

Fast charging towards a low carbon future

Kathleen Valley Lithium Project

DEFINITIVE FEASIBILITY STUDY & UPDATED
DOWNSTREAM SCOPING STUDY | NOVEMBER 2021

ASX: LTR

Important information

Cautionary Statement

The production targets and forecast financial information referred to in the Definitive Feasibility Study (DFS) and Downstream Scoping Study (DSS) were based on Proven Ore Reserves (3.3%), Probable Ore Reserves (79.5%) and Inferred Mineral Resources (17.2%). The Inferred material included in the inventory was 14.3Mt @ 1.1% Li₂O & 120 ppm Ta₂O₅. The Inferred material was scheduled such that less than 10% of the Inferred material is mined in the first ten years, with the remainder mined through to the end of the mine life.

The Inferred material does not have a material effect on the technical and economic viability of the project.

There is a low level of geological confidence associated with inferred Mineral Resources and there is no certainty that further exploration work will result in the determination of indicated Mineral Resources or that the production target itself will be realised.

Forward looking statements

This Presentation contains forward-looking statements which are identified by words such as 'may', 'could', 'believes', 'estimates', 'targets', 'expects', or 'intends' and other similar words that involve risks and uncertainties. These statements are based on an assessment of present economic and operating conditions, and on a number of assumptions regarding future events and actions that, as at the date of this Presentation, are considered reasonable. Such forward-looking statements are not a guarantee of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, the Directors and the management. The Directors cannot and do not give any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained in this Presentation will actually occur and investors are cautioned not to place undue reliance on these forward-looking statements. The Directors have no intention to update or revise forward-looking statements, or to publish prospective financial information in the future, regardless of whether new information, future events or any other factors affect the information contained in this Presentation, except where required by law or the ASX listing rules.

Disclaimer

Whilst care has been exercised in preparing and presenting this presentation, to the maximum extent permitted by law, Liontown Resources Limited and its representatives:

- Make no representation, warranty or undertaking, express or implied, as to the adequacy, accuracy, completeness or reasonableness of this Presentation;
- Accept no responsibility or liability as to the adequacy, accuracy, completeness or reasonableness of this Presentation; and
- Accept no responsibility for any errors or omissions from this Presentation.

Competent person statement

The Information in this Presentation that relates to Exploration Results and Mineral Resources for the Kathleen Valley Project is extracted from the ASX announcement "Strong progress with Kathleen Valley Definitive Feasibility Study as ongoing work identifies further key project enhancements" released on 8 April 2021 which is available on www.ltresources.com.au.

The Information in this Presentation that relates to metallurgical testwork and process design, Ore Reserves, Production Target and DFS for the Kathleen Valley Project is extracted from the ASX announcement "Kathleen Valley DFS confirms Tier-1 global lithium project with outstanding economics and sector-leading sustainability credentials" released on 11 November 2021 which is available on www.ltresources.com.au.

The Information in this Presentation that relates to the DSS for the Kathleen Valley Project is extracted from the ASX announcement "Updated Downstream Scoping Study Highlights Next Growth Horizon for Kathleen Valley Project" released on 11 November 2021 which is available on www.ltresources.com.au.

The Information in this Presentation that relates to Mineral Resources for the Buldania Project is extracted from the ASX announcement "Liontown announces maiden Mineral Resource Estimate for its 100%-owned Buldania Lithium Project, WA" released on the 8 November 2019 which is available on www.ltresources.com.au.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and that all material assumptions and technical parameters underpinning the estimates or production targets or forecast financial information derived from a production target (as applicable) in the relevant market announcements continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

Authorisation

This Presentation has been authorised for release by the Board.

Highlights

Kathleen Valley (KV) is a globally significant lithium resource, located within a stable and established mining jurisdiction with a strong ESG position with growth optionality. The project is well positioned, with start of production expected to coincide with a significant spodumene market deficit

	Globally significant Tier 1 project	<ul style="list-style-type: none">World-class lithium deposit with a globally significant Mineral Resource Estimate (MRE) of 156Mt @ 1.4% Li₂OExceptional economics, delivering a post-tax NPV₈ of A\$4.2bn and post-tax IRR of 57%
	Low cost, long-life scalable operations	<ul style="list-style-type: none">Current resource base supports an initial ~23 year life of mine, with Lontown targeting further expansionLow cash operating costs of US\$314/dmt (Years 1-5)¹ and capital intensity below other spodumene development projects
	Timed to perfection	<ul style="list-style-type: none">Significant supply deficits forecast to emerge from 2024, expected to align with start of production at KVKV is positioned to become one of very few projects advanced enough to meet demand, with full offtake optionality
	Strong ESG focus	<ul style="list-style-type: none">Liontown is on a net zero trajectory, with a climate strategy roadmap in place targeting net zero emissions by 2034Leveraged underground mining approach to achieve a strong ESG profile relative to peers
	Clear and achievable long-term strategy	<ul style="list-style-type: none">DFS contemplates an expansion of SC6.0 production from ~500ktpa to ~700ktpa facilitating downstream ambitionUpdated Downstream Scoping Study (post-tax NPV₈ of A\$9.6bn, IRR of 56%) provides value maximising pathway
	Funding & Offtake Advanced	<ul style="list-style-type: none">Actively progressing all funding options. Board confident that funding will be in place prior to FID Q2 2022Offtake discussions well advanced with potential customers, diversified by geography and stage in the value chain

1. Excluding royalties

Liontown Corporate Overview

Liontown is a leading ASX-listed lithium company focused on the development of the world-class Kathleen Valley Lithium Project

Projects

Kathleen Valley World-class scale and economics

Liontown's Strategy

We aim to be an ESG-leader, and a globally significant provider of battery materials for the rapidly growing clean energy market

Liontown's ESG Focus

Environment

- Aspiring to have Best-in-class Scope 1 and 2 emissions and reduced impact on local surroundings due to UG⁴ approach
- ~60% renewable energy target to reduce Scope 2 emissions
- Minimising water usage through recycling

Social and corporate governance

- Native Title Holders have provided consent for signing Native Title Agreement
- Social licence fundamental to sustainable, long-term operation
- Best-in-class reporting aligned with GRI¹, TCFD² and SASB³ standards
- First sustainability report expected Q4 2021

Customers

- Automotive OEMs increasingly demand environmentally-friendly, low-carbon batteries to achieve Scope 1-3 targets
- Carbon footprint labelling and transparency will enable end-consumer choice for ESG

Climate Strategy Roadmap

First Production 2024	1 st Goal 2029	Net Zero 2034
Design & build for the future <ul style="list-style-type: none">• ~60% renewable power with built in expansion potential• Conventional mine fleet with future proofed UG infrastructure• Alternative fuels for mine and transport fleet• Redesigned mine-plan with a focus on reduced ground disturbance	Refine <ul style="list-style-type: none">• Target >75% renewable power• Upgraded mining fleet with electric trucks• Target 50% biofuel powered road transport & LV fleet• Reduced site water consumption via greater recycling	Consolidate <ul style="list-style-type: none">• Target 100% renewable power• Target 100% electric or clean fuel powered mining & LV Fleet• Net zero to ship loading

10 years to net zero⁵

Liontown's ESG Focus (cont.)

