

ASX ANNOUNCEMENT

28th July 2021

ASX: DEV | ACN: 009 799 553

Activities Report for the Quarter Ended 30th June 2021

HIGHLIGHTS

Sovereign Nickel-Copper-PGE Project, WA (Earn-In and 100% Tenement)

- Follow-up air-core (AC) drilling program completed in the highly prospective Julimar region of WA, subsequent to quarter-end.
- Drilling was designed to test the extensive differentiated mafic-ultramafic intrusion that lies between Chalice Mining Ltd's (ASX: CHN) Julimar discovery to the south and Caspin Resources Ltd's (ASX: CPN) Yarawindah Brook Project to the north.
- Assay results are pending. Results are expected to assist with the definition of priority targets for extensive ground Electromagnetic (EM) surveys and subsequent Reverse Circulation (RC)/diamond drilling in the coming months.

Wilga Downs Gold-Base Metal Project, NSW (80% and 100% Tenements)

- Diamond drilling commenced during the quarter to test two significant Cobar-type off-hole Electromagnetic (EM) conductors.
- Drilling is in progress with results expected in the coming month.

Junee Copper-Gold Project, NSW (100%)

- Recent exploration results have further upgraded the potential of the Nangus Road Prospect.
- Wide-spaced reconnaissance AC drilling (400mN x 200mE) and RC drilling intersected broadly anomalous, coincident copper-gold bedrock mineralisation over a strike length of ~2km.
- A follow-up IP survey was also completed, identifying multiple strong chargeability anomalies beneath the copper-gold soil anomaly.
- Higher gold grades of up to 3.5g/t Au were returned from re-assaying of previously reported wide-spaced AC drilling, subsequent to quarter-end.

Corporate

- Strongly supported A\$7.97 million capital raise completed through a share placement at \$0.32 per share.
- The raising increases DevEx's cash balance to ~A\$16.6 million, ensuring that the Company is well-funded to progress its accelerated exploration timetables.
- Exploration continues to gather momentum across several prospective targets in three highly-endowed regions – Julimar (WA), the Lachlan Fold Belt (NSW) and the Alligator Rivers Uranium Province (NT).

PO Box 434 West Perth WA 6872

1. SOVEREIGN NICKEL-COPPER-PGE PROJECT, WA (Earn-In and 100% Tenement)

During the June Quarter, DevEx continued to progress a systematic and multi-pronged exploration program targeting intrusion-related nickel (Ni), copper (Cu) and platinum group elements (PGE) discoveries at the Sovereign Project, which is strategically located within the highly prospective Julimar Complex.

The Julimar Complex hosts the globally significant Gonneville Ni-Cu-PGE discovery owned by Chalice Mining (ASX: CHN), located ~40km to the south of the Sovereign Project (Figure 1).

An expanded air-core (AC) drilling program totalling 318 holes for 8,456m was completed during the Quarter. A total of 242 holes (6,491m) were completed on the western side of the Sovereign Magnetic Complex (E70/3405), where DevEx is currently exploring under an Earn-In Agreement with Australian Silica Quartz Group Ltd ('ASQ') (ASX Announcement – 1st June 2020).

In addition, a review of the previous Airborne EM (AEM) survey and ground follow-up undertaken by the Company's geophysical consultants, Newexco Pty Ltd, found that the AEM survey would have been depth restrictive and unlikely to have tested the full vertical extent of the prospective intrusion. As a result, Newexco has recommended that a more extensive programme of ground EM is required to effectively test for massive sulphide Ni-Cu-PGE mineralisation within the mafic-ultramafic intrusion.

In light of the encouraging results returned from the previous broad-spaced AC drilling which confirmed the presence of an extensive differentiated mafic-ultramafic intrusion and the depth limitations of the earlier AEM survey, follow-up drilling was warranted to map the near-surface geometry of the mafic-ultramafic intrusion and test several Ni-Cu-PGE targets where anomalous copper (Cu), palladium (Pd) and platinum (Pt) was identified.

The remaining 76 holes (1,965m) were completed on the eastern half of the Sovereign Magnetic Complex (E70/3565), within DevEx's 100%-owned tenure. This first-pass AC drilling was conducted to test the newly-identified surface Pd+Pt geochemical anomaly, which had never been previously explored.

Assays were pending at the time of finalising this report, with results expected in the coming month.

Results, and a more enhanced geological understanding, are expected to assist with definition of priority targets within the broader differentiated mafic-ultramafic intrusion which will pave the way for an expanded ground electromagnetic (EM) survey and subsequent RC/diamond drilling in the coming months.

Photo 1. Drill rig in operation during the Quarter at the Sovereign Project, WA.

