What are the key risks of further investment in the Company?	<p>Potential investors should be aware that subscribing for New Shares and New Options in the Company involves a number of risks. Some of the more significant risks which affect an investment in the Company are summarised below. Please refer to section 4 for further details of both the risks set out below and other risks that are relevant to a decision to apply for New Shares and New Options.</p> <ul style="list-style-type: none"> <p>Going concern</p> <p>The Company's Financial Report for the half year ended 30 June 2021 has been prepared on a going concern basis. However, it includes a note which states that whilst the Company has demonstrated a track record in raising capital, there exists a material uncertainty that may cast significant doubt on the ability of the Company to continue as a going concern for a period at least 12 months from 30 August 2021 without additional capital and therefore, whether it is able to realise its assets and discharge its liabilities in the normal course of business.</p> 	Section 4

	<ul style="list-style-type: none"> Funding risk <p>The Offer, and the contemporaneous Options Offers, are not underwritten. If the Company does not raise the Entitlement Offer Minimum Subscription Amount, it may not be able to continue as a going concern. Accordingly, notwithstanding the Minimum Subscription Amount, there is a risk that funds raised will be less than anticipated and further funding will be required to continue the Company's planned activities. The Company's ability to operate its business and effectively implement its business plan within the timeframe that it is aiming to achieve, will depend in part on its ability to raise further substantial funds by way of debt and equity. There is no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.</p> <p>Existing funds (including the funds raised under the Offer) will not be sufficient for expenditure required for certain aspects of the Company's business plan, including the construction and commissioning of mining operations and processing facilities in Mozambique.</p> Potential for dilution <p>Shareholders should note that if they do not participate in the Offer, their holdings are likely to be diluted by up to approximately 17% (as compared to their holdings and number of Shares on issue as at the date of the Prospectus, assuming that no existing or New Options are exercised (including any New Options issued under the Options Offer)).</p> ASX quotation <p>If ASX does not grant Official Quotation of the New Shares offered pursuant to this Prospectus within 3 months after the date of this Prospectus (or such period as varied by ASIC), the Company will not allot New Shares and will repay all application monies for the New Shares within the time period prescribed under the Corporations Act, without interest.</p> <p>The New Options will not immediately be quoted on the ASX. However, if in the future, the Company is able to meet the requirements to quote the New Options on the ASX, it will apply for such quotation at the time.</p> 	

Question	Response	Where to find more information
	<p>Whilst the Company may seek quotation of the New Options in the future, it makes no guarantee that such quotation will be granted by ASX. The fact that ASX may agree to grant Official Quotation of the New Options is not to be taken in any way as an indication of the merits of the Company or its securities.</p> <p>If the Company's application for the New Options to be quoted under on ASX is granted, the trading price of the New Options may be affected by the ongoing performance, financial position, and solvency of the Company.</p> <ul style="list-style-type: none"> <p>Development and operational risks</p> <p>The Company is intending to continue construction with a view to development. There is no certainty that the development of the Ancuabe Graphite Project will proceed as planned or at all. The Company notes that there is a risk that approvals and licences necessary to conduct the construction and development of the Ancuabe Graphite Project will not be received or conditions imposed that are unacceptable to the Company or unusual and that the use of funds may not adequately fund the construction activities currently contemplated to completion. In addition, the Company's future operations and profitability will be subject to operational risks.</p> <p>While the Company considers it has commenced works for title purposes, there is inevitably a government discretion involved in any such assessment. Any assessed failure to commence appropriate levels of works has the potential for a fine rather than title implications.</p> <p>Further, the Company requires approvals and licences necessary to conduct mining, which may impose conditions the Company must satisfy in order to proceed with production of the graphite. It may not be possible for the Company to satisfy these conditions.</p> <p>COVID-19 Impact</p> <p>The outbreak of the coronavirus disease (COVID-19) is impacting global economic markets. The nature and extent of the effect of the outbreak on the performance of the Company remains uncertain. The Company's Share and Option prices may be adversely affected in the short to medium term by the continued economic uncertainty caused</p>

Further, any governmental or industry measures taken in response to COVID-19 may adversely impact the Company's operations (including the development of the Ancyabe Graphite Project) and are likely to be beyond the control of the Company.</p> <p>The Directors are continuing to monitor the situation closely and consider the impact of COVID-19 on the Company's business and financial performance. As the situation is continually evolving, the consequences are inevitably uncertain. In compliance with its continuous disclosure obligations, the Company will continue to update the market in regard to any adverse impact of COVID-19 on the Company. If any of these impacts appear material prior to close of the Offer, the Company will notify investors under a supplementary prospectus.</p> <ul style="list-style-type: none"> <p>Mineral resource estimation risk</p> <p>Should the Company encounter mineralisation or formations different from those predicted by past drilling, sampling and similar examinations, resource estimates may have to be adjusted and mining plans may have to be altered in a way which could adversely affect the Company's operations.</p> <p>Graphite price risk</p> <p>Volatility in commodity markets may materially affect the profitability and financial performance of the Company and the price of its Shares and Options. In addition, any sustained low global price for graphite (as well as other related commodities) may adversely affect the Company's business and financial results, and its ability to finance, and the financing arrangements for activities and its planned capital expenditure commitments (in the ordinary course of the Company's operations).</p> <p>Third party risks</p> <p>The Company has entered into: (i) two binding offtake agreements; and (ii) conditional agreements with third parties in relation to project development.</p> <p>The binding offtake agreements cover approximately 53% of the Company's anticipated average annual graphite production from the Ancyabe Graphite Project and the Company may enter into additional offtake agreements in the future. If the Company fails to meet its obligations in terms of product quantity, quality or timing</p> 	

