Botanix Expands Management Team

Key highlights

- Botanix expands management team with the appointment of a new Senior Vice President of Pharmaceutical Development – Dr Jack Hoblitzell
- Dr Hoblitzell adds significant experience leading world class technical operations to deliver new product launches and excellence in manufacturing and supply chain management
- Additional appointment to the management team further supports plans for pipeline development and to accelerate the development and scale-up of commercial capabilities

Philadelphia PA and Perth Australia, 24 September 2021: Clinical dermatology company, Botanix Pharmaceuticals Limited (ASX: BOT, “Botanix” or “the Company”), is pleased to announce the expansion of its management team with the appointment of Dr Jack Hoblitzell as Senior Vice President of Pharmaceutical Development.

Vince Ippolito, President and Executive Chairman, commented: “We are pleased to welcome Jack to the Botanix team. His depth of experience and success in leading successful new product launches and regulatory submissions will be invaluable as we continue to focus on our clinical programs as they move into last stage studies and commercial manufacturing, as well as our increasing work with the Permetrex™ platform.”

Dr Hoblitzell was most recently SVP, Technical Operations at Assertio Therapeutics Inc. leading all aspects of manufacturing and supply chain, including quality, regulatory and pharmacovigilance operations. Serving on the executive team, Dr Hoblitzell oversaw the integration of Assertio Therapeutics and Zyla Life Sciences in 2020, where he was previously VP Technical Operations.

Dr Hoblitzell has over 30 years of extensive experience in leading world-class technical operations to manufacture and deliver branded, specialty and generic pharmaceuticals, previously holding senior leadership roles in the US with companies including Pfizer, King Pharmaceuticals, Ivax Pharmaceuticals and Teva Pharmaceuticals. This includes expertise in areas such as M&A due diligence, manufacturing technology transfer and integration in addition to manufacturing for pivotal studies and regulatory submission documentation. Dr Hoblitzell has a depth of experience in supply chain management and operational excellence delivery having successfully led sales and operations planning and distribution for both marketed and new products, including implementation and oversight of technical contract manufacturing and packaging.

Dr Hoblitzell is Registered Pharmacist and member of the American Association of Pharmaceutical Scientists (AAPS), and International Society of Pharmaceutical Engineers (IPSE). He holds his PhD in Pharmaceutics and BS Pharmacy from the University of Rhode Island.

About Botanix Pharmaceuticals

Botanix Pharmaceuticals Limited (ASX:BOT) is a dermatology focused company based in Perth (Australia) and Philadelphia (USA) committed to the development of pharmaceutical products that are underpinned by science and supported by well-controlled randomised clinical trials. The Company has two separate development platforms - dermatology and antimicrobial products - both of which currently leverage the unique anti-inflammatory, immune modulating and antimicrobial properties of cannabinoids, particularly synthetic cannabidiol or CBD. Botanix has an exclusive license to use a proprietary drug delivery system (Permetrex™) for direct skin delivery of active pharmaceuticals in all skin diseases, which it utilises in its existing development programs and is being explored with a view to being utilized in a number of other product opportunities.

The Company is developing a pipeline of product candidates with recent positive data from its BTX 1801 Phase 2a antimicrobial study and its Phase 1b rosacea clinical study is currently enrolling patients. Following a successful meeting with the FDA, the Company has also confirmed a drug development plan for the BTX 1503 acne Phase 3 program to support registration. In addition, Botanix plans to advance its BTX 1204A atop dermatitis program to a proof of concept canine study in Q3 CY2021 following encouraging early data from a recent pilot study.
