▲ Ebay's buyer protection ... but what about a seller who has been scammed? Photograph: NetPhotos/Alamy

I appear to have been scammed after I sold a £450 pair of trainers on eBay
about a month ago to a "buyer" in the US.

They paid straight away, and the delivery address was a business in New York, but there was no contact name and they had zero feedback. This concerned me, but I believed I'd be protected by eBay.

I took pictures of the shoes and the box from every angle, and then I bubblewrapped and double-boxed them so there was zero chance of any damage, and the buyer couldn't possibly dispute their condition. Which is exactly what happened.

I sent all the evidence that a £450 pair of trainers were perfect, but it refunded the buyer who has kept my trainers

## Estimated demand for Web Design services (mid-high OECD)

Web design revenue opportunity estimated as \$2.7 billion per annum (\$10.5b GPV)

- Freelancer's estimated global web design revenue opportunity at c.\$2.7 billion (\$10.5b GPV).
- This is as a replacement of existing business only- there is also potential upside from opening up of new demand from lower cost labour services
  - o e.g. for the first time, a café can get a website for c.\$100
- Indicative calculation:
  - web design in the US alone is US\$20 billion + industry<sup>1</sup>
  - o wages constitute US\$12 billion of this
  - more than 50% of software engineering jobs can be outsourced at 30% of US wages<sup>2</sup>
  - US\$1.74 billion in wages outsourced @ 27.8% monetisation rate = c.A\$678 million revenue opportunity for Freelancer in the US (Total Available Market)<sup>4</sup>
  - there are 28 million small businesses in the US, but at least 96 million more in other mid-high income OECD countries<sup>3</sup>
  - $\circ$  from this we estimate the global opportunity is (96+28)/28 = c.4.4x larger than the US market

IBISWorld, "Web Design Services in the US" (August, 2013).

McKinsey Global Institute, "The Emerging Global Labor Market: Part III: How Supply and Demand for Offshore Talent Meet" (June, 2005).

## Estimated demand from mid-high income OECD SMEs

#### Global SMB revenue estimated as \$48b per annum (620m projects, \$181b GPV)

- There are about 28 million small businesses in the US
  - 22 million of these are informal non-employers (yet generate >\$1 trillion per annum in revenue)<sup>1</sup>
- US job posters who posted more than one project posted on average 4.97 projects in 2016<sup>2</sup>
- Average project size in FY19 was US\$216, generating revenue of \$60 to Freelancer (27.8% monetisation rate)<sup>2</sup>
  - Implies A\$11.7 billion TAM (A\$42 billion GPV, 140 million projects) from US SMEs
- But there are 420 510 million micro, small and medium enterprises (MSMEs) globally<sup>3</sup>
- 96 million are formal employer MSMEs outside the US in mid-high income nations<sup>4</sup>
  - Additional A\$40 billion TAM (A\$144 billion GPV, 480 million projects)

- Estimated global TAM from MSME market of c.\$52 billion (A\$186 billion GPV, 620 million projects)
- This excludes another 100m+ informal (unregistered)
   MSMEs in high income nations globally including
   non-employer firms, sole proprietors and partnerships
   which could add materially to Freelancer's revenue
   opportunities

US Government, Small Business Administration Office of Advocacy.

<sup>2.</sup> Based on Freelancer internal statistics. Average paid value of completed project was US\$216 in FY19. Monetisation rate = \$50.4m / 181.41m = 27.8%