Question	Response	Where to find more information
	<p>(including the initial target supply date), there may be a risk that these contracts are cancelled.</p> <p>The Company notes that the binding offtake agreements may be terminable by the counterparties as the initial target supply dates under those agreements have not been met. However, the Company is not aware of any intention to, nor has it received any notice of, termination of those agreements. If these binding offtake agreements are cancelled or terminated, this may have a material adverse effect upon the Company's financial performance and results of operations.</p> <p>In March 2018, the Company acquired an economic interest (to the extent permissible) in the remaining 20% of Grafex Limitada. The acquisition remains conditional upon the responsible Mozambique Minister consenting to the transfer of the interest which has yet to be obtained. Until the Company obtains this consent it does not have legal title to the minority interest but is entitled to the economic benefits of the 20% interest (to the extent permissible), unless and until the required approval is obtained.</p> <ul style="list-style-type: none"> <p>Access to land</p> <p>The licenses comprising the Company's projects are all located in Mozambique and the subject of the laws of that country, including its mining laws and the practical logistics of INAMI. The renewal of a license is subject to the discretions that may be available under the Mozambique mining laws. The inability to meet those conditions could restrict the ability to renew a granted license, adversely affecting the financial position and performance of the Company.</p> 	

Question	Response	Where to find more information
	<p>The Nicanda Hill Tenement was due for renewal in 2018. Whilst its primary and near term focus has been the Ancuabe Graphite Project, the Company has for some time sought the support of the Mozambique authorities for it to maintain its interest in the Nicanda Hill project in the hope of also developing the Nicanda Hill project over the longer term. The Company has been advised that the Cadastre states the area is marked as reserved for public tender. Notwithstanding the best efforts of the Company to have the Nicanda Hill licence renewed, it has not been renewed. Triton is very disappointed by this outcome. The failure to renew the Nicanda Hill Tenement adversely affects assets, operations and prospects. Triton has instructed its advisers in Mozambique to appeal to the Minister. Triton will make every effort to obtain a renewal of the licence via the Minister and keep the market updated in this regard. .</p> <p>The Company additionally notes that if INAMI revoke EL5365, EL5304, EL5380 and EL5305 at a future date, the Company will experience impairment costs of approximately \$1.6 million. Similarly, if INAMI revoke MC9132C at a future date, the Company will experience impairment costs of approximately \$18.5 million.</p> <ul style="list-style-type: none"> <p><i>Taxation and compliance risk</i></p> <p>In relation to the acquisition of the 80% economic interest in Grafex Limitada, the Company sought advice regarding any potential capital gains tax liability that may arise. Based on the advice received and the timing of the transaction, the Company has not disclosed a contingent liability in relation to any capital gains tax, but the possibility remains that capital gains tax in relation to this transaction is payable.</p> <p>In relation to the acquisition of the 20% economic interest in Grafex Limitada on 13 March 2018, the company has recognised a provision for an estimated potential capital gains tax liability of US\$480,000. The Company has completed the process to undertake the self-assessment required to settle any potential liability.</p> <p>Surface taxes in relation to the Company's operations in Mozambique may become payable, noting the Company is currently engaged in ongoing discussions in relation to modification of areas with INAMI.</p>

	<p>In addition, environmental permit fees in relation to the Ancuabe Graphite Project are due in November 2021. It is the Company's intention to pay these fees from the funds raised under the Offer.</p> <p>The Company is also looking to use this opportunity to raise funds for the above capital gains tax provisioning (which is the Company's current best estimate of the relevant CGT amount payable, but it notes the relevant amount has not been finalised). There is a risk that the relevant authorities may demand the Company immediately pay its capital gains tax liabilities in relation to the Grafex Limitada acquisitions and outstanding fees associated with the Ancuabe Graphite Project prior to the funds being received under the Offer. In these circumstances, if the Company cannot seek an extension to the date of repayment, this will have a material adverse effect.</p> <ul style="list-style-type: none"> <p>Operations in Mozambique</p> <p>The Company's operations are located in Mozambique and are exposed to various levels of political, economic and other risks and uncertainties. <p>What is the effect on control of the Company?</p>	<p>New Shares issued under the Offer will comprise approximately 17% of the Shares on issue after completion of the Offer. As the Offer is not underwritten, the Offer may result in a Shareholder or Shareholders gaining control of the Company. The Company has not appointed a nominee for foreign holders of the Company's Shares in accordance with section 615 of the Corporations Act, as it intends to make the Offer to all Shareholders as at the record date, allowing Shareholders to rely on the "rights issue" exception set out in item 10 of section 611 of the Corporations Act (Rights Issue Exception) to the general prohibition on acquisition of shares set out in section 606 of the Corporations Act.</p> <p>The Company notes that if the Rights Issue Exception cannot be relied upon by Shareholders for some reason, the Company will not issue any New Shares that would result in a breach of Chapter 6 of the Corporations Act, and although the New Options will be issued to Shareholders by the Company, Chapter 6 of the Corporations Act may restrict the exercise of the New Options by Shareholders.</p> <p>In these circumstances where the Rights Issue Exception cannot be relied upon by Shareholders, Jigao will be prohibited from participating in the Offer unless it participates in the Offer under one or more of the exceptions set out in section 611 of the Corporations Act.</p> <p>However, it is the Board's expectation (in the absence of Messrs Ji and Wang) that Jigao will not participate in the Offer given recent discussions.</p> <p>For further information regarding the effect of the Offer on control of the Company, see section 2.4.</p>	<p>Section 2.4</p>

No Shares or Options on issue are subject to escrow restrictions, either voluntary or ASX imposed.

2.4 Potential impact of the Offer control of the Company

As the Offer is not underwritten, the Offer may result in a Shareholder or Shareholders gaining control of the Company. The Company has not appointed a nominee for foreign holders of the Company's Shares in accordance with section 615 of the Corporations Act, as it intends to make the Offer to all Shareholders as at the record date, allowing Shareholders to rely on the Rights Issue Exception to the general prohibition on acquisition of shares set out in section 606 of the Corporations Act.

