In summary

We see value in economically sensitive stocks.

Lots of discussion of inflation and growth – few are positioned for it.

Some segments of the market are **INCREDIBLY** expensive – shorting will be important.

What should investors do here?

Avoid the current favourite themes: eCommerce, payments, staples.

Concern about regulatory crackdown in China are creating new opportunities.

Look where the crowd is NOT interested.

Out of favour stocks can do well.
We have been here before.

We continue to listen to our retail clients and their advisers

● → ***Clients need help as they transition to retirement***

Clients need exposure to equities to address longevity risk
Clients need downside protection to address draw down risk
Clients need solutions for intergenerational wealth transfer

● → ***Clients want ESG embedded, but also with flexibility***

Growing recognition that ESG is complex and one size does not suit all

ESG must be demonstrably integrated into investment process, not “greenwashed”

Some clients want to invest thematically

● → ***Solutions should be easy to understand and digital***

Preference for listed over unlisted investment vehicles

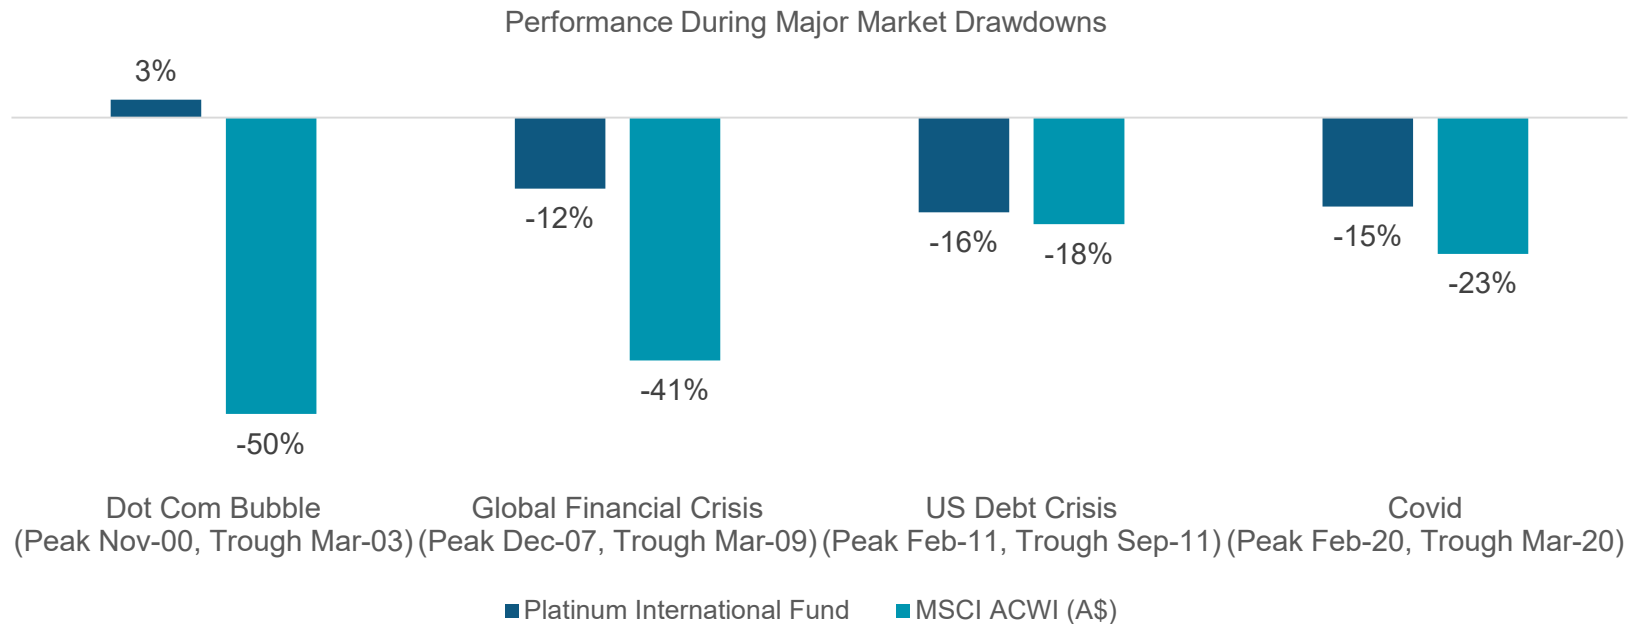

Continued enhancements to products and services

Increased communication effort through video, webinars, social media and digital channels

Retirement

- ◆ Australians are retiring with larger than ever portfolio balances but with increasing longevity and sequencing risks.
- ◆ Industry solutions tend to be expensive (annuities) and/or complex (risk pooling), both of which drag heavily on overall returns.
- ◆ Protecting clients from market volatility, whilst giving them long-biased equity exposure, has been central to Platinum's investment process for over 25 years.

Retirement

- Active management is crucial to the retirement phase. Retirees cannot “earn back” any market losses by increasing their savings or their time in the market.

A Practical (if hypothetical) Example.