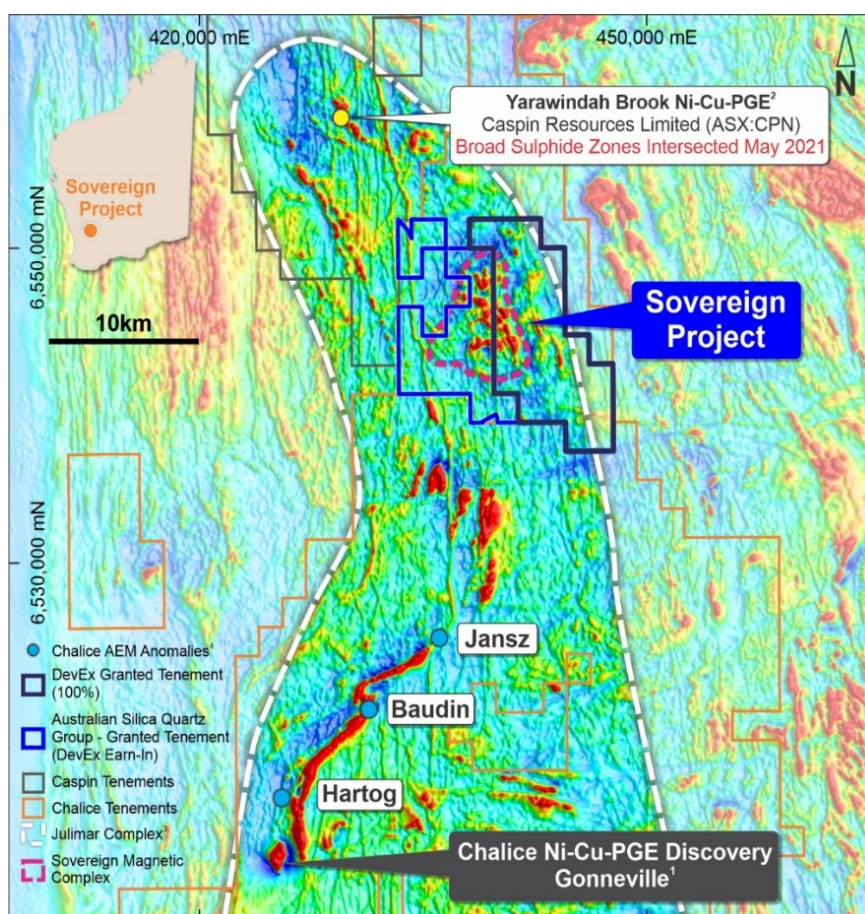

Figure 1. DevEx Tenement together with the Australian Silica Quartz Group Ltd ('ASQ') Tenement overlying airborne magnetics (RTP) in relation to Chalice Gold Mines Limited's recent high-grade palladium-nickel discovery (ASX: CHN) at the Julimar Project. The outline of the Julimar Complex was interpreted by the Company from information in Harrison (1984)³.

2. WILGA DOWNS GOLD-BASE METAL PROJECT, NSW (80% and 100% Tenements)

During the Quarter DevEx met its requirements to earn 80% in the Wilga Downs Project (see ASX Announcement on 20th September 2020 for further details).

DevEx is exploring the Wilga Downs Project for copper-gold mineralisation similar in style to other major deposits in the prolific Cobar Basin region, including Glencore's CSA Copper Mine, the Peak Gold Mine and the Great Cobar Copper-Gold Mines.

These deposit types show isolated magnetic highs which typically map pyrrhotite (magnetic iron sulphide) either surrounding or directly associated with the copper-gold and other base metal mineralisation. The magnetic highs and geology at Wilga exhibit many similarities to other gold-polymetallic deposits in the region.

Encouraging assays were received during the previous Quarter from the first diamond drill hole (20WD001). Drilling encountered a 13-metre zone of vein to disseminated pyrrhotite mineralisation with minor copper sulphides (chalcopyrite), close to the centre of the modelled magnetic high (Figure 3). Of most interest was a narrow intercept of semi-massive pyrrhotite grading 1m @ 0.7% Cu and 0.7g/t Au from 551.6m.

