FY21 – 30 June 2021

1. Consolidated FUM for Australian Fund Managers – Rainmaker Roundup, March 2021.  
2. Plan For Life Wholesale Trust Data, September 2020, December 2020 and March 2021.  
3. 78% of Fidante Partners funds have a buy rating.

4. 92% outperformance of mandates over 3 year period.  
5. FY21 net flows of \$16.1bn represent ~20% of FY20 FUM.

# Bank acquisition update

Extending customer reach to accelerate medium-term growth

Scalable  
digital  
savings  
and loans  
bank

Providing Challenger access  
to term deposit market

Expanding secure retirement  
income offering with familiar  
deposit product

Attract new customers and  
accelerate direct to customer  
capability

## Transaction update

- ✓ APRA approval received
- ✓ Acquisition completed

## Integration well progressed

- Forming distribution partnerships to build early momentum
- Investing in capability with focus on lending, risk and compliance
- Migrating to Challenger brand in FY22
- Developing sales pipeline

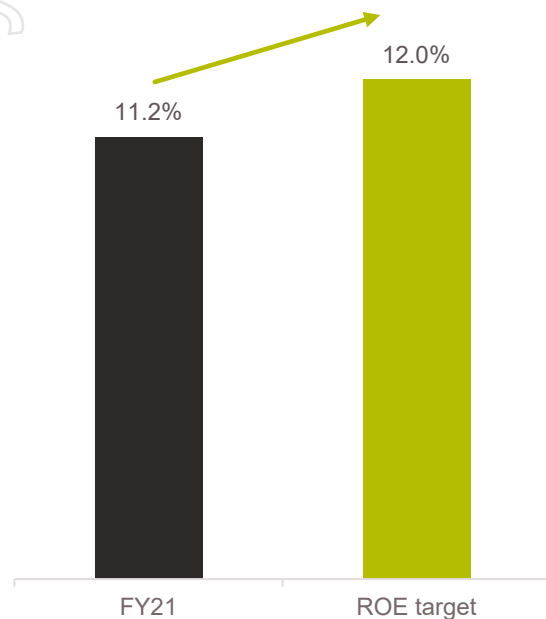

FY21 – 30 June 2021

# Sustainable ROE target<sup>1</sup>

Focus on risk adjusted returns

Clear pathway to ROE target in FY22

Normalised ROE (pre-tax)

**ROE target reset for enhanced risk settings**

**Pathway to RBA cash rate +12% target**

- Benefit of cash and liquids already deployed in FY21
- FY22 guidance (mid-point) delivers cash +12% ROE<sup>2</sup>

**Pathway to higher ROE**

**Potential ROE tailwinds**

- Rising interest rates
- Credit spread normalisation
- Lower annuity pricing (relative to swap rate)
- Ongoing growth in Funds Management
- Scaling recently acquired Bank

FY21 – 30 June 2021

1. Normalised pre-tax Return on Equity (ROE) target – RBA cash rate plus margin of 12%.

2. Mid-point of guidance range generates Group ROE in line with ROE target.

**Statutory NPAT**  
**\$592m – up \$1bn**

Reversal of unrealised  
FY20 investment losses

FY21 – 30 June 2021

1. Normalised profit framework and a reconciliation to statutory net profit after tax is disclosed in the 2021 Financial Report – Operating and Financial Review Section 8.  
2. Normalised EPS based on basic share count. Dilutive share count represents theoretical dilution as it assumes Capital Notes (i.e. hybrid debt) and subordinated debt fully converts into equity. It is Challenger's intention to repurchase Capital Notes and not allow them to convert into equity, as demonstrated with the replacement of Capital Notes 1 issued in 2014 with a new instrument in November 2020.

