LiveHire's Performance Metrics – Glossary

Below we explain a handful of the headline performance metrics, and inputs into key metrics, that we use every day to manage and drive LiveHire's performance.

Monthly Recurring Revenue

Monthly recurring revenue is a point in time monthly view of LiveHire's recurring revenue components. This is a combination of fixed monthly recurring revenue streams, variable monthly recurring revenue streams, and monthly recognised recurring revenue streams for upfront paying clients.

Annualised Recurring Revenue (ARR)

ARR represents contracted recurring revenue components of term subscriptions normalised to a one-year period.

Opening ARR

Opening ARR represents the ARR at the beginning of the period.

New Business ARR

New Business ARR represents the ARR derived from new clients secured in that period.

ARR Churn – Customer Losses

ARR Churn represents the value of ARR which was not renewed by clients lost in that period.

Net Revenue Retention (NRR) rate %

Calculated as $(\text{Opening ARR} + \text{upsell ARR} - \text{downsell ARR} - \text{churn / lost ARR}) / \text{Opening ARR}$. NRR is an indicator that measures how well a business can not only renew but generate additional revenue from its clients post initial sale.

ARR Churn

ARR Churn Customer Losses + Net Upsell ARR

Closing ARR

Closing ARR represents the ARR at the end of the period and is calculated as: $\text{Opening ARR} + \text{New Business ARR} + \text{Net Upsell ARR} - \text{Churn ARR Customer Losses}$.

Churn %

ARR Churn as a percentage of Opening ARR.

Annualised Recurring Revenue Per Client (ARRPC)

ARRPC is calculated as: $\text{Closing ARR} / \text{number of clients}$
ARRPC is a key metric and can be grown by securing higher value clients, and by adding new products and functionality to provide more value to clients.

Client

A client is defined as being an entity from which ARR is generated at a point in time.

Talent Community Connection (TCC)

A talent community connection (TCC) represents a connection between a company and an employment candidate on the LiveHire platform. An individual candidate may join multiple talent communities resulting in multiple TCCs per candidate. TCCs include unclaimed candidate profiles created by a company or its service providers or by the candidate through a job application process. TCCs may also include claimed candidate profiles that remain on the platform available to be connected with live talent communities after being archived by their only active company connection.

LiveHire's Financial Metrics – Glossary

Below we explain a handful of the headline performance metrics, and inputs into key metrics, that we use every day to manage and drive LiveHire's performance.

Recurring Revenue

Recurring revenue is the component of statutory reported operating revenue that relates to recurring revenue streams earned during the period being reported on. Recurring revenue streams include hosting fees, user licence fees and ongoing support and maintenance fees.

Non-Recurring Revenue

Non-recurring revenue is the component of statutory reported operating revenue that relates to one-off revenue streams earned during the period being reported on. This predominantly consists of upfront implementation and integrations fees as well as professional services fees.

Management EBITDA

EBITDA excluding Share Based Payments and R&D rebate income, and prior to the transfer of certain costs to the software development asset. It provides a normalised view that excludes significant non-cash expenses, income not considered part of core operations, and includes all salary costs (including those able to be capitalised under the applicable accounting standards).

Statutory EBITDA

EBITDA including Share Based Payments and R&D rebate income, and after the transfer of certain costs to the software development asset.

Annual Cash Burn excluding financing activities

Cash Burn excluding financing activities is calculated as operating and investing cash flows as reported in the statutory cash flow statement.

It does not include net cashflows from financing activities (e.g. capital raise).

Estimated Annual Contract Value (EACV) – Direct Sourcing

EACV refers to the expected annual contract value that a direct sourcing client will pay LiveHire when the client is at full ramp. LiveHire expects the client to take 12-24mths to ramp to this rate of use. Ramping may also be impacted by forex movements.

Management's assumption of an average of \$300k EACV per client has been calculated on a blended sales basis across the paybooks (in \$US) of the companies LiveHire intends to target and the LiveHire fee (%) that would be calculated across each paybook. The size of each paybook was assumed in USD and has been converted to AUD based on an exchange rate of 1.33.