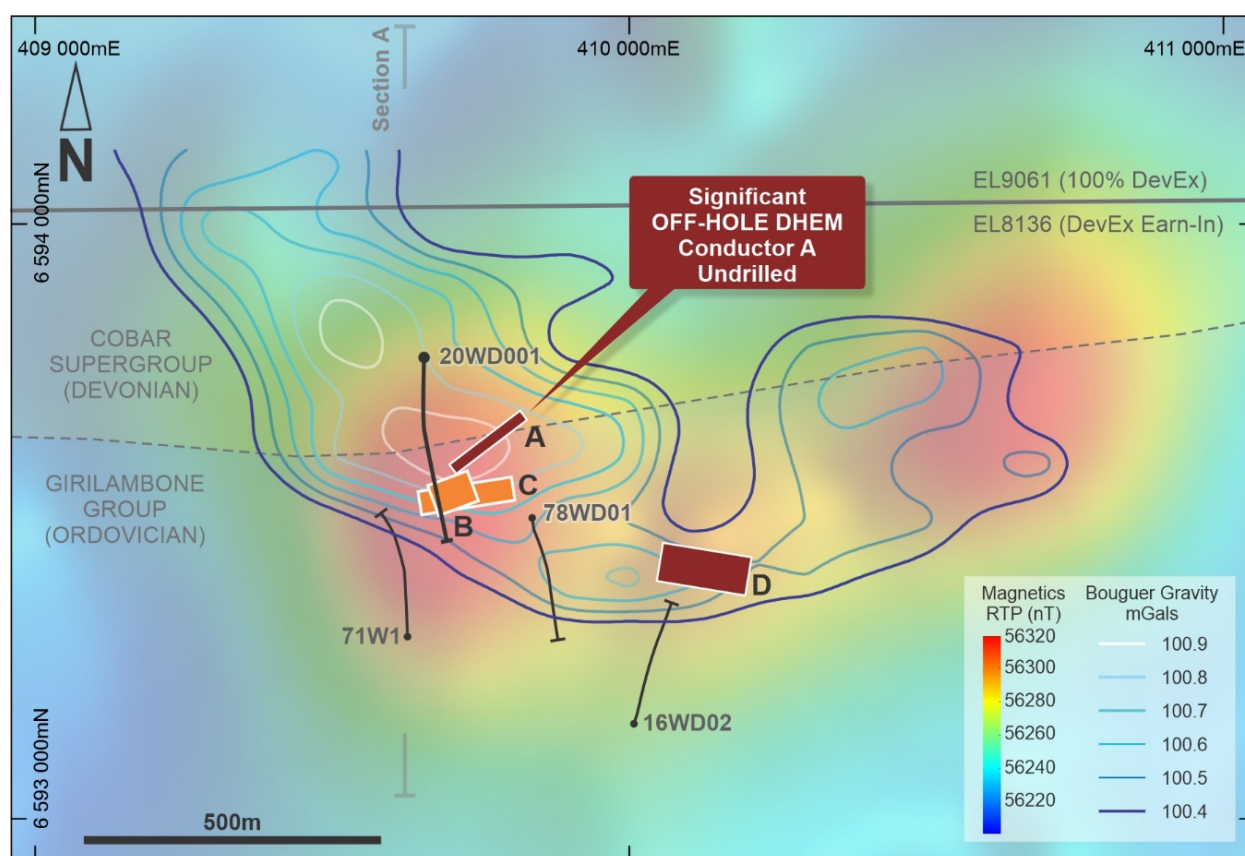

Figure 3: Location of modelled DHEM Conductors surrounding hole 20WD001 and the coincident RTP Airborne Magnetic image and Bouguer Gravity highs (blue contours). The coincident anomalies lie on a fault contact between the Cobar Supergroup and the older Girilambone Group – a primary exploration target horizon within the Cobar Basin.

A follow-up down-hole electromagnetic (DHEM) survey was conducted, during the Quarter, to test for off-hole conductors in proximity to the diamond drill hole.

DHEM confirmed the presence of a large 150m long x 250m, off-hole EM conductor 40m east of the recently drilled hole (Figure 3, Conductor A), providing a compelling drill target for 'Cobar-style' massive sulphide copper-gold mineralisation

Both in-hole and near-hole DHEM conductors (Conductors C and B) are also modelled and appear to be associated with the semi-massive pyrrhotite and chalcopyrite zone discussed above.

Figure 4: Section A showing DHEM Conductors A, B and C from diamond hole 20WD001 and associated modelled magnetic and gravity highs.

An additional off-hole conductor (Conductor D) was also recognised in a DHEM survey of diamond drill hole 16WD02 (drilled in 2016). The conductor is located north of hole 16WD02 and modelled to dip to the north (see Figure 3).

An additional Moving Loop Electromagnetic (MLEM) Survey was also completed during the Quarter, covering both magnetic anomalies. No additional conductors were identified.

Diamond drilling has now commenced with two holes designed to test Conductors A and D.

