

HIGHLY ACTIVE WEST AUSTRALIAN MINERAL EXPLORER
FOCUSED ON DISCOVERY

SOUTH-WEST CONNECT ASX SHOWCASE - OCTOBER 2021

Disclaimer

This presentation includes forward-looking statements. When used in this document, the words such as “could”, “plan”, “estimate”, “expect”, “intend”, “may”, “potential”, “should”, and similar expressions are forward-looking statements. Although Dreadnought Resources Limited (“Dreadnought”) believes that the expectation reflected in these forward-looking statements are reasonable, such statement involved risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements.

This presentation has been prepared by Dreadnought for the purpose of providing an overview of its current prospects and growth strategy to recipients. This presentation and its contents are provided to recipients on the basis that It may not be reproduced or disclosed in whole or in part to any other person, without the written consent of Dreadnought.

This presentation is provided on the basis that neither Dreadnought nor its respective officers, shareholders, related bodies corporate, partners, affiliates, employees, representatives and advisers, make any representation or warrant (express or implied) as to the accuracy, reliability, relevance or completeness of the material contained in this presentation and nothing contained in the presentation is, or may be relied upon, as a promise, representation or warrant, whether as to the past or the future. Dreadnought hereby excludes all warranties that can be excluded by law.

All persons should consider seeking appropriate professional advice in reviewing the presentation and all other information with respect to Dreadnought and evaluating the business, financial performance and operation of Dreadnought. Neither the provision of the presentation nor any information contained in the presentation or subsequently communicated to any person in connection with the presentation is, or should be taken as, constituting the giving of investment advice to any person.

Competent Person’s Statement

The information in this announcement that relates to geology and exploration results and planning was compiled by Mr. Dean Tuck, who is a Member of the AIG, Managing Director, and shareholder of the Company. Mr. Tuck has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the ‘Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves’. Mr. Tuck consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.

The Company confirms that it is not aware of any new information or data that materially affects the information in the original reports, and that the form and context in which the Competent Person’s findings are presented have not been materially modified from the original reports. (referencing historic and new company announcements).

Currency

All amounts shown are in Australian dollars unless otherwise stated.

Refer to Dreadnought announcements for JORC Table 1 and Table 2 for results and information contained in this presentation.

Illaara Gold-VMS-Iron Ore Project

• 24 June 2019	75 km Long Illaara Greenstone Belt Acquired from Newmont
• 6 December 2019	Consolidation of 75km Long Illaara Greenstone Belt
• 19 March 2020	RC Drilling Hits High Grades at Metzke’s Find
• 13 July 2020	RC Drilling Hits High Grade Gold at Metzke’s Find
• 17 July 2020	Remaining Metzke’s Find Assays
• 22 July 2020	High-grade Iron Ore Opportunity - Illaara Greenstone Belt
• 25 September	2020 Further High-Grade Gold from Metzke’s Find
• 8 October 2020	Further High-Grade Gold from Metzke’s Find
• 30 November 2020	Exploration Update Illaara Gold-VMS-Iron Ore Project
• 27 April 2021	Illaara Update and Regional Target Generation
• 31 May 2021	Drilling Results – Illaara Au-Cu-Iron Ore Project

Kimberley Ni-Cu-Au Project

• 6 June 2019	Ground EM Survey Lights Up Strong Conductor at the Texas Ni-Cu-PGE Target
• 2 December 2019	Assays and EM Surveys Confirm Massive Sulphide System at Chianti-Rufina
• 23 December 2019	Grants Cu-Au Assays and Coincident Magnetic/Gravity Targets
• 24 August 2020	High Priority Copper Gold Targets at Fuso and Paul’s Find
• 25 August 2021	RC Results from Orion, Grant’s Find & Fuso Indicate Large Cu-u-Ag-Co System
• 27 August 2021	Bonanza Grade Cu-Ag-Sb-Bi Mineralisation at rough Triangle
• 11 October 2021	Massive Sulphide Intersected in Multiple Holes at Orion

Mangaroon Ni-Cu-PGE, REE & Au Project

• 25 November 2020	Mangaroon Ni-Cu-PGE & Au Project
• 07 April 2021	Option/JV Agreement Signed with Global Base Metal Miner
• 19 July 2021	High Grade REE Ironstones Outcropping at Mangaroon
• 1 September 2021	Encouraging Results for Rare Earths at Yin
• 9 September 2021	Four New REE Ironstones Discovered at Mangaroon
• 24 September 2021	Airborne Magnetic-Radiometric Survey Commenced at Mangaroon

Company Snapshot

Capital Structure	
ASX Code	DRE
Share Price (27/10/2021)	\$0.039
Shares on Issue	2,831.9M
Market Cap (diluted)	\$113.3M
Cash (unaudited)	~\$8M
Unlisted Options (various strike prices)	74.0M
Top 20 Shareholders	32%
Board / Management Cash Investment	~\$1,300,000
Board / Management Shareholding	17%

Board & Management	
Paul Chapman	Non-Executive Chairman
Dean Tuck	Managing Director
Ian Gordon	Non-Executive Director
Paul Payne	Non-Executive Director
Jessamyn Lyons	Company Secretary
Matt Crowe	Exploration Manager
Frank Murphy	Operations Manager
Nick Chapman / Luke Blais	Senior Geologists

Kimberley Ni-Cu-Au Projects (100%, E04/2315 80%)

- 2,660km² land holding in the West Kimberley, 2nd largest land owner behind IGO and ahead of Chalice
- Unexplored since 1978 with known outcropping mineralisation
 - Orion – High-grade Cu-Co-Ag-Au-Zn Massive Sulphides
 - Rough Triangle – High-grade Cu-Ag-Bi-Sb Veins
 - Texas, Fuso and Grants – Cu-Co-Au mineralisation

Mangaroon Ni-Cu-PGE (Option with FQM), REE & Au Project (100%)

- ~4,500km² land holding in the Gascoyne Province
- Vastly unexplored with historical work led by local pastoralists
- Outcropping rare earth ironstones, nickel-copper-PGE sulphides and gold

Illaara Gold-Base Metals-LCT-Iron Ore Project (100%)

- Consolidated 880km² landholding covering 75km strike of the Illaara greenstone belt.
- High grade gold, outcropping fertile LCT pegmatites, Iron Ore and base metal gossans.
- Metzke's Find maiden gold resource underway:

Strategy and Performance

DELIVER SIGNIFICANT SHAREHOLDER RETURNS

- Increase value through advancing exploration targets through discovery to resource
- *Chalice – Julimar*
- *De Grey – Hemi*
- *Sirius – Nova Bollinger*
- *Sandfire – Degruusa*

