Company Quarterly Financial Overview:

The quarter ended 30 June 2021 continued to present perduring uncertainty across diverse industries/verticals and geographies, resulting in contract delays and extended payment terms. However, the strategy implemented by the Company, as announced early 2021, has presented early positive results leading to ~\$1.5M in total quarterly cash inflows, including client receipts of ~\$1M and ~\$0.5M from advances on invoices via the Company's commercial bank facilities. (Q3 FY21 Cash Receipts from customers: ~\$0.3M).

A robust cash balance of ~\$6.3M (31 March 2021: ~\$6.2M) continues to provide a strong base to pursue the aggressive 2021 growth strategy, including the delivery of well-executed M&A activities. The increase, compared to the previous period, is attributable to the cash received via M&A activities conducted during the period.

Business activities expenditure totalled \$2.34M for the quarter consisting of operating costs of sale (\$1.02M), research and development (\$140k), administration (\$553k) and staff costs (\$451k) with the balance to advertising and marketing and leased assets (combined \$176k).

The Company expects to significantly improve its underlying result in the following quarters as it implements significant efficiencies and grows its cash inflows from operating activities.

The aggregate amount of payments to related parties and their associates included in the current quarter cashflows from operating activities totalled ~\$113k. These payments consisted of Directors' fees and salaries paid to directors. All payments were on normal commercial terms.