Underground mining provides significant sustainability advantages compared to peers, owing to higher ore quality and grades and minimisation of waste

Sustainability Benchmarking

Liontown is expected to be one of the first new mining companies in Australia to have 60% renewable power at start-up

Source: Peers – Roskill and Kathleen Valley numbers are internal estimates
Bubble size represents annual production of spodumene on a LCE basis

Social Engagement

Tjiwarl input has been included in the project initial design to ensure areas of cultural significance are respected

- Native Title Holders (the Tjiwarl) have provided their consent for the signing of the Kathleen Valley Project Native Title Agreement (NTA)
- Agreement talks to areas that matter for the Tjiwarl:
 - Communication
 - Land and Water Management
 - Aboriginal Heritage Management
 - Cultural Awareness & Access
 - Compensation
 - Social Opportunities and Development
 - Employment and Contracting
- Securing a NTA is a key enabler for project permitting

Lithium Market Dynamics

Production at Kathleen Valley is expected to commence in 2024, coinciding with a forecast market deficit that is expected to continue and grow beyond 2024. Liontown has optionality to further increase production towards the end of the decade to capitalise on the widening deficit

Global lithium market balance (battery grade), 2021-31, kt LCE

Demand

- **25% forecast CAGR for Lithium-ion Battery demand** – driven by stronger GHG regulations and improving EV adoption
- **25% forecast CAGR for lithium hydroxide** – as preferred product for cathodes

Supply

- **Liontown is a globally significant source of supply** – Liontown forecast to supply ~5% of global spodumene in 2024 and ~6% in 2029²
- **Significant supply constraints** – Constraints on peers (e.g. environmental, permitting, customer agreements) make Liontown one of few viable options to meet supply deficit
- **17% cost advantage for hard rock** – compared to producing LiOH from brine¹

Source: Roskill, MineSpans

1. Costs represent indicative 2025 cost base for typical brine and spodumene operations; Source: MineSpans

2. Liontown expected to supply 5% of global spodumene and 4% of global lithium in 2024 and Liontown expected to supply 6% of global spodumene and 4% of global lithium in 2029

3. Kathleen Valley 2029 production of ~681kdm SC6.0 equivalent to ~86kt LCE (converted at 7.93t SC6.0 = 1t LCE)

Competitive Cost Curve Position

In 2030, Liontown will become a globally significant, cost competitive producer once 4Mtpa expansion ramp-up is complete

Roskill Spodumene Cost Curve: 2030
Based on Roskill cost analysis

Kathleen Valley Benchmarked

Kathleen Valley is a uniquely positioned, globally significant Tier 1 lithium resource with exploration potential

Australian hard rock lithium operations and advanced projects ¹

By project, size, and grade

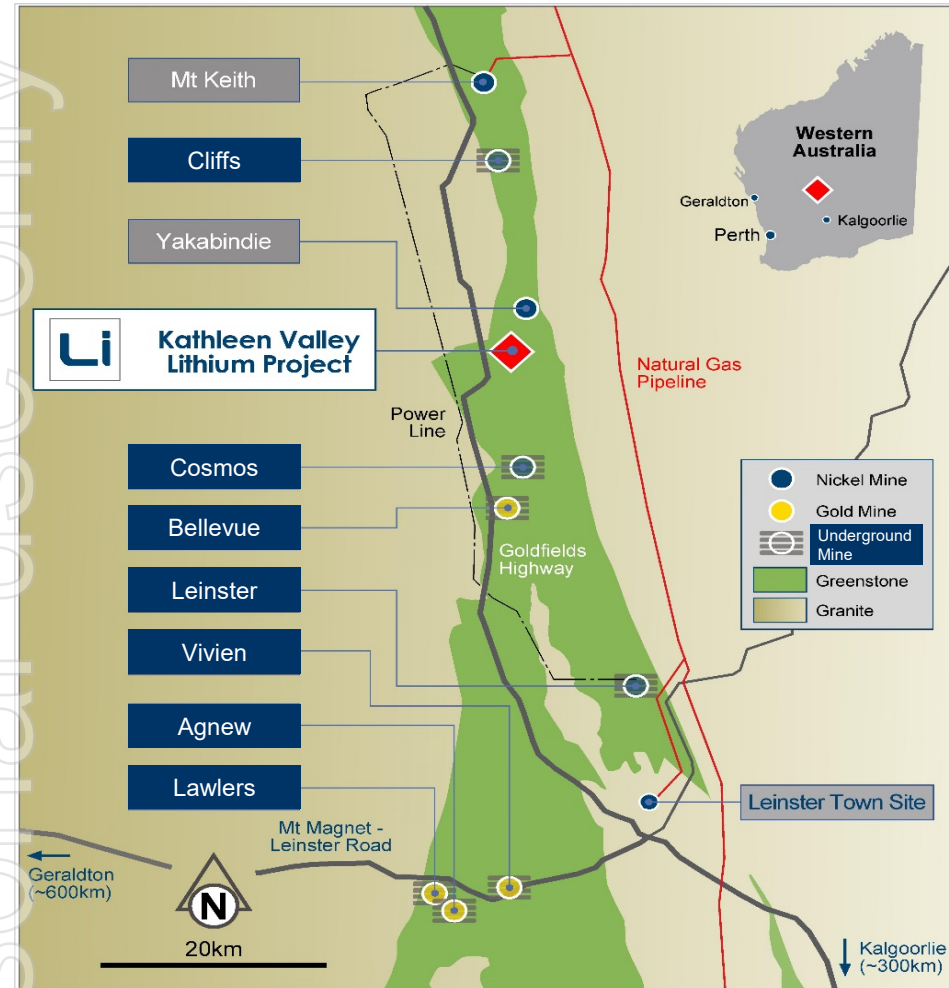

¹: Refer to Appendix for Peer Comparison information including Resource Classifications; refer to Appendix 2 for Li₂O equivalents parameters and calculations

²: Bubble size represents the Resource tonnes multiplied by lithium oxide (%).