EFFECTIVE AND EFFICIENT EXPLORATION

- >80% of funds go into the ground
- Maintain a pipeline of strong targets and drill results
- Maintain a stable of large scale projects with potential for multiple commodities

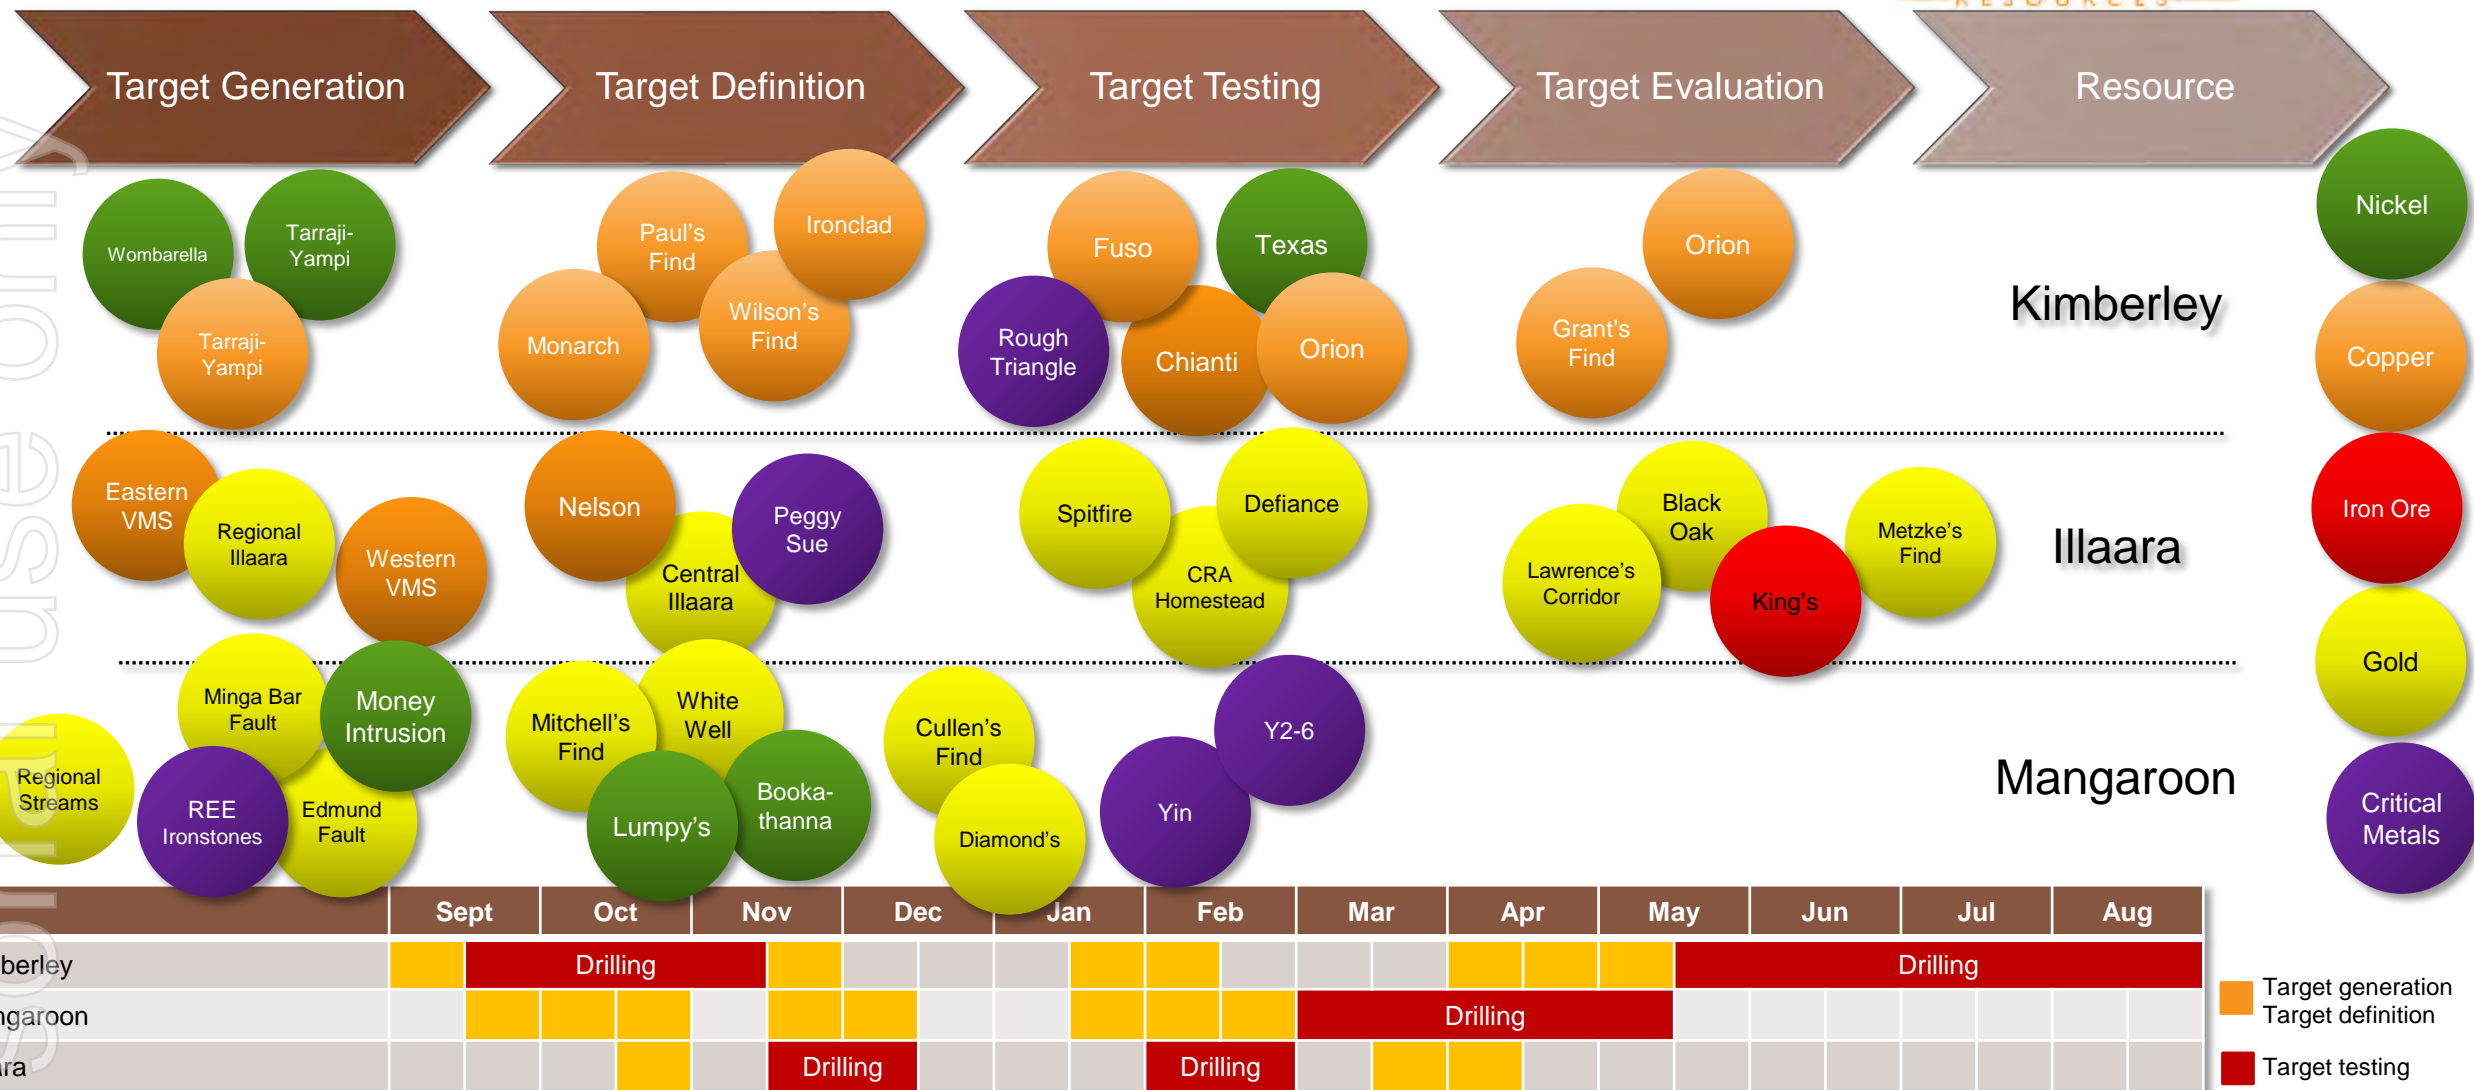

STRONG COMMUNITY AND STAKEHOLDER ENGAGEMENT

We strive to develop win-win relationships with key stakeholders – our licence to operate

- Water bores for pastoralists
- Upgrades to homestead outcamp
- Fire fighting trailer for the Dambimangari
- Site recycling to local sports clubs
- Low impact exploration
- Engagement with CSIRO and Universities

2021 Work Plan

Tarraji-Yampi Ni-Cu-PGE & Gold Project

Rare Exploration Opportunity