The Company notes that if the Rights Issue Exception cannot be relied upon by Shareholders for some reason, the Company will not issue any New Shares that would result in a breach of Chapter 6 of the Corporations Act, and although the New Options will be issued to Shareholders by the Company, Chapter 6 of the Corporations Act may restrict the exercise of the New Options by Shareholders.

In those circumstances, where the Rights Issue Exception cannot be relied upon by Shareholders, Jigao will be prohibited from participating in the Offer and increasing its voting power unless it participates in the Offer under one or more of the exceptions set out in section 611 of the Corporations Act.

Based on recent interactions with Jigao, it is the Board's expectation (in the absence of Messrs Ji and Wang) that Jigao will not participate in the Offer.

Assuming no existing Options are exercised prior to the Record Date, the maximum number of New Shares which will be issued pursuant to the Offer is 238,835,383. This equates to approximately 21 % of all the issued Shares in the Company immediately following completion of the Offer (assuming that no existing or New Options are exercised prior to that date (excluding the New Options under the Options Offer)).

Shareholders should note that if they do not participate in the Offer, their holdings will be diluted by up to approximately 17% (as compared to their holdings and number of Shares on issue as at the date of the Prospectus and assuming that no existing or New Options are exercised immediately following completion of the Offer).

The following analysis:

- (a) assumes that Jigao take up their full Entitlement;
- (b) assumes that no Shortfall Shares and Options are subsequently placed (which, to the extent placed, would reduce the control impact);
- (c) does not take into account the potential for New Options forming part of the Shortfall to be exercised following their issue; and
- (d) the fully diluted calculation includes all New Options issued under the Options Offer.

% participation by Shareholders (other than Jigao) under the Entitlement Offer	% holding of Jigao post-Entitlement Offer	
	Undiluted	Fully diluted
0%	33.64	38.42
25%	32.09	37.21
50%	30.67	36.08

% participation by Shareholders (other than Jigao) under the Entitlement Offer	% holding of Jigao post-Entitlement Offer	
	Undiluted	Fully diluted
75%	29.38	35.01
100%	28.19	34.01

The Offer is not expected to have any significant impact on the control of the Company.

- (d) commenced early works construction activities at the Ancuabe Graphite Project and awarded contracts for bulk earthworks, the construction camp infrastructure and operation and on-site medical services. The contractors were mobilised in June 2018 and early works included preparation of the construction camp, road works and site clearing for the raw water dam;
- (e) received the final environmental licence from the Ministry of Lands, Environment and Rural Development (**MITADER**); and
- (f) in May 2019, the Mozambique Minister of Energy and Natural Resources granted the Mining Concession for the Ancuabe Graphite Project.

Further, the Company has entered into the following binding material contracts associated with its future activities as a producer of graphite and vanadium in Mozambique.

- (a) As announced on 19 April 2018 the Company signed a binding offtake agreement with Tianshengda for up to 16,000 tonnes per annum of graphite concentrate from the Ancuabe Graphite Project. The initial agreement term is five years with a seller option to renew for a further five years, with a minimum quantity of 10,000 tonnes per annum. The selling price will be determined for every 6 months of the term of the agreement by reference to prevailing market prices in China over the preceding 6-month period. The agreement is conditional upon the buyer having obtained all necessary authorisations for the import of the product and Triton obtaining all approvals, a mining concession and completing construction of the mine and infrastructure.
- (b) As announced on 9 May 2018 the Company signed a binding offtake agreement with Chenyang for up to 16,000 tonnes per annum of graphite concentrate from the Ancuabe Graphite Project. The initial agreement term is five years with a seller option to renew for a further five years, with a minimum quantity of 10,000 tonnes per annum. The selling price will be determined for every 6 months of the term of the agreement by reference to prevailing market prices, subject to a range, in China over the preceding 6-month period. The agreement is conditional upon the buyer having obtained all necessary authorisations for the import of the product and Triton obtaining all approvals, a mining concession and completing construction of the mine and infrastructure.
- (c) On 4 July 2018, the Company entered a lease agreement with Priolo Corporation Pty Limited for the lease of the Company's registered office and place of business for an initial period of three years.

The Company notes that the binding offtake agreements may be terminable by the counterparties as the agreed initial supply target dates under those agreements have not been met. However, the Company is not aware of any intention to, nor has it received any notice of, termination of those agreements.

3.2 Intended use of funds

If the Offer is fully subscribed, the Company will raise up to approximately \$10,112,591 through the issue of New Shares and New Options under the Offer and New Options under the Options Offer (before expenses of the Offer and the Options Offer). The purpose of the fundraising is to raise funds for:

- (a) Mozambique capital gains tax, mining licence fees, construction permits and environmental licence fees;
- (b) Development activities including engineering and detailed design works, technical studies, construction of access roads, construction of a raw water dam and other ancillary construction activities; and
- (c) general working capital of the Company and the costs of the Offer and Options Offer.

4 Risk Factors

4.1 Introduction

This section identifies the areas that the Directors regard as the major risks associated with an investment in the Company. Investors should be aware that an investment in the Company involves many risks, which may be higher than the risks associated with an investment in other companies. Intending investors should read the whole of this Prospectus in order to fully appreciate such matters and the manner in which the Company intends to operate before any decision is made to apply for Shares and Options.

There are numerous widespread risks associated with investing in any form of business and with investing in the share market generally. There is also a range of specific risks associated with the Company's business. These risk factors are largely beyond the control of the Company and its Directors because of the nature of the business of the Company. The following summary, which is not exhaustive, represents some of the major risk factors which potential investors need to be aware of.