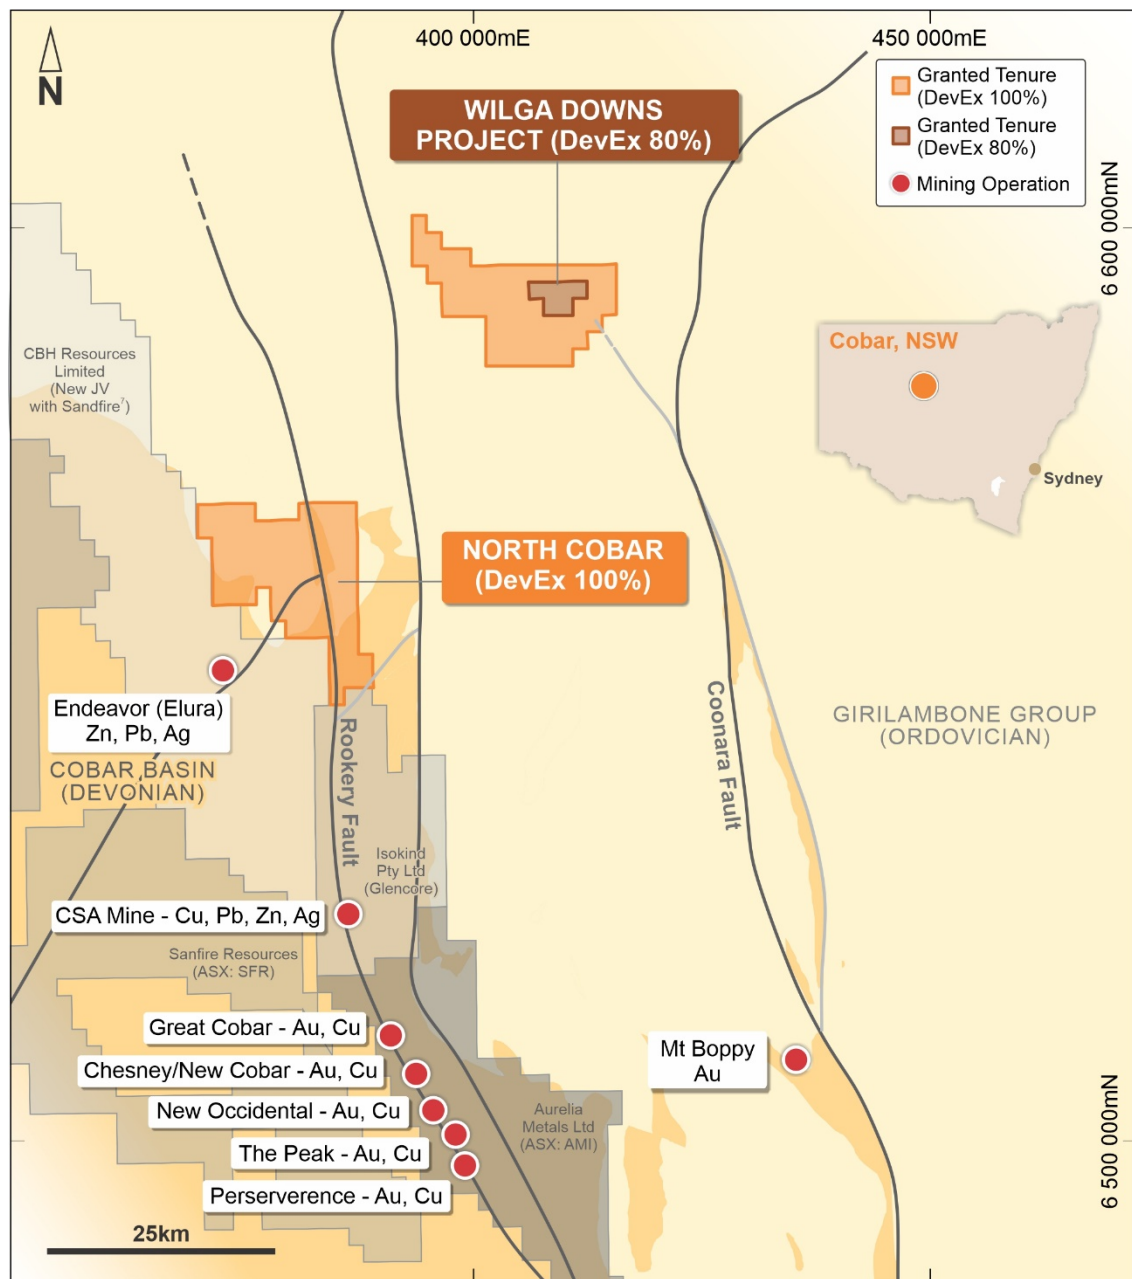

Figure 5: Generalised Geology Map of the central Cobar Mining District after David (2006)¹, showing location of Wilga Downs Project and the Company's recent tenement applications.

3. JUNE COPPER-GOLD PROJECT, NSW (100%)

The June Project lies within the highly endowed copper-gold province of the Macquarie Arc, a geological domain which hosts numerous major porphyry copper-gold deposits including the world-class Cadia-Ridgeway and Northparkes mines.

Exploration results generated during the Quarter support the potential for a porphyry copper-gold system in the project area.

During the Quarter, DevEx completed wide-spaced (400mN x 200mE) air-core drilling designed to test the northern margin of the Nangus Road magnetic anomaly.

Results identified broadly anomalous and coincident copper-gold bedrock mineralisation (up to 0.5g/t Au and 731ppm Cu in 4m composite samples) over several east-west traverses spaced at 400m and remained open to the north and south over the main magnetic anomaly (ASX Announcement – 26th May 2021).

Subsequent to Quarter end, analysis of the one metre intervals within the composite samples returned higher gold and copper grades of up to 3.5g/t Au and 1,410ppm Cu.

The anomalous copper-gold bedrock results are also supported by other anomalous pathfinder elements consistent with porphyry copper-gold systems, including molybdenum, bismuth, selenium, and tellurium.

