## **Our Company**

Invests in Australian and New Zealand companies – looking for quality for the long term.

Largest listed investment company on the ASX at \$9.4bn at 31 August 2021 (also listed on NZX), 160k shareholders, full transparency from being listed, independent Board of Directors providing strong governance.

Shareholders own the 'management rights' to the portfolio – no external funds management business deriving an income from the portfolio.

Management expense ratio of 0.14% with no performance fees.

Long term investor with low turnover – tax has less of a negative impact on shareholder returns compared with high turnover funds.

Long history of growing/stable fully franked dividends.

Team manages three other funds – Djerriwarrh, Mirrabooka and AMCIL which adds significantly to the effectiveness of the investment process and idea generation.

## AFIC's share price relative to the NTA - 31 August 2021

## **Investment Objectives**

The Company aims to provide shareholders with attractive investment returns through access to a growing stream of fully franked dividends and growth in capital invested.

The Company's primary investment goals are:

- to pay dividends which, over time, grow faster than the rate of inflation; and
- to provide attractive total returns over the medium to long term.

## Our investment process – how we assess quality

Uniqueness of Assets	Competitive landscape, leadership position, can the assets be replicated
Long-term Sustainability	Barriers to entry, sustainability of competitive advantage, track record of new entrants, threat of substitution
Independence	Pricing power, bargaining power of suppliers, government interference, exposure to commodity cycles
People	Owner/driver model, insider buying/selling, track record, remuneration incentives, corporate governance
Earnings Consistency	Volatility and quality of earnings, cash flow analysis
Financial Strength	Balance sheet gearing, structure of the debt book, dividend policy, ability to invest for future growth

## Our investment process – focus on long term quality

Long term investor in companies, not traders of share prices

Identify quality companies with sound growth prospects that we can buy at a reasonable price

This supports our belief in the power of compounding returns from great businesses

Our research process is built on observing the key characteristics of a company that our experience indicates will produce strong investment returns

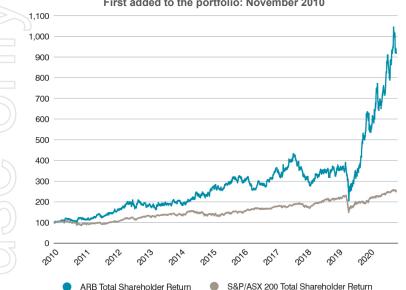

## Long-term approach

AFIC invests in high quality companies and benefits from compounding returns.

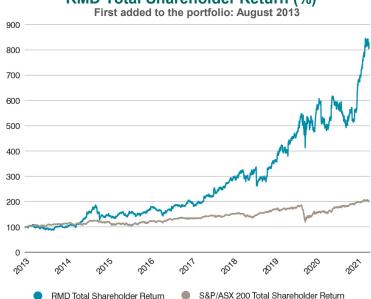

#### **ARB Total Shareholder Return (%)**

First added to the portfolio: November 2010

#### ResMed RMD Total Shareholder Return (%)

## **ESG** is integrated into our investment framework

#### Approach to Environmental, Social and Governance (ESG) factors

- Assessment of ESG risk factors is an important part of our investment process as the sustainability of a business is a key input in our assessment of a company.
- As a long-term investor, we seek to invest in companies that have strong governance and risk management processes, which includes consideration of environmental and social risks.
- We regularly review companies to ensure ongoing alignment with our investment framework.

#### **Engagement with companies**

Voting on resolutions is one of the key functions that a shareholder has in ensuring better long-term returns and management of investment risk:

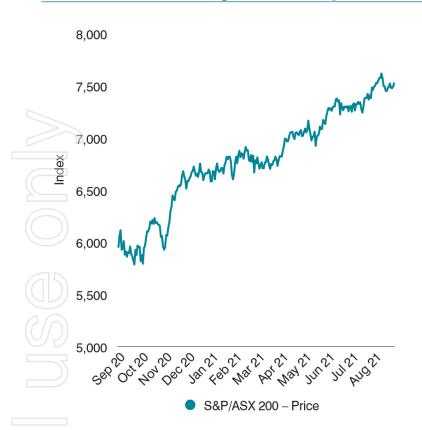

- We conduct our own evaluation of the merits of any shareholder resolution and take input from proxy advisors.
- We vote on all company resolutions as part of our regular engagement with companies.
- We actively engage with companies when we have concerns those resolutions are not aligned with shareholders' interests.

