# VIP Gloves Limited Appendix 4E Preliminary final report

## 1. Company details

Name of entity: VIP Gloves Limited ABN: 83 057 884 876

Reporting period: For the year ended 30 June 2021 For the year ended 30 June 2020

#### 2. Results for announcement to the market

			\$
Revenues from ordinary activities	up	251.4% to	48,123,312
Profit from ordinary activities after tax	up	3986.5% to	4,742,583
Profit for the year	up	3986.5% to	4,742,583

#### Comments

The profit for the consolidated entity after providing for income tax amounted to \$4,742,583 (30 June 2020: \$116,056) whilst the consolidated profit before depreciation and amortisation, finance costs, share-based payments and income tax expense amounted to \$16,793,308 (30 June 2020: 324,767).

During the year, a share-based payment expense of \$7,544,044 was recorded for the issue of options and performance rights (2020: nil).

The profit has been attributable to increased production capacity and strong demand for product resulting in an increased average selling price for nitrile gloves during the reporting period and forward sales contracts to December 2021.

During the reporting period, the company commissioned two new glove production lines bringing total production lines to 6 and increasing annual production to 744 million pieces. Work also commenced on the installation of a further 4 production lines which will increase production capacity to 936 million pieces per annum.

During the reporting period, VIP obtained the prestigious European Union CE-Mark Standard accreditation and US FDA 510(k) accreditation which provides the potential to deliver nitrile gloves to additional lucrative markets in Europe and North America.

The Company entered into a Deed of Revocation of the Sale and Purchase Agreement (SPA) to mutually rescind, revoke and terminate the SPA with effect from 17 February 2021. Of the total funds received amounting to \$2.9 million, the Company has repaid \$1.6 million to the purchaser of land and buildings during the reporting period. By terminating the SPA, the Company retains full control and security over the land and buildings.

During the reporting period, the Company repaid in excess of \$1.2m of interest-bearing debt.

During the reporting period, the Company issued:

- 38m options (exercise price \$0.045, exercise date 23 October 2023) to Directors and KMP; and
- 80m performance rights for nil value that expire on 31 October 2023, to Directors and KMP's that vest on achieving key
  milestones.
- 225,000 options were converted during the reporting period,

## Note 1. Significant accounting policies

## Basis of preparation

These general purpose financial statements have been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') and the Corporations Act 2001, as appropriate for for-profit oriented entities. These financial statements also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board ('IASB').

### Historical cost convention

The financial statements have been prepared under the historical cost convention.

### Critical accounting estimates

The preparation of the financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the consolidated entity's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in note 2.

## Principles of consolidation

The consolidated financial statements incorporate the assets and liabilities of all subsidiaries of VIP Gloves Limited ('Company' or 'parent entity') as at 30 June 2021 and the results of all subsidiaries for the year then ended. VIP Gloves Limited and its subsidiaries together are referred to in these financial statements as the 'consolidated entity'.

Subsidiaries are all those entities over which the consolidated entity has control. The consolidated entity controls an entity when the consolidated entity is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the consolidated entity. They are de-consolidated from the date that control ceases.

Intercompany transactions, balances and unrealised gains on transactions between entities in the consolidated entity are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of the impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the consolidated entity.

The acquisition of subsidiaries is accounted for using the acquisition method of accounting. A change in ownership interest, without the loss of control, is accounted for as an equity transaction, where the difference between the consideration transferred and the book value of the share of the non-controlling interest acquired is recognised directly in equity attributable to the parent.

Where the consolidated entity loses control over a subsidiary, it derecognises the assets including goodwill, liabilities and non-controlling interest in the subsidiary together with any cumulative translation differences recognised in equity. The consolidated entity recognises the fair value of the consideration received and the fair value of any investment retained together with any gain or loss in profit or loss.

# Foreign currency translation

The financial statements are presented in Australian dollars, which is VIP Gloves Limited's functional and presentation currency. The functional currency of KLE Products Sdn Bhd and VIP Glove Sdn Bhd is Malaysian Ringgit.

### Foreign currency transactions

Foreign currency transactions are translated into Australian dollars using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at financial year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

## Foreign operations

The assets and liabilities of foreign operations are translated into Australian dollars using the exchange rates at the reporting date. The revenues and expenses of foreign operations are translated into Australian dollars using the average exchange rates, which approximate the rates at the dates of the transactions, for the period. All resulting foreign exchange differences are recognised in other comprehensive income through the foreign currency reserve in equity.

The foreign currency reserve is recognised in profit or loss when the foreign operation or net investment is disposed of.

## Note 2. Critical accounting judgements, estimates and assumptions

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements, estimates and assumptions on historical experience and on other various factors, including expectations of future events, management believes to be reasonable under the circumstances. The resulting accounting judgements and estimates will seldom equal the related actual results. The judgements, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities (refer to the respective notes) within the next financial year are discussed below.