Risks specific to the Offer

Potential for dilution

Upon completion of the Offer, assuming all Entitlements are accepted, and no Options are exercised prior to the Record Date, the number of Shares in the Company will increase from 1,134,468,067 to approximately 1,373,303,450. This equates to approximately 17% of all the issued Shares in the Company immediately following completion of the Offer (assuming that no existing or New Options are exercised prior to that date). This excludes any dilution impact from the Options Offer.

This means that each Share will represent a lower proportion of the ownership of the Company. It is not possible to predict what the value of the Company or a New Share will be following the completion of the Offer and the Directors do not make any representation to such matters.

The last trading price of Shares on ASX prior to the Prospectus being lodged is not a reliable indicator as to the potential trading price of New Shares following completion of the Offer.

ASX quotation

ASX requires the Company to meet certain conditions for quotation of New Options as a new class on ASX. There is a risk that the Company may not be able to meet those requirements. If ASX does not grant Official Quotation of the New Shares offered under the Offer within three months after the date of this Prospectus (or such period as varied by ASIC), the Company will not allot New Shares under the Offer and will repay all application monies for the New Shares within the time period prescribed under the Corporations Act, without interest.

The New Options will not immediately be quoted on the ASX. However, if in the future, the Company is able to meet the requirements to quote the New Options on the ASX, it will apply for such quotation at the time.

Whilst the Company may seek quotation of the New Options in the future, it makes no guarantee that such quotation will be granted by ASX. The fact that ASX may agree to grant Official Quotation of the New Options is not to be taken in any way as an indication of the merits of the Company or its securities. If the Company's application for the New Options to be quoted under on ASX is granted, the trading price of the New Options may be affected by the ongoing performance, financial position, and solvency of the Company.

4.2 Risks specific to the Company

Funding risk

The Offer, and the contemporaneous Options Offers, are not underwritten. If the Company does not raise the Entitlement Offer Minimum Subscription Amount, it may not be able to continue as a going concern. Accordingly, notwithstanding the Minimum Subscription Amount, there is a risk that funds raised will be less than anticipated and further funding will be required to continue the Company's planned activities. The Company's ability to operate its business and effectively implement its business plan within the timeframe that it is aiming to achieve, will depend in part on its ability to raise further substantial funds by way of debt and equity. There is no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.

Existing funds (including the funds raised under the Offer) will not be sufficient for expenditure required for certain aspects of the Company's business plan, including the construction and commissioning of mining operations and processing facilities at the Ancyabe Graphite Project.

Any additional equity financing may dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. There is no guarantee that the Company will be able to secure any additional funding or will be able to secure funding on terms favourable to the Company.

Going concern risk

The Company's Financial Report for the half year ended 30 June 2021 has been prepared on a going concern basis, which contemplates continuity of normal business activities and realisation of assets and discharge of liabilities in the normal course of business. However, it includes a note regarding the basis of preparation of its financial statements on a going concern basis, despite its projected cash flow position. The Company's Financial Report for the half year ended 30 June 2021 states that:

- (a) *"The Group has prepared a cash flow forecast for its ongoing corporate operations and the construction and commissioning of the Ancyabe Graphite Project. The forecast demonstrates that there is a need for additional funding over and above the funds available at 30 June 2021. Without additional funds the Company would be required to significantly scale back planned Ancyabe activity, payroll costs and corporate overheads."*
- (b) *"Whilst the Company has demonstrated a track record in raising capital, there exists a material uncertainty that may cast significant doubt on the ability of the Group to continue as a going concern for at least 12 months from the date of this report without additional capital and therefore, whether it is able to realise its assets and discharge its liabilities in the normal course of business."*

Development and operational risks

The development of mineral deposits involves significant risks, which even a combination of careful evaluations, experience and knowledge may not eliminate. The Company is intending to continue construction with a view to development. There is no certainty that the development of the Ancyabe Graphite Project will proceed as planned or at all. The Company notes that there is a risk that approvals and licences necessary to conduct the construction and development of the Ancyabe Graphite Project will not be received or conditions imposed that are unacceptable to the Company or unusual and that the use of funds may not adequately fund the construction activities currently contemplated to completion. In addition, the Company's future operations and profitability will be subject to operational risks. These include geological conditions, technical difficulties, metallurgical issues, mineral processing risk, quality and flake size of the graphite, securing and maintaining licenses, availability of supplies, access to certain key infrastructure such as power, water, sanitation, roads, accommodation, ports and laydown/storage areas (in a timely and economic manner), health

and safety risks, weather and construction of efficient processing facilities. The operation may be affected by force majeure, engineering difficulties and other unforeseen events.

While the Company considers it has commenced works for title purposes, there is inevitably a government discretion involved in any such assessment. Any assessed failure to commence appropriate levels of works has the potential for a fine rather than title implications.

Further, the Company requires approvals and licences necessary to conduct mining, which may impose conditions the Company must satisfy in order to proceed with production of the graphite. It may not be possible for the Company to satisfy these conditions.

These factors affect the Company's ability to establish mining operations, continue with its projects, earn income from its operations and will affect the price of its Shares and Options.

Mineral resource estimation risk

Resource estimates are expressions of judgment based on knowledge, experience and industry practice. Estimates that were valid when made may change significantly when new information becomes available.

In addition, resource estimates are necessarily imprecise and depend to some extent on interpretations, which may prove to be inaccurate. Should the Company encounter mineralisation or formations different from those predicted by past drilling, sampling and similar examinations, resource estimates may have to be adjusted and mining plans may have to be altered in a way which could adversely affect the Company's operations.

Graphite price risk

The demand for, and the price of, commodities are highly dependent on a variety of factors, including international supply and demand, the price and availability of substitutes, actions taken by governments and global economic and political developments. Given the Company's main activities, which primarily involve potentially the production of graphite, the Company's operational and financial performance, as well as the economic viability of its projects, is heavily reliant on the prevailing global price of graphite, among other things. Volatility in commodity markets may therefore materially affect the profitability and financial performance of the Company and the price of its Shares and Options.