- Outcropping mineralisation
- Off limits since 1978
- First movers within the YSTA

WMC's David Barr (L) & Roy Woodall (R) at Tarraji – 1950s

No. of significant mineral discoveries in Australia: 1840-2014

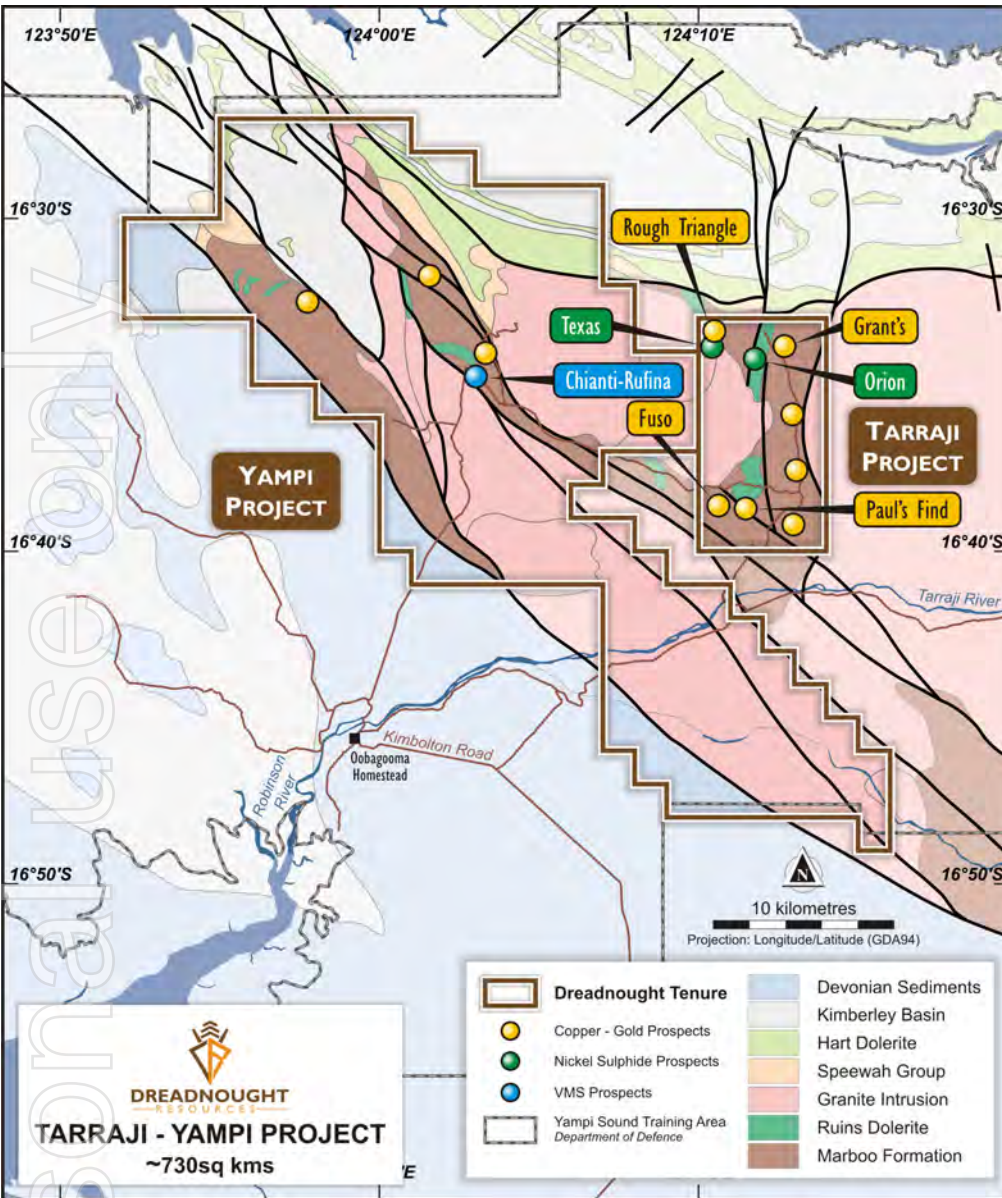

1956-1959: Last significant mineral exploration at Tarraji undertaken by WMC

1978-2013: YSTA Defense Reserve "off limits" to mineral exploration

- Half of all mineral deposits in Australia discovered after 1983
- No exploration since 1958 (Tarraji) / 1972 (Chianti-Rufina)
- Yampi Sound Training Area (Defense Reserve) off-limits to exploration from 1978-2013
- West Kimberley is controlled by IGO, Dreadnought and Chalice