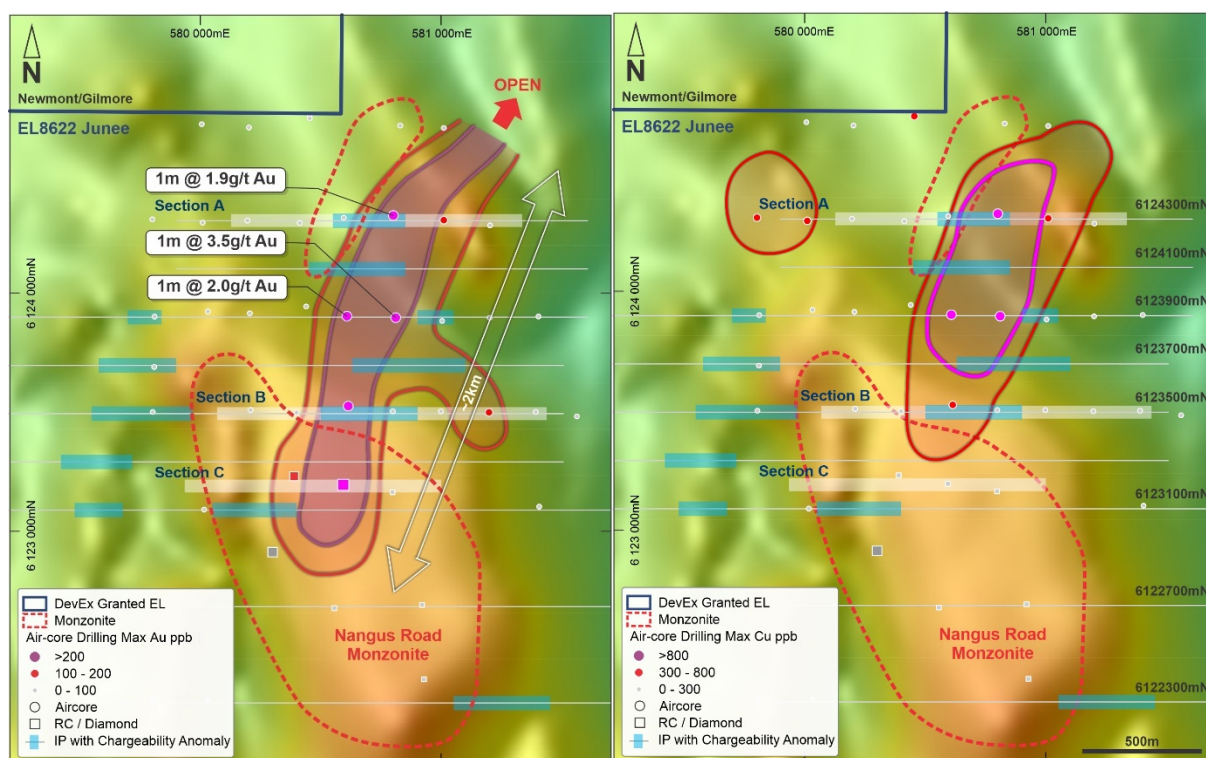

Figure 6: Nangus Road Prospect – Recent broad-spaced (400mN x 200mE) air-core + RC drilling, bedrock copper and gold anomaly (maximum Au and Cu assay per hole), peak assay of 1,410ppm Cu and 3.5g/t Au (3,490ppb Au), underlain by RTP magnetics. New IP Survey lines and anomalies are also shown. The copper and gold bedrock anomaly lies within and along the northern margin of the monzonite anomaly and remains open to the north. (see Figure 7 for location).

Following on from this AC drilling, six broad-spaced RC holes were drilled to test the main magnetic anomaly further to the south. This drilling was reconnaissance in nature and designed to expand the previous AC drilling over the main magnetic anomaly. Drilling encountered altered monzonite in all holes, with anomalous gold mineralisation (up to 284ppb Au) seen in the RC drilling immediately south of the previous AC drilling. Overall, the bedrock copper-gold anomaly has been extended to a strike length of ~2 kilometres.

In addition, a first-pass Dipole-Dipole Induced Polarisation (IP) geophysical survey tested the bedrock copper-gold anomaly on 200mN spaced traverses (Figure 6), identifying multiple strong chargeability highs beneath the Nangus Road copper-gold bedrock anomaly.

Both the shallow, ~2km long, bedrock copper-gold mineralization and the underlying IP chargeability anomalies represent compelling exploration drill targets.

DevEx is planning to commence drilling in early Q4 2021 once current and forecast wet weather abates and access is achievable.

Figure 7: Junee Project, NSW, location of Nangus Road Prospect within EL8622, showing RTP magnetics, where recent air-core and RC drilling has identified an extensive copper-gold anomaly on the northern margin of an altered monzonite associated with a magnetic anomaly similar in size and amplitude to the copper-gold bearing monzonite at Cooba (north of the project).

