ABOUT BCI MINERALS

BCI Minerals Limited (ASX:BCI) is an Australian-based company that is developing a salt and potash business supported by iron ore royalty earnings. BCI is rapidly advancing its 100% owned Mardie Salt & Potash Project, a potential Tier 1 project located on the West Pilbara coast in the centre of Australia's key salt production region.

Mardie aims to produce 5.35Mtpa of high-purity salt (>99.5% NaCl) and 140ktpa of sulphate of potash (SOP) (>52% K₂O) via solar evaporation of seawater.⁶ Using an inexhaustible seawater resource and a production process driven mainly by natural solar and wind energy, Mardie is a sustainable opportunity to supply the salt and potash growth markets in Asia over many decades. There is potential to optimise and expand the project beyond currently planned production levels.

A Final Investment Decision has been made and BCI is completing funding, approvals and tenure with the aim of commencing main construction in early 2022, which will allow first salt sales to be achieved by Q4 2024 and first SOP sales by Q1 2026.

BCI receives quarterly royalty earnings from Iron Valley, an iron ore mine located in the Central Pilbara region of Western Australia which is operated by Mineral Resources Limited (ASX:MIN). BCI's EBITDA from Iron Valley was A\$69.5M in FY21, and \$17.1M in the first quarter of FY22. BCI also has other assets, including potential royalties and/or deferred payments from Koodaideri South, Bungaroo South and Kumina.

⁶ Refer to ASX announcement dated 21 April 2021. BCI confirms that all material assumptions underpinning the production forecast and financial information derived from the production forecast have not materially changed and continue to apply.