In addition, any sustained low global price for graphite (as well as other related commodities) may adversely affect the Company's business and financial results, and its ability to finance, and the financing arrangements for, its activities or its planned capital expenditure commitments (in the ordinary course of the Company's operations).

The factors which affect the prices for graphite, as well as other related commodities (which are outside the control of the Company and its Directors) include, among many other factors, manufacturing and construction activities; the quantity of global supply in each of these respective commodities as a result of the commissioning of new mines and the decommissioning of others; political developments in countries which produce material quantities of these named commodities; the weather in these same countries; the price and availability of appropriate substitutes; advancements in technologies and the uses and potential uses of graphite, and the demand for the applications for which these commodities may be used; and sentiment or conditions in the countries and sectors in which the Company or its future business/commercial partners will potentially sell their products. Given the complex array of factors which contribute to the prevailing global price of these commodities, it is particularly difficult for the Company to predict with any certainty the prevailing price for these commodities and accordingly, investors are cautioned not to place undue reliance on any price or demand forecasts provided by the Company or by external analysts.

Third party risks

The Company has entered into:

- (a) two binding agreements with third parties in relation to offtake; and
- (b) conditional agreements with third parties in relation to project development.

The binding offtake agreements cover approximately 53% of the Company's anticipated average annual graphite production from the Ancuabe Graphite Project and the Company may enter into additional offtake agreements in the future. If the Company fails to meet its obligations in terms of product quantity, quality or timing, there may be a risk that these contracts are cancelled.

The Company notes that the binding offtake agreements may be terminable by the counterparties as the agreed initial supply target dates under those agreements have not been met. However, the Company is not aware of any intention to, nor has it received any notice of, termination of those agreements. The agreements are also conditional upon the Company obtaining all approvals and a mining concession and completing construction of the mine and infrastructure. Cancellation or termination of these agreements may have a material adverse effect upon the Company's financial performance and results of operations.

If any of the Company's counterparties default on the performance of their obligations, for example if an offtake counterparty defaults on payment or its funding commitments, it may be necessary to approach courts in Mozambique or Australia to seek enforcement or some other legal remedy, if no alternative settlement can be reached. Legal action can be uncertain and costly. There is a risk that the Company may not be able to seek legal redress against a defaulting counterparty, or that a legal remedy will not be granted on satisfactory terms.

There is also a risk of financial failure or default under the joint venture arrangements by a participant in any joint venture to which the Company may become, a party. Any withdrawal by a joint venture party or any issues with their ability to perform the obligations due under the joint venture arrangements could have a material adverse impact on the financial position of the Company. There is also the risk of disputes arising with any potential future joint venture partner, the resolution of which could lead to delays in the Company's proposed development activities or financial loss. To the extent that the consent of a third party is required in respect of the Company's proposed activities and is not obtained, there is a risk that the third party may avail itself of remedies available to it.

The Company acquired an economic interest (to the extent permissible) in the remaining 20% of Grafex Limitada. The acquisition remains conditional upon the responsible Mozambique Minister consenting to the transfer of the interest which has yet to be obtained. Until the Company obtains this consent it does not have legal title to the minority interest but is entitled to the economic benefits of the 20% interest to the extent permissible, unless and until the required approval is obtained.

Taxation and compliance risk

In relation to the acquisition of the 80% economic interest in Grafex Limitada, the Company sought advice regarding any potential capital gains tax liability that may arise. Based on the advice received and the timing of the transaction, the Company has not disclosed a contingent liability in relation to any capital gains tax, but the possibility remains that capital gains tax in relation to this transaction is payable.

In relation to the acquisition of the 20% economic interest in Grafex Limitada on 13 March 2018, the company has recognised a provision for an estimated potential capital gains tax liability of US\$480,000. The Company has completed the process to undertake the self-assessment required to settle any potential liability.

Surface taxes in relation to the Company's operations in Mozambique may become payable, noting the Company is currently engaged in ongoing discussions in relation to modification of areas with INAMI.

In addition, environmental permit fees in relation to the Ancuabe Graphite Project are due in November 2021. It is the Company's intention to pay these fees from the funds raised under the Offer.

The Company is also looking to use this opportunity to raise funds for the above capital gains tax provisioning (which is the Company's current best estimate of the relevant CGT amount payable, but it notes the relevant amount has not been finalised).

There is a risk that the relevant authorities may demand the Company immediately pay its capital gains tax liabilities in relation to the Grafex Limitada acquisitions and outstanding fees associated with the Ancuabe Graphite Project prior to the funds being received under the Offer. In these circumstances, if the Company cannot seek an extension to the date of repayment, this will have a material adverse effect.

Operations in Mozambique

The Company's operations are located in Mozambique and are exposed to various levels of political, economic and other risks and uncertainties. These risks and uncertainties include, but are not limited to, currency exchange rates; high rates of inflation; labour unrest; renegotiation or nullification of existing concessions, licenses, permits and contracts; changes in taxation policies; restrictions on foreign exchange; changing political conditions; currency controls and governmental regulations that favour or require the awarding of contracts to local contractors or require foreign contractors to employ citizens of, or purchase supplies from, a particular jurisdiction. The Company's acquisition of an 80% economic interest in Grafex Limitada has transferred and been registered but remains to be approved by the Mozambique government. There is no guarantee that this approval will be obtained and there is a risk that the Mozambique government will not recognise the Company's 80% economic interest in Grafex Limitada until such approval is obtained.