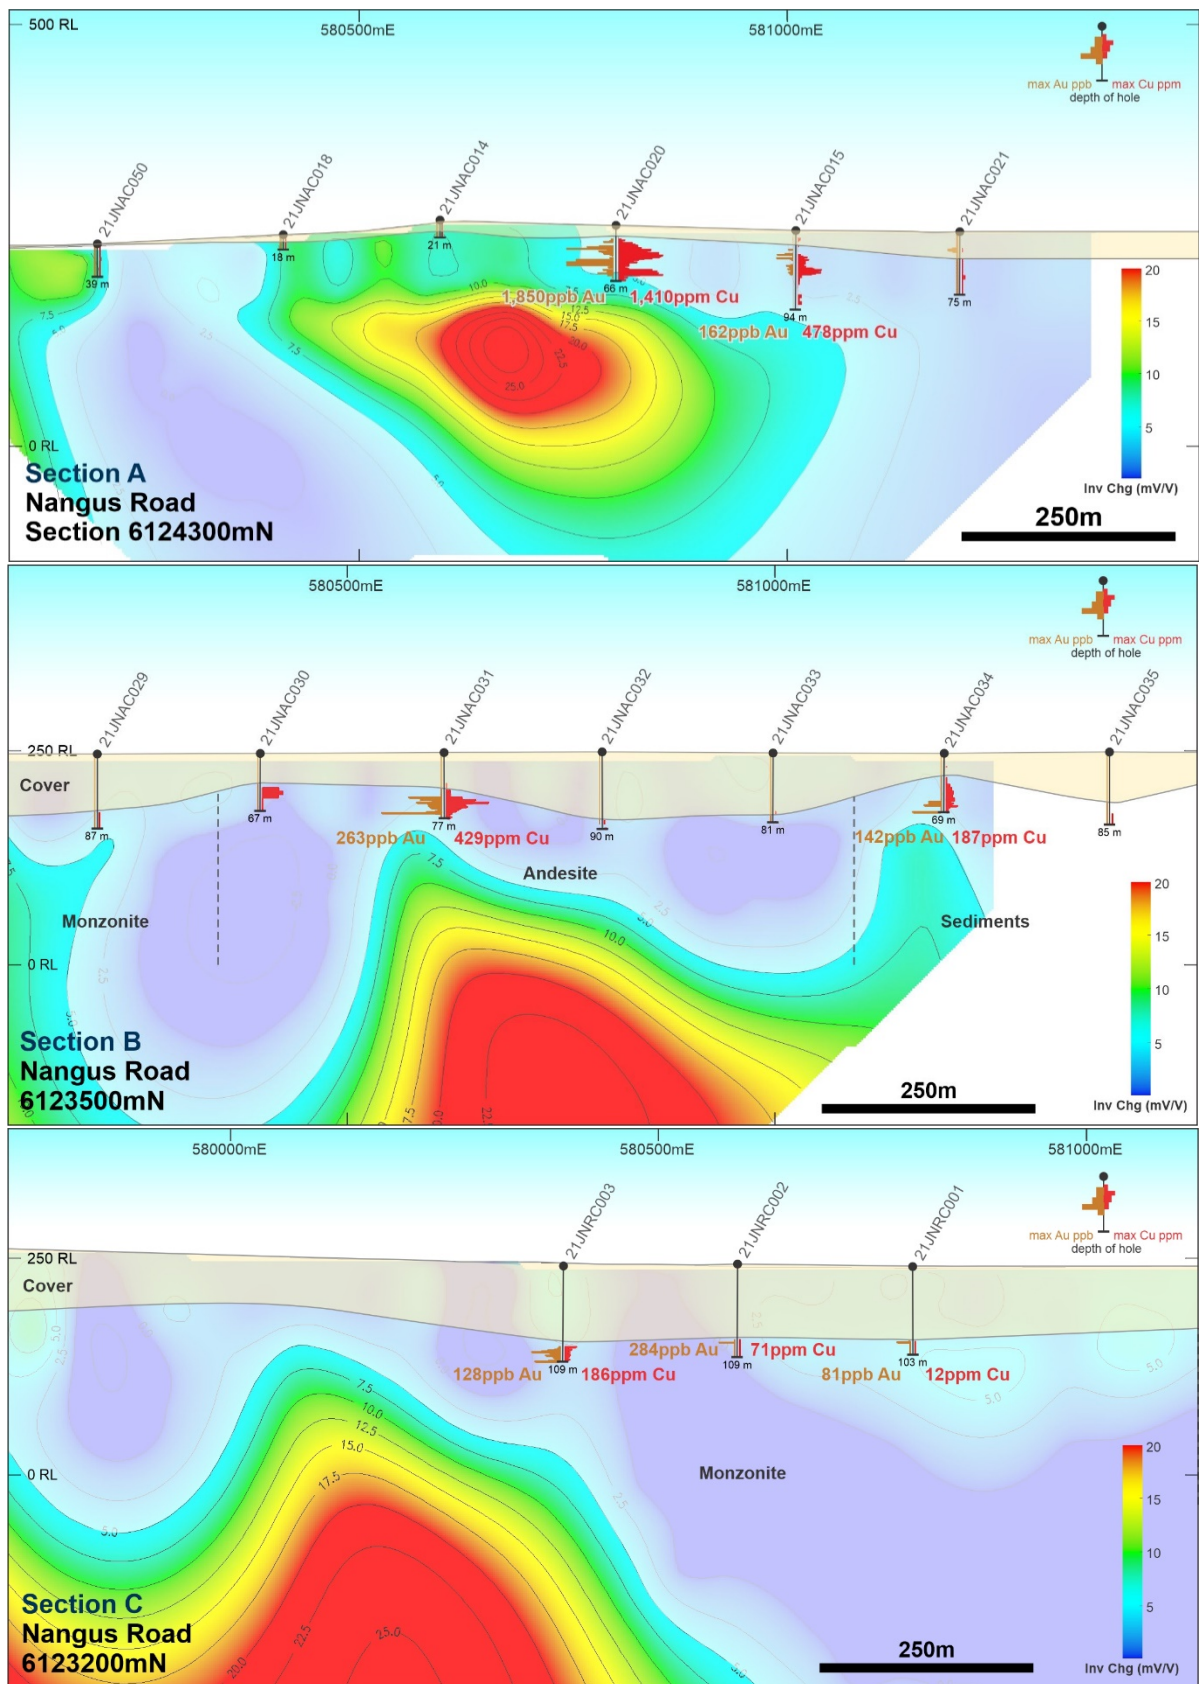

Figure 8: Nangus Road Prospect, Selective sections A, B and C (looking north) – showing broadly anomalous bedrock Au-Cu mineralisation overlying strong IP chargeability anomalies within and proximal to the northern margin of the Nangus Road monzonite (see Figure 2 for location).