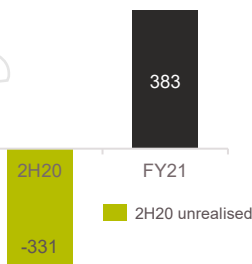

# Investment Experience \$455m

Positive experience across all asset classes

Reversal of unrealised pandemic related market losses

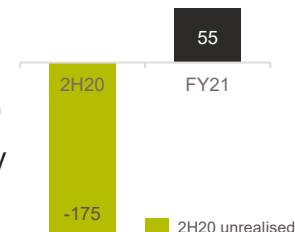

## Fixed income +\$383m

- 2H20: -\$536m (2/3<sup>rd</sup>s unrealised)
- FY21: spreads back to pre-pandemic levels driving reversal of unrealised losses

## Property +\$55m

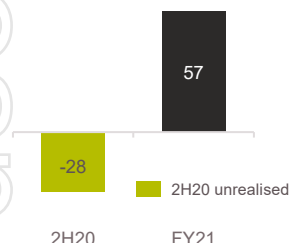

- 2H20: -\$212m (largely unrealised)
- FY21: All properties independently valued – revaluations exceed 2% pa growth assumption

**Assets  
+\$542m**

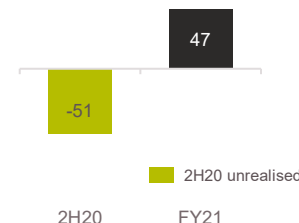

## Equities and Infra. +\$57m

- 2H20: -\$377m – largely realised
- FY21: Gains across both equities and infrastructure

## Alternatives +\$47m

- 2H20: -\$104m (1/2 unrealised)
- FY21: Strong absolute return fund gains – unrealised losses reversed

**Policy liabilities<sup>2</sup> -\$87m** – driven by illiquidity premium (-\$183) and policy liability gain (+\$96m)

FY21 – 30 June 2021

1. All investment experience numbers quoted pre-tax.

2. Comprises -\$183m as a result of illiquidity premium adjustment and \$96m gain on policy liabilities. Policy liability gain reflects changes to bond yields and interest rates used to hedge policy liabilities, expected inflation rates and expense assumptions on policy liabilities. The policy liability gain was significant in FY21 as a result of the significant relative movements in the yields on inflation instruments and semi-government securities held for hedging purposes.

1. Life Normalised Cash Operating Earnings (COE).

2. Growth assets represent property, alternatives, equities and infrastructure.

3. Product spread represents investment yield (policyholder) less interest expense.

# Life COE margin

Impacted by asset mix and interest rates

Product spread stable

**2H21 2.65% – up 10 bps on 1H21**

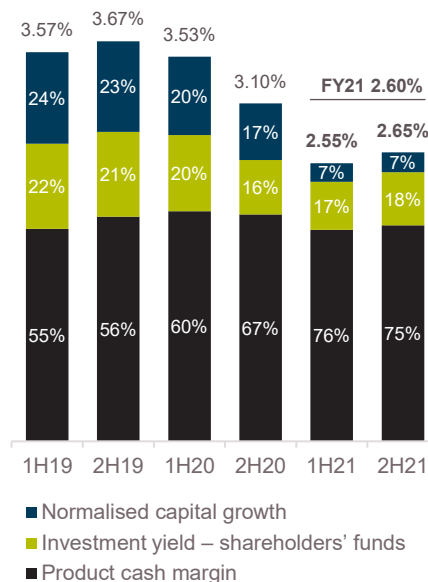

- One-off early ABS<sup>1</sup> repayment (2H21 impact +12 bps; FY21 impact +6 bps)
- Benefiting from deployment of cash
- Repricing initiatives reducing cost of funds