Changes, if any, in mining or investment policies or shifts in political attitude in Mozambique may adversely affect the Company's operations or profitability. Operations may be affected in varying degrees by governmental regulations with respect to, but not limited to: restrictions on production; price controls; export controls; currency remittance; income taxes; foreign investment; environmental legislation; land use; land claims of local people; water use; mine safety and government and local participation. Failure to comply strictly with applicable laws, regulations and local practices relating to mineral tenure and development, could result in loss, reduction or expropriation of entitlements.

The Company deals with INAMI and other Mozambique regulators and government officials. The Company is very aware of its legal obligations and best practice concerning anti-bribery and corruption issues. It can be difficult to know with certainty what status any application to government has, what feedback is the subject of official requirements, when decisions are final and when responses might be received.

In addition, the transportation and service infrastructure in Mozambique are under-developed and can be unreliable in some of the areas where the Company is operating. Material delays in the transportation of equipment, supplies and resources may delay the exploration and development of the Company's projects and/or the commercialisation of those projects. Any such delay is likely to increase the cost of exploring and developing the projects, and such increase may materially affect the Company's business, results of operations and financial condition. Specific infrastructure risks relate to the adequacy of port facilities and the supply of power to the Company's projects where they are ultimately developed. Grid power may not be available in the quantities required by the Company's projects, necessitating the use of diesel powered alternatives, which may adversely impact on the project economics.

The Company's investment may be exposed to adverse political developments that could affect the economics of the project. The Mozambique government has supported the Company with its activities to date, but there is no assurance that this support will continue.

Terrorism is a threat in Mozambique, particularly in Cabo Delgado and clashes between armed groups linked to Islamist extremism and security forces have been frequent. There is a risk that continued insurgency may impact the Company's future operations.

Operating in a foreign jurisdiction with legal systems and laws different to Australia may lead to uncertainty for the Company in enforcing legal and contractual rights in those jurisdictions. If the Company is unable to enforce its legal and contractual rights this may have a material adverse effect on the Company. Any future material adverse changes in government policies or legislation in Mozambique that affect foreign ownership, mineral exploration, development or mining activities, may affect the viability and profitability of the Company.

Competition

Competition from Australian and international graphite producers, developers and explorers may affect the potential future cash flow and earnings which the Company may realise from its operations. For example, the introduction of new mining and processing facilities and any increase in competition and supply in the global graphite market could lower the price of these commodities.

Access to land

The licenses comprising the Company's projects are all located in Mozambique and the subject of the laws of that country, including its mining laws and the practical logistics of INAMI. If, in the future, the Company acquires interests in licenses outside Mozambique, they will be subject to differing legislative requirements in relation to the processes for application, conversion, grant and renewal.

There is no guarantee that any applications, renewals or conversions for licenses and mining concessions in which the Company has a current or potential interest will be granted or as to the conditions that will apply.

The grant, extension and renewal of licenses is subject to a number of specific legislative conditions including payment of rent and minimum annual expenditure commitments. The renewal of a license is subject to the discretions that may be available under the Mozambique mining laws. The inability to meet those conditions could restrict the ability to renew a granted license, adversely affecting the financial position and performance of the Company.

The Nicanda Hill Tenement was due for renewal in 2018. Whilst its primary and near term focus has been the Ancuabe Graphite Project, the Company has for some time sought the support of the Mozambique authorities for it to maintain its interest in the Nicanda Hill project in the hope of also developing the Nicanda Hill project over the longer term. The Company has been advised that the Cadastre states the area is marked as reserved for public tender. Notwithstanding the best efforts of the Company to have the Nicanda Hill licence renewed, it has not been renewed. Triton is very disappointed by this outcome. The failure to renew the Nicanda Hill Tenement adversely affects assets, operations and prospects. Triton has instructed its advisers in Mozambique to appeal to the Minister. Triton will make every effort to obtain a renewal of the licence via the Minister and keep the market updated in this regard. The Company anticipates that INAMI will offer the Nicanda Hill Tenement for public offer, although it has not yet done so; the Company continues to make representations to the responsible Minister in respect of the Nicanda Hill Tenement. The failure to renew the Nicanda Hill Tenement adversely affects assets, operations and prospects.

The Company additionally notes that if INAMI revoke EL5365, EL5304, EL5380 and EL5305 at a future date, the Company will experience impairment costs of approximately \$1.6 million. Similarly, if INAMI revoke MC9132C at a future date, the Company will experience impairment costs of approximately \$18.5 million.

The Company will experience delays and cost overruns in the event it is unable to access the land required for its operations. This may be as a result of weather, environmental restraints, native title, harvesting, landholder's activities or other factors.

Reliance on key personnel

The Company's prospects depend in part on the ability of its executive officers, senior management and key consultants to operate effectively, both independently and as a group. The loss of the services of one or more of such key management personnel could have an adverse effect on the Company. The Company's ability to manage its development activities, and hence its success, will depend in large part on the efforts of these individuals. Investors must be willing to rely to a significant extent on management's discretion and judgement, as well as the expertise and competence of outside contractors.

Environmental liabilities risk

The Company's activities are subject to potential risks and liabilities associated with the potential pollution of the environment and the necessary disposal of mining waste products resulting from mineral exploration and production. Insurance against environmental risk (including potential liability for pollution or other hazards as a result of the disposal of waste products occurring from exploration and production) is not generally available to the Company (or to other companies in the minerals industry) at a reasonable price. To the extent that the Company becomes subject to environmental liabilities, the satisfaction of any such liabilities would reduce funds otherwise available to the Company and could have a material adverse effect on the Company. Laws and regulations intended to ensure the protection of the environment are constantly changing and are generally becoming more restrictive.

Climate change

The physical and non-physical impacts of climate change may affect the Company's assets and the communities in which it operates. Risks related to the physical impacts of climate change include acute risks resulting from increased severity of extreme weather events and chronic risks resulting from longer-term changes in climate patterns.

