- » In the past six months prime net face rents increased by 0.9% to \$1,214/sqm. Incentives have continued to increase, now at 32.3% gross, resulting in net effective rents moderating by 5.1% in the six months to June 2021.
- » Average prime yields have remained flat at 4.69%, reflecting no change to yields since September 2020.

1. Change during the past 12 months.

Notes: The effective rent is calculated by deducting from the face rental the amortised present value of incentives over an assumed 10 year lease term.

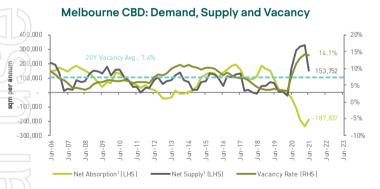

Vacancy is inclusive of sublease vacancy and uses JLL's 'dynamic' vacancy calculation, whereby any space being marketed for lease is included in the vacant space count. Historic 20y Vacancy Average calculated 2001–2020.

Office – Melbourne CBD

- » Melbourne CBD vacancy improved during 2Q 2021, falling slightly to 14.1%, albeit higher than six months ago. Falls in both direct and sub-lease vacancy helped to drive the reduction.
- » Supply has slowed off the back of 2020, with no supply added and minimal withdrawals.
- » Net prime face rents grew 1.4% over the six months to \$626/sqm bringing rent back to pre-COVID levels. Incentives increased to 35.5% net, resulting in a moderation of net effective rents of 3.2% in the half.
- » Average prime yields compressed by 12.5 bps to 4.76% in the past six months and are in line with March 2020 yields.