**FY22 expect ~2.5%<sup>3</sup> – stable on 2H21 excluding one-off fee**

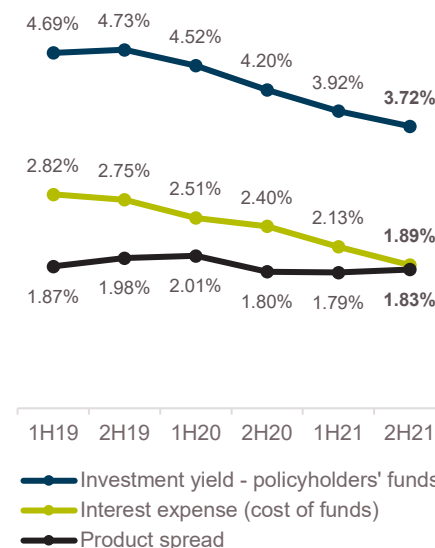

## Long term COE margin trends

- **Normalised growth** contribution reduced
- **Return on shareholder capital** rebased reflecting lower interest rates
- **Product spread** stable – spread-based business model with cost of funds adjusted to provide stable net spread

## Life COE margin

## Product spread<sup>2</sup>

FY21 – 30 June 2021

1. Asset Backed Security (ABS).

2. Product spread represents investment yield (policyholder) less interest expense.

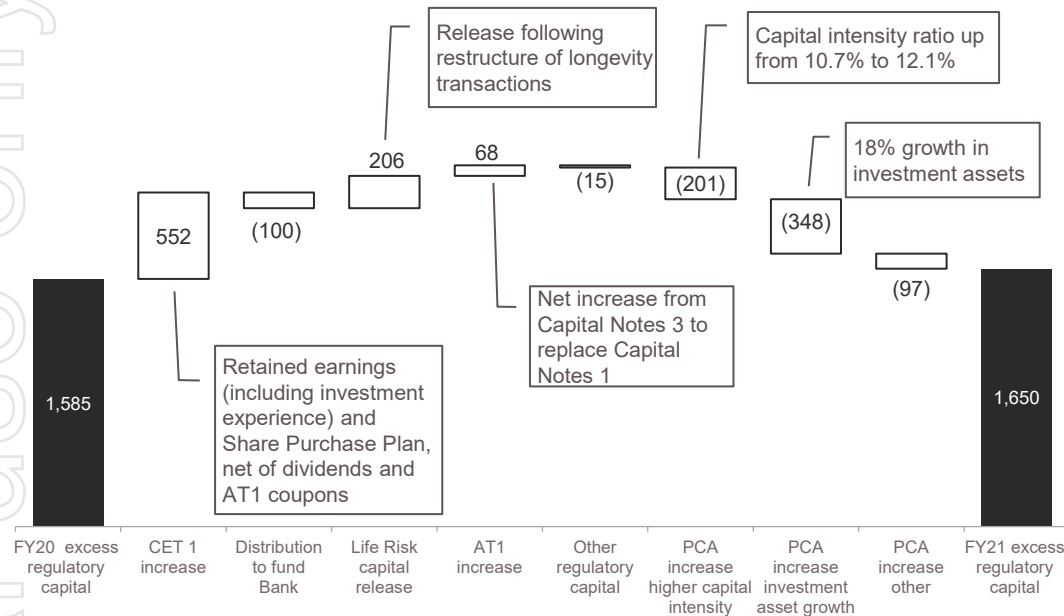

3. Mid-point of FY22 Normalised NPBT guidance range generates Life COE margin of ~2.5% (refer page 26).

# FY22 guidance and targets

Earnings to benefit from business growth

Enhanced risk settings with focus on risk adjusted returns

Normalised net profit before tax guidance range \$430m to \$480m<sup>1</sup>

Mid-point of guidance range represents best estimate and based on:

- Defensive investment portfolio settings maintained
- No material contribution from Bank acquisition

Mid-point of guidance range generates:

- Group ROE in line with revised target
- Life COE margin (~2.5%)

Normalised pre-tax Return on Equity (ROE) – RBA cash rate plus margin of 12%

Dividend payout ratio – 45% to 50% normalised dividend payout ratio<sup>2,3</sup>

CLC<sup>4</sup> excess regulatory capital – Remain strongly capitalised and operate around 1.60 times PCA<sup>5</sup>

FY21 – 30 June 2021

1. The COVID-19 situation and its impact on investment markets creates an inherently uncertain environment. This could, among other things, impact the investment returns and therefore impact guidance.