Tarraji-Yampi

- Located just 80kms from the port of Derby and entirely within the Yampi Sound Training Area
- Abundant outcropping Cu-Au-Ag-Bi-Sb-Co mineralisation – vectors to mineralisation undercover
 - Grant's Find – Discovered 1906
 - Rough Triangle – Discovered 1958 (but was never assayed)
- Hunting the elephants under shallow cover
 - Orion – Multiple massive sulphide intercepts with visible copper mineralisation – Assays Pending
 - Fuso – First program confirmed high-grade mineralisation, but the magnetic anomalies remain to be tested

Orion Cu-Ag-Au Target

12m of massive sulphide from the first hole drilled at Orion – *multiple additional intercepts since*

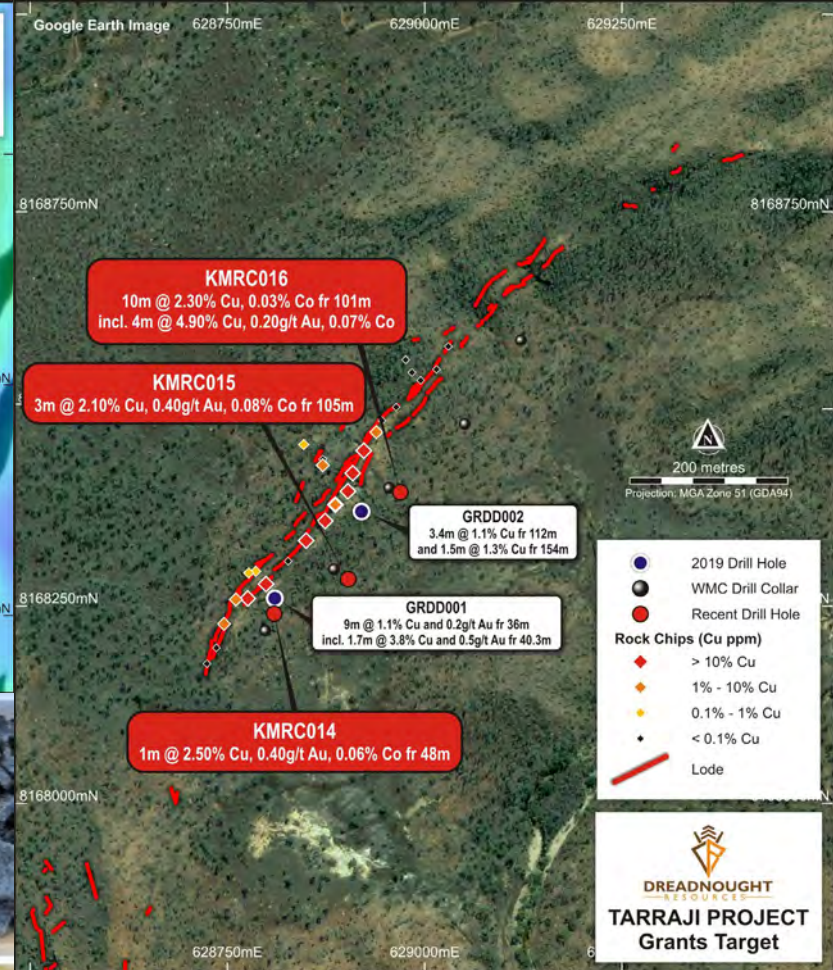

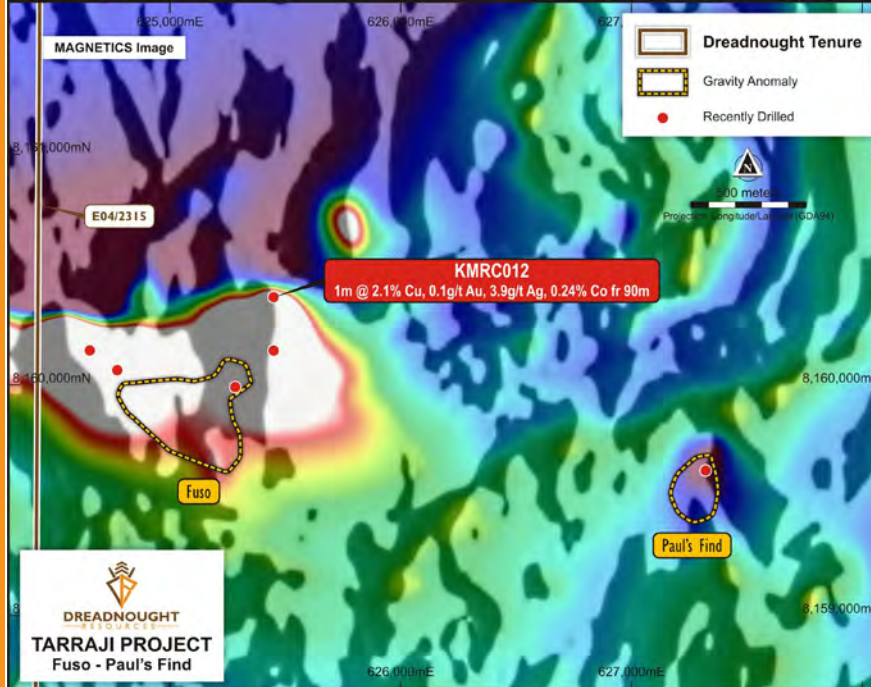

Grant's Find and Fuso Cu-Au-Co

Grant's Find

- Outcropping breccia vein over 800m strike.
- Best intercept to date – most northern drill hole.
- 10m @ 2.3% Cu, 0.03% Co

Fuso

- Multiple strong magnetic anomalies, completely under shallow cover.
- New magnetic data indicating we missed the target due to hole deviation.
- 1m @ 2.1% Cu, 0.24% Co, 0.1g/t Au

Next Steps: Explain the magnetic anomaly and does Grant's Find improve to the north?