- A Platinum HNW investor retired in 1995 at age 65 with a \$1m equities allocation in the Platinum International Fund (C Class), drawing down \$100,000 per annum thereafter.
- This investor then experienced the dot-com crash, the GFC, the US Debt Crisis, and the Covid crash. She is 91 years old today.
- Her Platinum account has grown to \$6.6m*, despite having withdrawn \$2.7m over 27 years (combined benefit of \$9.3m).
- If she had instead invested in the MSCI ACWI (A\$), her money would have run dry ten years ago, at the age of 81, having received \$1.7m.

* Assuming all distributions were reinvested, and no other contributions made.

Add the following: Source Platinum Investment Management Limited. Past performance is not a reliable indicator of future returns.

Retirement: two examples

Platinum Investment Bond

- ◆ Collaboration with Australian Unity as issuer and administrator
- ◆ Focused on long-term savings goals, retirement and intergenerational wealth transfer
 - ◆ STP of applications
 - ◆ No extra client fees

Platinum Fixed Cash Distribution Option

- ◆ Simple, 4%* annual cash yield
- ◆ Leverages Platinum's downside protection skills to help retirees manage their draw down risk
- ◆ No complex risk pooling or expensive annuitisation. No extra fees.
- ◆ Easy for IFA's to use (one click!) and explain to their retiree clients

Change of Distribution Election Form

Please complete the following steps:

Investment Account Details

Account Number * Account Name (in full) *

Distribution Election

I/We wish to receive annual distributions:

- Reinvested in additional units in the applicable Platinum Fund(s)
- Paid in cash* to my / our financial institution account*
- Fixed cash distribution

Your election here will apply to all your investments in the Funds and will override any previous instruction.

* New Zealand Investors - this nomination is not available for E class units.

ESG

- ◆ An enduring aspect of Platinum's investment approach continues to be the analysis of environmental, social and governance (ESG) considerations to investing.
- ◆ Sound ESG practices are vital to a company's long-term viability, growth and profitability so have always formed part of the Platinum's investment process.
- ◆ We regard all of our PT Funds as being fully ESG compliant but aspire to greater leadership in this space.
- ◆ Recent examples include
 - ◆ Hire of dedicated senior ESG investment specialist
 - ◆ Refinements to analyst research reporting
 - ◆ Inaugural Modern Slavery Statement released
 - ◆ Carbon footprint of PT Funds now measured and reported upon
 - ◆ New carbon offset program commenced.

Platinum Asset Management Supports Action to Remove Ushioda and Yamanashi from Lixil Board of Directors

Business Wire

SYDNEY -- April 3, 2019

Platinum Asset Management, an approximately A\$200 million investment manager, has announced its support of the removal of Ushioda and Yamanashi from the Board of Directors of Lixil.

Platinum sent a letter to Lixil on 22 February 2019 outlining its concerns regarding the circumstances leading to the abrupt resignation of Ushioda and Yamanashi, questioning the merits of Mr Ushioda's and Mr Yamanashi's appointment to the Board of Directors, and rating concerns regarding Lixil's recent financial performance. Platinum has not received a response from Lixil.

Platinum's Managing Director and Chief Investment Officer, Andrew Clifford said, "As a large institutional shareholder, our primary concern is value creation for our investors. Strong management and sound corporate governance practices are vital to a company's long-term viability, growth and profitability. We remain disaffected with the viability and nature of Lixil's

Platinum Carbon Offset

- ◆ Transparency on each fund's carbon footprint, coupled with an integrated option to offset
- ◆ The client controls where their offset spend should go
- ◆ Fully on-line, educational content
- ◆ Partnership with industry leader South Pole

The screenshot shows the Platinum Carbon Offset Initiative page. It features the Platinum Asset Management logo and navigation menu. The main heading is "Carbon Offset Initiative". Below the heading, there is a paragraph explaining that Platinum offers the ability to calculate an estimate of the carbon emissions made by the companies they invest in on the client's behalf. It mentions that they measure carbon emissions in tonnes per year for each \$10,000 invested in the Funds*. A "Carbon Calculator" is mentioned, which allows users to input the amount invested to calculate their estimated carbon emissions exposure. To provide context, it notes that an economy class return flight from Sydney to London via Singapore emits 1.74 tonnes of carbon**. A note at the bottom states: "Fund's exposure to carbon emissions".

The screenshot shows the header of the Platinum Carbon Emissions Disclosure page. It includes the Platinum Asset Management logo and navigation menu with links for "About Platinum", "Our Products", "Insights & Tools", and "Investing with Us". The breadcrumb trail reads: "Home > Investing with Us > Carbon Emissions Disclosure".

Carbon Emissions Disclosure

An enduring aspect of Platinum's investment approach continues to be the analysis of environmental, social and governance (ESG) considerations to investing. Sound corporate governance is vital to a company's long-term viability, growth and profitability. The social licence for a business to operate is nowhere more critical today than where this overlaps with the environment and particularly climate change*.

Understandably, you may therefore be keen to know how your investments with Platinum play a part. As outlined below, each Platinum Trust Fund and the Platinum Global Fund provides a monthly estimate of their exposures to carbon emissions in their investment portfolios. As an investor, you may wish to use this information to consider