2. Normalised dividend payout ratio represents dividend per share divided by normalised earnings per share (basic).

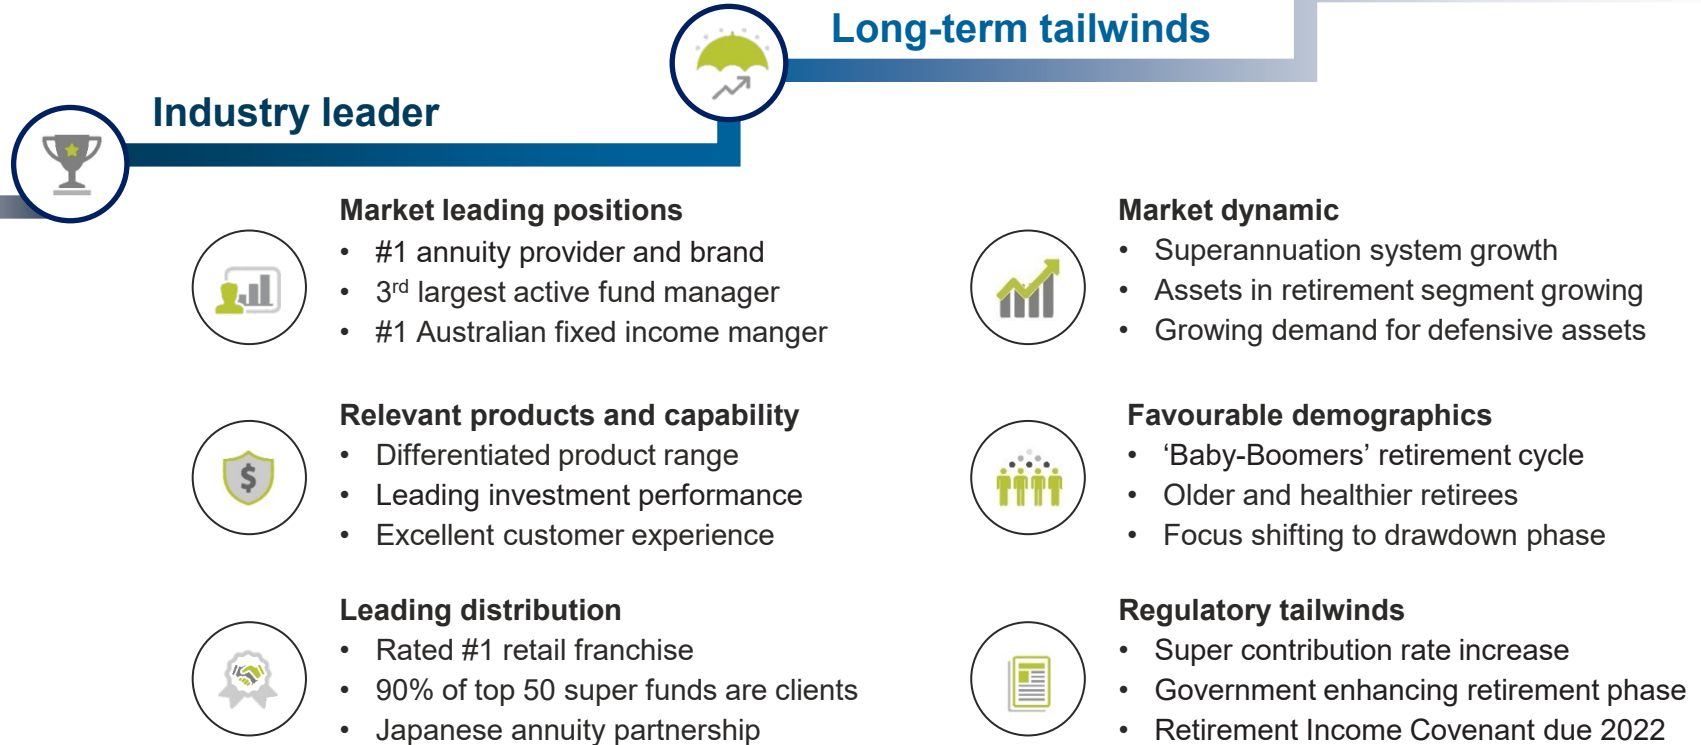

3. Dividend subject to market conditions and capital management priorities.

4. Challenger Life Company Limited (CLC).

5. CLC maintains a target level of capital representing APRA's Prescribed Capital Amount (PCA) plus a target surplus and does not target a fixed PCA ratio. The target PCA ratio range is currently 1.30 times to 1.70 times with a preferred operating level of 1.60 times.

## Retirement Income Covenant on track for 1 July 2022

The Government is progressing a range of reforms to enhance the retirement phase of the superannuation system.

### Treasury position paper, 19 July 2021

*The RIC<sup>1</sup> will require trustees to have a retirement income strategy that ensures they identify and recognise the retirement income needs of their members and that they have a plan to build the fund's capacity and capability to service those needs.*

- Covenant creates new obligation on trustees to formulate and give effect to a retirement income strategy