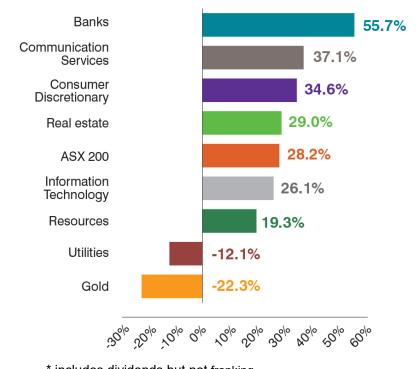

## Market and key sector performance\* - Year to 31 August 2021

<sup>\*</sup> includes dividends but not franking

## **Portfolio performance metrics**

## Portfolio performance, including franking\* - per annum returns to 31 August 2021

<sup>\*</sup> Assumes an investor can take full advantage of the franking credits. AFIC's portfolio return is also calculated after management fees, income tax and capital gains tax on realised sales of investments.

Past performance is not indicative of future performance.

## Over the 4-year period to 31 August 2021 AFIC has a higher portfolio return with less volatility than the S&P/ASX 200 Index (both exclude franking)

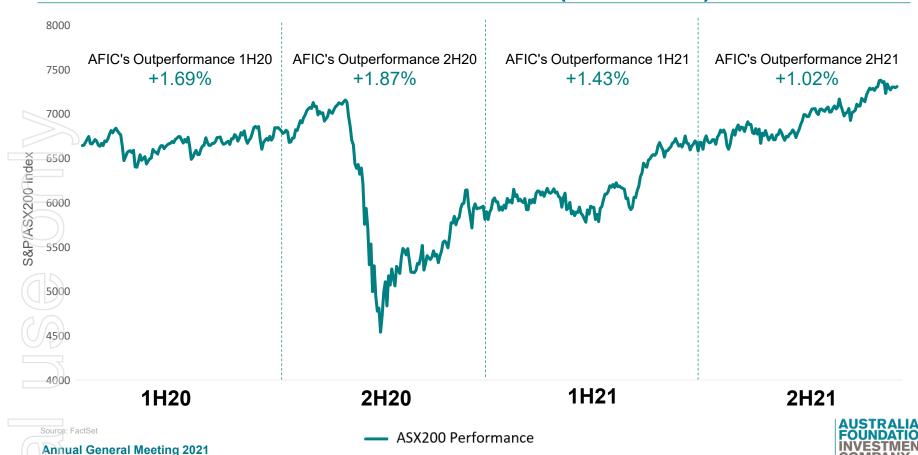

Source: Mercer Investment Performance Survey of Wholesale-Equity – Australia. Note AFIC's return is after tax paid and costs. The universe for Wholesale-Equity – Australia returns are before tax and after fees

Note AFIC share price returns have a significantly lower volatility (beta and standard deviation) than the Index.

#### **Outlook**

- We are mindful of:
  - China growth slowing.
  - Inflationary environment and potential end of rate easing cycle.
  - Company dividends recovering.
  - Outlook for earnings growth remains solid, companies with international earnings relatively better positioned to deliver.
  - Holding a diversified portfolio of quality companies remains appropriate.

### **International Portfolio**

① Invested a small amount (\$47m/50bps) in International companies in May 2021.

Portfolio holdings in 39 companies.

Performance so far has been encouraging.

Applying the AFIC way of investing to International companies.

Looking to build a consistent track record.