### Coronavirus (COVID-19) pandemic

Judgement has been exercised in considering the impacts that the Coronavirus (COVID-19) pandemic has had, or may have, on the consolidated entity based on known information. This consideration extends to the nature of the products and services offered, customers, supply chain, staffing and geographic regions in which the consolidated entity operates. Other than as addressed in specific notes, there does not currently appear to be either any significant impact upon the financial statements or any significant uncertainties with respect to events or conditions which may impact the consolidated entity unfavourably as at the reporting date or subsequently as a result of the Coronavirus (COVID-19) pandemic.

### Share-based payment transactions

The consolidated entity measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined by using either the Binomial or Black-Scholes model taking into account the terms and conditions upon which the instruments were granted. The accounting estimates and assumptions relating to equity-settled share-based payments would have no impact on the carrying amounts of assets and liabilities within the next annual reporting period but may impact profit or loss and equity.

## Allowance for expected credit losses

The allowance for expected credit losses assessment requires a degree of estimation and judgement. It is based on the lifetime expected credit loss, grouped based on days overdue, and makes assumptions to allocate an overall expected credit loss rate for each group. These assumptions include recent sales experience and historical collection rates.

#### Provision for impairment of inventories

The provision for impairment of inventories assessment requires a degree of estimation and judgement. The level of the provision is assessed by taking into account the recent sales experience, the ageing of inventories and other factors that affect inventory obsolescence.

## Estimation of useful lives of assets

The consolidated entity determines the estimated useful lives and related depreciation and amortisation charges for its property, plant and equipment and finite life intangible assets. The useful lives could change significantly as a result of technical innovations or some other event. The depreciation and amortisation charge will increase where the useful lives are less than previously estimated lives, or technically obsolete or non-strategic assets that have been abandoned or sold will be written off or written down.

## Impairment of non-financial assets other than goodwill and other indefinite life intangible assets

The consolidated entity assesses impairment of non-financial assets other than goodwill and other indefinite life intangible assets at each reporting date by evaluating conditions specific to the consolidated entity and to the particular asset that may lead to impairment. If an impairment trigger exists, the recoverable amount of the asset is determined. This involves fair value less costs of disposal or value-in-use calculations, which incorporate a number of key estimates and assumptions.

## Income tax

The consolidated entity is subject to income taxes in the jurisdictions in which it operates. Significant judgement is required in determining the provision for income tax. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. The consolidated entity recognises liabilities for anticipated tax audit issues based on the consolidated entity's current understanding of the tax law. Where the final tax outcome of these matters is different from the carrying amounts, such differences will impact the current and deferred tax provisions in the period in which such determination is made. Due to the strong prospectivity of revenue performance from glove manufacturing operations, the consolidated entity recognises that its tax losses will be utilised in the future.

## Note 3. Operating segments

Identification of reportable operating segments

The Directors have considered the requirements of AASB 8 – Operating Segments and the internal reports that are reviewed by the Chief Operating Decision Maker (CODM) (the Board) in allocating resources and have concluded that at this time there are no separately identifiable segments.

During the period, the Company's considers that it has only operated in one segment, being a nitrile glove manufacturing business in Malaysia. However, the consolidated entity has operated across two geographical locations, Malaysia and Australia. The accounting policies adopted for internal reporting to the CODM are consistent with those adopted in the financial statements. The information reported to the CODM is on a monthly basis.

The Company is domiciled in Australia. Revenue from external customers is generated in Malaysia. Assets are located in Malaysia and Australia.

# Ordinary shares

Ordinary shares entitle the holder to participate in dividends and the proceeds on the winding up of the Company in proportion to the number of and amounts paid on the shares held. The fully paid ordinary shares have no par value and the Company does not have a limited amount of authorised capital.

On a show of hands every member present at a meeting in person or by proxy shall have one vote and upon a poll each share shall have one vote.

## Note 14. Equity - issued capital (continued)

### Share buy-back

There is no current on-market share buy-back.

#### Capital risk management

The consolidated entity's objectives when managing capital is to safeguard its ability to continue as a going concern, so that it can provide returns for shareholders and benefits for other stakeholders and to maintain an optimum capital structure to reduce the cost of capital.

Capital is regarded as total equity, as recognised in the statement of financial position, plus net debt. Net debt is calculated as total borrowings less cash and cash equivalents.

In order to maintain or adjust the capital structure, the consolidated entity may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

The consolidated entity would look to raise capital when an opportunity to invest in a business or company was seen as value adding relative to the current Company's share price at the time of the investment. The consolidated entity is not actively pursuing additional investments in the short term as it continues to integrate and grow its existing businesses in order to maximise synergies.

The consolidated entity is subject to certain financing arrangements covenants and meeting these is given priority in all capital risk management decisions. There have been no events of default on the financing arrangements during the financial year.

The capital risk management policy remains unchanged from the 2020 Financial Report.

## Note 15. Equity - options and performance rights

Options

30 June 2021 - Unlisted
