded Holders) having regard to:

- (a) the number of Excluded Holders within the relevant jurisdiction;
- (b) the number and value of Shares held by those Excluded Holders; and
- (c) the cost of complying with overseas legal requirements within the relevant jurisdiction.

The Issue is not being extended, and does not qualify for distribution or sale, and the Options may not be issued to a Shareholder with a registered address outside Australia and any other jurisdiction in which it is not lawful to make the offers of Options in accordance with this Prospectus.

5.3 Performance to 31 December 2020

The table below sets out the Company's performance for various periods ending 31 December 2020. The performance data excludes all expenses, fees and taxes and is used as a guide to how the Company's Portfolio has performed against the S&P/ASX All Ordinaries Accumulation Index which is also calculated before tax and expenses. The Investment Manager has an absolute return approach to investing and therefore the Company also measures its performance against the Bloomberg AusBond Bank Bill Index, representing the return on cash, which is shown in the table below.

Performance as at 31 December 2020	Fin YTD	1 Yr	3 Yrs %pa	5 Yrs %pa	10 Yrs %pa	Since inception %pa (Jan-08)

Outperformance	+2.9%	+4.1%	+1.0%	+1.0%	+3.1%	+7.2%

Investment portfolio performance and Index returns are before expenses, fees and taxes.

The performance table for the relevant periods has been calculated on the basis of the following assumptions:

1. The performance of the S&P/ASX All Ordinaries Accumulation and Bloomberg AusBond Bank Bill Indices is based on trading data prepared by Bloomberg. Bloomberg has not consented to the use of this data in this Prospectus.
2. The above table is not intended to be an indication of future performance of any asset class, index or the Portfolio.

3. The Company's performance for each of the periods set out above reflect the annualised percentage changes in the value of the Company's Portfolio. The Company's performance has been calculated:
 - a) by reference to the last sale price on the ASX for each investment on the last trading day of each month and the amount of cash maintained by the Company as at that date;
 - b) on a monthly basis, compounded and then annualised over the relevant period;
 - c) by including on an accruals basis dividends, interest and other distributions;
 - d) before the payment of all expenses and fees;
 - e) without taking into account any value derived through imputation credits; and
 - f) before income tax expenses. The Company considers that the presentation of performance before income tax expense allows the Company's performance to be compared to the S&P/ASX All Ordinaries Accumulation Index and the Bloomberg AusBond Bank Bill Index.
4. The Company's performance has been presented as a percentage in order to compare it with the S&P/ASX All Ordinaries Accumulation Index and the Bloomberg AusBond Bank Bill Index.

Past performance of the Company or any other entities managed by the Investment Manager is not indicative of the future performance of the Company.

7. Overview of the Company

7.1 Investment objectives

The Company's investment objectives are to deliver investors a regular income stream via fully franked dividends, provide a positive return with low volatility, after fees, over most periods of time and to preserve capital.

The Company's ability to pay fully franked dividends is subject to the Company having sufficient profits reserves and franking credits available and it is within prudent business practices to do so.

The above is not intended to be a forecast, it is merely an investment objective of the Company. The Company may not be successful in meeting this objective.

7.2 Investment process

WAM Active provides investors with access to the Investment Manager's market-driven investment process. The market-driven process takes advantage of short-term mispricing opportunities in the global equity market, rather than investing in any individual companies or a portfolio of companies for a prolonged period of time. Opportunities are derived from initial public offerings, placements, block trades, rights issues, corporate transactions (such as takeovers, mergers, schemes of arrangement, corporate spinoffs and restructures), arbitrage opportunities, LIC discount arbitrages, short-selling and trading market themes and trends.

The Company's investment process is further detailed in Section 2 of the original Prospectus dated 6 November 2007, available on the Company's website (www.wilsonassetmanagement.com.au).

7.3 Permitted investments

Under the Investment Management Agreement, the Investment Manager is permitted to undertake investments on behalf of the Company without Board approval. However, if the proposed investment is not in accordance with written guidelines issued by the Board from time to time, Board approval for the investment is required.

Under the Investment Management Agreement, the Investment Manager may invest in:

- listed securities, being any security quoted on the ASX and other markets including, without limitation, shares, units or notes which are redeemable, preference or deferred, fully or partly paid, with or without any corresponding right, title or interest (including a right to subscribe for or convert to any such Security whether listed on the ASX or not), and any security of whatsoever nature which the Investment Manager expects will be quoted on the ASX within a 12 month period from the date of investment, and any security that has been listed on the ASX and subsequently becomes delisted;
- listed securities on any global stock market where the security is also listed on the ASX;
- warrants and options to purchase any investment and warrants and options to sell any investment which is a permitted investment;
- discount or purchase of bills of exchange, promissory notes or other negotiable instruments accepted, drawn or endorsed by any bank, or by any corporation of at least an investment grade credit rating granted by a recognised credit rating agency in Australia;
- debentures, unsecured notes and bonds of a corporation of at least an investment grade credit rating granted by a recognised credit rating agency in Australia;
- units or other interests in cash management trusts; and
- any other financial products with which the Investment Manager may use in the management of the Portfolio in accordance with its AFSL.

7.4 Dividend policy

The Board is committed to paying a stream of fully franked dividends to Shareholders, provided the Company has sufficient profits reserve and franking credits, and it is within prudent business practices. On 2 February 2021, the Board of Directors declared a fully franked interim dividend of 3.0 cents per Share. The Company has a profits reserve of 12.0 cents per Share as at 31 December 2020, representing 2 years dividend coverage, and forms part of the net tangible assets (NTA) of the Company. Since inception in January 2008, WAM Active has paid 74.7 cents per Share in fully franked dividends to Shareholders. The Company's ability to generate franking credits is dependent primarily upon the payment of tax on profits, as well as the receipt of franked dividends. This is not intended to be a forecast, it is merely an objective of the Company. The Company may not be successful in meeting this objective in the future.