Non-physical risks arise from a variety of policy, regulatory, legal, technology, financial and market responses to the challenges posed by climate change and the transition to a lower-carbon economy. Any changes to government regulation or policy relating to climate change, including relating to greenhouse gas emissions or energy intensive assets, may directly or indirectly impact the Company's costs and operational efficiency.

Land rehabilitation requirements

Although variable, depending on location and the governing authority, land rehabilitation requirements are generally imposed on mineral exploration companies, as well as companies with mining operations, in order to minimise long term effects of land disturbance. Rehabilitation may include requirements to control dispersion of potentially deleterious effluents and to reasonably re-establish pre-disturbance land forms and vegetation. In order to carry out rehabilitation obligations imposed on the Company in connection with its mineral exploration, the Company must allocate financial resources that might otherwise be spent on further exploration and/or development programs.

Insurance coverage risk

Exploration and development operations on mineral properties involve numerous risks, including unexpected or unusual geological operating conditions, rock bursts, cave-ins, ground or slope failures, fires, floods, earthquakes and other environmental occurrences, political and social instability that could result in damage to or destruction of mineral properties or producing facilities, personal injury or death, environmental damage, delays in mining caused by industrial accidents or labour disputes, changes in regulatory environment, monetary losses and possible legal liability.

It is not always possible to obtain insurance against all such risks and the Company may decide not to insure against certain risks because of high premiums or other reasons. Moreover, insurance against

risks such as environmental pollution or other hazards as a result of exploration and development is not generally available to the Company or to other companies in the industry on acceptable terms. Should such liabilities arise, they could reduce or eliminate any further profitability and result in increasing costs and a decline in the value of the securities of the Company.

4.3 General Risks

Covid-19

The outbreak of the coronavirus disease (COVID-19) is impacting global economic markets. The nature and extent of the effect of the outbreak on the performance of the Company remains uncertain. The Company's Share and Option prices may be adversely affected in the short to medium term by the continued economic uncertainty caused by COVID-19. Further, any governmental or industry measures taken in response to COVID-19 may adversely impact the Company's operations (including the development of the Ancuabe Graphite Project) and are likely to be beyond the control of the Company.

The Directors are continuing to monitor the situation closely and consider the impact of COVID-19 on the Company's business and financial performance. As the situation is continually evolving, the consequences are inevitably uncertain. In compliance with its continuous disclosure obligations, the Company will continue to update the market in regard to any adverse impact of COVID-19 on the Company. If any of these impacts appear material prior to close of the Offer, the Company will notify investors under a supplementary prospectus.

Economic Risks

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's development and production activities, as well as on its ability to fund those activities and to receive future dividends.

Further, security market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Security market conditions are affected by many factors such as general economic outlook; interest rates and inflation rates; currency fluctuations; changes in investor sentiment toward particular market sectors; the demand for, and supply of, capital; and terrorism or other hostilities.

Unforeseen expenses

The Company may be subject to significant unforeseen expenses or actions. This may include unplanned operating expenses, future legal actions or expenses in relation to future unforeseen events. The Directors expect that the Company will have adequate working capital to carry out its stated objectives however there is the risk that additional funds may be required to fund the Company's future objectives.

Securities market risk

The market price of the Company's Shares and Options could fluctuate significantly. The market price of the Company's Shares and Options may fluctuate based on a number of factors including the Company's operating performance and the performance of competitors and other similar companies, the public's reaction to the Company's press releases, other public announcements and the Company's filings with the various securities regulatory authorities, changes in earnings estimates or recommendations by research analysts who track the Company's Shares or Options or the shares of other companies in the resource sector, changes in general economic conditions, the number of the Company's Shares and Options publicly traded and the arrival or departure of key personnel, acquisitions, strategic alliances or joint ventures involving the Company or its competitors.

In addition, the market price of the Company's Shares and Options are affected by many variables not directly related to the Company's success and are therefore not within the Company's control, including other developments that affect the market for all resource sector shares, the breadth of the public market for the Company's Shares and Options, and the attractiveness of alternative investments.

Litigation risk

The Company is subject to litigation risks. All industries, including the minerals exploration industry, are subject to legal claims, with and without merit. Defence and settlement costs of legal claims can be substantial, even with respect to claims that have no merit.

Due to the inherent uncertainty of the litigation process, the resolution of any particular legal proceeding to which the Company is or may become subject could have a material effect on its financial position, results of operations or its activities.

Speculative nature of investment

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of Shares and Options.

5 Additional Information

5.1 Continuous disclosure obligations

The Company is a "disclosing entity" (as defined in section 111AC of the Corporations Act) and is subject to the regime of continuous disclosure and periodic reporting requirements. Specifically, as a listed company, the Company is subject to the Listing Rules which require continuous disclosure to the market of any information possessed by the Company which a reasonable person would expect to have a material effect on the price or value of its Shares and Options.

The Board has adopted a policy on compliance with the Listing Rules which sets out the obligations of the Directors, officers and employees to ensure the Company satisfies the continuous disclosure obligations imposed by the Listing Rules and the Corporations Act. The policy provides information as to what a person should do when they become aware of information which could have a material effect on the Company's securities and the consequences of non-compliance.

5.2 Legal framework of this Prospectus

As a "disclosing entity", the Company has issued this Prospectus in accordance with section 713 of the Corporations Act applicable to prospectuses for an offer of securities which are quoted enhanced disclosure (ED) securities and the securities are in a class of securities that were quoted ED securities at all times in the 3 months before the issue of this Prospectus (or Options over the same).

Having taken such precautions and having made such enquiries as are reasonable, the Company believes that it has complied with the requirements of ASX as applicable to disclosing entities from time to time, and which require the Company to notify ASIC of information available to the stock market conducted by ASX, throughout the 3 months before the issue of this Prospectus.

