## Financials

### Billings & Collections

Customer collections of \$2.4m for the quarter was slightly ahead of expectations.

It is noted that the majority of sales in the June quarter are 'back-ended' which is reflected in the Company's ~\$6 million of debtors at 30 June 2021.

### Acquisition of NetRef

During the quarter, the Company announced the acquisition of innovative US based classroom technology business NetRef.

The acquisition added ~240,000 student licences to the Company plus access to an innovative product and specialist and highly relevant technical and sales expertise in the US.

The transaction aligns with Company strategy for acquisitive growth where opportunities provide access to complementary capability or distribution.

The Company is pleased with the ongoing sales progress of the business since completion and its integration into the Family Zone group.

### Improving operating leverage

The Company is pleased to report that the combination of consolidation of data & hosting services and scale continues to drive down costs. Our data & hosting costs have now dropped below \$AU1.5 per student per year. This decrease in data and hosting costs is reflected in the reduced outflow from product manufacturing and operating cost during the quarter to only \$174k.

The chart below highlights this change and the impact during September 2020 to January 2020 of running AWS (Amazon Web Services) and GCP (Google Cloud Platform) in parallel.

The Company is well on track to exceeding it's targeted of <\$1.3 per student pa by the end of this financial year (FY2022).

The Placement was supported by Argonaut Securities Pty Limited, Shaw and Partners Limited and Euroz Hartey's Limited who acted as joint lead managers.

### R&D Grant

The Company ceased using R&D financing mechanisms in 2020. During the quarter the Company received no R&D grants funding. The next expected receipt of R&D grants is in the December quarter.

## Outlook

### Record B2B sales pipeline

The Company's sales outlook is at record levels boosted by substantial funding in USA K-12 and the Company's growing reputation.

The September quarter is typically the second largest in US education technology. The Company ended the quarter with a record 600,000 students in POC trials for which conversion rates are typically 80-90%. The Company's total pipeline at 30 June was ~2.4 million students.

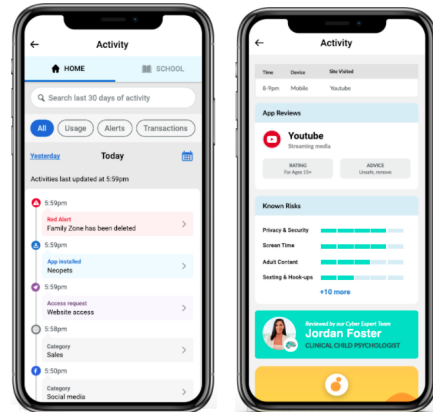

The Company's progress in Canada is going to plan with a number of deals won and the Company participating in procurement processes representing in excess of 200,000 students.

### USA Consumer launch

The Company is pleased with progress on its consumer launch into the US.

Three US school districts are currently launching trials with a further 15 school districts to be added shortly for the next phase.

The integration of Family Zone's school and parent platforms and the delivery of cyber safety expert advice through our apps provide a unique holistic school community solution.

A full scale US consumer launch is planned in the coming months as students return to school.

### Funding

The Company is exceptionally well funded to execute on its growth plans. Total cash held at 30 June 2021 is \$35.6 million.

It is noted that in the education sales cycles the December half typically accounts for 60-70% of the Company's cash receipts.