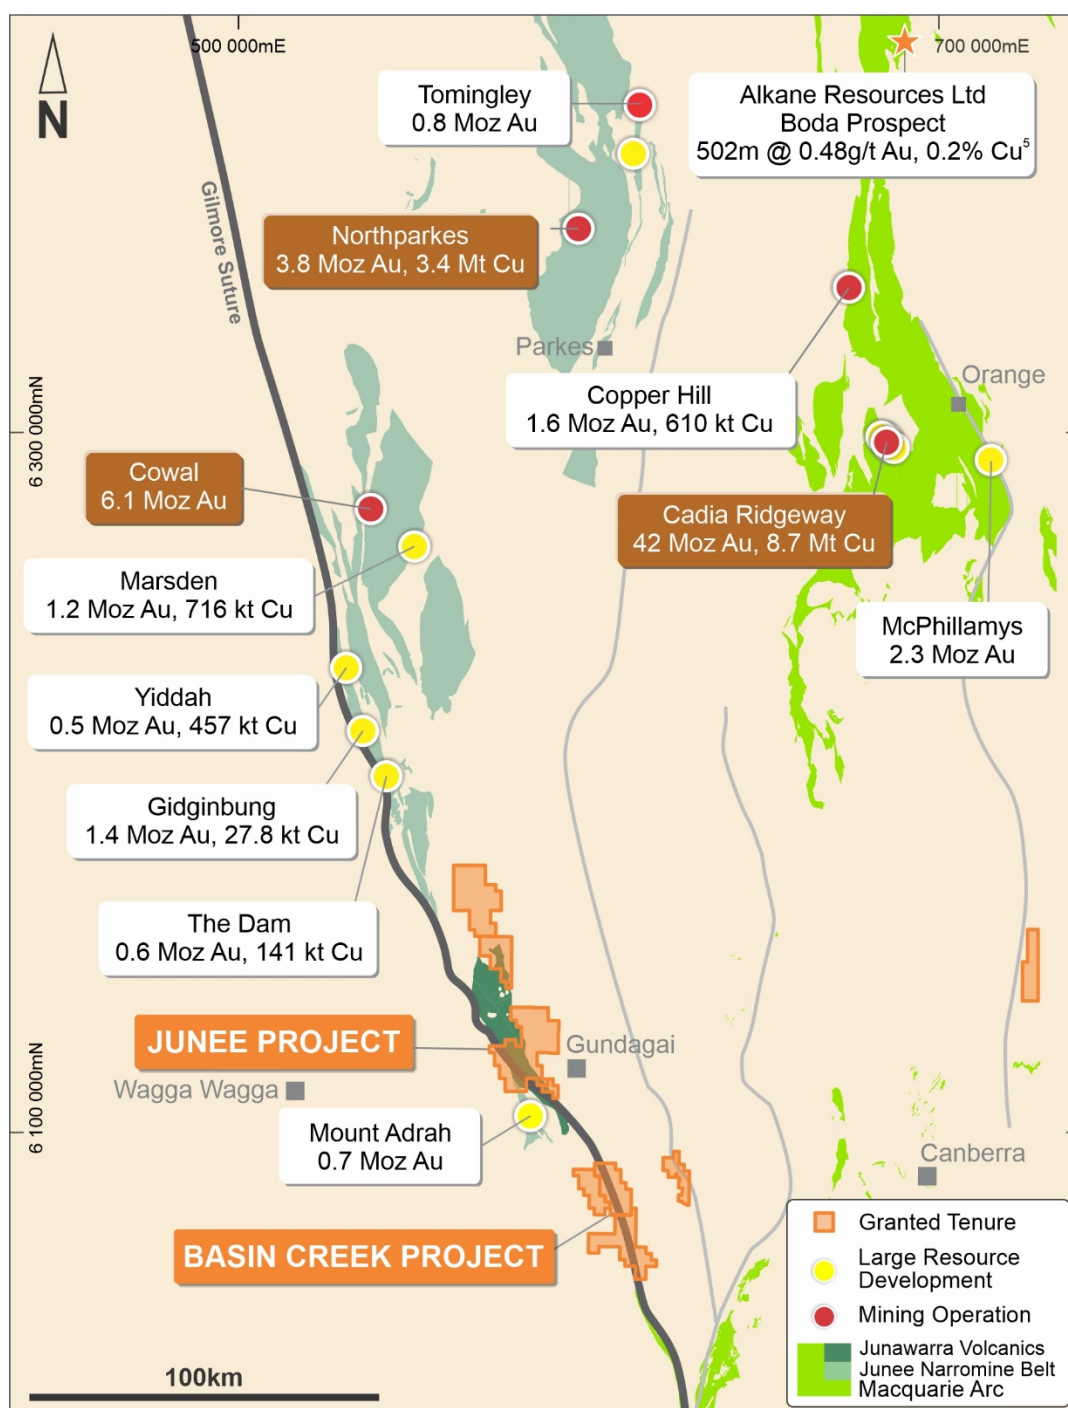

Figure 9: Junee Project, NSW, location of Nangus Road Prospect within EL8622, showing RTP magnetics, where recent aircore and RC drilling has identified an extensive copper-gold anomaly on the northern margin of an altered monzonite associated with a magnetic anomaly similar in size and amplitude to the copper-gold bearing monzonite at Cooba (north of the project).

4. NABARLEK URANIUM-COPPER-GOLD PROJECT, NT (100%)

With ongoing improvements in the uranium market, DevEx has been reviewing its extensive datasets collected since the early 1960s following the discovery, and eventual mining of the high-grade Nabarlek Uranium Deposit (production – 24Mlbs @ 1.84% U₃O₈)⁶.

With more than 500Mlbs of U₃O₈ defined⁷ throughout the Alligator Rivers Uranium Province, DevEx holds a dominant ground position of granted and tenement applications comprising +4500km² and centred on the historical Nabarlek Uranium Mine.

This review is expected to be complete over the coming month and will see renewed field exploration commence in Q3 2021 to follow up several new and under-explored uranium prospects surrounding the historical high-grade Nabarlek Uranium.

5. Dundas, WA (100%)

Field exploration at the Dundas Project, WA included the commencement of auger sampling to follow up historical gold in auger anomalies within the project. The auger sampling has defined a +1km long gold anomaly which has only been partially tested by previous drilling. The anomaly is open to the south where it crosses into the Dundas Nature Reserve (DNR). The Company is currently preparing applications to submit for approval to carry out exploration into the DNR.

6. OTHER PROJECTS

No significant activities were completed on the Basin Creek Gold Project, NSW, and the Bogong Copper-Gold Project, NSW, during the Quarter.