- Drilling Underway

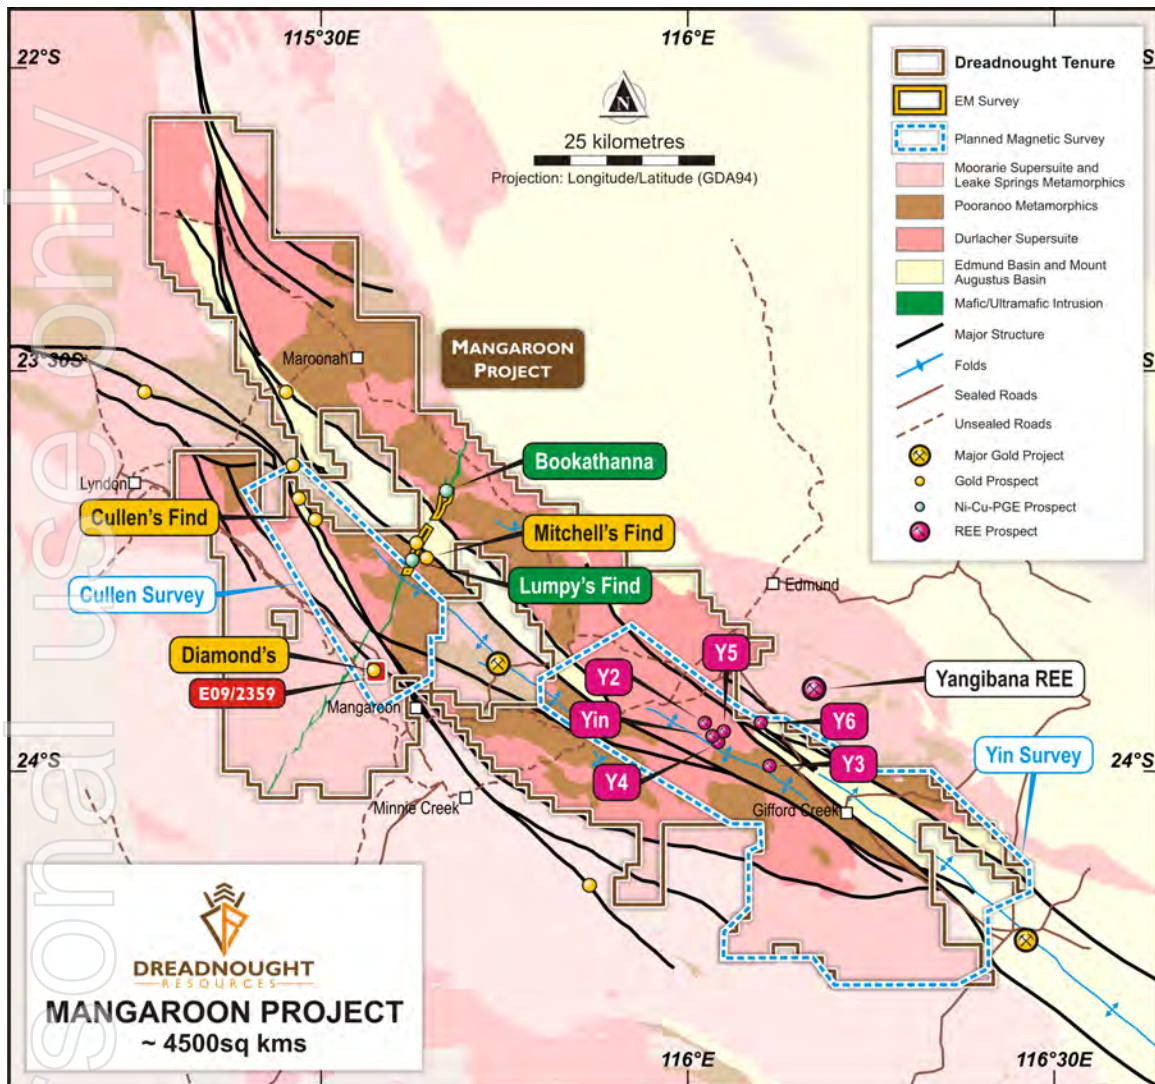

Rough Triangle: Cu-Ag-Bi-Sb

- 1.2km long outcropping vein of high-grade Cu-Ag-Bi-Sb mineralisation
- Significant rock chips include:
 - RT07: 20.4% Cu, 4.6% Sb, 0.9% Bi, 101g/t Ag
 - RT08: 8.1% Cu, 2.2% Sb, 0.3% Bi, 44.5g/t Ag
 - RT09: 18.9% Cu, 14.1% Sb, 1.6% Bi, 196g/t Ag
 - RT12: 18.5% Cu, 10.8% Sb, 1.9% Bi, 291g/t Ag
- Drilling expected May/June 2022

Mangaroon Ni-Cu-PGE, REE & Au Project

Mangaroon Project

➤ Rare Earths: Yin Camp – 100% Owned

- Outcropping high-grade rare earth ironstones – similar to Yangibana
- High NdPr to TREO ratio – high value product for permanent magnets
- Mineralogy and metallurgic work confirms high grade concentrate product

