

**8 October 2021**

**Australian Securities Exchange (ASX) Announcement**

## **Customer update (NanoDX)**

We have been working with NanoDX over the past 18 months to provide a MEMS-based solution for rapid COVID testing. Over this period there has been a sustained effort to interface MEMS structures into a nanowire-based technology solution. This is a difficult technological challenge. It has become clear that this combination does not allow to scale up to high volume manufacturing. NanoDX has commenced an entirely new type of design that does not include MEMs and this will terminate any further activity with Sensera on this product.

This announcement has been approved by the board of directors.
