MAIDEN DRILL PROGRAM TO COMMENCE AT THE AUSTIN GOLD PROJECT

Highlights

- Diamond drilling scheduled to commence today on the High Grade Austin Gold Project
- A total of 1,000m is initially planned at the Brians, Brunswick Hill and Mt Sandy Prospects where high grade gold mineralisation has been intersected in previous drilling and at surface.
- Drill program will follow up highly promising previous work such as:
 - Drilling intercept of **6m at 15.8g/t Au** from 36 m (Brunswick Hill Prospect)
 - Visible gold in surface veins returning assays up to **1,109 g/t gold** (Brians Prospect)
 - Up to 10 g/t gold from veins within a historic mine shaft (Mt Sandy)
- Diamond results will provide important structural information for the follow up major RC drill program which is scheduled to commence in mid to late August.

Silver City Minerals Limited (ASX: **SCI**) ("**SCI**" or "**Company**") is pleased to announce that its maiden diamond drilling program at the recently acquired Austin Gold Project is scheduled to commence today. The Austin Gold Project is located in the highly prospective Murchison greenstone province of Western Australia and is located directly adjacent to the Cue Gold Project owned by Musgrave Minerals Limited (ASX:MGV), which includes the high grade Break of Day Deposit and Starlight discovery.

Diamond Drill Program

The aim of the maiden diamond drill program at the Austin Project is to commence by accurately characterising the gold-bearing veins controlling gold mineralisation at three key prospect areas where high grade gold has been encountered in the past. Gaining orientation information on these veins will greatly assist step out drilling with the RC drill rig scheduled to commence mid to late August. The selected prospect areas are characterised by the following previous exploration results:

1. Brunswick Hill prospect where previous drilling intersected **6 m at 15.8 g/t Au** from 36m (including **2 m at 43 g/t Au**) in BGRC-03¹ that has never been followed up properly.
2. Brians prospect where visible gold in surface veins returning assays up to 1,109 g/t gold and a previous drilling intersection of **2 m at 20.1 g/t Au** from 31m, including **1 m at 28.0 g/t Au** in hole AUSRC20 in BGRC-03¹ that has never been followed up properly.

3. Mt Sandy prospect where previous outcropping narrow veins sampled by Silver City returned up to **10 g/t Au¹** that has never been drill tested. Also, recent work by Silver City suggests encouraging previous drilling intersections of **7 m at 1.7 g/t Au** from 21 m including **3 m at 3.4 g/t Au** in SC0603¹ may not have been drilled in the optimum drilling orientation.

Technical Director Mr Leo Horn commented, "We are extremely excited to be commencing our first drilling program on the newly acquired Austin Gold Project. We have already seen in the work we have undertaken to date that there is an abundance of gold at surface here and the limited drilling by previous owners has returned some spectacular shallow results such as the 6m @ 15.8 g/t Au which have never been properly followed up. We look forward to really pushing ahead with exploration activities now with an RC Rig arriving on site in late August to follow on from the diamond rig with a steady flow of results to follow moving forward."

The location of all three prospect areas are shown below in Figure 1.

ABOUT Silver City Minerals Limited

Silver City Minerals Limited (SCI) is a base and precious metals explorer focused on the prolific mining districts of Broken Hill, the Cobar Basin and the Lachlan Fold Belt of New South Wales, Australia. Silver City's flagship Austin Gold Project is located in the highly prospective Murchison greenstone province of Western Australia, directly adjacent to the Cue Gold Project owned by Musgrave Minerals Limited (ASX:MGV), which includes the high grade Break of Day Deposit and Starlight discovery. The Company has also secured a significant ground holding of the Talling Greenstone belt in the prolific Murchison gold mining region of Western Australia located 150 km south of the Golden Grove deposit.

CAUTION REGARDING FORWARD LOOKING STATEMENTS

This document contains forward looking statements concerning Silver City Minerals Limited. Forward-looking statements are not statements of historical fact and actual events and results may differ materially from those described in the forward-looking statements as a result of a variety of risks, uncertainties and other factors. Forward-looking statements include, but are not limited to, statements preceded by words such as "planned", "expected", "projected", "estimated", "may", "scheduled", "intends", "anticipates", "believes", "potential", "predict", "fore see", "proposed", "aim", "target", "opportunity", "could", "nominal", "conceptual" and similar expressions. Forward-looking statements are inherently subject to business, economic, competitive, political and social uncertainties and contingencies. Many factors could cause the Company's actual results to differ materially from those expressed or implied in any forward-looking information provided by the Company, or on behalf of, the Company. Such factors include, among other things, risks relating to additional funding requirements, metal prices, exploration, development and operating risks, competition, production risks, regulatory restrictions, including environmental regulation and liability and potential title disputes. So, there can be no assurance that actual outcomes will not materially differ from these forward-looking statements. Forward looking statements in this document are based on Silver City's beliefs, opinions and estimates of Silver City as of the dates the forward-looking statements are made, and no obligation is assumed to update forward looking statements if these beliefs, opinions and estimates should change or to reflect other future development.

COMPETENT PERSONS STATEMENT

The information in this announcement that relates to Exploration Results is based on and fairly represents information and supporting documentation prepared by Mr Leo Horn, a Competent Person. Mr Horn is a Director of Silver City Minerals and a member of the Australian Institute of Geoscientists. Mr Horn has sufficient experience relevant to the styles of mineralisation and types of deposits which are covered in this announcement and to the activity which they are undertaking to qualify as a Competent Person as defined in the 2012 edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' ("JORC Code"). Mr Horn consents to the inclusion in this announcement of the matters based on his information in the form and context in which it appears.