- Strategy to set out trustee's plan to assist members achieve and balance three objectives:
  1. Maximise retirement income;
  2. Manage risks to the sustainability and stability of retirement income; and
  3. Allow some flexible access to retirement savings.
- Trustees to have their retirement income strategy in place by 1 July 2022

FY21 – 30 June 2021

1. Retirement Income Covenant (RIC).

# Asset allocation framework

## Consistently applied with strong risk management

- Fundamental principle – assets and liabilities cash flow matched
- Managed by dedicated team
- Liability maturity profile drives asset tenor

- Investment returns considered relative to base swap rates
- Illiquidity premium contributes to relative value

### Risk management

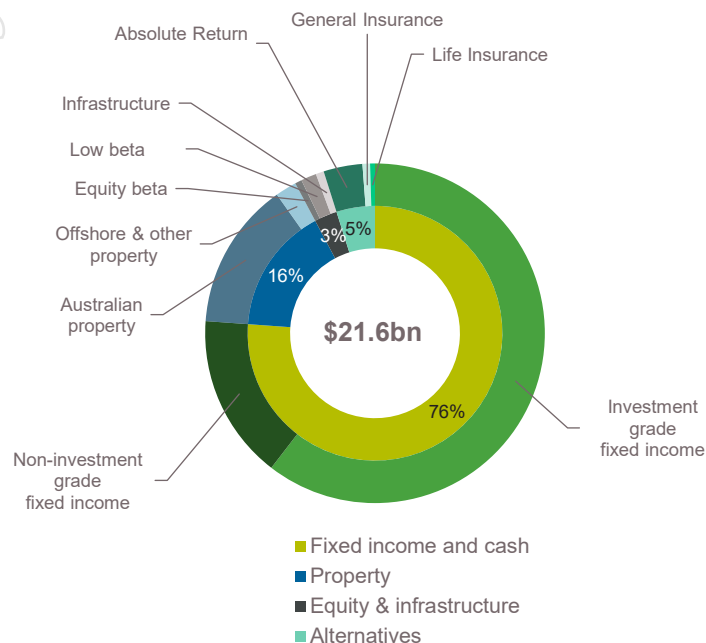

- Strong governance framework
- Risk management entrenched in corporate culture
- Minimise unwanted risks such as interest rate, currency and inflation risks

- Manage asset allocation to capital and ROE targets
- Investment decisions based on risk-adjusted returns

