ASX RELEASE | De.mem Limited (ASX:DEM)

For personal use only

Section 708A Cleansing Notice

12 November 2021: This notice is given by De. Mem Limited (**DEM** or the **Company**) (ASX: **DEM**) under Section 708A(5)(e) of the *Corporations Act 2001* (Cth) (**Corporations Act**).

The Company hereby confirms that:

(a) Following the exercise on 10 November 2021 of 347,500 options originally issued on 28 August 2020, the Company has on 12 November 2021 issued a total of 347,500 Fully Paid Ordinary Shares (**Shares**) at the exercise price of $0.22 (22 cents) per option.

(b) the Shares were issued without disclosure to investors under Part 6D.2 of the Corporations Act;

(c) the Company is providing this notice under paragraph 5(e) of Section 708A of the Corporations Act;

(d) as at the date of this notice the Company, as a disclosing entity under the Corporations Act, has complied with:

(i) the provisions of Chapter 2M of the Corporations Act as they apply to the Company; and

(ii) Section 674 of the Corporations Act as it applies to the Company; and

(e) as at the date of this announcement, there is no excluded information of the type referred to in Sections 708A(7) and 708A(8) of the Corporations Act.

An application for quotation of these securities is being lodged in conjunction with this announcement.

De.mem Limited (ASX:DEM) is a decentralised water and wastewater treatment business that designs, builds, owns and operates turnkey water and wastewater treatment systems for some of the world's largest companies in the mining, electronics, chemical, oil & gas, and food & beverage industries. Its systems also provide municipalities, residential developments and hotels/resorts across the Asia Pacific with a reliable supply of clean drinking water.

De.mem's technology to treat water and wastewater is among the most advanced globally. The Company is headquartered in Australia and has international locations in Singapore, Germany and Vietnam. It is commercialising an array of innovative proprietary technologies from its research and development partner, Nanyang Technological University (NTU) in Singapore, a world leader in membrane and water research. Technologies uniquely offered by De.mem include a revolutionary low-pressure hollow fibre nanofiltration membrane that uses less electricity and is cheaper to operate than conventional systems, as well as a new Forward Osmosis membrane deployed in de-watering applications or the concentration of liquids.