Kathleen Valley Location

Kathleen Valley is located in a stable, established and well-governed mining jurisdiction, giving Lontown confidence to execute an accelerated project delivery timetable and providing long-term operation support to Kathleen Valley

Major Nickel and Gold Mines

Town of Leinster

Goldfields Highway (access to Geraldton port)

Natural gas pipeline

Powerline

Sealed airstrips

November 2021 DFS Key Metrics

Based on April 2021 MRE – 156Mt @ 1.4% Li₂O and 130ppm Ta₂O₅

NPV¹ (post-tax)	A\$4.2B
IRR / Payback	57% / 2.3 years
SC6 Opex Years 1-5³ (FOB)	US\$402/dmt US\$314/dmt (excl. royalties)
SC6 Opex Years 1-10³ (FOB)	US\$417/dmt US\$319/dmt (excl. royalties)
AISC Years 1-10⁴ (FOB)	US\$452/dmt
Ave. SC6 Price Years 1-10⁵ (FOB)	US\$1,287/dmt (Based on Roskill price)
Capex⁶	A\$473M (incl. \$107M Pre-production)

1. 8% (real). FX assumption of 0.73
2. Refer Cautionary Statement on Slide 2.
3. Operating costs include all mining, processing, transport, state and private royalties, freight to port, port costs and site administration and overhead costs (includes tantalum credits). Excludes sustaining capital.
4. All in Sustaining Capital Costs (AISC), as referred to in this announcement, are cash operating costs including all mining, processing, transport, freight to port, port costs, site administration/ overhead costs, tantalum credits, state and private royalties and sustaining capital.
5. Based on Roskill November 2021 price forecasts
6. Project totals exclude working capital, finance costs, sustaining capital and corporate costs associated with project development

Production Schedule and Mine Overview

Kathleen Valley is a globally significant, high-grade resource – average grade in first five years of 1.5%

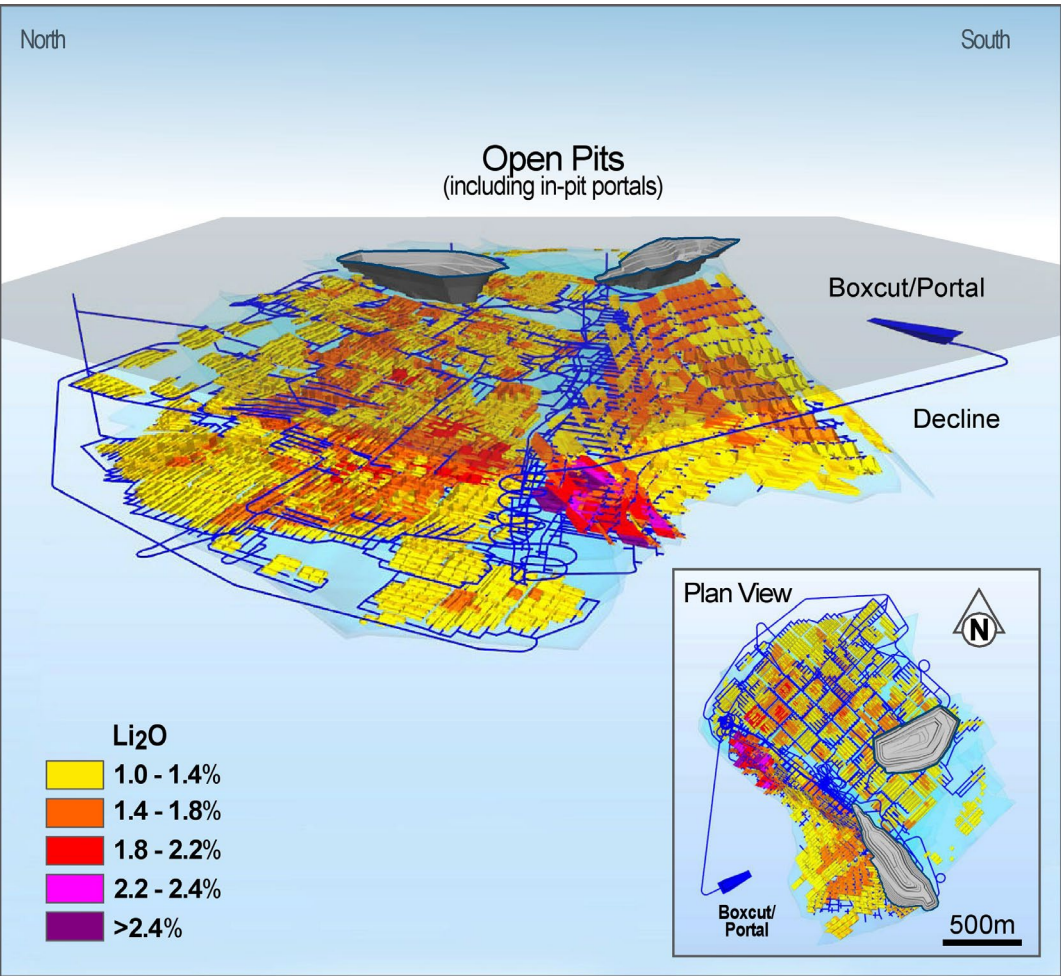

10-Year Production Schedule

Spodumene Concentrate (kdmt) and Processing Grade (%)

Planned throughput expansion

Mine Overview

Mining and Processing

Conventional mining method, proven and reliable technology with a flowsheet grounded in evidence based design

Underground Mining Method

- **Conventional mining methods** (room-and-pillar and long-hole stoping) with proven technology
- **Shallow mine** - first ore at 120m, total depth 450m
- **Competent ground conditions** with ~5km dedicated geotechnical drilling to prove UG design
- **Well-established underground mining precinct**
 - Seven underground operations in area
 - Highly skilled underground workforce (including contractors)