Information that is already in the public domain has not been reported in this Prospectus other than that which is considered necessary to make this Prospectus complete.

5.4 Lead Manager Agreement

Terms of the Lead Manager Agreement

The Company has entered into the Lead Manager Agreement with the Lead Manager under which it has appointed the Lead Manager as the lead manager to the Offer under this Prospectus.

The key terms of the Lead Manager Agreement are set out in the table below:

5.5 Corporate Governance

To the extent that they are applicable to the Company, the Board has adopted the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations* where the Board has considered the recommendation to be an appropriate benchmark for its corporate governance practices. Where, after due consideration, the Company's corporate governance practices depart from a recommendation, the Board has disclosed the reasons for the departure in its Corporate Governance Statement for the financial year ended 31 December 2020. This can be found in the Company's Appendix 4G dated 19 March 2021.

A summary of the Company's corporate governance policies and procedures is available on the Company's website at www.tritonminerals.com.

5.6 Agreements with Directors and related parties

- (a) The Company's policy in respect of related party arrangements is:
- (i) a Director with a material personal interest in a matter is required to give notice to the other Directors before such a matter is considered by the Board; and
 - (ii) for the Board to consider such a matter, the Director who has a material personal interest is not present while the matter is being considered at the meeting and does not vote on the matter.
- (b) The Company does not intend to issue any securities to Directors or other related parties at this time, other than up to the extent of their Entitlement under the Offer.

Mr Andrew Frazer, a Director, is the managing director of the Lead Manager. Accordingly, the Company followed its policy in respect of related party arrangements in considering and resolving to enter into the Lead Manager Agreement. Separately, the Company acknowledged that entry into the Lead Manager Agreement constituted a financial benefit and therefore fell under Chapter 2E of the Corporations Act. Company under section 208 of the Corporations Act. The Board (with Mr Andrew Frazer abstaining) determined that entry into the Lead Manager Agreement with the Lead Manager was at "arms length" for the purposes of section 210 of the Corporations Act.

5.7 Rights Attaching to New Shares

The New Shares to be issued pursuant to this Prospectus, and the underlying Shares to be issued upon exercise of the New Options, will rank equally in all respects with existing Shares in the Company.

Full details of the rights attaching to the Company's Shares are set out in its Constitution, a copy of which can be inspected at the Company's registered office.

The following is a summary of the principal rights which attach to the Company's Shares:

(a) Voting

Every holder of Shares present in person or by proxy, attorney or representative at a meeting of Shareholders has one vote on a vote taken by a show of hands, and, on a poll every holder of Shares who is present in person or by proxy, attorney or representative has one vote for every fully paid Share held by him or her, and a proportionate vote for every partly paid Share, registered in such Shareholder's name on the Company's share Register.

A poll may be demanded by the chairman of the meeting, by any five Shareholders entitled to vote on the particular resolution present in person or by proxy, attorney or representative, or by any one or more Shareholders who are together entitled to not less than 5% of the total voting rights of, or paid up value of, the Shares of all those Shareholders having the right to vote on the resolution.

(b) Dividends

Dividends are payable out of the Company's profits and are declared by the Directors.

(c) Transfer of Shares

A Shareholder may transfer Shares by a market transfer in accordance with any computerised or electronic system established or recognised by the Listing Rules or the Corporations Act for the purpose of facilitating transfers in Shares or by an instrument in writing in a form approved by ASX or in any other usual form or in any form approved by the Directors.

The Directors of the Company may refuse to register any transfer of Shares, (other than a market transfer) where the Company is permitted or required to do so by the Listing Rules or the ASX Settlement Operating Rules (formerly the ASTC Settlement Rules). The Company must not prevent, delay or interfere with the registration of a proper market transfer in a manner which is contrary to the provisions of any of the Listing Rules or the ASX Settlement Operating Rules.

(d) Meetings and Notice

Each Shareholder is entitled to receive notice of and to attend general meetings for the Company and to receive all notices, accounts and other documents required to be sent to Shareholders under the Constitution of the Company, the Corporations Act or the Listing Rules.

(e) Liquidation Rights

If the Company is wound up, the liquidator may, with the authority of a special resolution, divide among the Shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as it considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

(f) **Shareholder Liability**

As the Shares under the Prospectus are fully paid Shares, they are not subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

(g) **Alteration to the Constitution**

The Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. At least 28 days' written notice, specifying the intention to propose the resolution as a special resolution must be given.

(h) **ASX Listing Rules**

If the Company is admitted to the Official List, then despite anything in the Constitution of the Company, if the Listing Rules prohibit an act being done, the act must not be done. Nothing in the Constitution prevents an act being done that the Listing Rules require to be done. If the Listing Rules require an act to be done or not to be done, authority is given for that act to be done or not to be done (as the case may be). If the Listing Rules require the Constitution to contain a provision or not to contain a provision the Constitution is deemed to contain that provision or not to contain that provision (as the case may be). If a provision of the Constitution is or becomes inconsistent with the Listing Rules, the Constitution is deemed not to contain that provision to the extent of the inconsistency.

The Notice and cheque or BSB payment must be received by the Company during the Exercise Period. An exercise of only some New Options shall not affect the rights of the Optionholder to the balance of the New Options held by the Optionholder.

- (i) The Company shall issue the resultant Shares and deliver a statement of shareholdings with a holders' identification number within 5 Business Days of exercise of the New Options.
- (j) The Shares issued shall rank, from the date of issue, equally with the existing ordinary Shares of the Company in all respects.
- (k) If there is a bonus share issue (**Bonus Issue**) to the holders of Shares, the number of Shares over which a New Option is exercisable will be increased by the number of Shares which the Optionholder would have received if the New Option had been exercised before the record date for the Bonus Issue (**Bonus Shares**).