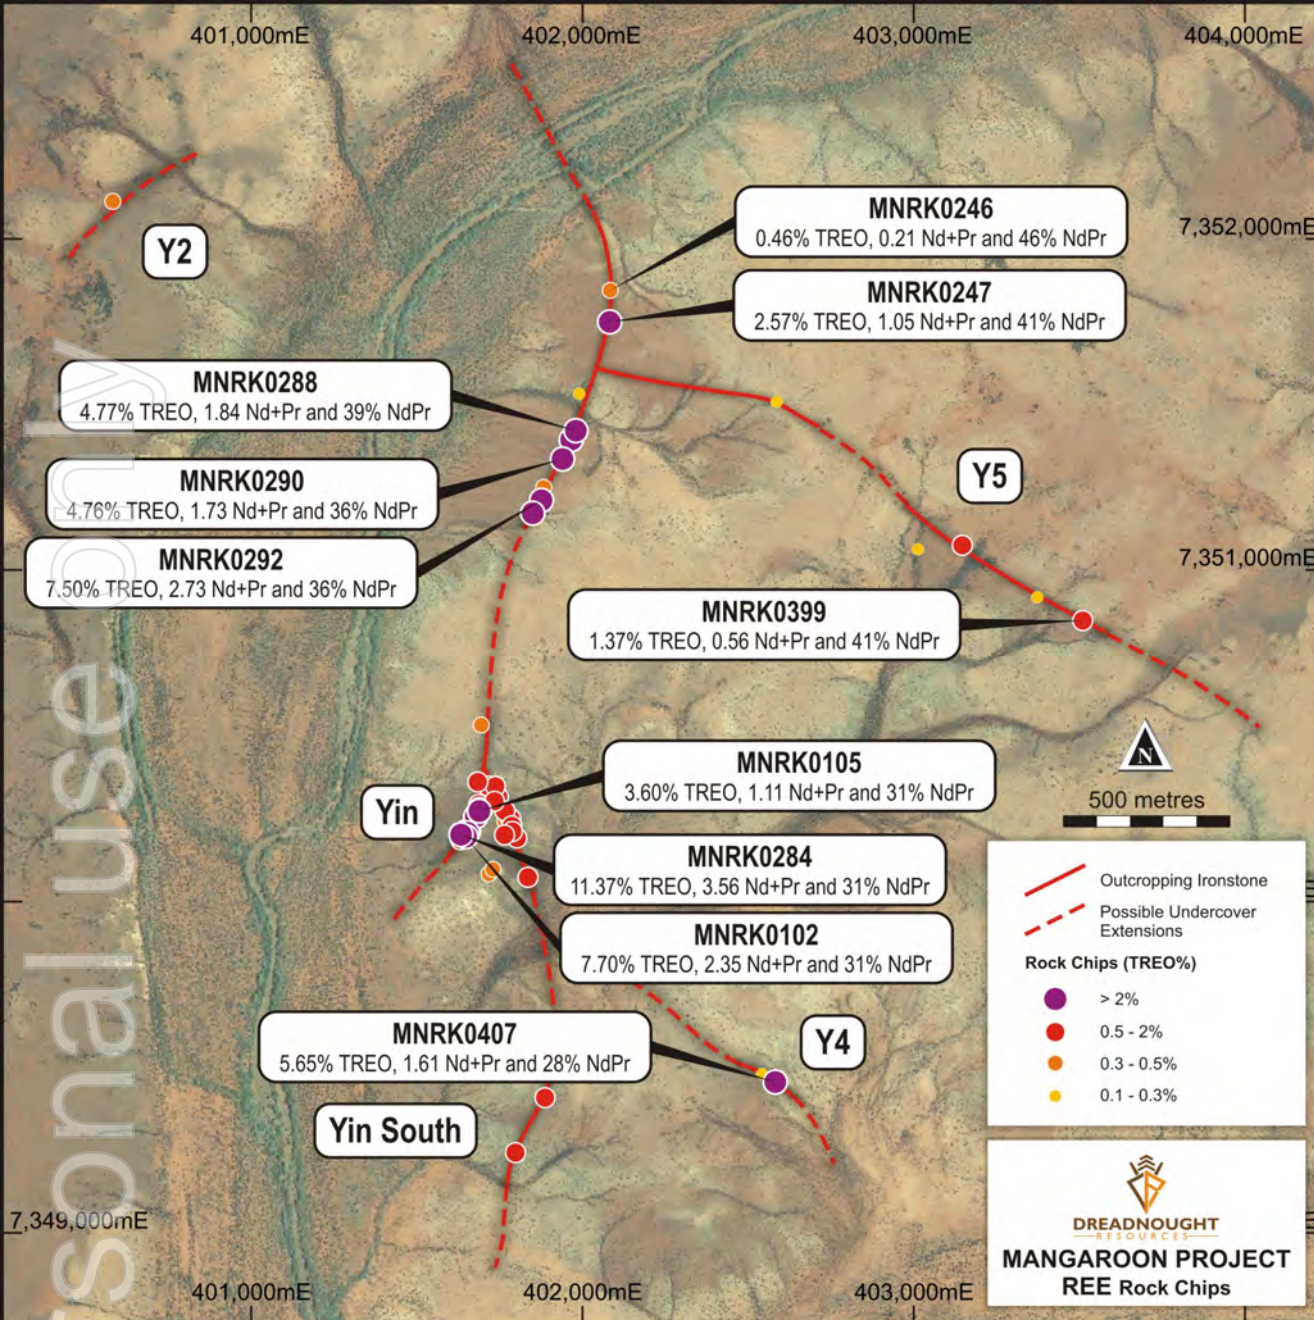

➤ Ni-Cu-PGE: The Money Intrusion – Option/JV with FQM

- 50km long, outcropping mafic/ultramafic intrusion with high tenor blebby Cu-Ni-PGE bearing sulphides
- FQM entered into an Option Agreement over 5 tenements covering the Money Intrusion
- earn 51% interest by spending \$15M and a further 19% interest by sole funding up until a Decision to Mine.
- Dreadnought retains rights to any gold discoveries.

➤ Gold: Minga Bar and Edmund Faults – 100% Owned

- Known outcropping gold mineralisation along two crustal scale structures
- Historical high grade gold drilled at Cullen's Find and mined at Diamond's Mine