Should the SPP and the Placement result in the issue of the maximum of 25,743,351^{*} additional Shares, on completion of the Bonus Option Issue the maximum number of Options on issue will be 72,549,447 Options. If 72,549,447 Options are issued, and subsequently exercised, the number of Shares on issue would increase to 145,098,894 Shares.

^{*} Assumes that the Company issues 30% (14,041,828 Shares) of Shares already on issue permissible under the Share Purchase Plan and 25% of Shares already on issue permissible under the Placement (utilising WAM Active's 15% (7,020,914 Shares) placement capacity under the ASX Listing Rules and the additional 10% (4,680,609 Shares) Placement capacity approved by Shareholders at the AGM (where applicable)).

9.2 Legal proceedings

The Company is not and has not been, during the 12 months preceding the date of this Prospectus, involved in any legal or arbitration proceedings which have had or may have a significant effect on the financial position of the Company. As far as the Directors are aware, no such proceedings are threatened against the Company.

9.3 Rights attaching to the Options

The terms and conditions of the Options are as follows:

Register

The Company will maintain a register of holders of Options in accordance with Section 168(1)(b) of the Corporations Act.

Transfer/transmission

An Option may be transferred or transmitted in any manner approved by the ASX.

Exercise

On exercise, the Company will issue a Share for each Option exercised. An Option may be exercised by delivery to the Company of a duly completed Option Exercise Form, signed by the registered holder of the Option, together with payment to the Company of \$1.10 per Option being exercised.

An Option may be exercised on any business day from issue to 5:00pm (Sydney time) on 31 October 2022 (inclusive), but not thereafter.

A Option Exercise Form is only effective when the Company has received the full amount of the exercise price in cash or cleared funds.

Dividend entitlement

Options do not carry any dividend entitlement. Shares issued on exercise of Options rank equally with other issued Shares of the Company on and from issue.

Participating rights

For determining entitlements to the Issue, optionholders may only participate in new issues of Securities to holders of Shares in the Company if the Option has been exercised and Shares allotted in respect of the Option before the record date. The Company must give at least 4 business days notice to optionholders of any new issue before the record date for determining entitlements to the issue in accordance with the Listing Rules.

If between the date of issue and the date of exercise of an Option, the Company makes one or more rights issues (being a pro rata issue of Shares that is not a bonus issue), the exercise price of options on issue will be reduced in respect of each rights issue according to the following formula:

$$NE = OE - \frac{E [P - (S + D)]}{(N + 1)}$$

Where:

NE is the new exercise price of the Option;

OE is the old exercise price of the Option;

E is the number of underlying Shares into which one Option is exercisable;

P is the average closing sale price per Share (weighted by reference to volume) during the five trading days ending on the day before the ex rights date or ex entitlements date (excluding special crossings and overnight sales);

S is the subscription price for Shares under the rights issue;

D is the dividend due but not yet paid on each Share at the relevant time; and

N is the number of Shares that must be held to entitle holders to receive a new Share in the rights issue.

If there is a bonus issue to the holders of Shares in the capital of the Company, the number of Shares over which the Option is exercisable will be increased by the number of Shares which the holder of the Option would have received if the Option had been exercised before the record date for the bonus issue.

Reconstructions and alteration of capital

Any adjustment to the number of outstanding Options and the exercise price under a re-organisation of the Company's share capital must be made in accordance with the ASX Listing Rules.

ASX Listing

The Company must make application for quotation of Shares issued on exercise of the Options on the ASX in accordance with the Listing Rules. Shares so issued will rank equally with other issued Shares of the Company.

9.4 Rights attaching to the Shares

The following information is a summary of the terms of issue of Shares as contained in the Company's Constitution. Shareholders have the right to acquire a copy of the Company Constitution, free of charge, from the Company until the expiry of this Prospectus.

Each Share confers on its holder:

- the right to vote at a general meeting of Shareholders (whether present in person or by any representative, proxy or attorney) on a show of hands (one vote per Shareholder) and on a poll (one vote per Share on which there is no money due and payable) subject to the rights and restrictions on voting which may attach to or be imposed on Shares (at present there are none);
- the right to receive dividends, according to the amount paid up on the Share;
- the right to receive, in kind, the whole or any part of the Company's property in a winding up, subject to priority given to holders of Shares that have not been classified by ASX as "restricted securities" and the rights of a liquidator to distribute surplus assets of the Company with the consent of members by special resolution; and
- subject to the Corporations Act and the Listing Rules, Shares are fully transferable.

The rights attaching to Shares may be varied with the approval of Shareholders at a general meeting by special resolution.

9.5 Investor considerations

Before deciding to exercise your Options, you should consider whether the Shares to be issued and allotted on exercise of the Options are a suitable investment for you. There are general risks associated with any investment in the stock market. The value of shares listed on the ASX may rise or fall depending on a range of factors beyond the control of the Company.

If you are in doubt as to the course you should follow, you should seek advice on the matters contained in this Prospectus from a stockbroker, accountant, solicitor or other professional adviser immediately.

The potential tax effects relating to the Issue will vary between Shareholders. Shareholders are urged to consider the possible tax consequences of participating in the Issue by consulting a professional tax adviser.

- prepare and lodge with ASIC both yearly and half-yearly financial statements accompanied by a Directors' statement and report and an audit or review report;