Economic Benefits of Underground Mining

- **Early access** to higher grade parts of the deposit
- **High tonnage** per vertical metre (100 kt/m – 206 kt/m at 200 – 400 metres below surface)
- **Selective mining** avoids dilution from host rocks
- **Less waste removal**

WOF Processing Strategy

- Simple flowsheet – better operability and reliability
- KV ore has **outstanding metallurgical properties**
- Test work has repeatedly achieved **greater than 80% Lithia recovery** and >6.0% concentrate grade
 - Supported by **140+ staged float tests** and variability analysis
 - **78%** has been conservatively assumed for financial modelling

Cumulative Grade vs. Recovery – Avg. of multiple Batch Tests¹

1. OP = Open Pit, MMV = Mount Mann Vertical, NWF = NorthWest Flats

Leading Capital Intensity

Despite inflationary pressures across the industry, Liontown’s DFS represents a significant improvement in capital intensity at Kathleen Valley. Once expanded, Liontown will have one of the lowest capital intensity development projects globally and strong capital efficiency

PFS Capex to DFS Capex (A\$m)

Capital Intensity of Comparable Projects (US\$/tpa)¹

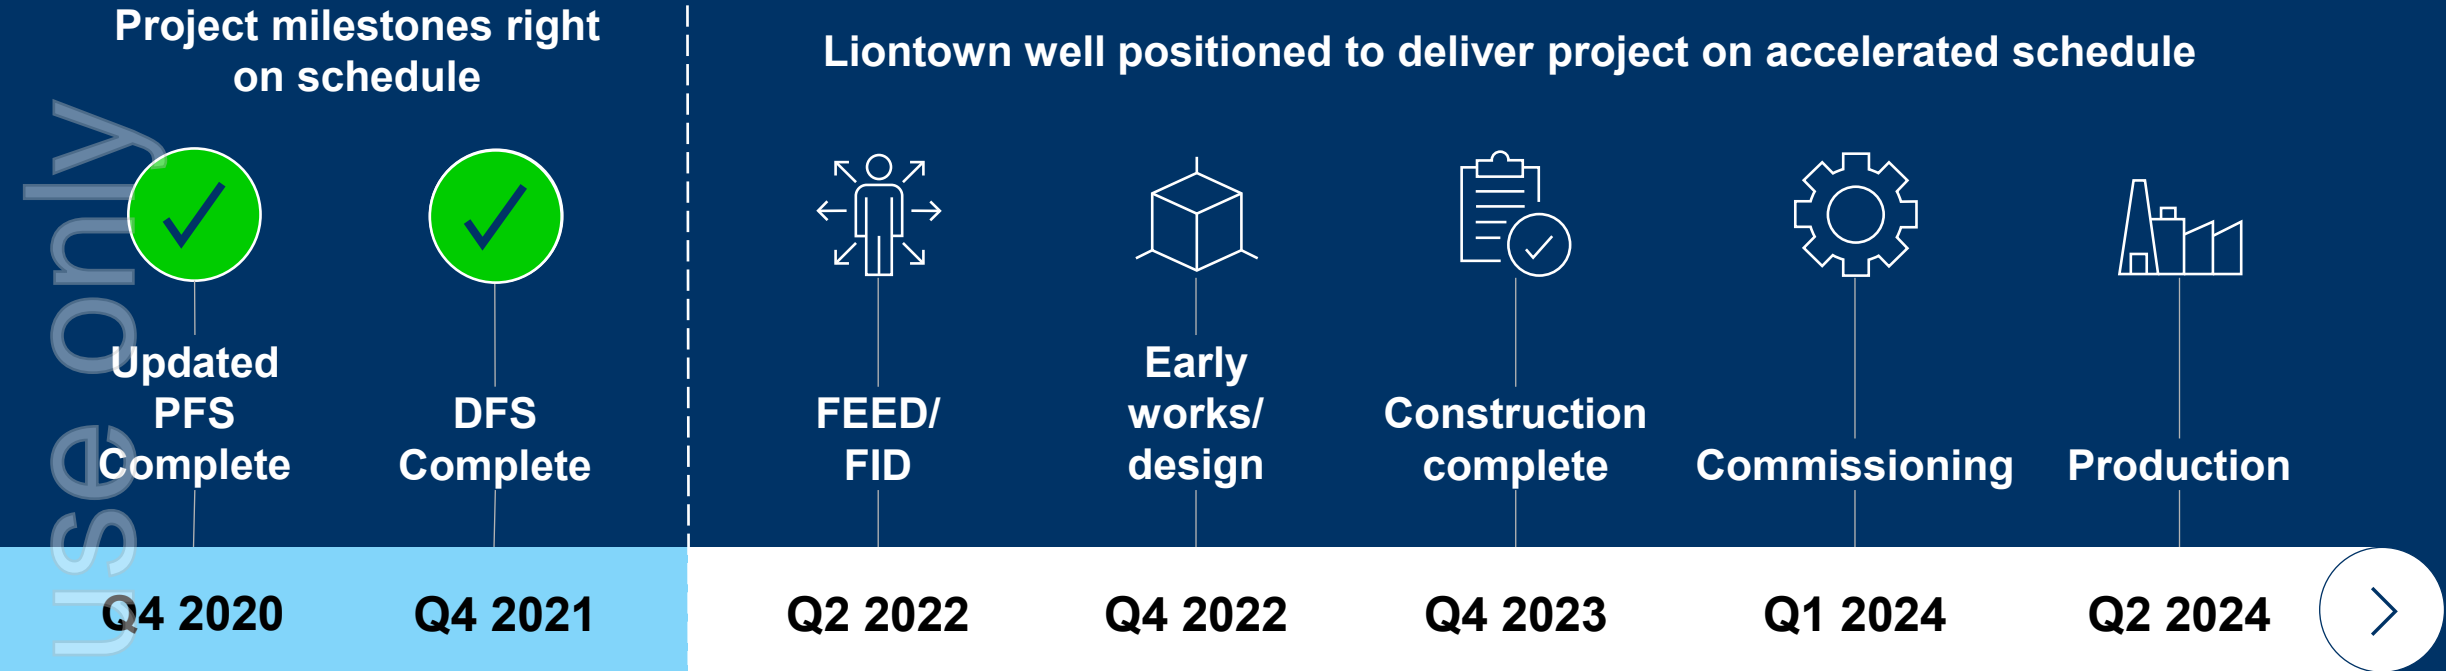

1: Assumes AUD USD of 0.73 and CAD USD of 0.81. Adjusted to 6.0% spodumene concentrate grade. Only projects with >10 year LOM shown
2: Capital efficiency calculated as NPV of \$4.2B divided by initial + expansion capital of \$538m

