FROM THE CEO

Q2-FY22: 4th Record Quarter in a row

“We are thrilled to report that Tinybeans set a new record in Q2, making it our **most successful quarter ever**. Relaunching as one brand across app, web and email, we continued to deliver on our strategy to monetize our customer base across both our subscription and advertising sales businesses while expanding how we serve parents.

In Q2, we delivered overall revenue of **US\$3.65M, an increase of 59%** on pcp. This includes US\$3.1M in advertising revenues up 64% on pcp, and growth in **Beanstalk**, our paid subscription product, to **US\$148k in Monthly Recurring Revenues (MRR)**.

Beanstalk, our new paid subscription offering, continues to drive forward and grow. The quarter finished with over **46k** paying subscribers, nearly **2x the previous quarter**. This new paid offering is an important initiative toward accomplishing our long term strategy of a 50/50 advertising/consumer revenue mix.

We launched a powerful new tinybeans.com, sunsetting the Red Tricycle name and increasing the Tinybeans brand footprint 2.5x. Built on the trust and safety that has always been core to who we are, **Tinybeans inspires parents to both create memories and share them**. The new Tinybeans.com also offers the **market-leading capability of delivering content uniquely to each family**, tailored to their children’s ages, interests, and where they live. With a combination of utility and personalized content, the new Tinybeans (through its app and website) has taken a significant step toward accomplishing our goal of being **the go to resource for all things parenting**.

Advertising continues its aggressive growth curve driven by bigger deals with bigger brands, and powered by our first party data.

We remain committed to our roadmap, and we are confident in our ability to grow **Lifetime Value (LTV)** beyond the **US\$178*** that it is today. With an **LTV-CAC multiple of 3.6**, we can double down on growth to drive revenue acceleration. We expect the quarter ahead, Q3-FY22, to achieve comparable growth rates to pcp across both subscription and advertising.

While consumer trust continues to erode across many sources of information, inspiration and connection, Tinybeans continues to place our stake in the ground as a trusted member of the family, which parents can count on for relevant content, safe connections and private photo sharing **to help parents raise amazing kids.**”

EVOLVING AUDIENCE MODEL

Audience

- This past quarter saw the two website platforms merged into one and with it, an integrated experience to help parents raise amazing kids.
- Total Active Users across Q2-FY22 declined as expected and previously communicated. Through Q2, monthly active users settled on 3.5M for the qtr, down from 4.8M 12 months prior.
- The reasons for the decline were largely related to doubling up of users between the prior two websites, impact on organic traffic due to Google search algorithm changes and the reduction of active users given the move from free to paid for the memories product.
- A comprehensive search engine audit has begun to address the traffic reduction through search, with an implementation plan expected later in Q3. We expect to return to growth levels in organic search towards the end of Q3 and into Q4.
- Partnerships with [Apple](#) continue to drive engagement and growth where Tinybeans remains a top 3 partner over more than 100 partners.

ACQUIRING CUSTOMERS

Customer Lifetime Value

* Based on early results across a range of channels. Further investment expected and experimentation to continue through 2022. LTV is calculated on trailing 12 months of actuals.

02

FINANCIAL RESULTS

Profit & Loss Summary

Highlights:

- Revenue up **+59% vs prior year**, driven by both ad sales and subscription growth
- Gross Margin decreased to 90%, which was expected to support larger ad sales campaigns and subscription processing fees to Apple and Google as subscription revenue grows
- Operating Expenses increased 40% vs prior year, driven by people and compensation to support product and operational investments, including software and services
- The company continues to incur a new run rate of increased General and Administrative costs related to growth of the company and its future plans, in areas such as accounting, audit fees and compliance.
- The current quarter includes approximately \$0.1M of capitalized software development costs for our product enhancements (\$0.5M over last three quarters), which started in Q4-FY21 and is amortized below Adjusted EBITDA
- While our first half of the year finished at **-\$0.2M Adjusted EBITDA** (margin of -4%), we expect our second half of the year to have higher negative margins, due to the seasonality of the ad business, and planned investments in consumer marketing. We expect full year margins to be roughly in line with Adjusted EBITDA margins from FY21 (-22%).

USD (\$M)	Q2-FY22	Q2-FY21	% Chg
Total Revenue	3.65	2.30	59%
Cost of goods sold	(0.37)	(0.10)	-249%
Gross Margin	3.29	2.19	50%
Gross Margin %	90%	95%	
Operating Expenses	(3.34)	(2.39)	-40%
Adjusted EBITDA*	(0.05)	(0.20)	73%
Adjusted EBITDA Margin %	-1%	-9%	

* Adjusted EBITDA defined as reported EBITDA excluding share based payments expense & other non-operating income & expenses. Also, in Q4-FY21, Tinybeans began to recognize capitalized software development costs in accordance with AASB 138, Intangible Assets. These costs totaled \$94K in Q4-FY21, \$289K in Q1-FY22, and \$98K in Q2-FY22, and are excluded from Adjusted EBITDA above.

FINANCIAL RESULTS

Cash Waterfall

Highlights:

- Operating cash flow is generally in line with income statement activity, with normal lag on collections for growing revenue and receivables
- **Cash receipts for the quarter were \$3.1M**, up +35% over prior year, in line with lagged revenue growth
- Capital raise consisted of \$5.1M of gross proceeds, less - \$0.3M of transaction costs, and -\$0.5M repayment of directors' loans
- The expected operating cash burn for Q3-FY22 is approximately -\$1.2M, which will be partially offset by expected net proceeds of \$0.8M related to Tranche 2 of our capital raise, to be received in early February
- While we are capable of becoming free cash flow breakeven in calendar 2022, it would come at the expense of investments that we believe will drive future revenue growth

All Other Activity includes Investing Activity, Financing Activity, and ForEx. Investing Activity includes cash outflows related to capitalized software development costs.
