Review of Operations

In 2020, Reece Group took decisive action to protect the business while remaining focused on accelerating long term growth.

The business has efficiently responded to a dynamic and changing environment, ensuring consistent service and support for its customers who were relied on to provide essential services throughout the period.

The embedded position of Reece's branch network and an expanding digital offering supported a record performance in the first half of FY21.

Enhancements to digital services and accelerated adoption through the pandemic, resulted in a 70% increase in online sales compared to the first half of last year.

In the US, the focus on operational fundamentals and building a great culture to enable the customer experience continues.

Solid customer demand drove sales revenue growth in both of the Reece Group's regions for HY21.

In Australia and New Zealand sales revenue was \$1,564m, up 7% on the prior year, and the US delivered sales revenue of \$1,509m, up 7% on a constant currency US dollar basis and up 1% when converted to Australian dollars.

The business is well positioned to capitalise on potential growth opportunities, as and when they arise.

Dividend

The Board has declared a full franked interim dividend of 6.0 cents per share. The record date for the dividend is 30 March 2021 and it will be paid on 15 April 2021.