7. RESPONSE TO COVID-19

COVID-19 continues to have minimal impact on the Company's fieldwork and activities.

DevEx remains governed by company-wide protocols consistent with the current advice from the Government and health authorities to proactively manage the potential impact of the COVID-19 global pandemic on the Company, and is regularly monitoring this advice to ensure that its protocols remain relevant.

All necessary health and safety precautions are being taken as part of this process of returning to the office. The Company remains well funded to continue operations throughout this period.

8. PROJECT SUMMARY

This section is provided in compliance with Listing Rule 5.3.

Tenements

A full list of tenements held by the Company is enclosed in Appendix 1.

Changes in tenements held during the Quarter:

Location in Australia	Project	Tenement No.	Registered Holder	Nature of Interests
WA	Julimar Complex	E70/5364	G E Resources Pty Ltd – 100%	Granted
		E70/5760	G E Resources Pty Ltd – 100%	Granted
	South West	E70/5751	G E Resources Pty Ltd – 0%	Withdrawn
		E70/5752	G E Resources Pty Ltd – 0%	Withdrawn
		E70/5717	G E Resources Pty Ltd – 100%	Granted
		E70/5718	G E Resources Pty Ltd – 100%	Granted
		E70/5719	G E Resources Pty Ltd – 100%	Granted
		E59/2513	G E Resources Pty Ltd – 0%	Withdrawn
		E59/2514	G E Resources Pty Ltd – 0%	Withdrawn
		E59/2515	G E Resources Pty Ltd – 0%	Withdrawn
		E59/2516	G E Resources Pty Ltd – 0%	Withdrawn
		E59/2517	G E Resources Pty Ltd – 0%	Withdrawn
		E59/2518	G E Resources Pty Ltd – 0%	Withdrawn
		E59/2519	G E Resources Pty Ltd – 0%	Withdrawn
		E59/2520	G E Resources Pty Ltd – 0%	Withdrawn

Changes in farm-in or farm-out agreements during the Quarter:

Location in Australia	Project	Tenement No.	Registered Holder	Nature of Interests
NSW	Wilga Downs	EL8136	Thomson Resources Pty Ltd – 100% (Pending Transfer)	80% Earn-in commitment met

Expenditure

Exploration and evaluation expenditure by the Company during the Quarter was \$1,159,440 (YTD: \$5,237,458). In addition, the Company has spent \$144,280 on administration costs including staff costs during the Quarter (YTD: \$824,256).

9. CORPORATE

The Group's cash balance at the end of the Quarter was \$16,576,754.

During the Quarter, the Company completed a \$7.97 million placement, issuing 24,913,460 fully-paid ordinary shares at an issue price of \$0.32 per share to sophisticated and professional investors.

The following options were exercised during the Quarter:

- 166,667 unlisted options exercisable at \$0.10 on or before 30th November 2021; and
- 100,000 unlisted options exercisable at \$0.32 on or before 27th July 2023.

Payments reported in the Appendix 5B under section 6.1 consist of remuneration paid to the Managing Director and the non-executive directors.

Refer Appendix 5B for further information.

This announcement has been authorised for release by the Board.

COMPETENT PERSON STATEMENT

The Information in this report that relates to Exploration Results for the Sovereign Project is extracted from the ASX announcement titled *"Drilling confirms anomalous palladium, platinum and copper associated with a mafic-ultramafic intrusion at the Sovereign Project, WA"* released on 27th April 2021 which is available at www.devexresources.com.au.

The Information in this report that relates to Exploration Results for the Wilga Downs Gold-Base Metal Project is extracted from the ASX announcements titled *"Strong Off-Hole DHEM Conductor at Wilga Downs Copper-Gold Project, NSW"* released on 20th April 2021, *"Encouraging initial drill results at Wilga Downs Project"* released on 4th February 2021 and *"DevEx expands NSW portfolio with farm-in on highly prospective gold-base metal project in Cobar Basin"* released on 16th September 2020 which are available at www.devexresources.com.au.

The Information in this report that relates to Exploration Results for the Junee Copper-Gold Project is extracted from the ASX announcements titled *"New results significantly upgrade Junee Porphyry Copper-Gold Project, NSW"* released on 26th July 2021, *"Encouraging gold-copper assays from maiden air-core drilling into large-scale target at Junee Project, NSW"* released on 26th May 2021 and *"Extensive copper-gold soil anomaly strengthens potential for large-scale porphyry copper-gold system at Junee"* released on 9th February 2021 which are available at www.devexresources.com.au.

The company confirms that it is not aware of any new information or data that materially affects the information included in the above original market announcements. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

FORWARD LOOKING STATEMENT

This announcement contains forward-looking statements which involve a number of risks and uncertainties. These forward looking statements are expressed in good faith and believed to have a reasonable basis. These statements reflect current expectations, intentions or strategies regarding the future and assumptions based on currently available information. Should one or more of the risks or uncertainties materialise, or should underlying assumptions prove incorrect, actual results may vary from the expectations, intentions and strategies described in this announcement. No obligation is assumed to update forward looking statements if these beliefs, opinions and estimates should change or to reflect other future developments.

8.4 Cash and cash equivalents at quarter end (item 4.6)	16,577
8.5 Unused finance facilities available at quarter end (item 7.5)	-
8.6 Total available funding (item 8.4 + item 8.5)	16,577
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	12.7
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: N/A	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer: N/A	

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: N/A

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 28 July 2021

Authorised by: The Board

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