We aim to accelerate the schedule to meet expected market shortfall

Project milestones right on schedule

Liontown well positioned to deliver project on accelerated schedule

Continued assessment of growth and downstream processing options

Near Term: Next steps prior to FID

- Permitting
- NTA signoff (17th Nov)
- Finalise offtake agreements
- Ordering critical long lead items
- Award EPCM and key supplier and engineering contracts
- Recruitment of Project Execution Team
- Finalise funding arrangements

<3 years

Target to production

Offtake Strategy

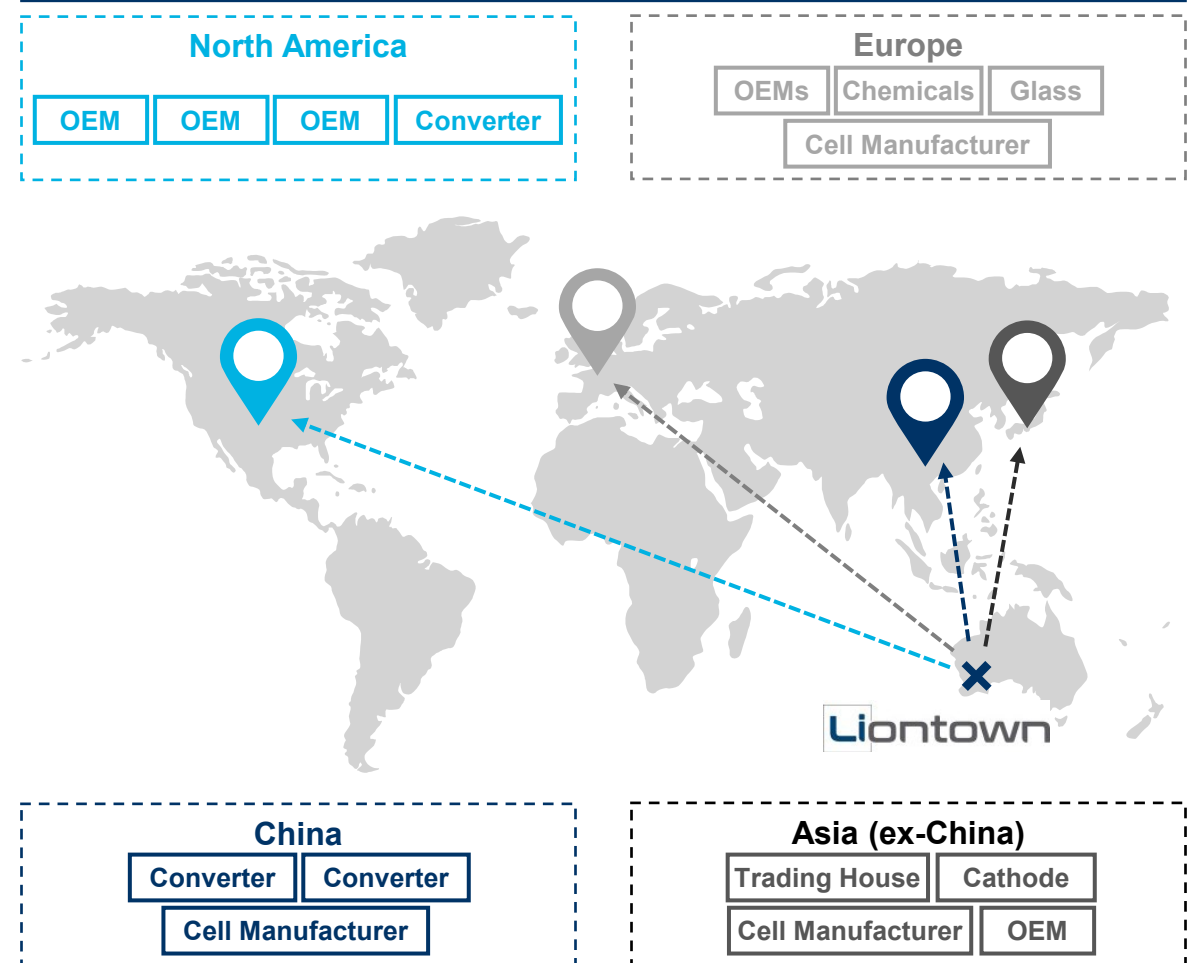

Liontown intends to put in place large foundation offtake agreements, aiming to deliver diversification by geography and stage in value chain

Offtake Strategy

- Discussions held with in excess of 50 parties who have expressed interest in offtake
- Leveraging strong position given full offtake optionality, patience has been a strength in the rapidly improving lithium market
- Offtake pricing likely to be determined with reference to the lithium hydroxide price, exposing Liontown to higher value end product
 - Liontown expects spodumene pricing calculated with reference to hydroxide price will provide potential for realised prices in excess of a spodumene index priced offtake
- Discussions are in advanced stages with a number of parties, diversified by geography and stage in value chain
- Offtake for tantalum by-product is also being explored with customers
- Any uncontracted production intended to be sold into the spot market
 - various options are being explored, including auction platforms (such as the Battery Mineral Exchange, where other spodumene producers have recently achieved outstanding results)

Geographic Breakdown and Indicative Target Customers

Downstream Processing Opportunity

The updated DSS confirms: Value maximizing pathway for Lontown is a staged -build, integrated mining, processing and refining operation producing Lithium Hydroxide Monohydrate ("LHM")

The Integrated Project has the potential to make Lontown the 3rd largest supplier of LHM in the world (based on 2031 Roskill LHM projections) producing ~86ktpa LHM

Refinery will be included in our Climate Strategy Roadmap and benefit from the energy renewables developed during the operation of KV reducing its carbon footprint

Value Maximising Pathway

- ✓ Exposure to higher margin end-product more quickly
- ✓ Capture highly favourable market environment
- ✓ Unlocks additional offtakers (particularly OEMs) with potential for nearer-term discussions
- ✓ Value maximising pathway with significant NPV value upside
- ✓ Lontown progressing to pre-feasibility study phase for downstream opportunity

(1) 8% (real) | (2) Refer Cautionary Statement on Slide 2. | (3) Cash operating costs during the years of refinery operation include all mining, processing, downstream refining, transport, state & private royalties, freight to port, port costs, site administration, overhead costs and tantalum credits. Excludes sustaining capital. | (4) Based on Roskill November 2021 price forecasts | (5) Integrated CAPEX for LHM production includes \$538M for the mine / 6% Li₂O (SC6.0) processing plant (DFS) and \$1.5B for the downstream refinery. Excludes working capital, finance costs, sustaining capital and corporate costs associated with project development. SC6.0 plant capital to DFS level +/-15% accuracy, DSS to +/-30% accuracy. DFS included no contingency on SC6.0 operating costs, DSS includes no contingency on operating costs. DFS included (\$31M) capital contingency, DSS includes (\$258M) contingency on capital costs.