Yin REE Ironstones

Next door to Yangibana –
Hastings Technology Metals
(HAS.ASX) Market Cap ~\$500M

Discovery and Resource drilling
to commence March Quarter
2022

Yin REE Ironstones

Scale

- Six REE ironstones identified to date with over an area of ~10kms x 5kms

Grade

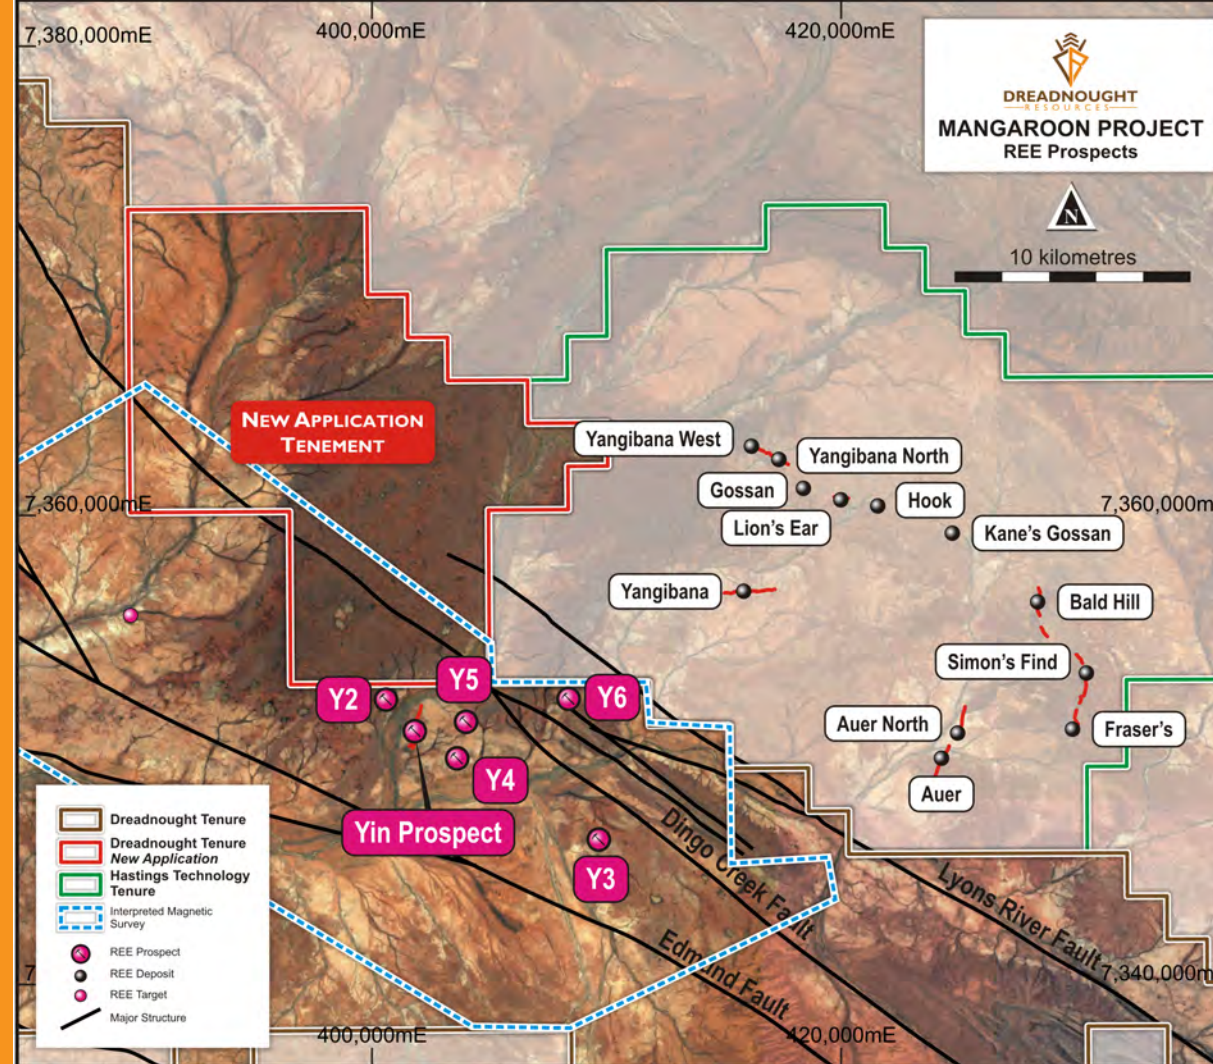

- High grade rock chips with high NdPr to TREO ratios – high value concentrate

Mineralogy

- Monazite – globally significant REE mineral with abundant processing capacity with three plants to be built in WA

Metallurgy

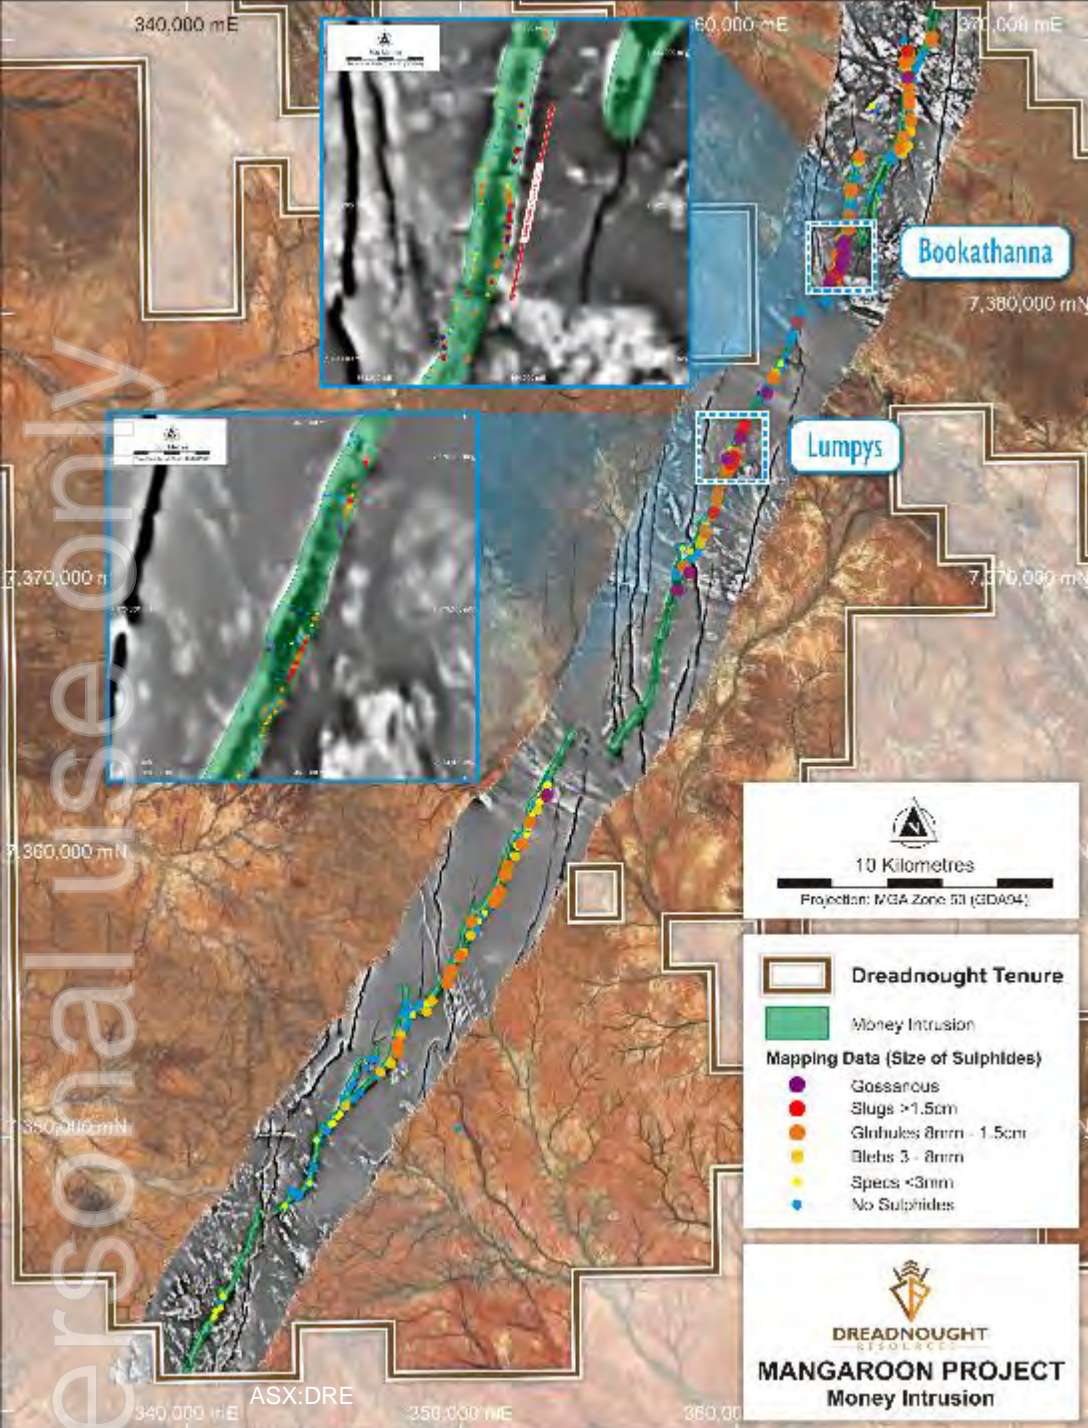

- Standard flotation sheet able to produce high grade concentrate
- 12.3% Nd₂O₃ / 40% TREO with 92.8% process recovery

