RCR awarded Crushing Plant contract for Fortescue Metals Group

NRW Holdings Limited (ASX:NWH) is pleased to announce that wholly owned subsidiary RCR Mining Technologies have been awarded a \$27.2m contract for the Design and Construction of a Primary Crushing Plant (PCP) at Fortescue Metals Group's (ASX:FMG) Cloudbreak mine.

After successful delivery of the previous Hopper 9 Crushing Facility at Fortescue's Cloudbreak mine in early 2020 this award is strategically significant for the business as it showcases our engineering led delivery of innovative solutions. RCR is partnering with Primero Group who will provide engineering support and construction services. This project will be complimentary and concurrent to the Solomon Hub Conveyor and Crushing plant we are currently delivering for Fortescue Metals Group, announced earlier this year.

NRW subsidiaries, RCR Mining Technologies and DIAB Engineering, together with Primero, bring a very strong Design, Manufacture and Construction capability to this project with an engineering led philosophy of solutions and innovation.

We look forward to working with the Fortescue team to deliver another Crushing project.

NRW CEO Jules Pemberton said, "I'm delighted that our Minerals Energy and Technology team of RCR Mining Technologies, DIAB and Primero are able to collaborate once again on another project for Fortescue and continue to innovate through smarter engineering solutions".

This ASX Announcement has been approved in accordance with the Company's published continuous disclosure policy and authorised for release by the Chief Executive of NRW Holdings Limited.

Kim Hyman
Company Secretary

About NRW Holdings Limited:

NRW is a leading provider of diversified contract services to the resources and infrastructure sectors in Australia. With extensive operations in all Australian States except Tasmania and an office in Canada, NRW's geographical diversification is complemented by its ability to deliver a wide range of services. These encompass civil construction including bulk earthworks, road and rail construction and concrete installation, together with contract mining and drill and blast services through NRW Civil & Mining, Golding Contractors and Action Drill & Blast. NRW also offers a comprehensive OEM capability through Action Mining Services providing refurbishment and rebuild services for earthmoving equipment and machinery. NRW's MET Division comprising RCR Mining Technologies, DIAB Engineering and Primero offers tailored mine to market solution, specialist maintenance (shutdown services and onsite maintenance), Non-Process Infrastructure, innovative materials handling capability and complete turnkey design, construct & operation of minerals processing and energy projects. NRW has a workforce of around 7,000 people supporting more than one hundred projects around Australia for clients across the resources, infrastructure, industrial engineering, maintenance and urban subdivision sectors.