Building A Sustainable Company Starts With Good People

Sustainability and governance has been approached to date with a clean slate and a small team, allowing the fundamentals to be established early to provide a valuable blueprint as the employee numbers and the company grows through aligned values

Our Values

Safety

Do no harm. In all our activities we must send everyone home safe, every day

Sustainability

Work towards a circular economy in which the raw materials we produce are used efficiently and responsibly

Ambition

The challenge of constant improvement motivates us. We set objectives and then discover how these can be achieved

Respect

We ensure all voices are respectfully heard and work toward solutions that balance the interests of all stakeholders

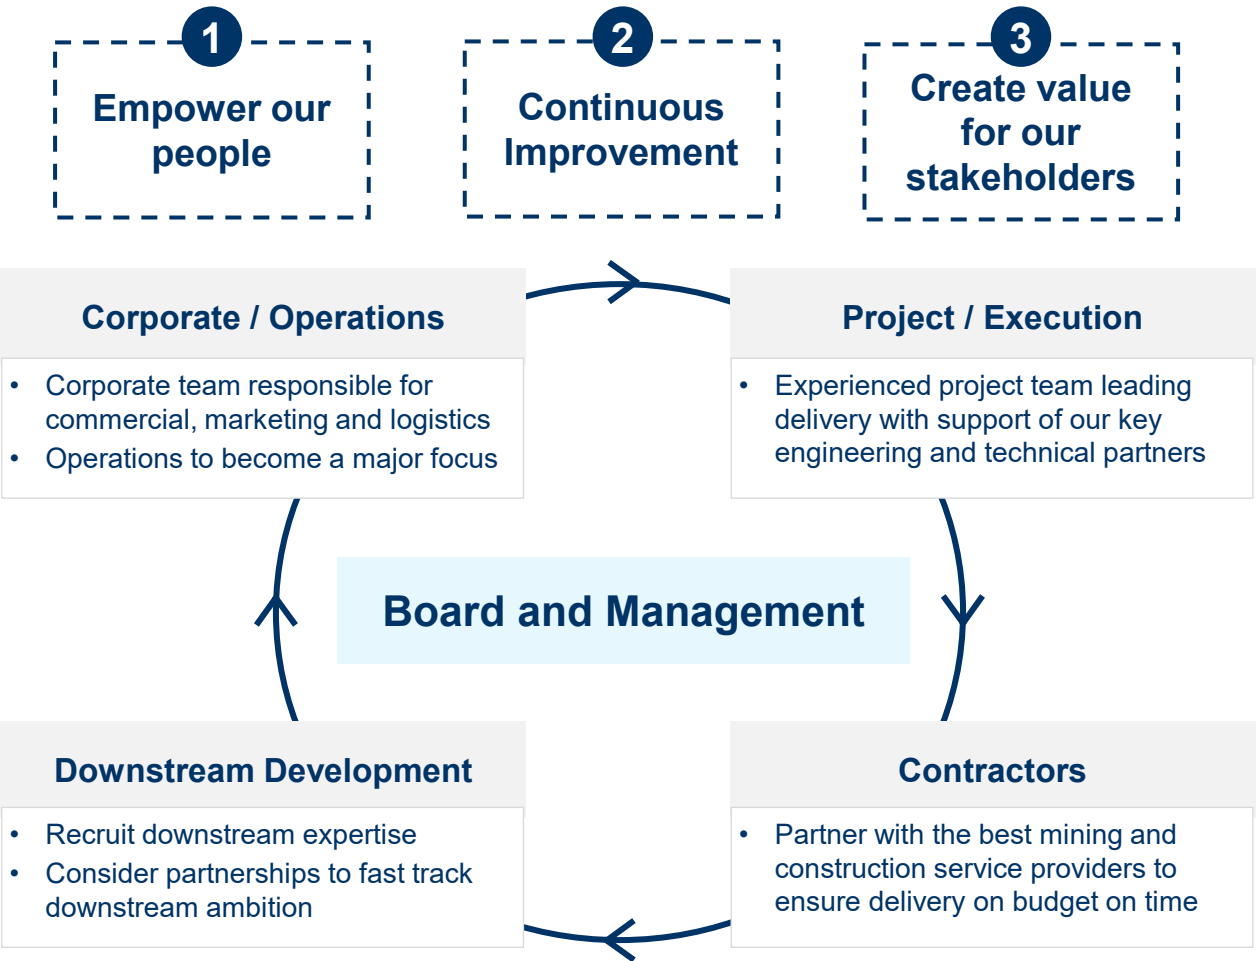

Integrity

We have the courage to do the right thing, even when it is the harder thing. We don't take 'shortcuts'