FY21 – 30 June 2021

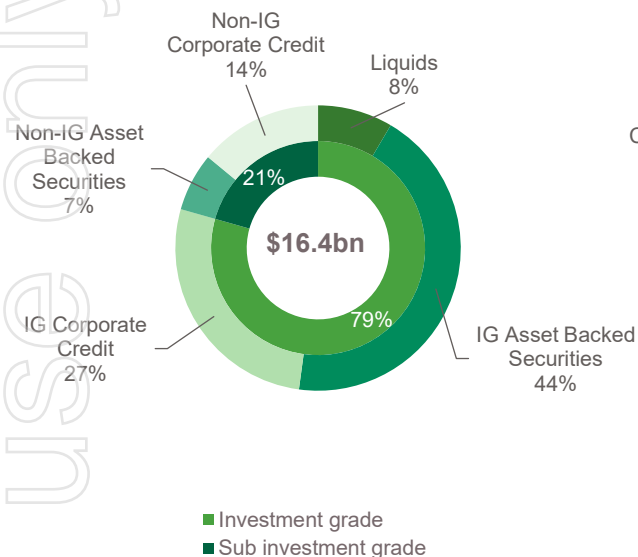

1. As at 30 June 2021.

2. In FY21 (from 1 July 2020), Life's investment portfolio categories were amended to more accurately reflect changes in portfolio composition. The equities and infrastructure categories were combined (~3% of Life's investment assets), and absolute return funds and insurance related investments were reclassified from equities to alternatives (~5% of Life's investment assets) as both are relatively uncorrelated to equity market returns. FY20/FY19 have been restated based on this reclassification for comparability.

## Investment Experience

Asset and policyholder liability valuation movements plus net new business strain

### Asset and policy liability experience

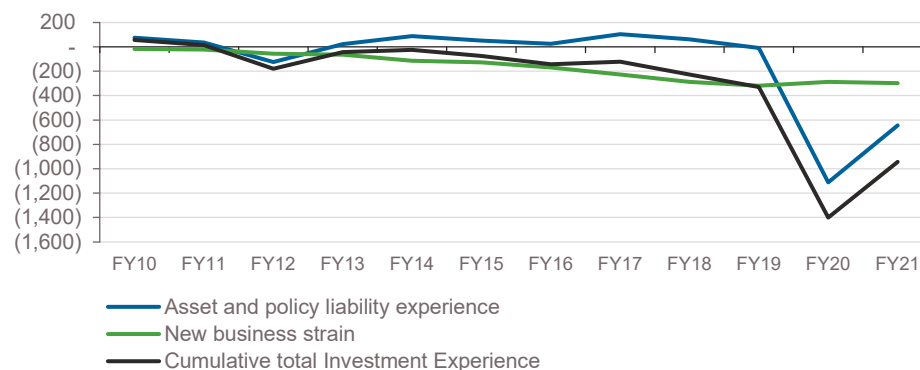

Difference between expected capital growth<sup>1</sup> for each asset class compared to actual investment returns

Includes impact of changes in macroeconomic variables<sup>2</sup> on the valuation of Life's liabilities

### New business strain

New business strain is a non-cash accounting adjustment recognised when annuity rates on new business are higher than the discount rate (risk free rate plus an illiquidity premium<sup>3</sup>) used to fair value annuities. New business strain unwinds over the annuity contract

1. Based on normalised assumptions. Normalised profit framework and a reconciliation to statutory net profit after tax is disclosed in the 2021 Annual Report - Operating and Financial Review section 8. Normalised growth assumptions have been updated in FY21 for category changes and to ensure they reflect both the nature of the investments and long-term expected investment returns.

2. Macroeconomic variables include changes to bond yields, inflation factors, expense assumptions and other factors.

3. Annuities are fair valued using a risk-free discount rate, based on the Australian Commonwealth Government bond curve plus an illiquidity premium.