Next Steps: How big is it and how many more are there?

- September 2021: Airborne magnetic and radiometric survey
- October 2021: Environmental and heritage surveys
- March 2022: Discovery and resource focused drilling
- Mid-Late 2022: Deliver maiden JORC resource

Mangaroon Ni-Cu-PGE

➤ The Money Intrusion

- 50km long, outcropping mafic / ultramafic intrusion with high tenor blebby Cu-Ni-PGE bearing sulphides
- 1km long outcropping gossanous Ni-Cu-PGE horizon at Bookathanna

Next Steps: Is there a massive sulphide accumulation?

September – November 2021: Ground EM surveys

October / November 2021: Environmental and heritage surveys

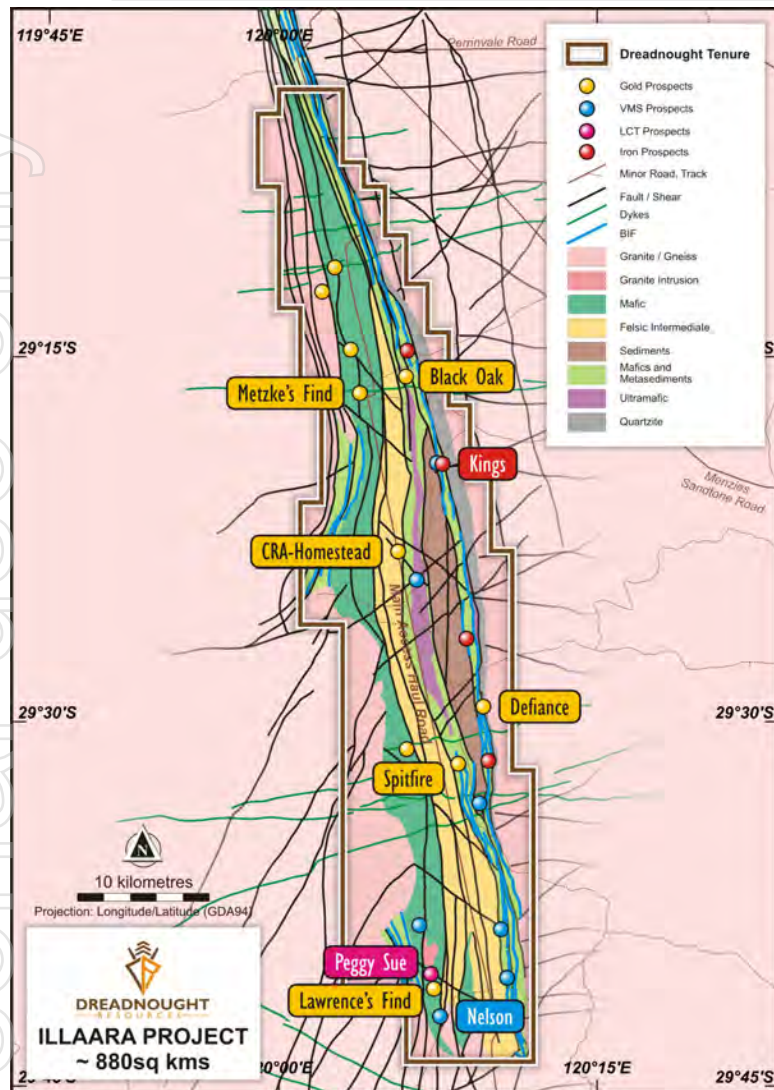

March 2022: Discovery focused drilling

Coarse grained mafic intrusion showing high tenor three phase disseminated and blebby sulphides comprised of chalcopyrite, pentlandite and pyrrhotite

Ilaara Au-Cu-LCT-Iron Ore Project

Illara Project Overview

Lithium Caesium Tantalum Pegmatites – Peggy Sue

- Outcropping fertile LCT pegmatite swarm over an area of 5km x 2kms with multiple clusters of high-grade tantalum (up to 529ppm Ta₂O₅)
- Additional mapping and sampling over mineralised clusters to define drill targets for early 2022

VMS - Nelson

- ~1.4km long Cu-Pb-Zn-Ag anomaly situated over prospective changes in lithology (peak values 640ppm Pb; 1,100ppm Zn; 300ppm Cu; 0.5 g/t Ag)
- FLEM survey to define drill target

Gold

- High-grade gold resource at Metzke's Find in March quarter 2022
- Regional sampling over central and eastern corridor highlighting new large scale coherent gold in soil anomalies

Iron Ore

- Resource evaluation drilling in June quarter 2022
 - **P-North:** 29m @ 58.6% Fe, 8.3% SiO₂, 3.4% Al₂O₃, 0.04% P, and 4.0% LOI from 6m
 - Incl. 16m @ 64.4% Fe, 2.4% SiO₂, 1.3% Al₂O₃, 0.04% P and 3.7% LOI from 8m
 - **Kings:** 49m @ 55.7% Fe, 9.1% SiO₂, 3.1% Al₂O₃, 0.04% P, and 4.0% LOI from 13m
 - Incl. 11m @ 62.7% Fe, 2.5% SiO₂, 1.2% Al₂O₃, 0.05% P and 6.1% LOI from 48m

Take Away Message

- Strong news flow: Discovery and evaluation / resource drilling focus for the next 12 months
 - Metzke's Find Gold: March 2022
 - Kings Iron Ore: June 2022
 - Yin REE: August 2022
 - Orion Cu-Ag-Au: December 2022
- Kimberley and Mangaroon: first mover with potential for major Cu, Au, Ni and REE deposits
- Illaara: Consolidated 75km long underexplored greenstone belt with early exploration success
- Experienced management team with a track record of success and strongly aligned with shareholders