Teamwork

We are inclusive
We celebrate our diversity
We have fun
We do important work

Our Principles

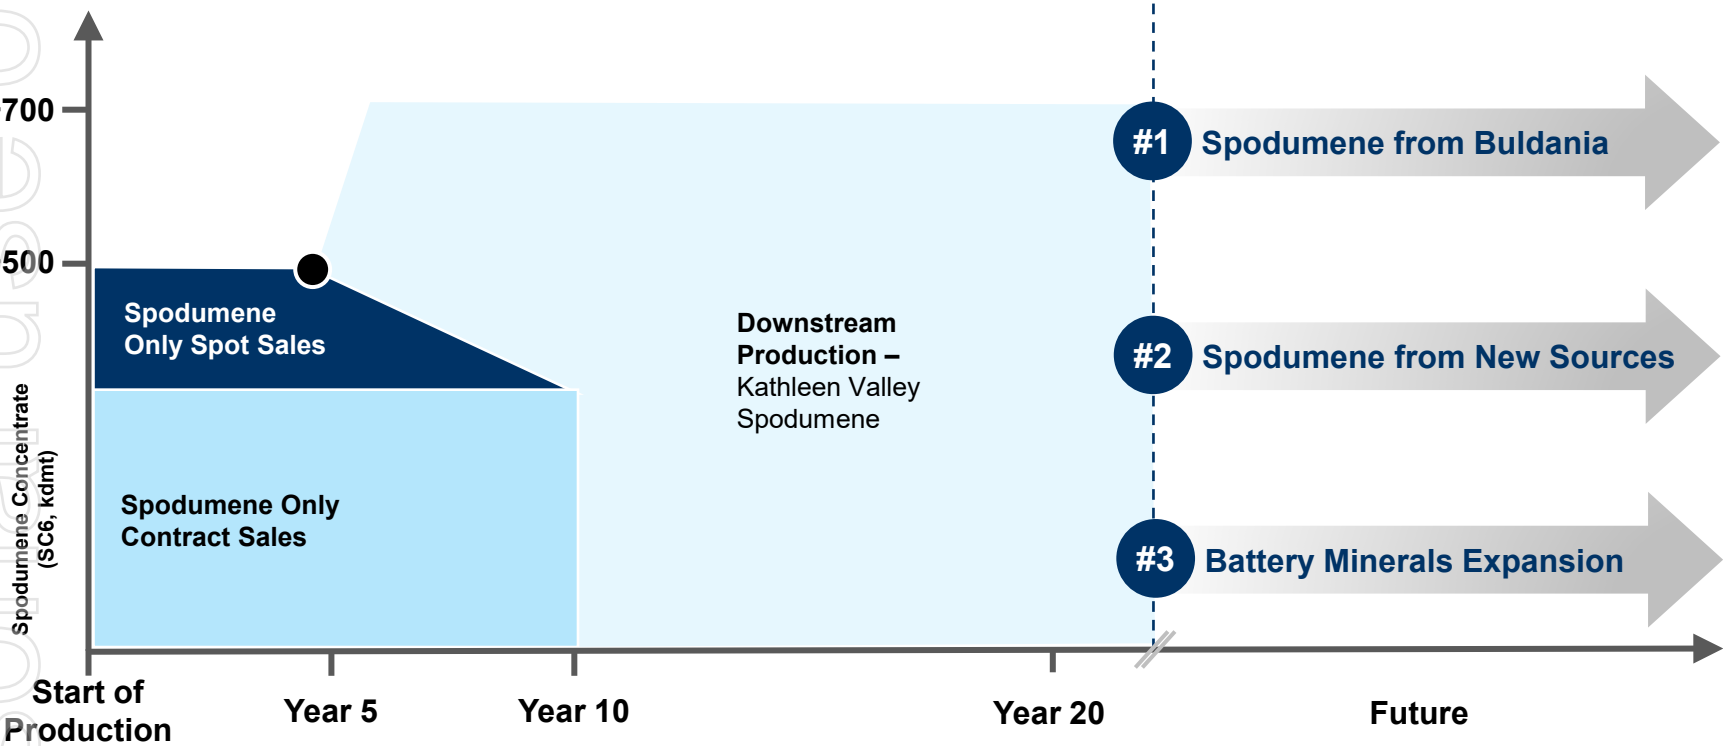

Liontown's Long-Term Strategy

Liontown is planning for the future

Kathleen Valley Spodumene

Optionality for spodumene or processed lithium sales based on market conditions

- Near-term focus on maximising spodumene value from Kathleen Valley through offtake agreements and further resource drilling
- Accelerate progression to higher value downstream production
- Continuously explore options for development / expansion of lithium inventory
- Develop expertise in alternative commodities which support Liontown's battery minerals strategy

Liontown's Funding Strategy

Discussions are progressing positively. Liontown is confident its optimal funding mix will be in place prior to final investment decision in Q2 2022.

Short-term funding requirement

DFS Capex: ~A\$473M¹

Debt

- Strong interest from tier 1 domestic and international banks
- Indicative term sheets over the coming weeks – some presented now

Equity

- Strength in equity markets evidenced by strongly supported raises across lithium peers

Other

- Liontown exploring other financing options (e.g. "Green loans", customer pre-payments, streaming opportunities, etc.)

Long-term funding

Expansion Capex: ~A\$66M

Internal Cash Flows

- Liontown expects expansion will be funded through internally generated cash flows

DSS Capex: ~A\$1.5B¹

Internal Cash Flows or Other

- Current estimated project cashflows sufficient to fund but optionality remains to fund via traditional debt / equity markets or other sources (e.g. downstream partner, etc.)

Liontown's Investment Proposition

Tier 1 Asset

Kathleen Valley is a world-class lithium deposit, with exceptional economics and growth optionality

ESG-Positive

Net zero trajectory, with a climate strategy roadmap in place targeting net zero emissions by 2034

Timed To Perfection

Significant supply deficits forecast to emerge from 2024, which is expected to align with start of production at Kathleen Valley

Integrated Opportunity

Integrated, long-term lithium producer, positioned to capture value from mine to end-use in the electric vehicle market

Near Term Priorities

- 1 Execute attractive offtake agreements to support final investment decision
- 2 Progress and finalise project funding
- 3 Secure long-lead items to support accelerated development timeline
- 4 Appoint industry leading EPCM contractor to spearhead Kathleen Valley development
- 5 Continue to develop downstream strategy

APPENDIX 3

Kathleen Valley Project Net Zero Definition

Liontown will firm up its net-zero trajectory aspiration before FID

Selected examples of different “net zero” pathways

There are many different ways to meet “net zero” by 2050

1: Approximations, compared to 2020, based on published scenarios | 2: IEA ETP 2017 RTS (assuming 33.5 GtCO₂direct emissions from energy in 2020) | 3: IEA ETP 2017 2DS (assuming 33.5 GtCO₂direct emissions from energy in 2020) | 4: Based on IEA 2020 WEO SDS scenario, direct CO₂ emissions from energy, global | 5: NGFS 2020 ‘Orderly’ (CO₂) | 6: NGFS 2020 1.5 with CDR and with limited CDR respectively | 7: IPCC AR5, RCP6.0, 720-1000ppm CO₂e, cumulative emissions 2011-2100: 3620-4990, minus 9 years emissions of ~50GtCO₂e/year since 2011 = 3170-4540, approximation of 50GtCO₂e/yr based on Climatewatch data | 8: IPCC SR15 report, budget starting from 2018, for 2C, at 67th and 50th percentile | 9: IPCC SR15 report, budget starting from 2018, for 1.75C, at 67th and 50th percentile | 10: IPCC SR15 report, budget starting from 2018, for 1.5C, at 67th and 50th percentile

APPENDIX 4

Buldania

Buldania Project Overview

Buldania is in a lithium-rich mineral province

- 1 Outcropping, fresh, spodumene-related mineralization
- 2 Mineralisation at Anna extends to the SE under shallow cover – strike length >1.4km and open with further drilling underway
- 3 15Mt Resource and similar geology to the Mt Marion and Bald Hill lithium deposits (71Mt¹ and 26Mt² respectively)
- 4 Good infrastructure – located on Eyre Highway ~30km east of Kalgoorlie-Esperance railway
- 5 Lione town has 100% of the lithium and related metal rights
- 6 Mining Lease Application lodged over Anna deposit ¹

¹ Mt Marion – Refer to Peer Comparison table – slide 32.

² Bald Hill source: <http://www.allianceminerals.com.au/projects/>

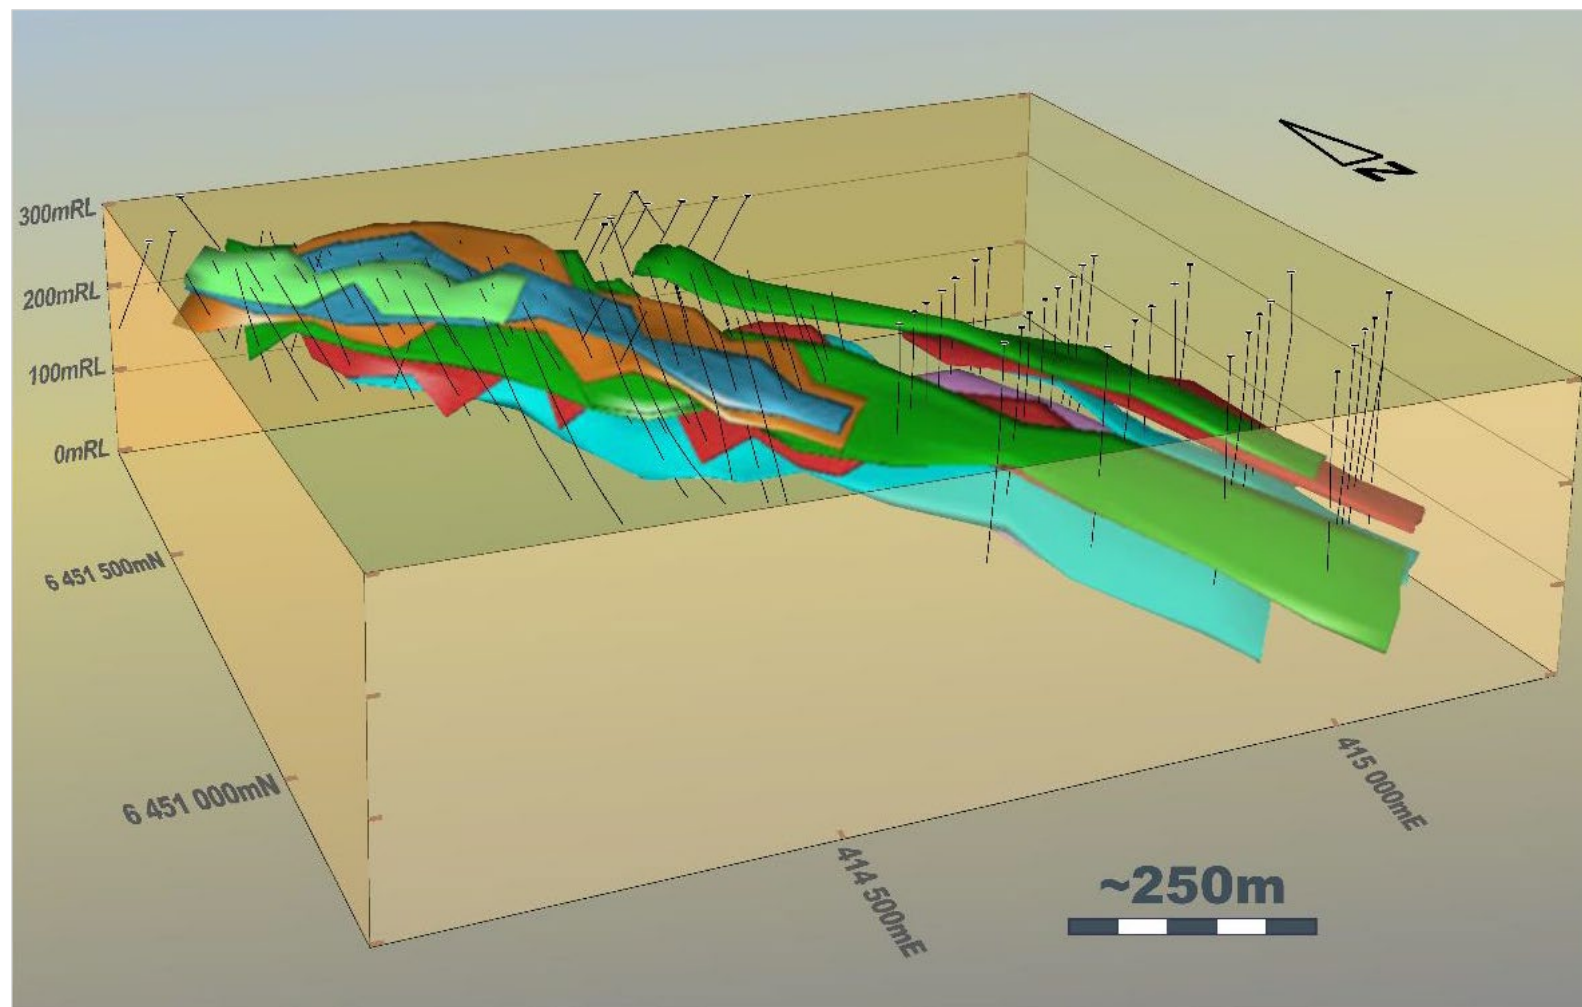

Resource

Maiden Mineral Resource
Estimate

14.9Mt @ 1.0% Li₂O
